30 Years of Service Award

Tom Hambright, Senior Librarian—Local History

Tom Hambright has served the Monroe County Public Library and the entire Florida Keys community as Local Historian at the Key West Library for the past 30 years. He is acclaimed for his extensive knowledge of the history of Key West and the Florida Keys, not just throughout Monroe County but throughout the entire State of Florida.

Before joining the Library staff, Tom served 21 years with the Navy, retiring with the rank of Lieutenant Commander. Following that retirement, he worked as Curator for the Lighthouse Museum and East Martello for three years, where he expanded his interest in Keys lore and legend.

In his 30 years of Library service, Tom has given presentations on Keys history to most of the non-profit organizations in the County, from Key Largo to Key West, and is known far beyond this community as the "Keys Historian." In this capacity he has worked with authors, students, journalists, film producers, and scholars, sharing his wealth of knowledge, and has appeared on television himself a number of times. During this time he assisted in the planning for and construction of a new wing and special vault for the unique Florida History collection that he has helped to develop and now carefully oversees, while still adding new and old items of interest to enhance what has already been gathered. He was honored as Monroe County Employee of the Year in 1999.

Tom has served on the Board of Directors of the Old Island Restoration Foundation,

Salvation Army, and the Key West Art and Historical Society. He has also serves on the board of the Key West Maritime Historical Society and has published articles in the *Florida Keys Sea Heritage Journal* and *The Florida Genealogist*. He has produced the daily column "Today in Keys History" for the Key West Citizen with his wife, Lynda, since 1998, and is a regular contributor to numerous other historical publications.

Over the last decade, Tom has contributed nearly 20,000 digital images with descriptions from the Florida History photographic collection to the Flickr website, which has garnered over 14 million hits since its debut online.

Although the Florida History archival collection, under Tom's guidance, has grown to be an extensive collection of unique materials, Tom's own memory is the real treasure of the collection. Tom Hambright is an extraordinary ambassador for Monroe County, a valued colleague to his fellow employees, and a historic treasure to the community. We are extremely grateful for his 30 years of extraordinary service on behalf of the Monroe County Library, and look forward to many more.

**BOARD OF COUNTY COMMISSIONERS
AGENDA ITEM SUMMARY**

Meeting Date: 02/10/2016

Department: Airports

Bulk Item: Yes X No

Staff Contact Person/Phone #: Don DeGraw 809-5200

AGENDA ITEM WORDING: Approval to accept a bid proposal, waiver of bid irregularities, and approve a contract with the most responsive bidder “Cliffhanger Janitorial, Inc.”, providing janitorial services at the Key West International Airport, in the annual amount of \$394,999.92, to be funded in full with Airport Operating Fund 404.

ITEM BACKGROUND: The airport has approximately 70,000 sq. ft. of building spaces that require 24/7/365 janitorial services by a professional airport cleaning service company. The airport received eight (8) bids from janitorial service companies; the most responsive bidder was determined to be “Cliffhanger Janitorial Inc.” the incumbent bidder.

Please see the attached memo related to the one (1) non-responsive bidder.

The bid submission by Cliffhanger Janitorial omitted three proposal requirements that included the following; references, present commitments and corporate seal/evidence of authority.

Monroe County Code defines “Responsive bidder” as follows; “An individual or business which had submitted a bid, offer, proposal, quotation or response which, as determined by the county, conforms in all material respects to the solicitation which may include but is not limited to pricing, surety, insurance, specifications of the goods or services requested or any other matter unequivocally stated in the invitation for bids as a determinant of responsiveness. A lack of conformity in these matters which is non-substantive in nature may be considered a technicality or irregularity which may be waived by the county commission.”

In addition M.C.C. sect 2-347(j)(1) provides the following; “The board of county commissioners' determination as to the following is discretionary with the board and is final: whether a bid is the lowest in price, based upon the same criteria set forth in subsection (i)(3); whether a proposal is the highest ranked, with price as a consideration when applicable; whether a bid variation from the county's specification is slight and immaterial or substantial and material; whether a response is submitted by a responsive bidder and responsible bidder, as defined in this chapter.

In this particular solicitation the omission of these three items does not affect Cliffhanger’s ability to physically perform the work in its proposal nor does vitiate any of the technical specifications set forth in the bid solicitation.

PREVIOUS RELEVANT BOCC ACTION: BOCC – May 20, 2015 approval to issue a bid solicitation for janitorial services at the Key West International Airport, Item C-8.

CONTRACT/AGREEMENT CHANGES: N/A

STAFF RECOMMENDATION: Approval.

For the foregoing reasons staff is recommending that;

- i) the board find that the omissions are non-substantive in nature,
- ii) that the board waive the technicality,
- iii) that the board award the bid to Cliffhanger Janitorial, Inc.,

iv) that the board approve the contract with Cliffhanger Janitorial, Inc.

36. **AIRPORT SECURITY.**

a) **General.** The federal Transportation Security Administration is the federal agency primarily responsible for overseeing the security measures utilized by the airport owner pursuant to the relevant provisions of Chapter 49, United States Code, and regulations adopted under the authority of the Code, including but not limited to 49 CFR 1540, et seq. Violations of the statutes or regulations may result in severe civil monetary penalties being assessed against the airport operator. It is the intent of the airport operator that the burdens and consequences of any security violations imposed upon the airport operator as a result of actions by an airport tenant or the airport tenant's employees, agents, invitees, or licensees shall be borne by the airport tenant.

b) **Airport Tenant Defined.** An airport tenant means any person, entity, organization, partnership, corporation, or other legal association that has an agreement with the airport operator to conduct business on airport property. The term also includes an airport tenant as defined in 49 CFR 1540.5. Each signatory to this Agreement, other than the airport operator, is an airport tenant.

c) Airport Operator Defined. As used in this Agreement, airport operator means Monroe County, Florida, its elected and appointed officers, and its employees.

d) Airport Property Defined. Airport property shall mean the property owned or leased by, or being lawfully used by, the airport operator for civil aviation and airport-related purposes. For purposes of this Agreement, airport property is the property generally referred to as the Key West Airport, the Marathon Airport, or both as may be set forth in this Agreement.

e) Inspection Authority. The airport tenant agrees to allow Transportation Security Administration (TSA) authorized personnel, at any time or any place, to make inspections or tests, including copying records, to determine compliance of the airport operator or airport tenant with the applicable security requirements of Chapter 49, United States Code, and 49 CFR 1540, et seq.

f) Airport Security Program. The airport tenant agrees to become familiar, to the extent permitted by the airport operator, with the Airport Security Program promulgated by the airport operator and approved by TSA, and also agrees to conform its' operations and business activities to the requirements of the Airport Security Program.

g) Tenant Security Program. If permitted under TSA regulations, the airport tenant may voluntarily undertake to maintain an Airport Tenant Security Program as referred to in 49 CFR 1542.113. If the airport tenant voluntarily promulgates an Airport Tenant Security Program that is approved by TSA, such program, as may be amended and approved from time to time, shall be automatically incorporated into this Agreement.

h) Breach of Agreement. Should TSA determine that the airport tenant or one or more of the airport tenant's employees, agents, invitees, or licensees has committed an act or omitted to act as required, and such act or omission is a violation which results in TSA imposing a civil penalty against the airport operator in accordance with TSA's Enforcement Sanction Guidance Policy, such determination and imposition of a civil penalty by TSA shall be considered a significant breach of this Agreement.

(1). Minimum Violation. If the violation is the first or second violation attributed to the airport tenant and is a civil penalty "minimum violation" as provided for in TSA's Enforcement Sanction Guidance Policy, the airport tenant may cure the breach by paying to the airport operator the total costs incurred by the airport operator, including any fines or penalties imposed, in investigating, defending, mitigating, compromising, or taking of remedial measures as may be agreed to by TSA, to include but not be limited to reasonable attorney's fees and costs incurred in the investigation, defense, compromising, mitigation, or taking of remedial action measures. If the violation is a third violation, or there are multiple violations in excess of two violations, that is or are a civil penalty "minimum violation", the airport tenant shall pay to the airport operator the total costs incurred by the airport operator, including any fines or penalties imposed, in investigating, defending, compromising, mitigating, or taking of remedial measures as may be agreed to by TSA, to include but not be limited to reasonable attorney's fees and costs incurred in the investigation, defense, compromising, mitigation, or taking of remedial action measures; and, further, the airport operator shall have the right to unilaterally cancel this Agreement, such cancellation to be effective thirty calendar days after receipt by the airport tenant of written notice of cancellation of this Agreement by the airport operator.

(2). Moderate Violation. If the violation is the first or second violation attributed to the airport tenant and is a civil penalty “moderate violation” as provided for in TSA’s Enforcement Sanction Guidance Policy, the airport tenant may cure the breach by paying to the airport operator the total costs incurred by the airport operator, including any fines or penalties imposed, in investigating, defending, compromising, mitigating, or taking of remedial measures as may be agreed to by TSA, to include but not be limited to reasonable attorney’s fees and costs incurred in the investigation, defense, compromising, mitigation, or taking of remedial action measures; and, further, the airport tenant may cause all of airport tenant’s employees involved in the airport tenant’s business operations on the airport property to undergo such security training as may be required by the airport operator. The total cost of the training shall be paid for by the airport tenant. If the violation is a third violation, or there are multiple violations in excess of two violations, that is or are a civil penalty “moderate violation”, the airport tenant shall pay to the airport operator the total costs incurred by the airport operator, including any fines or penalties imposed, in investigating, defending, compromising, mitigating, or taking of remedial measures as may be agreed to by TSA, to include but not be limited to reasonable attorney’s fees and costs incurred in the investigation, defense, compromising, mitigation, or taking of remedial action measures; and, further, the airport operator shall have the right to unilaterally cancel this Agreement, such cancellation to be effective thirty calendar days after receipt by the airport tenant of written notice of cancellation of this Agreement by the airport operator.

(3). Maximum Violation. If the violation is the first violation attributed to the airport tenant and is a civil penalty “maximum violation” as provided for in TSA’s Enforcement Sanction Guidance Policy, the airport tenant may cure the breach by paying to the airport operator the total costs incurred by the airport operator, including any fines and penalties imposed, in investigating, defending, compromising, mitigating, or taking of remedial measures as may be agreed to by TSA, to include but not be limited to reasonable attorney’s fees and costs incurred in the investigation, defense, compromising, mitigation, or taking of remedial action measures; and, further, the airport tenant may cause all of airport tenant’s employees involved in the airport tenant’s business operations on the airport property to undergo such security training as may be required by the airport operator. The total cost of the training shall be paid for by the airport tenant. If the violation is a second violation, or there are multiple violations, that is or are a civil penalty “maximum violation”, the airport tenant shall pay to the airport operator the total costs incurred by the airport operator, including any fines or penalties imposed, in investigating, defending, compromising, mitigating, or taking of remedial measures as may be agreed to by TSA, to include but not be limited to reasonable attorney’s fees and costs incurred in the investigation, defense, compromising, mitigation, or taking of remedial action measures; and, further, the airport operator shall have the right to unilaterally cancel this Agreement, such cancellation to be effective thirty calendar days after receipt by the airport tenant of written notice of cancellation of this Agreement by the airport operator.

(4). Mitigation of Breach. TSA has a policy of forgoing civil penalty actions when the airport operator detects violations, promptly discloses the violations to TSA, and takes prompt corrective action to ensure that the same or similar violations do not recur. This policy is known as the TSA Voluntary Disclosure Program Policy, and is designed to encourage compliance with TSA regulations, foster secure practices, and encourage the development of internal evaluation programs. The airport tenant agrees that upon detecting a violation the airport tenant will immediately report it to the airport operator. Should the TSA

W I T N E S S E T H

WHEREAS, Owner owns and operates the Key West International Airport (hereinafter referred to as the "Airport"); and

WHEREAS, Operator is engaged in the business of operating public parking facilities; and

WHEREAS, Operator was selected to operate certain parking facilities at the Airport; and

WHEREAS, Operator has indicated a willingness and demonstrated the ability to properly operate and manage said Airport parking facilities in accordance with the terms of this Agreement.

NOW, THEREFORE, in consideration of the premises and of the mutual covenants herein contained, and for such other good and valuable consideration, the receipt of which the parties hereby expressly acknowledge, the parties hereto covenant and agree to the following terms and conditions.

ARTICLE I
TERM OF AGREEMENT

1.01. **Term.** The initial term of this Agreement shall be three (3) years commencing on the 1st day of March, 2016(Commencement Date) and terminating at Midnight on the 28th day of February, 2019.

1.02 **Renewal.** Provided Operator has fulfilled all conditions of this Agreement, Operator may request this Agreement be renewed for a single two (2) year option period beginning at the end of the initial term. In the event Operator submits a request to renew, it shall do so by providing written notice to Owner not less than one hundred eighty (180) days prior to the scheduled termination date of the initial term. Such notice shall include any Operator requested modifications to terms and conditions, if any, of this Management

Agreement. The Owner shall have sixty (60) days to review the renewal request and the proposed modifications and respond. Failure of the Owner to respond at the end of the 60 day period shall be deemed to be a denial of the operators request to renew the agreement.

ARTICLE II
FACILITIES AND OPERATIONS

2.01 Description of Privileges, Uses and Rights. Owner hereby makes available to the Operator for management and operation:

All paid public vehicle parking facilities serving Key West International Airport, located within the terminal building area, upon terms and conditions hereinafter set forth.

Except as expressly set forth, nothing herein contained shall be construed to grant to Operator the right to use any space or area improved or unimproved which is exclusively leased to a third party, or which Owner has not granted herein.

2.02 Description of Facilities. The Facilities shall encompass the vehicle parking areas serving the main terminal, exit booths, control devices, entrances, exits, and other improvements, including the Long Term and Metered Parking Lots as more particularly described on Exhibit "A" dated January 22, 2016 attached hereto and made a part hereof. The employee parking area is hereby excluded from this agreement.

Contractor shall submit plans and drawings to the Director of Airports for a fully automated parking lot payment system consisting of one (1) pay-in-lane device (the "Equipment"). Upon review and written approval by the Director of Airports the Contractor shall proceed to install the approved Equipment within 30 days of the written approval. The Equipment shall be financed as follows:

A. Owner will pay Contractor monthly charges for the Equipment over a sixty (60) month period from March 1, 2016 through February 28, 2021 (the "Payment Period") in the amount of \$2,420.00 per month for months 1-36, and \$504.00 per month for months 37-60 (each a "Monthly Charge" and collectively, the "Monthly Charges"). The Monthly Charges shall be deemed operating expenses and reimbursed to Contractor as per Article IV below. In addition, any personal property tax assessed on the Equipment shall be either (i) reimbursed as an operating expense, or (ii) paid directly by Owner to the tax authority or equipment financier (as applicable).

B. Owner acknowledges that (i) the Equipment is and shall remain personal property and shall not constitute a fixture, and (ii) Owner does not own the Equipment and Owner shall not have or acquire any right, title or interest in or to the Equipment at any time under the Agreement, except as expressly set forth in Section C below. Title to the Equipment shall be

retained by Contractor or an equipment financier, subject only to any security interest or assignment that Contractor may grant to such equipment financier. Owner shall not suffer or permit any lien or encumbrance to attach to the Equipment. Owner shall refrain from taking any action to bar, restrain or otherwise prevent Contractor, its representatives, agents, secured parties, successors or assigns from entering, and hereby grants to said parties the right of entry to, the Facilities for the purpose of inspecting or, after an event of default under or the expiration of term of this Agreement, taking possession of and removing the Equipment at any reasonable time or times.

C. Upon expiration of the Payment Period, provided all Monthly Charges have been paid in accordance herewith, title to the Equipment shall be transferred to Owner. However, notwithstanding anything in this Agreement to the contrary, if this Agreement should not be renewed beyond the initial 36-month term, or if this Agreement should terminate for any reason prior to Contractor's receipt of all sixty (60) Monthly Charges for the entire Payment Period, Owner shall be responsible for paying to Contractor, within ten (10) days after the date of Contractor's statement for same, one lump-sum payment equal to the total of all remaining Monthly Charges for the Payment Period, which shall be automatically accelerated and become due. Upon receipt of such lump-sum payment, title to the Equipment shall be transferred to Owner.

Contractor shall be solely responsible for the maintenance of the automated system during the term of this Agreement and any subsequent renewals. The cost of such maintenance shall be reimbursed to Contractor as an operating expense

In the event Owner, prior to termination of the Agreement or any renewal thereof, shall vacate, move, re-establish, or materially alter the entrance to the Terminal Building or Airport grounds, or take any other action resulting in the necessity of a new parking lot and the relocation of parking equipment and cashier booths, or should the Airport Terminal Building or airport runways be relocated to an area other than immediately adjacent to the now-existing Terminal Building resulting in the necessity of a new parking lot area, then in such event, Owner shall provide Operator a comparable parking facility with all parking equipment and cashier booths relocated at no cost to Operator.

ARTICLE III GROSS REVENUES AND REPORTS

3.05 Budget. Operator shall prepare and submit to the Owner for review and approval an overall annual operating budget, listing all anticipated reimbursable costs required for the first year. Thereafter, annually, no later than 30 days prior to the anniversary of the Agreement, Operator shall submit a new annual operating budget for review and approval by the Owner. The Owner shall approve all of the expenses contained in the budget. Only expenses approved by the Owner as set forth in the budget approved by the Owner, may be reimbursed to the Operator by the Owner.

Notwithstanding the foregoing, unless Operator is notified in writing by the Owner that

the operating expense associated with the purchase or performance of certain goods or services will be incurred by the Owner, all operating expenses shall be reimbursed by Owner to Operator at Operator's cost, plus sales tax, if any, in accordance with Article 4.02 herein below.

The Bonus Evaluation Form to be used is attached as Exhibit "B".

4.02 Operating Expenses. All operating budgeted expenses incurred by Operator in the operation of the Facilities, which are specifically approved by the Owner, plus start-up expenses, shall be reimbursed by Owner to Operator at the Operator's cost within ten (10) days from receipt by the Owner of a monthly "Expense Invoice(s)" from the Operator, certified by an officer of the Operator. Expense invoices for payroll and payroll related costs may be submitted every two weeks. Expense invoices for other than payroll and payroll related expenses must be accompanied and supported by copies of vendor invoices. If any item of expense is disputed or contested, a statement in writing setting forth the items being disputed and the specific reasons therefore shall be submitted to the Operator. Owner shall advance to Operator one-twelfth (1/12) of the operating budget to cover cost of the operation. Owner shall advance the above sum within thirty (30) days following the commencement of this Agreement.

Operator further covenants, warrants, guarantees, and agrees that it shall comply with all ordinances of Owner, including but not limited to the "Rules and Regulations", all operational orders issued thereunder, and any and all other laws, ordinances, regulations, rules, and orders of any governmental entity which may be applicable to Operator or in any way to Operator's business operations under this Agreement, as said laws, ordinances, regulations, rules, and orders now exist, or are hereinafter amended, promulgated, or otherwise imposed on Operator by laws. Notwithstanding any contrary provision in this Agreement, to the extent compliance with the Americans with Disabilities Act or other laws require modification(s) to the Facilities of a structural or capital nature, Owner, rather than Operator, shall be responsible for such compliance.

12.02 Permits and Licenses General. Operator expressly covenants, warrants, and agrees that it shall, at its sole cost and expense, be strictly liable and responsible for obtaining, paying for, maintaining current, and fully complying with, any and all permits,

licenses and other governmental authorizations, however designated, as may be required at any time throughout the entire term of this Agreement or any extension thereof by any Federal, State, or local governmental entity or any court of law having jurisdiction over Operator or Operator's operations and activities; however, such costs and expense shall be reimbursed in accordance with Paragraph 4.02 "Operating Expenses".

12.03 Governing Law, Venue, Interpretation. This Agreement shall be governed by and construed in accordance with the laws of the State of Florida applicable to contracts made and to be performed entirely in the State.

In the event that any cause of action or administrative proceeding is instituted for the enforcement or interpretation of this Agreement, the County and Operator agree that venue will lie in the appropriate court or before the appropriate administrative body in Monroe County, Florida.

The County and Operator agree that, in the event of conflicting interpretations of the terms or a term of this Agreement by or between any of them the issue shall be submitted to mediation prior to the institution of any other administrative or legal proceeding.

**Monroe County
Notice for Public Comment
Intention to Impose and Use a Passenger Facility Charge
at Key West International Airport and Florida Keys Marathon Airport**

Monroe County (the County) is posting this public notice as part of the passenger facility charge (PFC) application process under 14 CFR § 158.24 for Key West International Airport (EYW) and Florida Keys Marathon Airport (MTH). As part of this process, the County is providing the following information regarding proposed PFC Application No. 16-16-C-00-EYW:

Projects for which the County is Seeking Authority to Impose and Use a PFC

1. EYW Phase 1 Noise Insulation Program (NIP) Planning and Eligibility Noise Testing

Project Start Date: October 2015

Project End Date: December 2016

Funding:

Approved AIP	\$525,835
Anticipated AIP Entitlement	\$0
Anticipated AIP Discretionary	\$0
FDOT Funds	\$0
PFC	\$58,426
Total Project Cost	\$584,261

Project Description: This project will include (1) development of a NIP Implementation Plan (including the Proposed Testing Protocol), and (2) conducting the Initial Testing Phase. Both of these steps will be completed pursuant to FAA Order 5100.38D, Airport Improvement Program Handbook, Appendix R for EYW.

Pursuant to Appendix R, the Initial Testing Phase includes:

- Conducting a windshield survey to catalog the types of residences in the Program Areas, noting similarities and differences in the age, construction type, size, number of levels, and types of housing (single family or multi-family),
- Characterizing the diversity of the residences in the Program Areas and developing a property classification protocol,
- Selecting a representative sample of each type of similarly-constructed residences for testing,
- Performing pre-testing of the representative sample of residences,
- Developing standard design packages designed to reduce the interior noise level in the residence for each type of construction identified in the property classification protocol,

- Installing sound insulation packages in the representative sample of residences,
- Performing post-testing of the representative sample of residences,
- Potentially adjusting the standard design packages to achieve required results, and
- Documenting the results in a report to be submitted to the FAA ADO for review and approval.

Project Justification: The justification for this project is that certain homes are currently experiencing noise levels in excess of acceptable day-night noise levels (DNL) and mitigation is necessary to reduce interior noise levels, generated by exterior aircraft operations, in habitable rooms and classroom areas for eligible structures located within the 2013 Existing Condition Noise Exposure Map for EYW, in accordance with FAA-approved Noise Compatibility Program, and pursuant to AIP Handbook Appendix R.

In August 2014, EYW submitted a proposed Noise Compatibility Program (NCP) to the FAA for review and approval. The FAA issued their Record of Approval (ROA) on March 11, 2015. NCP Recommended Measure LU-1 is to provide noise insulation for noncompatible structures in exchange for aviation easements, and Recommended Measure LU-2 is to offer to purchase aviation easements from property owners that do not wish to participate or are identified as ineligible to participate in the Noise Insulation Program (NIP).

Project Objective: The objective of this project is to mitigate noise impacts. By implementing this project, the County will install sound insulation in homes that currently are experiencing noise levels in excess of acceptable DNL levels resulting from aircraft operations at EYW.

2. EYW Baggage Handling System Upgrades

Project Start Date: June 2016

Project End Date: October 2017

Funding:

Approved AIP	\$0
Anticipated AIP Entitlement	\$0
Anticipated AIP Discretionary	\$0
FDOT Funds	\$0
PFC	\$450,000
Total Project Cost	\$450,000

Project Description: This project will reconfigure the current conveyors of the baggage handling system (BHS) at EYW to increase the pre-Explosive Detection System (EDS) storage capacity and to fully automate the BHS.

Project Justification: The current BHS is experiencing severe back up at the ticket counters due to several factors and limitations associated with the BHS. As a result of this back up, baggage is being stock-piled behind the ticket counters, creating a safety issue for airline ticket agents and airport staff.

The primary issues with the current BHS are as follows:

- The existing BHS is not fully automated, requiring the Transportation Security Officer (TSO) to perform manual-processing of baggage screening
- The BHS ticket counter belt merge is prioritized based on the timing of the ticket counter belt initiation (operation), versus the baggage volume/processing rates of the passengers checking baggage of each ticket counter induction belt
- The BHS pre-screening baggage-storage-capacity (conveyor queues) is insufficient for the number of passengers using the airport at peak time frames, because the current system is non-automated
- The passenger growth and number of airlines has significantly increased since the BHS was initially installed, and the current volume of baggage has exceeded the current system capacity, therefore creating safety & security issues and back up at the ticket counters
- A baggage hygiene (handling) policy is not being fully utilized, thus requiring manual alignment of bags at the EDS entrance tunnel

Project Objective: The objective of this project is to enhance safety, security, and capacity through the following:

- Meeting EYW's, Airline's, and Transportation Security Administration's (TSA) design objective goals and operational needs
- Alleviating the baggage back up, security and safety issues at the ticket counters
- Providing a fully automated BHS-system that will increase baggage screening through-put, and that will reduce operating costs through efficient design/system layout and configuration
- Providing increased pre-screening baggage storage capacity
- Programming the new BHS merging conveyors to operate more efficiently

3. EYW Airfield Security Improvements

Project Start Date: November 2015

Project End Date: November 2017

Funding:

Approved AIP	\$0
Anticipated AIP Entitlement	\$0
Anticipated AIP Discretionary	\$0
FDOT Funds	\$277,740
PFC	\$627,740
Total Project Cost	\$905,480

Project Description: This project will include the following at EYW:

- Increasing the height of the security perimeter fence to a total height of ten feet
- Upgrade the existing "L" shape barb wire to the "Y" shape configuration
- Perform upgrades to the access control and CCTV systems to allow for automatic notifications and surveillance during alarm events
- Upgrades to associated communication networks and integration and installation of an automated emergency alert system.

Project Justification: The County has recently experienced a number of security related incidents at EYW. TSA along with tenants and airlines had initiated investigations into these occurrences and they are urging the airport to take immediate actions.

Project Objective: The objective of this project is to enhance safety and security. The noted improvements will help mitigate security incidents from occurring in the future. These improvements will also increase the response time of the surveillance system along with airport management, operations, and security/safety personnel to react to emergency and alarm events, which results in improved safety and security of the airfield.

4. EYW Runway Departure Enhancements

Project Start Date: July 2016

Project End Date: May 2017

Funding:

Approved AIP	\$0
Anticipated AIP Entitlement	\$0
Anticipated AIP Discretionary	\$0
FDOT Funds	\$0
PFC	\$750,000
Total Project Cost	\$750,000

Project Description: This project will increase the Runway 9-27 departure length by approximately 270 feet at EYW. Increasing the departure length of Runway 9-27 will be accomplished by claiming the existing overrun pavement between the current Runway 9-27 threshold and the start of the Engineered Material Arresting System (EMAS). The EMAS is currently setback 306 feet from the Runway 9-27 threshold. A total of 270 feet can be re-classified to runway pavement, while maintaining a minimum of 35 feet setback for the EMAS. This will increase the runway departure length from 4,801 feet to approximately 5,070 feet. The runway departure enhancements will include runway markings, runway edge light modifications, and runway pavement modifications.

Project Justification: Runway 9-27 has seen a significant increase in larger aircraft operations. Since 2009, EYW has seen an increase in B37 departures from 486 to an estimated forecast of over 1,200 departures in 2015, which represents an increase of more than 240%. Providing additional runway departure length will accommodate larger aircraft departing from Runway 9-27.

Project Objective: The objective of this project is to enhance safety. Providing additional runway departure length will provide additional margin of safety for aircraft departing Runway 9-27.

5. MTH Obstruction Removal RPZ/RW 25 Design and Construction

Project Start Date: October 2016

Project End Date: October 2017

Funding:

Approved AIP	\$0
Anticipated AIP Entitlement	\$112,500
Anticipated AIP Discretionary	\$0
FDOT Funds	\$0
PFC	\$12,500
Total Project Cost	\$125,000

Project Description: The project consists of the demolition of existing shade hangars (including design) located within the Runway Protection Zone (RPZ) of Runway 25 at MTH.

Project Justification: The existing shade hangars within the Runway 25 RPZ have been designated as obstruction by the FAA. The demolition of the hangars will result in compliance with current FAA requirements for the RPZ.

Project Objective: The objective of this project is to enhance safety. Demolition of the shade hangars will increase safety by removing obstructions.

6. MTH Runway Threshold Light Relocation

Project Start Date: July 2015

Project End Date: August 2015

Funding:

Approved AIP	\$44,256
Anticipated AIP Entitlement	\$0
Anticipated AIP Discretionary	\$0
FDOT Funds	\$0
PFC	\$4,917
Total Project Cost	\$49,173

Project Description: The project consists of the relocation of the existing elevated base mounted Runway 7-25 threshold lights at MTH from the current outboard location to the inboard location. The existing threshold lights at MTH are located outboard of the runway pavement. The current FAA standard is for runway threshold lights to be located inboard of the runway pavement. There are total of eight threshold lights per runway end, for a total of 16. New base cans, conduit, and cable will be installed at each runway end and the existing elevated threshold lights will be relocated and energized to their new location.

Project Justification: The project will relocate the existing threshold lights inboard in accordance with FAA standards.

Project Objective: This project will preserve safety by relocating the existing threshold lights inboard in accordance with FAA standards.

7. MTH Miscellaneous Planning Studies

Project Start Date: November 2015

Project End Date: November 2016

Funding:

Approved AIP	\$234,447
Anticipated AIP Entitlement	\$0
Anticipated AIP Discretionary	\$0
FDOT Funds	\$0
PFC	\$26,050
Total Project Cost	\$260,497

Project Description: This project includes a study that will evaluate the practicability of shifting the runway at MTH to the northwest, relocating parallel Taxiway "A" to the southeast, or a combination thereof, and provide a qualitative and, where possible, a quantitative annotation of impacts and actions needed for implementation associated with each alternative.

Specifically, the study will focus on 1) the identification of existing non-FAA standard airfield geometric or separation deficiencies, 2) the development of runway/taxiway alternatives in compliance with FAA design standards, 3) the evaluation and comparison of the alternatives including the development of cost estimates and the identification of potential areas of environmental concern, and 4) the update of the Airport Layout Plan (ALP) to reflect the preferred development alternative.

Once a preferred airfield improvement option has been identified for MTH, the existing ALP drawing set would be updated for review and approval by the FAA.

Project Justification: The FAA recommends a standard separation distance of 240 feet between a runway and associated parallel taxiway for airports with a B-II Airport Reference Code (ARC) designation. However, the current separation at MTH is 200 feet. The Draft Environmental

Assessment (EA) that was initiated in 2009 recommended the shifting of the runway to the northwest as the proposed action to bring the runway and parallel taxiway into compliance with FAA standards. Because the EA was initiated more than five years ago and the FAA airport design standards have recently been updated, the County needs to investigate a range of reasonable alternatives to solve the existing runway to taxiway separation distance deficiency.

Project Objective: This project will preserve safety and capacity by investigating a range of reasonable alternatives to solve the existing runway to taxiway separation distance deficiency.

8. PFC Administrative Costs

Project Start Date: February 2015

Project End Date: December 2016

Funding:

Approved AIP	\$0
Anticipated AIP Entitlement	\$0
Anticipated AIP Discretionary	\$0
FDOT Funds	\$0
PFC	\$28,000
Total Project Cost	\$28,000

Project Description: Includes professional fees for services rendered from the County's consultant in developing, implementing, and coordinating the PFC program at EYW and MTH.

Project Justification: The justification for this project (PFC Administrative Costs) is the same as the justification for other projects in PFC Application #16-16-C-00-EYW. This project is eligible in accordance with 14 CFR § 158.3, "allowable costs" as explained in that section's preamble.

Project Objective: This project will result in Airport development that will (1) preserve and enhance safety, security, and capacity and (2) mitigate noise at EYW and MTH.

Class of Carriers Excluded From Collecting a PFC

The County plans to continue to exclude PFC collection from Air Taxi/Commercial Operators (ATCO) filing FAA Form 1800-31. The most recent official enplanement figures, for the year-end December 31, 2014, indicate that these carriers enplaned 29 passengers.

The known carriers in this class and their enplanement levels consist of the following:

ATCO CARRIERS FILING FAA FORM 1800-31	
Aero Jet Services LLC	6
Averitt Air, Inc.	4
Flexjet LLC	18
Meridian Air Group, Inc.	1
ATCO Total	29
Airport Total	383,776
Percentage of Total	0.075%

SOURCE: U.S. DOT ACAIS database, October 7, 2015.

PREPARED BY: Ricondo & Associates, Inc., October 2015.

As shown above, the number of passengers enplaned annually by this class of carriers represents an amount less than one percent of the total enplaned passengers at EYW. In accordance with 14 CFR § 158.25, this class of air carriers may be requested to be exempted based on their enplanement levels and cost to EYW to collect PFCs from this class of air carriers.

PFC Level

A four dollar and fifty cents charge (\$4.50) on passengers enplaned at EYW.

Charge Effective Date

Based on projections of enplanements and anticipated charge expiration date of PFC Application No. 15-15-C-00-EYW, charge effective date is estimated to be July 1, 2019.

Estimated Charge Expiration Date

Collection of \$1,957,633 of PFC revenues is estimated to take approximately 18 months based on current collection levels and therefore, the charge expiration date is estimated to be January 1, 2021 (or until collected PFC revenue plus interest thereon equals the allowable costs of the approved projects, as permitted by regulation).

Estimated Total PFC Impose Revenue

\$1,957,633

**BOARD OF COUNTY COMMISSIONERS
AGENDA ITEM SUMMARY**

Meeting Date: February 10, 2016

Department: Employee Services

Bulk Item: Yes X No

Staff Contact /Phone #: Maria Gonzalez, Ext. 4448

AGENDA ITEM WORDING: Approval of amendment to the Subscription Agreement with Worxtime LLC covering calendar year 2015, in order to engage Worxtime LLC to direct mail IRS forms 1095-C (required by IRS Sections 6055 and 6066 to confirm health insurance coverage) for all employees and retirees.

ITEM BACKGROUND: PPACA requires employers to send IRS form 1095-C to all employees and retirees beginning with reporting year (calendar year) 2015. The 1095-C will contain information about the cost, broken out by month, of employee only coverage for reporting of affordability and minimum value. The form will also show the months during 2015 that each person was covered by health insurance. The deadline for mailing these forms is March 31, 2016. In July 2015, Monroe County contracted with Worxtime LLC to pull data and prepare the forms for all BOCC, Tax Collector, Clerk of Courts, Property Appraiser, Supervisor of Elections and Land Authority employees for 2015. Worxtime has worked with the County and Constitutional Officers to obtain the data for the 2015 forms. This has been a new and difficult process. Given this is a federal requirement, we are seeking approval by the BOCC to amend the 2015 Subscription Agreement to have Worxtime LLC direct mail each 1095-C. Further, the County has not transitioned the Employee Services Department into a computerized Information System for human resources, benefits or other programs. We are currently evaluating utilizing the Pentamation system, which is linked with the County's Clerk's office for this solution. Given this issue, we are also requesting Worxtime LLC perform IRS form 1095-C development for 2016 as well.

PREVIOUS RELEVANT BOCC ACTION: Original Subscription Agreement for calendar year 2015 approved at the July 15, 2015 BOCC meeting.

CONTRACT/AGREEMENT CHANGES: The Amendment to the 2015 Subscription Agreement adds the feature of having Worxtime LLC mail the employee's copy of the IRS forms to the employees and retirees, at the cost of \$3.00 per mailed form.

MEMORIAL PARKWAY, SUITE 211, HUNTSVILLE, AL 35802 ("WORXTIME") AND MONROE COUNTY BOARD OF COUNTY COMMISSIONERS (hereinafter referred to as "You" or "Your"). THIS AGREEMENT SUPERSEDES ANY "CLICK-THROUGH" TERMS EMBEDDED IN THE PROGRAM. CAPITALIZED TERMS ARE DEFINED IN THE DEFINITIONS SECTION OF THIS AGREEMENT AND ARE APPLICABLE TO THIS AGREEMENT AND ANY ATTACHMENTS, AMENDMENTS OR EXHIBITS, UNLESS INDICATED OTHERWISE.

1.0 GRANT OF RIGHTS; COPYRIGHT NOTICES

1.1 Worxtime hereby permits You to use the Program and the services provided by the Program in accordance with the terms, conditions and limitations of this Agreement during the Term or Terms, as defined herein. Any use of the Program inconsistent with the terms, conditions and limitations of this Agreement is prohibited. Your permission to use the Program and rights to services related to the Program is subject to Your payment in full of all fees set forth in the herein attached Worxtime Software Subscription (the "Order") and Your compliance with all other terms and conditions of this Agreement. The right to use the Program and the right to services related to the Program granted to You by Worxtime is a limited, personal, non-exclusive, non-transferable and non-assignable (except as this Agreement otherwise provides) right as set forth in this Agreement.

1.2 Subject to the restrictions set forth below, You may use the Program and Documentation for Your internal operations only and permit only Authorized Users to access and use the Program in accordance with this Agreement.

1.3 Copyright notices and any other proprietary legends on the original copy of the Program and on printed material related to the Program must be reproduced on any copies of the Program or printed material unless an independent private label agreement is executed as represented by a separate and distinct written agreement. You may not transfer any of Your rights to any party, whatsoever, without the written consent of Worxtime.

1.4 Use of some third-party materials included in the Program may be subject to other terms and conditions typically found in a separate software agreement or a "Read Me" file located in or near such materials.

2.0 RESTRICTIONS

2.1 By accepting the rights granted by Worxtime, You agree that You will not, without the prior written consent of Worxtime; (a) sell, license, sublicense, grant rights to, distribute, lease or otherwise transfer or allow the transfer of the Program, or any backup copy, to third parties; (b) use the Program in any manner inconsistent with the rights granted herein; (c) use the Program in any manner for the purpose of monitoring or evaluating a greater number of employees than such number of employees anticipated by the Agreement; (d) modify or create derivative works of the Program or Documentation or separate the Program's component parts unless used in creating desktop procedure manuals or similar documents for use by Your employees to assist in internal training or day to day operations of Program; or (e) unless specifically permitted under applicable law without the possibility of contractual waiver, attempt to decompile, disassemble or reverse engineer the Program, or otherwise attempt to (i) derive source code or underlying ideas, algorithms, structure or organization from the Program or (ii) defeat, avoid, bypass, remove, deactivate or otherwise circumvent any software protection mechanisms in the Program, including without limitation any such mechanism used to restrict or control the functionality of the Program.

2.2 You may not transfer the Documentation, the Program or any rights granted hereunder prior to receiving written authorization from Worxtime, such authorization shall not be unreasonably withheld. Any such authorized transfer must include the Program and Documentation, all backup copies, all Updates or Upgrades, if applicable, and a copy of this Agreement. You agree to send written Notice of the completion of any authorized transfer to Worxtime within fifteen (15) business days after the completion of the transfer.

2.3 THERE MAY BE TECHNOLOGICAL MEASURES IN THE PROGRAM THAT ARE DESIGNED TO PREVENT UNAUTHORIZED USE OF THE PROGRAM. You understand that You may need to activate or reactivate the Program from time to time to continue use of the Program.

2.4 If the Program accesses an internet-based service associated with the Program, You agree that You will not use the Program in any manner that could damage, disable, overburden, or impair such service or interfere with any other party's use and enjoyment of such.

3.0 TAXES

If any authority imposes a duty, tax, levy or fee (excluding those based on Worxtime's net income), upon the

Program, then You agree to pay the amount specified. You are responsible for any personal property taxes for the Program from the date it is delivered.

4.0 TERM OF AGREEMENT

This Agreement will continue for a period of one (1) year from the Effective Date ("Initial Term"). At the end of the Initial Term this Agreement will renew automatically for additional periods ("Renewal Terms") of ninety (90) days each until either party gives written Notice of their intent not to renew the Agreement upon the expiration of the then effective Term. Such Notice must be given not less than thirty (30) days before the end of the Initial Term or any Renewal Term.

5.0 FEES, ANNUAL AUDIT AND PRO RATION OF FEES

5.1 All fees are due and payable for the Initial Term as of the Effective Date. All fees are due and payable for any Renewal Term as of the first day of such Renewal Term. Your initial payment of PEPM fees for the Initial Term shall be computed based on the estimated number of employees to be monitored, as indicated in the Order. The initial PEPM fee payment for any Renewal Term shall be the prior Term's actual (or intended in the event an actual number has not been determined) number of employees monitored. All PEPM fees shall be based upon the actual number of employees monitored by the Program.

5.2 To obtain an accurate analysis certain calculations may require the input of employee data covering periods of time prior to the Effective Date. In such event Your initial payment of PEPM fees for the Initial Term shall include an additional payment for PEPM fees relative to these historical months.

5.3 An audit shall be performed by Worxtime, subject to Your review, at the end of each Term to determine the actual number of employees monitored during such Term. In the event the actual number of employees monitored is greater or less than the number of employees intended to be monitored a credit or debit will be calculated and applied to Your account based on the actual number of employees monitored.

5.4 Any and all annual fees that are applicable to a Term that is less than one (1) year shall be prorated.

10.0 LIMITED WARRANTY; DISCLAIMER

10.1 Worxtime warrants that it has sufficient rights to grant You the rights to use the Program and benefit from the services provided by the Program pursuant to this Agreement. Worxtime further warrants that the Program will operate substantially in accordance with its written specifications and that all services provided by Worxtime including the operation of the Program shall be provided in a professional and timely manner in accordance with accepted industry standards. Worxtime warrants that the Program and service provided by Worxtime will perform in substantial accordance with and conform to the descriptions and specifications described herein. No warranty is made that the Program will run uninterrupted or error-free. To the extent You or an agent of Yours supplies data or inputs data, You are solely responsible for the accuracy of all such data. Notwithstanding any other terms or conditions contained herein, Worxtime expressly disclaims any and all liability and You agree to indemnify and hold harmless Worxtime from any and all liability resulting from inadequate data, inaccurate data, incomplete data or improper data supplied or input by You or an agent of Yours.

Worxtime warrants that Upgrades and Updates will be made to the Program in a timely manner and will reasonably reflect all future adopted rules and regulations related to ACA. This warranty is limited to duration for Your Initial Term and any Renewal Terms.

10.3 Any and all warranties are void if failure of the Program is the result of accident, abuse, misapplication, abnormal use, input of inaccurate data or a virus attributable to You or an agent of Yours. Worxtime will use commercially reasonable efforts to provide You a remedy within a commercially reasonable time of Your compliance with Worxtime's warranty remedy procedures. Outside the United States or Canada, neither these remedies nor any product support services offered by Worxtime are available without proof of purchase from an authorized international source.

10.4 THE PRECEDING WARRANTIES ARE THE ONLY WARRANTIES RELATED TO THE PROGRAM, DOCUMENTATION AND SUPPORT SERVICES AND ARE MADE IN LIEU OF ALL OTHER WARRANTIES AND CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES AND MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. WORXTIME IS NOT LIABLE FOR ANY DAMAGES, INCLUDING INDIRECT, INCIDENTAL, CONSEQUENTIAL, ATTORNEY'S FEES, PUNITIVE OR SPECIAL DAMAGES RELATING TO LOSS OF DATA, PROFIT, REVENUE OR BUSINESS OR THE LOSS, DAMAGE OR DESTRUCTION OF ANY PROPERTY, WHETHER YOU, YOUR ASSIGNEE OR ANY OTHER TRANSFEREE SUFFER THE LOSS OR DAMAGE.

10.5 If an implied warranty or condition is created and Your state, federal or provincial law prohibits disclaimer of it, You may also have an implied warranty or condition. Some jurisdictions do not allow limitations on how long an implied warranty or condition lasts, so the above limitation may not apply to You. This limited warranty gives You specific legal rights. You may have other rights, which vary from jurisdiction to jurisdiction. You understand and acknowledge that You are solely responsible, among other things, for: (a) all uses of the Program using user names or passwords assigned to You; (b) input of data into the Program; (c) confirmation of the accuracy of the data input into and received from the Program; and, (d) compliance with all applicable laws associated with the use of the data.

11.0 LIMITATION OF LIABILITIES

11.1 IN NO EVENT WILL WORXTIME, ITS PROGRAM DEVELOPERS OR SUPPLIERS HAVE ANY OBLIGATION OR LIABILITY (WHETHER IN TORT, CONTRACT, WARRANTY OR OTHERWISE AND NOTWITHSTANDING ANY FAULT, NEGLIGENCE, PRODUCT LIABILITY, OR STRICT LIABILITY), FOR ANY PUNITIVE, INDIRECT, INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES, INCLUDING BUT NOT LIMITED TO, LOST REVENUE, LOSS OF OR DAMAGE TO DATA, PROFITS OR BUSINESS INTERRUPTION LOSSES, SUSTAINED OR ARISING FROM OR RELATED TO THE PROGRAM, DOCUMENTATION OR SERVICES.

This Agreement shall be governed in all respects by the laws of the State of Alabama, without regard to conflicts of law.

12.2 **Severability.** If any term of this Agreement is held invalid or unenforceable for any reason, the parties agree that such invalidity will not effect the validity of the remaining provisions of this Agreement, and further agree to substitute for the invalid provision a valid provision that most closely approximates the intent and economic effect of the invalid provision.

12.3 **Waiver.** None of the requirements of this Agreement shall be considered as waived by either party unless the same is done in writing, and then only by persons executing this Agreement or other duly authorized agents or representatives. 11.7 If an implied warranty or condition is created and Your state, federal, or provincial law prohibits disclaimer of it, You may also have an implied warranty or condition. Some jurisdictions do not allow limitations on how long an implied warranty or condition lasts, so the above limitation may not apply to You. This limited warranty gives You specific legal rights. You may have other rights, which vary from jurisdiction to jurisdiction. You understand and acknowledge that You are solely responsible, among other things, for: (a) all uses of the Program using user names or passwords assigned to You; (b) input of data into the Program; (c) confirmation of the accuracy of the data input into and received from the Program; and, (d) compliance with all applicable laws associated with the use of the data.

12.0 MISCELLANEOUS

12.1 **Governing Law.** This Agreement shall be governed in all respects by the laws of the state in which you are located, without regard to conflicts of law.

12.2 **Severability.** If any term of this Agreement is held invalid or unenforceable for any reason, the parties agree that such invalidity will not affect the validity of the remaining provisions of this Agreement, and the parties further agree to substitute for the invalid provision a valid provision that most closely approximates the intent and economic effect of the invalid provision.

12.3 **Waiver.** None of the requirements of this Agreement shall be considered as waived by either party unless the same is done in writing, and then only by persons executing this Agreement or other duly authorized agents or representatives. The waiver by either party of a breach or a violation of any provision of this Agreement shall not operate as or be construed to be a waiver of any subsequent breach or violation.

12.4 **Assignment.** You may not assign (voluntarily, by operation of law, or otherwise) this Agreement (or any rights or obligations contained herein) without the prior written consent of Worxtime, whose consent shall not be unreasonably withheld. However, You may assign this Agreement and its rights and obligations hereunder in connection with the transfer or sale of all or substantially all of Your business related to this Agreement or in the event of its merger, consolidation, change in control, or similar transaction. Any permitted assignee shall assume all obligations of its assignor under this Agreement. Any purported assignment or transfer in violation of this section shall be void. Worxtime may assign this Agreement to any Affiliate or successor in interest upon Notice to You.

12.5 **Compliance.** You agree that upon request, in writing, from Worxtime or Worxtime's authorized representative, You will within thirty (30) days fully document and certify that the Service provided by Worxtime and the use of the Program at the time of the request is in conformity with this Agreement. Such request will not be made more than one time in a twelve (12) month period.

12.6 **Entire Agreement.** This Agreement is the entire agreement between You and Worxtime relating to the Service and the Program, and this Agreement supersedes all prior or contemporaneous oral or written communications, proposals, and representations with respect to the Service and the Program or any other subject

matter covered by this Agreement. The terms and conditions of the Agreement can only be modified via a written agreement signed by both parties.

12.7 **Counterparts.** This Agreement may be executed by the parties in separate counterparts each of which when so executed and delivered shall be an original, but all such counterparts together shall constitute but one and the same instrument.

12.8 **Independent Contractor.** The performance by Worxtime of its duties and obligations under this Agreement will be that of an independent contractor and nothing contained in this Agreement will create or imply an agency, joint venture, or partnership between Worxtime and You. Neither the employees of Worxtime nor those of its subcontractors will be deemed to be employees or agents of You. Unless expressly set forth in this Agreement, none of Worxtime, its employees, or its subcontractors may enter into contracts on behalf of, bind, or otherwise obligate You in any manner whatsoever.

12.9 **Excluded Provider.** Worxtime hereby represents and warrants that Worxtime, nor any of its employees, contractors or agents, is not or at any time has never been convicted of any criminal offense related to health care nor has been debarred, excluded, or otherwise ineligible for participation in any federal or state government health care program, including Medicare and Medicaid ("Government Healthcare Program(s)"). In the event that Worxtime, or any of its employees, contractors or agents, is convicted of any criminal offense related to health care or is excluded from participation in any Government Healthcare Program during the Term, or if at any time after the date of this Agreement it is determined that Worxtime is in breach of this provision, You have right to immediately terminate this Agreement.

12.10 **Time is of the Essence.** The performance of all obligations on the precise times stated in this Agreement is of absolute importance and failure to perform any of them on time is a default, time being of the essence.

12.11 **Construction.** In the event an ambiguity or question of intent or interpretation arises, this Agreement shall be construed as if drafted jointly by the parties and no presumption or burden of proof shall arise favoring or disfavoring any party by virtue of the authorship of any of the provisions of this Agreement.

12.12 **Use of Third-party Software.** Use of some third-party software and other materials required by the Service may be subject to other terms and conditions typically found in a separate software agreement or a "Read Me" file located in or near such materials.

ORIGINAL

CFDA Number: 93.568

Agreement Number: 16EA-0F-11-54-01-019

FEDERALLY FUNDED SUBGRANT AGREEMENT
LOW-INCOME HOME ENERGY ASSISTANCE PROGRAM (LIHEAP)

THIS AGREEMENT is entered into between the State of Florida, Department of Economic Opportunity, with headquarters in Tallahassee, Florida, hereinafter referred to as "DEO," and Monroe, County of, hereinafter referred to as "Subrecipient" (each individually a "Party" and collectively "the Parties").

THIS AGREEMENT IS ENTERED INTO BASED ON THE FOLLOWING REPRESENTATIONS:

A. The U.S. Department of Health and Human Services (HHS) administers the LIHEAP program at the Federal level, and distributes LIHEAP block grant funds to the States. The State of Florida has received these grant funds from HHS.

B. DEO is the LIHEAP grantee Recipient agency for the State of Florida, designated by HHS to receive funds annually for program purposes. DEO is authorized to distribute LIHEAP funds to the Subrecipient so that Subrecipient may provide home energy assistance benefits to eligible households.

C. Subrecipient is qualified and eligible to receive these grant funds in order to provide the services identified herein.

THEREFORE, DEO and Subrecipient agree to the following:

(1) SCOPE OF WORK

Subrecipient shall perform the work in accordance with Attachment A, Scope of Work, to this Agreement.

(2) INCORPORATION OF LAWS, RULES, REGULATIONS AND POLICIES

Subrecipient and DEO shall be governed by all applicable State and Federal laws, rules and regulations, including, but not limited to, those identified in Attachment B.

(3) PERIOD OF AGREEMENT

This Agreement period will begin on **March 1, 2016**, and will end on **March 31, 2017**, unless terminated earlier in accordance with the provisions of Paragraph (13) of this Agreement.

(4) MODIFICATION OF CONTRACT

Either Party may request modification of the provisions of this Agreement. Except for Informal Modifications submitted in accordance with Attachment B, modifications of provisions of this Agreement are valid only when reduced to writing and duly signed by the Parties.

(5) AUDITS AND RECORDS

(a) Subrecipient's performance under this Agreement is subject to the applicable requirements published in the "Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards, 2 Code of Federal Regulations (C.F.R.) Part 200, hereinafter referred to as the "Uniform Guidance". If this Agreement is made with a commercial (for-profit) organization on a cost-reimbursement basis, Subrecipient will be subject to the Federal Acquisition Regulations System particularly 48 C.F.R. § 31.2.

(b) Subrecipient shall retain all records pertaining to this Agreement, regardless of the form of the record (e.g., paper, film, recording, electronic), including, but not limited to financial records, supporting documents, statistical records, and any other documents (hereinafter referred to as "Records") for a period of five State fiscal years after all reporting requirements are satisfied and final payments have been received, or if an audit has been initiated and audit findings have not been resolved at the end of this five-year period, the Records must be retained until resolution of the audit findings through litigation or otherwise. Subrecipient shall cooperate with DEO to facilitate the duplication and transfer of such Records upon request of DEO. The five-year period may also be extended for the following reasons:

1. If any litigation or claim is started before the five-year period expires, and extends beyond the five-year period, the Records must be retained until all litigation and claims involving the Records have been resolved.
2. Records for the disposition of non-expendable personal property valued at five thousand dollars and zero cents (\$5,000.00) or more at the time it is acquired must be retained for five years after final disposition.
3. Records relating to real property acquired must be retained for five years after the closing on the transfer of title.
4. Any additional Federal requirements identified in Attachment A, Scope of Work, of this Agreement.

(c) Subrecipient shall maintain all records for all subcontractors to be paid from funds provided under this Agreement, including documentation of all program costs, in a form sufficient to determine compliance with the requirements and objectives of Attachment J and Attachment K to this Agreement as well as all other applicable laws and regulations.

(d) Subrecipient shall give access to any of Subrecipient's records to representatives of DEO, the Chief Financial Officer of the State of Florida, the Auditor General of the State of Florida, the Florida Office of Program Policy Analysis and Government Accountability or representatives of the Federal government and their duly authorized representatives for the purposes of conducting audits, examinations, investigations, or making excerpts or transcriptions.

(e) Subrecipient may, per Rule 1B-24.003(9)(a), Florida Administrative Code, allow its public records to be stored through electronic recordkeeping systems as substitutes for the original or paper copy.

(f) Subrecipient shall maintain books, records, and documents in accordance with generally accepted accounting principles and practices which sufficiently and properly reflect all expenditures of funds provided by DEO under this Agreement.

(g) Records pertaining to this Agreement must be available at reasonable times for inspection, review, or audit by State personnel and other persons authorized by DEO. "Reasonable" means normal business hours of 8:00 a.m. to 5:00 p.m., local time, Monday through Friday.

(h) If Subrecipient's expenditures of State financial assistance and/or Federal awards during its applicable fiscal year(s) require it to conduct an audit in accordance with Exhibit 1 to this Agreement, such audit will comply with all applicable requirements of Exhibit 1 to this Agreement, section 215.97, F.S., and the Uniform Guidance as applicable, and Subrecipient shall ensure that all related party transactions are disclosed to the auditor.

(i) Subrecipient shall include the aforementioned audit and record-keeping requirements in all subcontracts and assignments.

(j) Subrecipient shall have each required audit completed by an independent certified public accountant (IPA), either a certified public accountant or a public accountant licensed under chapter 473, F.S., and ensure that all related party transactions are disclosed to the auditor. For the IPA's audit to be sufficient, it must state that the Subrecipient complied with the applicable provisions noted in Exhibit 1 to this Agreement.

(k) The reporting packages for required audits must be timely submitted in accordance with the requirements of Exhibit-1, Audit Requirements, of this Agreement and the applicable laws, rules and regulations referenced therein. The requirements of 2 C.F.R. § 200.512, Report Submission, are applicable to audits of Federal awards conducted in accordance with Subparagraph (5)(h) above.

(l) Subrecipient shall reimburse DEO if an audit shows that all or any portion of the funds disbursed were not spent in accordance with the conditions of this Agreement and applicable regulations. The amount of reimbursement will be equal to the amount of funds not spent in accordance with this Agreement. Subrecipient shall send such reimbursement to DEO within thirty calendar days after DEO has notified Subrecipient of such non-compliance.

(m) Within sixty calendar days of the close of Subrecipient's fiscal year, on an annual basis, Subrecipient shall electronically submit a completed Audit Compliance Certification (a version of this certification is attached hereto as Exhibit-2, Audit Compliance Certification, of this Agreement) to audit@deo.myflorida.com. Subrecipient's timely submittal of one completed Audit Compliance Certification for each applicable fiscal year will fulfill this

requirement within all agreements (e.g., contracts, grants, memorandums of understanding, memorandums of agreement, economic incentive award agreements, etc.) between DEO and Subrecipient.

(6) INFORMATION RELEASE AND PUBLIC RECORDS REQUIREMENTS:

(a) In addition to Subrecipient's responsibility to directly respond to each request it receives for records made or received by Subrecipient in conjunction with this Agreement and to provide the applicable public records in response to such request, Subrecipient shall notify DEO of the receipt and content of such request by sending an e-mail to PRRequest@deo.myflorida.com within one (1) business day from receipt of such request.

(b) Subrecipient shall allow public access to all documents, papers, letters or other materials made or received by Subrecipient in conjunction with this Agreement, unless the records are exempt from section 24(a) of Article I of the State Constitution and section 119.07(1), F.S. For records made or received by Subrecipient in conjunction with this Agreement, Subrecipient shall respond to requests to inspect or copy such records in accordance with chapter 119, F.S. For all such requests for records that are public records, as public records are defined in section 119.011, F.S., Subrecipient shall be responsible for providing such public records per the cost structure provided in chapter 119, F.S., and in accordance with all other requirements of chapter 119, F.S., or as otherwise provided by law.

(c) DEO may terminate this Agreement if Subrecipient refuses and/or fails to comply with Florida's public records laws or to allow public access to any public record made or received by Subrecipient in conjunction with this Agreement.

(d) If, for purposes of this Agreement, Subrecipient is a "contractor" as defined in section 119.0701(1)(a), F.S., Subrecipient shall transfer, at no cost to DEO, all public records upon completion or termination of this Agreement, and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All electronic records shall be provided to DEO in a DEO-compatible format.

(e) Subrecipient shall notify DEO verbally within 24 hours and in writing within 72 hours if any data in Subrecipient's possession related to this Agreement is subpoenaed or improperly used, copied, or removed (except in the ordinary course of business) by anyone except an authorized representative of DEO. Subrecipient shall cooperate with DEO, in taking all steps as DEO deems advisable, to prevent misuse, regain possession, or otherwise protect the State's rights and the data subject's privacy.

(f) Subrecipient acknowledges that DEO is subject to the provisions of chapter 119, F.S., relating to public records and that reports, invoices, and other documents Subrecipient submits to DEO under this Agreement may constitute public records under Florida Statutes. Subrecipient shall cooperate with DEO regarding DEO's efforts to comply with the requirements of chapter 119, F.S.

(g) It is Subrecipient's duty to identify any records submitted by Subrecipient to DEO as confidential and exempt from public disclosure if those records contain trade secrets or confidential proprietary business information. Subrecipient waives any claim of exemption if Subrecipient fails to identify the legal basis for each exemption from the requirements of chapter 119, F.S. prior to submitting any such record to DEO.

(7) EMPLOYMENT ELIGIBILITY VERIFICATION

(a) Executive Order 11-116, signed May 27, 2011, by the Governor of Florida, requires DEO's subgrant agreements in excess of nominal value, if applicable, to expressly require Subrecipient to:

1. Utilize the U. S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by Subrecipient during this Agreement term; and,

2. Include in all subcontracts under this Agreement, the requirement that subcontractors performing work or providing services pursuant to this Agreement utilize the E-Verify system to verify the employment eligibility of all new employees hired by the subcontractor during the term of the subcontract.

(b) E-Verify is an Internet-based system that allows an employer, using information reported on an employee's Form I-9, Employment Eligibility Verification, to determine the eligibility of all new employees hired to work in the United States after the effective date of the required Memorandum of Understanding (MOU); the responsibilities and elections of Federal contractors, however, may vary, as stated in Article II.D.1.c. of the MOU. There is no charge to employers to use E-Verify. The Department of Homeland Security's E-Verify system can be found at http://www.dhs.gov/files/programs/gc_1185221678150.shtm.

(c) If Subrecipient does not have an E-Verify MOU in effect, Subrecipient shall enroll in the E-Verify system prior to hiring any new employee after the effective date of this Agreement.

(8) REPORTS

Subrecipient shall provide DEO with all required reports as set forth in Attachment C to this Agreement.

(a) If all required reports and copies are not sent to DEO, or are not completed in a manner acceptable to DEO, DEO may withhold further payments until such reports are completed or DEO may take other action as stated in Paragraph (12) of this Agreement. "Acceptable to DEO," means that the reports were completed in accordance with the Attachments of this Agreement.

(b) Subrecipient shall provide additional program updates, reports, and information as may be required by DEO.

(9) MONITORING

(a) Subrecipient shall monitor its performance under this Agreement, as well as that of its subcontractors and/or consultants who are paid from funds provided under this Agreement.

(b) In addition to reviews of audits conducted in accordance with Paragraph (5) above, monitoring procedures may include, but are not limited to, on-site visits by DEO staff, limited scope audits, and other procedures.

(c) Subrecipient, and all subcontractors, shall comply with the most recent LIHEAP Program Monitoring Field Manual provided by DEO, and cooperate with any monitoring procedures/processes deemed appropriate by DEO. In the event that DEO determines that a limited scope review of Subrecipient is appropriate, Subrecipient shall comply with any additional instructions provided by DEO regarding such review.

(d) Subrecipient shall comply and cooperate with any inspections, reviews, investigations or audits deemed necessary by the Florida Chief Financial Officer or Auditor General.

(e) DEO will monitor the performance and financial management by Subrecipient throughout the Agreement term to ensure timely completion of all tasks.

(10) INDEMNIFICATION; INDEPENDENT CONTRACTOR STATUS

(a) Unless Subrecipient is a state agency or subdivision, as defined in section 768.28(2), F.S., Subrecipient is fully liable for the actions of its agents, employees, partners, or subcontractors and shall fully indemnify, defend, and hold harmless the State and DEO, and their officers, agents, and employees, from suits, actions, damages, and costs of every name and description, including attorneys' fees, arising from or relating to personal injury and damage to real or personal tangible property alleged to be caused in whole or in part by Subrecipient, its agents, employees, partners, or subcontractors, provided, however, that Subrecipient has no affirmative duty to indemnify for that portion of any loss or damages proximately caused by the negligent act or omission of the State or DEO.

Any Subrecipient which is a State agency or subdivision, as defined in section 768.28(2), F.S., shall be fully responsible for its negligent or tortious acts or omissions which result in claims or suits against DEO, and shall be liable for any damages proximately caused by its acts or omissions to the extent set forth in section 768.28, F.S. Nothing herein is intended to serve as a waiver of sovereign immunity by any Subrecipient to which sovereign immunity applies. Nothing herein may be construed as consent by a State agency or subdivision of the State of Florida to be sued by third parties in any matter arising out of any contract.

(b) For purposes of this Agreement, Subrecipient is an independent contractor and is not an employee or agent of DEO. DEO shall neither have nor exercise any control or direction over the methods by which Subrecipient shall perform its work and functions other than as provided herein. Nothing in this Agreement is intended to or may be deemed to constitute a partnership or joint venture between the Parties. Subrecipient shall not represent to others that, as Subrecipient, it has the authority to bind DEO unless specifically authorized to do so. Subrecipient shall act as necessary to ensure that each subcontractor is deemed to be an independent contractor

and will not be considered or permitted to be an agent, servant, joint venturer, or partner of DEO or the State of Florida. DEO shall not be responsible for withholding taxes with respect to Subrecipient's compensation hereunder. Subrecipient shall have no claim against DEO for vacation pay, sick leave, retirement benefits, social security, workers' compensation, health or disability benefits, reemployment assistance benefits, or employee benefits of any kind. Subrecipient shall ensure that its employees, subcontractors, and other agents, receive benefits and necessary insurance (health, workers' compensation, reemployment assistance benefits) from an employer other than the State of Florida. Subrecipient, at all times during the Agreement, must comply with the reporting and Reemployment Assistance contribution payment requirements of chapter 443, F.S.

(11) DEFAULT

If any of the following events occur ("Events of Default"), DEO shall have the right to terminate further payment of funds under this Agreement, and DEO may exercise any of its remedies set forth in Paragraph (12) of this Agreement. However, DEO may make payments or partial payments after any Events of Default without waiving the right to exercise such remedies, and without becoming liable to make any further payment:

(a) If any warranty or representation made by Subrecipient in this Agreement, or any previous agreement with DEO is, or becomes, false or misleading in any respect, or if Subrecipient fails to keep or perform any of the obligations, terms or covenants in this Agreement or any previous agreement with DEO and has not cured them in timely fashion, or is unable or unwilling to meet its obligations under this Agreement;

(b) If material adverse changes occur in the financial condition of Subrecipient at any time during the term of this Agreement, and Subrecipient fails to cure this adverse change within thirty calendar days from the date written notice is sent by DEO;

(c) If any reports required by this Agreement have not been submitted to DEO or have been submitted with incorrect, incomplete, or insufficient information; or

(d) If Subrecipient has failed to perform and complete in timely fashion any of its obligations under this Agreement.

(12) REMEDIES

If an Event of Default occurs and DEO provides written notice to Subrecipient, DEO may exercise any one or more of the following remedies, either concurrently or consecutively:

(a) Terminate this Agreement, if Subrecipient has not cured the default within thirty calendar days of receipt of written notice of an Event of Default;

(b) Begin an appropriate legal or equitable action to enforce performance of this Agreement;

(c) Withhold or suspend payment of all, or any part of, a request for payment;

(d) Exercise any corrective or remedial actions, to include but not be limited to:

1. Request additional information from Subrecipient to determine the reasons for or the extent of non-compliance or lack of performance,
2. Issue a written warning to advise that more serious measures may be taken if the situation is not corrected,
3. Advise Subrecipient to suspend, discontinue, or refrain from incurring costs for any activities in question, or
4. Require Subrecipient to reimburse DEO for the amount of costs incurred for any items determined to be ineligible; and

(e) Exercise any other rights or remedies which may be otherwise available under law.

Pursuing any of the above remedies will not limit any of DEO's other remedies, either in this Agreement, or provided at law or in equity. If DEO waives any right or remedy in this Agreement, or fails to insist on strict performance by Subrecipient, it will not affect, extend or waive any other right or remedy of DEO, or affect the later exercise of the same right or remedy by DEO for any other default by Subrecipient.

(13) TERMINATION

(a) DEO may terminate this Agreement for cause with thirty calendar days written notice. Cause includes, but is not limited to: an Event of Default as set forth in Paragraph (11) of this Agreement, misuse of funds, fraud, lack of compliance with applicable rules, laws and regulations, failure to perform in a timely manner, failure to cure an Event of Default within thirty calendar days from receipt of the notice, or refusal by Subrecipient to permit public access to any document, paper, letter, or other material subject to disclosure under chapter 119, F.S., as amended. The rights and remedies of DEO in this clause are in addition to any other rights and remedies provided by law or under this Agreement. Subrecipient shall not be entitled to recover any cancellation charges.

(b) DEO may terminate this Agreement for convenience or when it determines, in its sole discretion, that continuing this Agreement would not produce beneficial results in line with the further expenditure of funds, by providing Subrecipient with thirty calendar days prior written notice. Subrecipient shall not furnish any product after it receives the notice of termination, except as necessary to complete the continued portion of this Agreement, if authorized in writing. Subrecipient shall not be entitled to recover any cancellation charges.

(c) The Parties may terminate this Agreement for their mutual convenience through a written amendment. The amendment shall state the effective date of the termination and the procedures for proper closeout of this Agreement.

(d) If DEO issues a notice of Event of Default, Subrecipient shall stop incurring new obligations upon receipt of the notice. If DEO determines that Subrecipient has cured the Event of Default within the thirty-day cure period, DEO will provide notice to Subrecipient that it may resume incurring new obligations. Costs incurred for new

obligations after receipt of a notice of Event of Default and until receipt of notice that it may resume incurring new obligations will be disallowed. If this Agreement is terminated by DEO because of Subrecipient's breach, such termination shall not relieve Subrecipient of liability under this Agreement. DEO may, to the extent authorized by law, withhold payments to Subrecipient for the purpose of set-off until the exact amount of damages due DEO from Subrecipient is determined.

EXHIBIT 1
AUDIT REQUIREMENTS

The administration of resources awarded by DEO to the Subrecipient may be subject to audits and/or monitoring by DEO as described in this section.

MONITORING

In addition to reviews of audits conducted in accordance with OMB Circular A-133 and Section 215.97, F.S., as revised (see "AUDITS" below), monitoring procedures may include, but not be limited to, on-site visits by DEO staff, limited scope audits as defined by OMB Circular A-133, as revised, and/or other procedures. By entering into this agreement, the Subrecipient agrees to comply and cooperate with any monitoring procedures/processes deemed appropriate by DEO. In the event DEO determines that a limited scope audit of the recipient is appropriate, the Subrecipient agrees to comply with any additional instructions provided by DEO staff to the Subrecipient regarding such audit. The Subrecipient further agrees to comply and cooperate with any inspections, reviews, investigations, or audits deemed necessary by the Chief Financial Officer (CFO) or Auditor General.

AUDITS

PART I: FEDERALLY FUNDED

This part is applicable if the recipient is a State or local government or a non-profit organization as defined in OMB Circular A-133, as revised.

1. In the event that the Subrecipient expends \$300,000 (\$500,000 for fiscal years ending after December 31, 2003) or more in Federal awards in its fiscal year, the Subrecipient must have a single or program-specific audit conducted in accordance with the provisions of OMB Circular A-133, as revised. Exhibit 1 to this agreement indicates Federal resources awarded through DEO by this agreement. In determining the Federal awards expended in its fiscal year, the Subrecipient shall consider all sources of Federal awards, including Federal resources received from DEO. The determination of amounts of Federal awards expended should be in accordance with the guidelines established by OMB Circular A-133, as revised. An audit of the Subrecipient conducted by the Auditor General in accordance with the provisions of OMB Circular A-133, as revised, will meet the requirements of this part.
2. In connection with the audit requirements addressed in Part I, paragraph 1, the recipient shall fulfill the requirements relative to auditee responsibilities as provided in Subpart C of OMB Circular A-133, as revised.
3. If the Subrecipient expends less than \$300,000 (\$500,000 for fiscal years ending after December 31, 2003) in Federal awards in its fiscal year, an audit conducted in accordance with the provisions of OMB Circular A-133, as revised, is not required. In the event that the Subrecipient expends less than \$300,000 (\$500,000 for fiscal years ending after December 31, 2003) in Federal awards in its fiscal year and elects to have an audit conducted in accordance with the provisions of OMB Circular A-133, as revised, the cost of the audit must be paid from non-Federal resources (i.e., the cost of such an audit must be paid from the recipient resources obtained from other than Federal entities).
4. Title 2 C.F.R. part 200, entitled *Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards*, also known as the Uniform Guidance, supersedes and consolidates the requirements of OMB Circulars A-21, A-87, A-110, A-122, A-89, A-102 and A-133 and is effective for Federal awards or

increments of awards issued on or after December 26, 2014. Please refer to title 2 C.F.R. part 200 for revised definitions, reporting requirements and auditing thresholds referenced in this Attachment and Agreement accordingly.

Part II: STATE FUNDED

This part is applicable if the recipient is a non-state entity as defined by Section 215.97(2), Florida Statutes.

1. In the event that the Subrecipient expends a total amount of state financial assistance equal to or in excess of \$500,000 in any fiscal year of such Subrecipient (for fiscal years ending September 30, 2004 or thereafter), the Subrecipient must have a State single or project-specific audit for such fiscal year in accordance with Section 215.97, F.S.; applicable rules of the Department of Financial Services; and Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General. Exhibit 1 to this agreement indicates state financial assistance awarded through DEO by this agreement. In determining the state financial assistance expended in its fiscal year, the Subrecipient shall consider all sources of state financial assistance, including state financial assistance received from DEO, other state agencies, and other non-state entities. State financial assistance does not include Federal direct or pass-through awards and resources received by a non-state entity for Federal program matching requirements.
2. In connection with the audit requirements addressed in Part II, paragraph 1, the Subrecipient shall ensure that the audit complies with the requirements of section 215.97(8), Florida Statutes. This includes submission of a financial reporting package as defined by section 215.97(2), Florida Statutes, and Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General.
3. If the Subrecipient expends less than \$500,000 in state financial assistance in its fiscal year (for fiscal years ending September 30, 2004 or thereafter), an audit conducted in accordance with the provisions of section 215.97, Florida Statutes, is not required. In the event that the Subrecipient expends less than \$500,000 in state financial assistance in its fiscal year and elects to have an audit conducted in accordance with the provisions of section 215.97, F.S., the cost of the audit must be paid from the non-state entity's resources (i.e., the cost of such an audit must be paid from the Subrecipient's resources obtained from other than State entities).

21. **Sponsorship and Publicity**

21.1 As required by s. 286.25, F.S., if the Provider is a non-governmental organization which sponsors a program financed wholly or in part by state funds, including any funds obtained through this contract, it shall, in publicizing, advertising, or describing the sponsorship of the program, state: "Sponsored by (Provider's name), the State of Florida Department of Elder Affairs and the Alliance for Aging, Inc." If the sponsorship reference is in written material, the words "State of Florida, Department of Elder Affairs" and "Alliance for Aging, Inc." shall appear in at least the same size letters or type as the name of the organization.

21.2 The Provider shall not use the words "The State of Florida Department of Elder Affairs" or "Alliance for Aging, Inc." to indicate sponsorship of a program otherwise financed, unless specific authorization has been obtained by the Alliance prior to use.

22. **Assignments**

22.1 The Provider shall not assign the rights and responsibilities under this Contract without the prior written approval of the Alliance, which shall not be unreasonably withheld. Any sublicense, assignment, or transfer otherwise occurring without prior written approval of the Alliance will constitute a material breach of the contract.

22.2 The Alliance shall at all times be entitled to assign or transfer, in whole or part, its rights, duties, or obligations under this contract to another agency upon giving prior written notice to the Provider. In the event the Alliance approves transfer of the Provider's obligations, the Provider remains responsible for all work performed and all

expenses incurred in connection with the contract.

22.3 This contract shall remain binding upon the successors in interest of either the Provider or the Alliance.

23. **Subcontracts**

23.1 The Provider is responsible for all work performed pursuant to this contract and the Service Provider Application in response to the 2012 OAA RFP. Any subcontracts shall be evidenced by a written document and subject to any conditions of approval the Alliance for Aging deems necessary. The Provider further agrees that the Alliance shall not be liable to the subcontractor in any way or for any reason. The Provider, at its expense, shall defend the Alliance against any such claims.

23.2 The Provider shall promptly pay any subcontractors upon receipt of payment from the Alliance. Failure to make payments to any subcontractor in accordance with s. 287.0585, F.S., unless otherwise stated in the contract between the Provider and subcontractor, will result in a penalty as provided by statute.

24. **Funding Obligations**

24.1 The Alliance acknowledges its obligation to pay the Provider for the performance of the Provider's duties and responsibilities set forth in any contract or agreement incorporating in this agreement.

24.2 The Alliance shall not be liable to the Provider for costs incurred or performance rendered unless such costs and performances are in accordance with the terms and conditions of any contract or agreement executed between the parties, which incorporates this Contract, including but not limited to terms, governing the Provider's promised performance and unit rates and/or reimbursement capitations specified.

24.3 The Alliance shall not be liable to the Provider for any expenditures which are not allowable costs as defined in the C.F.R., Title 45, Parts 74 and 92, as amended, or which expenditures have not been made in accordance with all applicable state and federal rules.

24.4 The Alliance shall not be liable to the Provider for expenditures made in violation of regulations promulgated under the Older Americans Act, as amended, or in violation of applicable state and federal laws, rules, or provisions of any contract or agreement incorporating in this Contract.

25. **Independent Capacity of Provider**

It is the intent and understanding of the Parties that the Provider, or any of its subcontractors, are independent contractors and are not employees of the Alliance and shall not hold themselves out as employees or agents of the Alliance without specific authorization from the Alliance. It is the further intent and understanding of the Parties that the Alliance does not control the employment practices of the Provider and shall not be liable for any wage and hour, employment discrimination, or other labor and employment claims against the Provider or its subcontractors. All deductions for social security, withholding taxes, income taxes, contributions to unemployment compensation funds and all necessary insurance for the Provider shall be the sole responsibility of the Provider.

26. **Payment**

26.1 Payments will be made to the Provider pursuant to s. 215.422, F.S., as services are rendered and invoiced by the Provider. The Alliance will have final approval of the invoice for payment, and will approve the invoice for payment only if the Provider has met all terms and conditions of the contract, unless the bid specifications, purchase order, or this contract specify otherwise. The approved invoice will be submitted to the Alliance's fiscal section for budgetary approval and processing. Disputes arising over invoicing and payments will be resolved in

accordance with the provisions of s. 215.422 F.S.

- 26.2 The Provider agrees to submit bills for fees or other compensation for services or expenses in sufficient detail for a proper pre audit and post audit thereof. The contractor shall comply with the particular requirements under the following laws and guidelines that are applicable to the contracts or agreements incorporating in this Contract by reference: (a) paragraph (16) (b) of section 216.181, F.S., regarding advances; (b) Rule 69I-40.103 F.A.C. pertaining to Restriction of Expenditures from state funds; and, (c) the Invoice Requirements of the Reference Guide for State Expenditures from the Department of Financial Services at:
http://www.myfloridacfo.com/aadir/reference_guide/Reference_Guide_For_State_Expenditures.pdf

The Provider will certify that detailed documentation is available to support each item on the itemized invoice or payment request for cost reimbursed expenses, fixed rate or deliverables contracts or agreements incorporating this Contract by reference, including paid Subcontractor invoices, and will be produced upon request by the Alliance. The Provider will further certify that reimbursement requests are only for allowable expenses as defined in the laws and guiding circulars cited in Sections 4 and 5 of this Contract, in the Reference Guide for State Expenditures, and any other laws or regulations, as applicable, and that administrative expenses do not exceed amounts budgeted in the Provider's approved area plan as developed in accordance with and pursuant to section 306(a) of the Older Americans Act of 1965, as amended.

- 26.3 The Provider and Subcontractors shall provide units of deliverables, including reports, findings, and drafts as specified in the contracts or agreements and attachments which incorporate this Contract and the area plans developed by the Provider (pursuant to section 306(a) of the Older Americans Act), to be received and accepted by the Contract Manager prior to payment.
- 26.4 Payments will be made to the Provider based on a complete and correct invoice, invoices that are incomplete or with incorrect total will not be processed and will be returned to the Provider for correction. Fiscal staff will not be able to correct or make changes to the invoices. Returning invoices for corrections may result in failure to receive payment for that month. Invoices shall be submitted timely as per ATTACHMENT VIII in order to avoid any payment delays.
- 26.5 Each service performed shall be recorded as specified in the client information and registration tracking system (CIRTS) guidelines. Supporting documentation of services provided must be adequate to permit fiscal and programmatic evaluation, and ensure internal management.

27. **Return of Funds**

The Provider will return to the Alliance any overpayments due to unearned funds or funds disallowed and any interest attributable to such funds pursuant to the terms and conditions of this contract that were disbursed to the Provider by the Alliance. In the event that the Provider or its independent auditor discovers that an overpayment has been made, the Provider shall repay said overpayment immediately without prior notification from the Alliance. In the event that the Alliance first discovers an overpayment has been made, the Contract Manager, on behalf of the Alliance, will notify the Provider by letter of such findings. Should repayment not be made forthwith, the Provider will be charged at the lawful rate of interest on the outstanding balance pursuant to s. 55.03, F.S., after Alliance notification or Provider discovery.

28. **Data Integrity and Safeguarding Information**

The Provider and its subcontractors shall insure an appropriate level of data security for the information the Provider is collecting or using in the performance of this contract. An appropriate level of security includes approving and tracking all Provider employees that request system or information access and ensuring that user access has been removed from all terminated employees. The Provider, among other requirements, must anticipate and prepare for the loss of information processing capabilities. All data and software shall be routinely backed up to ensure recovery from losses or outages of the computer system. The security over the backed-up data is to be as stringent as the

protection required of the primary systems. The Provider shall ensure all Subcontractors maintain written procedures for computer system back-up and recovery. The Provider shall complete and sign ATTACHMENT IV prior to the execution of this contract.

29. Computer Use and Social Media Policy

The DOEA has implemented a new Social Media Policy, in addition to its Computer Use Policy, which applies to all employees, contracted employees, consultants, OPS and volunteers, including all personnel affiliated with third parties, such as, but not limited to, Area Agencies on Aging and vendors. Any entity that uses the DOEA's computer resource systems must comply with the DOEA's policy regarding social media. Social Media includes, but is not limited to blogs, podcasts, discussion forums, Wikis, RSS feeds, video sharing, social networks like MySpace, Facebook and Twitter, as well as content sharing networks such as Flickr and YouTube (ATTACHMENT C). This policy is available on the Department's website at:

<http://elderaffairs.state.fl.us/doesa/financia.php>

30. Conflict of Interest

The Provider shall establish safeguards to prohibit employees, board members, management and subcontractors from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest or personal gain. No employee, officer or agent of the Provider or subcontractor shall participate in selection, or in the award of an agreement supported by State or Federal funds if a conflict of interest, real or apparent, would be involved. Such a conflict would arise when: (a) the employee, officer or agent; (b) any member of his/her immediate family; (c) his or her partner, or; (d) an organization which employs, or is about to employ, any of the above, has a financial or other interest in the firm selected for award. The Provider or any subcontractor's officers, employees or agents will neither solicit nor accept gratuities, favors or anything of monetary value from contractors, potential contractors, or parties to subcontracts. The Provider's board members and management must disclose to the Alliance any relationship which may be, or may be perceived to be, a conflict of interest within thirty (30) calendar days of an individual's original appointment or placement in that position, or if the individual is serving as an incumbent, within thirty (30) calendar days of the commencement of this contract. The Provider's employees and subcontractors must make the same disclosures described above to the Provider's board of directors. Compliance with this provision will be monitored.

31. Public Entity Crime

Pursuant to s. 287.133, F.S., the following restrictions are placed on the ability of persons convicted of public entity crimes to transact business with the Alliance. A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a bid, proposal, or reply on a contract to provide any goods or services to a public entity; may not submit a bid, proposal, or reply on a contract with a public entity for the construction or repair of a public building or public work; may not submit bids, proposals, or replies on leases of real property to a public entity; may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity; and may not transact business with any public entity in excess of the threshold amount provided in s. 287.017, F.S., for CATEGORY TWO for a period of 36 months following the date of being placed on the convicted vendor list.

32. Emergency Preparedness and Continuity of Operations

32.1 If the tasks to be performed pursuant to this contract include the physical care and control of clients, or the administration and coordination of services necessary for client health, safety or welfare, the Provider shall, within thirty (30) calendar days of the execution of this contract, submit to the Contract Manager verification of an emergency preparedness plan (Continuity of Operations Plan.) In the event of an emergency, the Provider shall notify the Alliance of emergency provisions.

33. Use of Contract Funds to Purchase Equipment

No funds under this contract will be used by the Provider to purchase equipment.

Equipment means: (a) an article of nonexpendable, tangible personal property having a useful life of more than one year and an acquisition cost which equals or exceeds the lesser of the capitalization level established by the organization for the financial statement purposes, or \$5,000.00 [for federal funds], or (b); nonexpendable, tangible personal property of a non-consumable nature with an acquisition cost of \$1,000.00 or more per unit, and expected useful life of at least one year; and hardback bound books not circulated to students or the general public, with a value or cost of \$250.00 or more [for state funds].

34. The PUR 1000 Form is hereby incorporated by reference and available at:
http://www.myflorida.com/apps/vbs/adoc/F_40_P_R_000_pd

In the event of any conflict between the PUR 1000 Form and any terms or conditions of any contract or agreement terms or conditions the contract shall take precedence over the PUR 1000 Form. However, if the conflicting terms or conditions in the PUR 1000 Form are required by any section of the Florida Statutes, the terms or conditions contained in the PUR 1000 Form shall take precedence.

35. **Use of State Funds to Purchase or Improve Real Property**

Any state funds provided for the purchase of or improvements to real property are contingent upon the Provider or political subdivision granting to the state a security interest in the property at least to the amount of state funds provided for at least 5 years from the date of purchase or the completion of the improvements or as further required by law.

36. **Dispute Resolution**

Any dispute concerning performance of the contract shall be decided by the Contract Manager, who shall reduce the decision to writing and serve a copy on the Provider.

37. **Financial Consequences of Non-Performance**

If the Provider fails to meet the minimum level of service or performance identified in this agreement, or that is customary for the industry, then the Alliance may apply financial consequences commensurate with the deficiency. Financial consequences may include but are not limited to contract suspension, refusing payment, withholding payments until deficiency is cured, tendering only partial payments, and or cancellation of contract and reacquiring services from an alternate source.

- 37.1 The Provider shall not be charged with financial consequences, when a failure to perform arises out of causes that were the responsibility of the Alliance.

38. **No Waiver of Sovereign Immunity**

Nothing contained in this agreement is intended to serve as a waiver of sovereign immunity by any entity to which sovereign immunity may be applicable.

39. **Venue**

If any dispute arises out of this contract, the venue of such legal recourse will be Miami-Dade County, Florida.

40. **Entire Contract**

This contract contains all the terms and conditions agreed upon by the parties. No oral agreements or representations shall be valid or binding upon the Alliance or the Provider unless expressly contained herein or by a written amendment to this contract signed by both Parties.

41. **Force Majeure**

The Parties will not be liable for any delays or failures in performance due to circumstances beyond their control, provided the party experiencing the force majeure condition provides immediate written notification to the other party and takes all reasonable efforts to cure the condition.

42. Severability Clause

The Parties agree that if a court of competent jurisdiction deems any term or condition herein void or unenforceable, the other provisions are severable to that void provision and shall remain in full force and effect.

43. Condition Precedent to Contract: Appropriations

The Parties agree that the Alliance's performance and obligation to pay under this contract is contingent upon an annual appropriation by the Legislature.

44. Addition/Deletion

The Parties agree that, notwithstanding the terms of the procurement documents and actions leading to this contract, the Alliance reserves the right to add or to delete any of the services required under this contract when deemed to be in the best interest of the elder population targeted by the Area Plan and reduced to a written amendment signed by both Parties. The Parties shall negotiate compensation for any additional services added.

45. Waiver

The delay or failure by the Alliance to exercise or enforce any of its rights under this contract shall not constitute or be deemed a waiver of the Alliance's right thereafter to enforce those rights, nor shall any single or partial exercise of any such right preclude any other or further exercise thereof or the exercise of any other right.

46. Compliance

The Provider shall abide by all applicable current federal statutes, laws, rules and regulations as well as applicable current State statutes, laws, rules and regulations. The Parties agree that failure of the Provider to abide by these laws shall be deemed an event of default of the Provider, and subject the contract to immediate, unilateral cancellation of the contract at the discretion of the Alliance for Aging, Inc.

47. Final Invoice

The Provider shall submit the final invoice for payment to the Alliance for Aging, Inc. as specified in section ~~3.3.7~~^{3.3.6} (date for final request for payment) of ATTACHMENT I. If the Provider fails to submit final request for payment by the deadline, then all rights to payment may be forfeited and the Alliance may not honor any requests submitted after the aforesaid time period. Any payment due under the terms of this contract may be withheld until all reports due from the Provider and necessary adjustments thereto have been approved by the Alliance.

48. Renegotiations or Modifications

Modifications of the provisions of this contract shall be valid only when they have been reduced to writing and duly signed by both parties. The rate of payment and the total dollar amount may be adjusted retroactively to reflect price level increases and changes in the rate of payment when these have been established through the appropriations process and subsequently reflected in the Alliance's contract with DOEA pursuant to which the Alliance administers funding under this contract.

49. Suspension of Work:

The Alliance may in its sole discretion suspend any or all activities under this Contract and any Contract or agreement incorporating in this Contract, at any time, when in the best interests of the State to do so. The Alliance shall provide the Provider written notice outlining the particulars of suspension. Examples of the reason for suspension include, but are not limited to, budgetary constraints, declaration of emergency, or other such circumstances. After receiving a suspension notice, the Provider shall comply with the notice and shall not accept any purchase orders. Within ninety days, or any longer period agreed to by the Provider, the Alliance shall either (1) issue a notice authorizing resumption of work, at which time activity shall resume, or (2) terminate the Contract or

purchase order. Suspension of work shall not entitle the Provider to any additional compensation.

50. Termination

50.1 This contract may be terminated by either party without cause upon no less than thirty (30) calendar days' notice in writing to the other party unless a sooner time is mutually agreed upon in writing. Said notice shall be delivered by U.S. Postal Service or any expedited delivery service that provides verification of delivery or by hand delivery to the Contract Manager or the representative of the Provider responsible for administration of the contract.

50.2 In the event funds for payment pursuant to this contract become unavailable, the Alliance may terminate this contract upon no less than twenty-four (24) hours' notice in writing to the Provider. Said notice shall be delivered by U.S. Postal Service or any expedited delivery service that provides verification of delivery or by hand delivery to the Contract Manager or the representative of the Provider responsible for administration of the contract. The Alliance will be the final authority as to the availability and adequacy of funds. In the event of termination of this contract, the Provider will be compensated for any work satisfactorily completed prior to the date of termination.

50.3 Termination for Cause

This contract may be terminated for cause by the Alliance upon no less than twenty-four (24) hours' notice in writing to the Provider. Waiver of breach of any provisions of this contract shall not be deemed to be a waiver of any other breach and shall not be construed to be a modification of the terms and conditions of this contract. The provisions herein do not limit the Alliance's or the Provider's rights to remedies at law or in equity.

50.4 Failure to have performed any contractual obligations with the Alliance in a manner satisfactory to the Alliance will be a sufficient cause for termination. To be terminated as a contractor under this provision, the Provider must have (1) previously failed to satisfactorily perform in a contract with the Alliance, been notified by the Alliance of the unsatisfactory performance and failed to correct the unsatisfactory performance to the satisfaction of the Alliance; or (2) had a contract terminated by the Alliance for cause.

50.5 Waiver of breach of any provisions of this contract shall not be deemed to be a waiver of any other breach and shall not be construed to be a modification of the terms and conditions of this contract. The provisions herein do not limit the Alliance's right to remedies at law or to damages of a legal or equitable nature.

51. Electronic Records and Signature

The Alliance authorizes, but does not require, the Provider to create and retain electronic records and to use electronic signatures to conduct transactions necessary to carry out the terms of this Contract. Stat. All electronic records must be fully auditable; are subject to *Florida's Public Records Law*, ch. 119, Fla. Stat.; must comply with section 28, *Data Integrity and Safeguarding Information*; must maintain all confidentiality, as applicable; and must be retained and maintained by the Provider to the same extent as non-electronic records are retained and maintained as required by this Contract.

51.1 The Alliance's authorization pursuant to this section does not authorize electronic transactions between the Provider and the Alliance. The Provider is authorized to conduct electronic transactions with the Alliance only upon further written consent by the Alliance.

51.2 Upon request by the Alliance, the Provider shall provide the Alliance or DOEA with non-electronic (paper) copies of records. Non-electronic (paper) copies provided to the Alliance of any document that was originally in electronic form with an electronic signature must indicate the person and the person's capacity who

electronically signed the document on any non-electronic copy of the document.

52. Special Provisions:

The Provider agrees to the following provisions:

52.1 Investigation of Criminal Allegations:

Any report that implies criminal intent on the part of the Provider or any Subcontractors and referred to a governmental or investigatory agency must be sent to the Alliance. If the Provider has reason to believe that the allegations will be referred to the State Attorney, a law enforcement agency, the United States Attorney's office, or other governmental agency, the Provider shall notify the Alliance immediately. A copy of all documents, reports, notes or other written material concerning the investigation, whether in the possession of the Provider or Subcontractors, must be sent to the Alliance's contract manager with a summary of the investigation and allegations.

52.2 Volunteers:

53.3 The Provider lacks financial stability sufficient to meet contractual obligations or that contractual funds have been misappropriated;

53.4 The Provider has committed multiple or repeated violations of legal and regulatory standards, regardless of whether such laws or regulations are enforced by the Alliance, or the Provider has committed or repeated violations of Alliance standards;

53.5 The Provider has failed to continue the provision or expansion of services after the declaration of a state of emergency; and/or

53.6 The Provider has failed to adhere to the terms of any contract or agreement incorporating in this Contract.

53.8 In making any determination under this provision the Alliance may rely upon the findings of another state or federal agency, or other regulatory body. EXHIBIT 1 to this agreement indicates Federal resources awarded through the Department of Elder Affairs or the Alliance for Aging, Inc. by this agreement. In determining the Federal awards expended in its fiscal year, the provider shall consider all sources of Federal awards, including Federal resources received from the Department of Elder Affairs or the Alliance for Aging, Inc. The determination of amounts of Federal awards expended should be in accordance with the guidelines established by OMB Circular A-133, as revised. An audit of the provider conducted by the Auditor General in accordance with the provisions of OMB Circular A-133, as revised, will meet the requirements of this part.

In connection with the audit requirements addressed in Part I, paragraph 1, the provider shall fulfill the requirements relative to auditee responsibilities as provided in Subpart C of OMB Circular A-133, as revised.

If the provider expends less than \$500,000 in Federal awards in its fiscal year, an audit conducted in accordance with the provisions of OMB Circular A-133, as revised, is not required. In the event that the provider expends less than \$500,000 in Federal awards in its fiscal year and elects to have an audit conducted in accordance with the provisions of OMB Circular A-133, as revised, the cost of the audit must be paid from non-Federal resources (i.e., the cost of such audit must be paid from provider resources obtained from other than Federal entities.)

An audit conducted in accordance with this part shall cover the entire organization for the organization's fiscal year. Compliance findings related to agreements with the Department of Elder Affairs or the Alliance for Aging, Inc. shall be based on the agreement's requirements, including any rules, regulations, or statutes referenced in the agreement. The financial statements shall disclose whether or not the matching requirement was met for each applicable agreement. All questioned costs and liabilities due to the Department of Elder Affairs or the Alliance for Aging, Inc. shall be fully disclosed in the audit report with reference to the Department of Elder Affairs or the Alliance for Aging, Inc. agreement involved. If not otherwise disclosed as required by Section .310(b)(2) of OMB Circular A-133, as revised, the schedule of expenditures of Federal awards shall identify expenditures by agreement number for each agreement with the Department of Elder Affairs or the

Alliance for Aging Inc. in effect during the audit period. Financial reporting packages required under this part must be submitted within the earlier of 30 days after receipt of the audit report or 9 months after the end of the provider's fiscal year end.

PART II: STATE FUNDED

This part is applicable if the provider is a nonstate entity as defined by Section 215.97(2), Florida Statutes. In the event that the provider expends a total amount of state financial assistance equal to or in excess of \$500,000 in any fiscal year of such provider (for fiscal years ending September 30, 2004 or thereafter), the provider must have a State single or project-specific audit for such fiscal year in accordance with Section 215.97, Florida Statutes; applicable rules of the Department of Financial Services; and Chapters 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General. EXHIBIT I to this agreement indicates state financial assistance awarded through the Department of Elder Affairs or the Alliance for Aging, Inc. by this agreement. In determining the state financial assistance expended in its fiscal year, the provider shall consider all sources of state financial assistance, including state financial assistance received from the Department of Elder Affairs or the Alliance for Aging, Inc., other state agencies, and other nonstate entities. State financial assistance does not include Federal direct or pass-through awards and resources received by a nonstate entity for Federal program matching requirements.

In connection with the audit requirements addressed in Part II, paragraph 1; the provider shall ensure that the audit complies with the requirements of Section 215.97(8), Florida Statutes. This includes submission of a financial reporting package as defined by Section 215.97(2), Florida Statutes, and Chapter 10.550 (local governmental entities) or 10.650 (nonprofit and for-profit organizations), Rules of the Auditor General.

If the provider expends less than \$500,000 in state financial assistance in its fiscal year (for fiscal years ending September 30, 2004 or thereafter), an audit conducted in accordance with the provisions of Section 215.97, Florida Statutes, is not required. In the event that the provider expends less than \$500,000 in state financial assistance in its fiscal year and elects to have an audit conducted in accordance with the provisions of Section 215.97, Florida Statutes, the cost of the audit must be paid from the nonstate entity's resources (i.e., the cost of such an audit must be paid from the provider resources obtained from other than State entities).

An audit conducted in accordance with this part shall cover the entire organization for the organization's fiscal year. Compliance findings related to agreements with the Department of Elder Affairs or the Alliance for Aging Inc. shall be based on the agreement's requirements, including any applicable rules, regulations, or statutes. The financial statements shall disclose whether or not the matching requirement was met for each applicable agreement. All questioned costs and liabilities due to the Department of Elder Affairs or the Alliance for Aging, Inc. shall be fully disclosed in the audit report with reference to the Department of Elder Affairs or the Alliance for Aging Inc. agreement involved. If not otherwise disclosed as required by Rule 691-5.003, Fla. Admin. Code, the schedule of expenditures of state financial assistance shall identify expenditures by agreement number for each agreement with the Department of Elder Affairs or the Alliance for Aging, Inc. in effect during the audit period. Financial reporting packages required under this part must be submitted within 45 days after delivery of the audit report, but no later than 12 months after the provider's fiscal year end for local governmental entities. Non-profit or for-profit organizations are required to be submitted within 45 days after delivery of the audit report, but no later than 9 months after the provider's fiscal year end. Notwithstanding the applicability of this portion, the Department of Elder Affairs or the Alliance for Aging, Inc. retains all right and obligation to monitor and oversee the performance of this agreement as outlined throughout this document and pursuant to law.

INSTRUCTIONS FOR THE CIVIL RIGHTS COMPLIANCE CHECKLIST

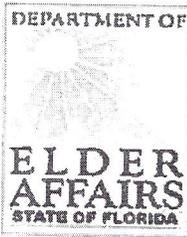

1. Describe the geographic service area such as a district, county, city or other locality. If the program/facility serves a specific target population such as adolescents, describe the target population. Also, define the type of service provided.
2. Enter the percent of the population served by race and sex. The population served includes persons in the geographical area for which services are provided such as a city, county or other regional area. Population statistics can be obtained from local chambers of commerce, libraries, or any publication from the 1980 Census containing Florida population statistics. Include the source of your population statistics. ("Other" races include Asian/Pacific Islanders and American Indian Alaskan Natives.)
3. Enter the total number of full-time staff and their percent by race, sex and disability. Include the effective date of your summary.
4. Enter the total number of clients who are enrolled, registered or currently served by the program or facility, and list their percent by race, sex and disability. Include the date that enrollment was counted.
5. Enter the total number of advisory board members and their percent by race, sex, and disability. If there is no advisory or governing board, leave this section blank.
6. Each recipient of federal financial assistance must have on file an assurance that the program will be conducted in compliance with all nondiscriminatory provisions as required in 45 CFR 80. This is usually a standard part of the contract language for DOEA recipients and their sub-grantees, 45 CFR 80.4 (a).
7. Is the race, sex, and national origin of the staff reflective of the general population? For example, if 10% of the population is Hispanic, is there a comparable percentage of Hispanic staff?
8. Where there is a significant variation between the race, sex or ethnic composition of the clients and their availability in the population, the program facility has the responsibility to determine the reasons for such variation and take whatever action may be necessary to correct any discrimination. Some legitimate disparities may exist when programs are sanctioned to serve target populations such as elderly or disabled persons, 45 CFR 80.3 (b) (6).
9. Do eligibility requirements unlawfully exclude persons in protected groups from the provision of services or employment? Evidence of such may be indicated in staff and client representation (Questions 3 and 4) and also through on-site record analysis of persons who applied but were denied services or employment, 45 CFR 80.3 (a) and 45 CFR 80.1 (b) (2).
10. Participants or clients must be provided services such as medical, nursing and dental care, laboratory services, physical and recreational therapies, counseling and social services without regard to race, sex, color, national origin, religion, age or disability. Courtesy titles, appointment scheduling and accuracy of record keeping must be applied uniformly and without regard to race, sex, color, national origin, religion, age or disability. Entrances, waiting rooms, reception areas, restrooms and other facilities must also be equally available to all clients, 45 CFR 80.3 (b).

11. For in-patient services, residents must be assigned to rooms, wards, etc., without regard to race color, national origin or disability. Also, residents must not be asked whether they are willing to share accommodations with persons of a different race, color, national origin, or disability, 45 CFR 80.3 (a).
12. The program/facility and all services must be accessible to participants and applicants, including those persons who may not speak English. In geographic areas where a significant population of non-English speaking people live, program accessibility may include the employment of bilingual staff. In other areas, it is sufficient to have a policy or plan for service, such as a current list of names and telephone numbers of bilingual individuals who will assist in the provision of services, 45 CFR 80.3 (a).
13. Programs/facilities must make information regarding the nondiscriminatory provisions of Title VI available to their participants, beneficiaries or any other interested parties. This should include information on their right to file a complaint of discrimination with either the Florida Department of Elder Affairs or the U.S. Department of HHS. The information may be supplied verbally or in writing to every individual, or may be supplied through the use of an equal opportunity policy poster displayed in a public area of the facility, 45 CFR 80.6 (d).
14. Report number of discrimination complaints filed against the program facility. Indicate the basis, e.g., race, color, creed, sex, age, national origin, disability, retaliation; the issues involved, e.g., services or employment, placement, termination, etc. Indicate the civil rights law or policy alleged to have been violated along with the name and address of the local, state or federal agency with whom the complaint has been filed. Indicate the current status, e.g., settled, no reasonable cause found, failure to conciliate, failure to cooperate, under review, etc.
15. The program/facility must be physically accessible to disabled individuals. Physical accessibility includes designated parking areas, curb cuts or level approaches, ramps and adequate widths to entrances. The lobby, public telephone, restroom facilities, water fountains, information and admissions offices should be accessible. Door widths and traffic areas of administrative offices, cafeterias, restrooms, recreation areas, counters and serving lines should be observed for accessibility. Elevators should be observed for door width, and Braille or raised numbers. Switches and controls for light, heat, ventilation, fire alarms, and other essentials should be installed at an appropriate height for mobility impaired individuals.
16. Section 504 of the Rehabilitation Act of 1973 requires that a recipient of federal financial assistance conduct a self-evaluation to identify any accessibility barriers. Self-evaluation is a four step process:
 - With the assistance of a disabled individual organization, evaluate current practices and policies which do not comply with Section 504.
 - Modify policies and practices that do not meet Section 504 requirements.
 - Take remedial steps to eliminate any discrimination that has been identified.
 - Maintain self-evaluation on file. (This checklist may be used to satisfy this requirement if these four steps have been followed.), 45 CFR 84.6.
17. Programs or facilities that employ 15 or more persons must adopt grievance procedures that incorporate appropriate due process standards and provide for the prompt and equitable resolution of complaints alleging any action prohibited by Section 504.45 CFR 84.7 (b).
18. Programs or facilities that employ 15 or more persons must designate at least one person to

- coordinate efforts to comply with Section 504.45 CFR 84.7 (a).
19. Continuing steps must be taken to notify employees and the public of the program facility's policy of nondiscrimination on the basis of disability. This includes recruitment material, notices for hearings, newspaper ads, and other appropriate written communication, 45 CFR 84.8 (a).
 20. Programs/facilities that employ 15 or more persons must provide appropriate auxiliary aids to persons with impaired sensory, manual or speaking skills where necessary. Auxiliary aids may include, but are not limited to, interpreters for hearing impaired individuals, taped or Braille materials, or any alternative resources that can be used to provide equally effective services, (45 CFR 84.52 (d)).
 21. Programs/facilities with 50 or more employees and \$50,000 in federal contracts must develop, implement and maintain a written affirmative action compliance program in accordance with Executive Order 11246, 41 CFR 60 and Title VI of the Civil Rights Act of 1964, as amended.

Re: Fee proposal to perform preliminary analysis to identify adjacent properties and structures within right of way to be impacted by the sea level rise (SLR) considerations in Roadway and Drainage improvements design for Lake Surprise Estate Subdivision

Dear Ms. Clarke;

EAC Consulting Inc. (EAC) is pleased to submit this fee proposal to Monroe County to provide civil engineering services in reference to County's request to incorporate Sea Level Rise (SLR) considerations with respect to infrastructure improvements proposed within Lake Surprise Estate.

Background & Scope of Services:

Monroe County has conducted a sea level rise study and the recommendation from the study to maintain roadway elevations at a minimum 2.93 feet NGVD. Accordingly, the County intends to ensure compliance with this requirement by elevating the roadways within the subdivision to accomplish a minimum edge of pavement elevation at 2.93 ft NGVD and maintaining a 2% roadway cross slope cross section. The County requires EAC Consulting, Inc., to perform a preliminary analysis to determine the following:

1. Identify the adjacent properties of the roadways that will be impacted by raising the elevation of the roadway
2. Identify the structures within the right of way that will be impacted by the raising of the elevation of the roadway.

The following roadways segments are assumed to be impacted and thus will be included in the analysis:

- Long Key Road (From Largo Road to North End)
- Lower Matecumbe Road (From Plantation Road to North End)
- Largo Road (From Grassy Road to Plantation Road)
- Plantation Road (From Largo Road to Upper Matecumbe Road)
- Upper Matecumbe Road (250 LF From Plantation Road)
- Lake Surprise (150 LF From Private Community - West End)
- Vaca Road (250 LF From West End)
- Bahia Honda Road (From East End to Largo Road)
- Big Pine Road (From East End to Largo Road)
- Summerland Road (From East End to Overseas Highway/ US-1)
- Largo Road (From Bahia Honda Road to Big Pine Road)

Task 1 - Data Collection and Review:

- Site Visits: EAC will conduct site visits to identify any obstacle for tie-ins, harmonization, drainage or gravity wall construction to incorporate in the survey and analysis. Based on the amount of houses two days have been allocated for the site visits.

Task 2 - Preliminary Analysis:

EAC will review the sea level rise report which is provided by the County to incorporate into the analysis. The elevation difference between the raised edge of pavement and the existing right of way boundary every 100 feet will be analyzed to determine the effect of the harmonization.

815 NW 57 Avenue, Suite 402 Miami, FL 33126 | Phone: 305-264-2557 | Fax: 305-264-8363 | www.eacconsult.com | CA # 7011

Deliverables:

EAC shall furnish to the County a letter report identifying the houses that will be impacted and thus requiring survey and agreements between the property owners and the county for harmonization. The letter report will also identify the structures that need to be adjusted due to the elevation change.

Schedule:

EAC will provide the report on December 18, 2015.

Fee and Costs:

Our fee proposal is summarized as follows:

Tasks	Descriptions	Fee
1	Data Collection & Review - Lump Sum	\$9,480.00
2	Preliminary Analysis - Lump Sum	\$13,480.00
	Project Management - Lump Sum	\$3,780.00
	Reimbursables	\$500.00
	TOTAL (LUMP SUM)	\$27,240.00

We thank you for the opportunity and look forward to work with the County on this project.

Sincerely,

This paragraph shall be incorporated by reference into any assignment or subcontract and any assignee or subcontractor shall comply with all of the provisions of this agreement. Subject to the provisions of the immediately preceding sentence, each party hereto binds itself, its successors, assigns and legal representatives to the other and to the successors, assigns and legal representatives of such other party.

9.4 NO THIRD PARTY BENEFICIARIES

Nothing contained herein shall create any relationship, contractual or otherwise, with or any rights in favor of, any third party.

9.5 TERMINATION

- A. In the event that the CONSULTANT shall be found to be negligent in any aspect of service, the COUNTY shall have the right to terminate this agreement after five days written notification to the CONSULTANT.
- B. Either of the parties hereto may cancel this Agreement without cause by giving the other party sixty (60) days written notice of its intention to do so.

9.6 CONTRACT DOCUMENTS

This contract consists of the Request for Proposals, any addenda, the Form of Agreement (Articles I-IX), the CONSULTANT'S response to the RFQ, the documents referred to in the Form of Agreement as a part of this Agreement, and attachments A, B and C, and modifications made after execution by written amendment. In the event of any conflict between any of the Contract documents, the one imposing the greater burden on the CONSULTANT will control.

9.7 PUBLIC ENTITIES CRIMES

A person or affiliate who has been placed on the convicted vendor list following a conviction for public entity crime may not submit a bid on contracts to provide any goods or services to a public entity, may not submit a bid on a contract with a public entity for the construction or repair of a public building or public work, may not submit bids on leases of real property to public entity, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with any public entity in excess of the threshold amount provided in Section 287.017 of the Florida Statutes, for CATEGORY TWO for a period of 36 months from the date of being placed on the convicted vendor list.

By signing this Agreement, CONSULTANT represents that the execution of this Agreement will not violate the Public Entity Crimes Act (Section 287.133, Florida Statutes). Violation of this section shall result in termination of this Agreement and recovery of all monies paid hereto, and may result in debarment from COUNTY'S competitive procurement activities.

In addition to the foregoing, CONSULTANT further represents that there has been no determination, based on an audit, that it or any subconsultant has committed an act defined by Section 287.133, Florida Statutes, as a "public entity crime" and that it has not been formally charged with committing an act defined as a "public entity crime" regardless of the amount of money involved or whether CONUSULTANT has been placed on the convicted vendor list.

CONSULTANT will promptly notify the COUNTY if it or any subcontractor or subconsultant is formally charged with an act defined as a "public entity crime" or has been placed on the convicted vendor list.

9.8 MAINTENANCE OF RECORDS

CONSULTANT shall maintain all books, records, and documents directly pertinent to performance under this Agreement in accordance with generally accepted accounting principles consistently applied. Records shall be retained for a period of five years from the termination of this agreement. Each party to this Agreement or its authorized representatives shall have reasonable and timely access to such records of each other party to this Agreement for public records purposes during the term of the Agreement and for four years following the termination of this Agreement. If an auditor employed by the COUNTY or Clerk determines that monies paid to CONSULTANT pursuant to this Agreement were spent for purposes not authorized by this Agreement, or were wrongfully retained by the CONSULTANT, the CONSULTANT shall repay the monies together with

interest calculated pursuant to Sec. 55.03, of the Florida Statutes, running from the date the monies were paid by the COUNTY.

9.9 GOVERNING LAW, VENUE, INTERPRETATION, COSTS, AND FEES

In the event that any cause of action or administrative proceeding is instituted for the enforcement or interpretation of this Agreement, COUNTY and CONSULTANT agree that venue shall lie in the 16th Judicial Circuit, Monroe County, Florida, in the appropriate court or before the appropriate administrative body. This agreement shall not be subject to arbitration. Mediation proceedings initiated and conducted pursuant to this Agreement shall be in accordance with the Florida Rules of Civil Procedure and usual and customary procedures required by the circuit court of Monroe County.

9.10 SEVERABILITY

If any term, covenant, condition or provision of this Agreement (or the application thereof to any circumstance or person) shall be declared invalid or unenforceable to any extent by a court of competent jurisdiction, the remaining terms, covenants, conditions and provisions of this Agreement, shall not be affected thereby; and each remaining term, covenant, condition and provision of this Agreement shall be valid and shall be enforceable to the fullest extent permitted by law unless the enforcement of the remaining terms, covenants, conditions and provisions of this Agreement would prevent the accomplishment of the original intent of this Agreement. The COUNTY and CONSULTANT agree to reform the Agreement to replace any stricken provision with a valid provision that comes as close as possible to the intent of the stricken provision.

9.11 ATTORNEY'S FEES AND COSTS

The COUNTY and CONSULTANT agree that in the event any cause of action or administrative proceeding is initiated or defended by any party relative to the enforcement or interpretation of this Agreement, the prevailing party shall be entitled to reasonable attorney's fees, court costs, investigative, and out-of-pocket expenses, as an award against the non-prevailing party, and shall include attorney's fees, courts costs, investigative, and out-of-pocket expenses in appellate proceedings.

9.15 ADJUDICATION OF DISPUTES OR DISAGREEMENTS

COUNTY and CONSULTANT agree that all disputes and disagreements shall be attempted to be resolved by meet and confer sessions between representatives of each of the parties. If no resolution can be agreed upon within 30 days after the first meet and confer session, the issue or issues shall be discussed at a public meeting of the Board of County Commissioners. If the issue or issues are still not resolved to the satisfaction of the parties, then any party shall have the right to seek such relief or remedy as may be provided by this Agreement or by Florida law. This provision does not negate or waive the provisions of paragraph 9.5 concerning termination or cancellation.

9.16 COOPERATION

In the event any administrative or legal proceeding is instituted against either party relating to the formation, execution, performance, or breach of this Agreement, COUNTY and CONSULTANT agree to participate, to the extent required by the other party, in all proceedings, hearings, processes, meetings, and other activities related to the substance of this Agreement or provision of the services under this Agreement. COUNTY and CONSULTANT specifically agree that no party to this Agreement shall be required to enter into any arbitration proceedings related to this Agreement.

- B. It is understood and agreed that, in order to permit federal participation, no supplemental agreement of any nature may be entered into by the parties hereto with regard to the work to be performed hereunder without the approval of the U.S. Department of Transportation, anything to the contrary in this Agreement notwithstanding.
- C. Compliance with Regulations: The Consultant shall comply with the Regulations of the U.S. Department of Transportation Title 49, Code of Federal Regulations, Part 21, as they may be amended from time to time, (hereinafter referred to as the Regulations), which are herein incorporated by reference and made a part of this Agreement.
- D. Nondiscrimination: The Consultant, with regard to the work performed during the contract, shall not discriminate on the basis of race, color, national origin, sex, age, disability, religion or family status in the selection and retention of subcontractors, including procurements of material and leases of equipment. The Consultant will not participate either directly or indirectly in the discrimination prohibited by Section 21.5 of the Regulations, including employment practices when the contract covers a program set forth in Appendix B of the Regulations.
- E. Solicitations for Subcontracts, Including Procurements of Materials and Equipment: In all solicitations made by the Consultant, either by competitive bidding or negotiation for work to be performed under a subcontract, including procurements of materials and leases of equipment, each potential subcontractor or supplier shall be notified by the Consultant of the Consultant's obligations under this contract and the Regulations relative to nondiscrimination on the basis of race, color, national origin, sex, age, disability, religion or family status.
- F. Information and Reports: The Consultant will provide all information and reports required by the Regulations, or directives issued pursuant thereto, and will permit access to its books, records, accounts, other sources of information, and its facilities as may be determined by the Florida Department of Transportation, Federal Highway Administration, Federal Transit Administration, Federal Aviation Administration, and/or Federal Motor Carrier Safety Administration to be pertinent to ascertain compliance with such Regulations, orders and instructions. Where any information required of the Consultant is in the exclusive possession of another who fails or refuses to furnish this information, the Consultant shall so certify to the Florida Department of Transportation, Federal Highway Administration, Federal Transit Administration, Federal Aviation Administration, and/or the Federal Motor Carrier Safety Administration as appropriate, and shall set forth what efforts it has made to obtain the information.
- G. Sanctions for Noncompliance: In the event of the Consultant's noncompliance with the nondiscrimination provisions of this contract, the Florida Department of Transportation shall impose such contract sanctions as it or the Federal Highway Administration, Federal Transit Administration, Federal Aviation Administration, and/or Federal Motor Carrier Safety Administration may determine to be appropriate, including, but not limited to,
 - 1. withholding of payments to the Consultant under the contract until the Consultant complies and/or

In the event a Consultant becomes involved in, or is threatened with, litigation with a subcontractor or supplier as a result of such direction, the Consultant may request the Florida Department of Transportation to enter into such litigation to protect the interests of the Florida Department of Transportation, and, in addition, the Consultant may request the United States to enter into such litigation to protect the interests of the United States.

Question from: Amando Silveira (Burke Construction Group, Inc.) at 03:30 PM on 11/13/2015

Per our weekly meeting yesterday, we have observed that the existing slabs to the warehouse areas are at different elevations. Please see attached plan and picture. The owner stated that they are ok with a small 6" transition ramp between the slabs. However, please note that this will cause the exterior doors to be at different elevations, and the head room underneath the mezzanine will vary. Please advise what the minimum head room is and provide direction on how to proceed with the different transition heights. Exterior doors need to be set flush with the ground.

All Replies:

Remove a portion of the existing slab to either side of the gap resulting in a new wider gap of a minimum of 12 inches in width. Clean and remove all loose debris and infill with new concrete over original slab to match adjacent levels.

AGENDA ITEM SUMMARY**

Meeting Date: February 10, 2016

Division: Public Works

Bulk Item: Yes No

Department: P.W. Facilities and Roads & Bridges

Staff Contact Person/Phone #: Giselle Lopez 852-7161

AGENDA ITEM WORDING: Approval to waive Sections 17-4 and 18-1 of the County Code to allow for daily and overnight camping in the S.E. corner of Key Largo Community Park by volunteers and cyclists participating in the 2016 Bike MS: Breakaway to Key Largo on March 5, 6, & 7, 2016, for use of Card Sound Road and Bridge, and for waiver of all fees associated with the use of Monroe County facilities and roads and bridges during those dates.

ITEM BACKGROUND: For the last 29 years the MS Bike Ride has been an annual event supported by the County. The South Florida Chapter of the National Multiple Sclerosis Society ("NMSS") is requesting the use of the park for overnight camping as a cost free alternative for volunteers and participants who need it during the event. MCC Sec. 17-4 prohibits camping on County property. MCC Sec. 18-1 mandates that the park shall be closed during the hours of 11:00PM to 7:00AM. The normal operating hours for the park are 7:00AM to 9:00PM. The BOCC may waive Sec. 18-1 on a per-event basis. The NMSS will provide portable shower and bathroom facilities in the designated camping area. The NMSS propose to set up the operation on Saturday March 5, 2016. Details of the schedule are attached. The BOCC may waive the tolls pursuant to MCC Sec. 19-4 (b)(4)j.

PREVIOUS RELEVANT BOCC ACTION: In previous years, the BOCC has waived all fees for the use of County facilities including tolls on Card Sound Road for this event.

Key West, Florida 33040

Dear Mr. Gastesi:

Thank you for your continued support of the National Multiple Sclerosis Society's cycling event, Bike MS. It is through the combined commitment of riders, volunteers, sponsors and community leaders that we are able to continue the programs, services, and research that helps those affected by MS.

The 2016 Bike MS: Breakaway to Key Largo will take place on March 5 and 6. We kindly request your support once again by waiving the \$300 fee for this two-day event.

Monroe County has assisted the National MS Society with the use of Card Sound Road and Card Sound Bridge without cost. This support keeps our expenses down and allows us to devote more funds to our mission. We would be grateful for this support once again.

We also hope you can assist us by waiving the fees at the toll booth. In the past, we have placed a small ramp at the toll booth and directed riders over the ramp. If we can avoid using the ramp, it would smooth the passage of participants through the area, as they would not need to navigate over the ramp.

Thank you again for support and commitment to helping the MS community.

Sincerely,

Cristina Vidal
Bike MS Director

Re: 2016 Bike MS: Breakaway to Key Largo

Dear Mr. Thompson,

Thank you for your continued support of the Bike MS: Breakaway to Key Largo charity bicycle event. We are asking for Waste Management to waive the tipping fees associated with the trash removal of three 20 yard roll off dumpsters and one 6 yard dumpster by Keys Sanitation in Key Largo.

The event will take place on March 5 and 6, 2016. The success of this annual event is credited largely to our partners who support us through in-kind and financial donations.

Bike MS is the South Florida Chapter's largest fundraiser and it helps us serve over 7,500 families who are affected by multiple sclerosis in 10 counties, including Monroe.

We look forward to working with you and thank you once again.

Pet-Friendly Hurricane Evacuation Center (PHEC)

Tentative Acceptance Letter

Dear Applicant:

This letter serves to acknowledge receipt of Part 1 of your application for the Monroe County Pet-Friendly Hurricane Evacuation Center (PHEC). For the registration process to be complete, you must fill out and return Part 2 of the application and return it to:

**Pet-Friendly Shelter Application
c/o Monroe County Emergency Management
490 63rd Street, Suite 150
Marathon, FL 33050**

Failure to return the form negates your application and hurricane evacuation center eligibility. It is your responsibility to contact the Monroe County Emergency Management at **(305)289-6018** to assure that the form was received and that your registration is complete.

This PHEC is the first of its kind in Monroe County and we are working to assure a successful operation. However, the success of this pet-friendly hurricane evacuation center depends upon you. On Part 2 of the application you acknowledged and agreed to certain provisions regarding shelter management. You are expected to abide by these provisions. Any infraction can result in your removal from the registration database and denial of use of the PHEC for current and future storms. You should understand that this letter, your application, or your compliance with all PHEC requirements do not constitute a binding commitment or contract that you and your pets will be accepted at the PHEC. The purpose of this application process is to facilitate the accommodation of applicants. However, everyone should understand that even if they comply with all application requirements and receive this letter, there is no guarantee or contractual commitment that you and your pets will be accepted at the PHEC.

If you live in one of the County's hurricane evacuation zones, mobile homes, or in a structure that has been deemed unsafe by the County, you must monitor the hurricane event and listen for the mandatory evacuation order. Upon issuance of a mandatory evacuation order for your area, you should report to the PHEC with all of the items listed in this letter. It is important to note that opening of this shelter is at the sole discretion of Monroe County and that you need to have a contingency plan for yourself and your pet(s) if this shelter is not opened for any reason, or if you and your pet are not accepted in the PHEC.

Upon arrival at the PHEC, all animals will be examined by a qualified shelter personnel / licensed veterinarian. The veterinarian will only examine the animal and will not vaccinate or offer medical treatment. This examination will determine if the animal presents a health or safety risk to any human or other animal. All proof of vaccinations must be presented at this time. Any animal deemed a risk to humans or other animals, due to illness or behavioral problems, will not be allowed to enter. It is imperative that your animal is clean, healthy, and that all vaccinations are up to date. It is within the County's sole discretion to determine whether any pet will be accepted at the PHEC.

Page 6 of 8

Items you must bring to the PHEC:

- Valid photo identification and recent utility bill showing current address for adult registrant
- Proof of all current required vaccinations for each pre-registered pet (list appears on page)
- All personal hygiene items, medications, and bedding supplies for each member of your family

- Appropriate crate/cage for each pet; bedding (specifications are below).
- A sheet or other covering material for each crate to reduce the visual stimuli of the animal.
- A secure collar and sturdy leash for each dog.

Although we do not list numeric specifications for the size of any one crate or cage, the following criteria apply for dogs and cats:

Housing must be large enough to allow the animal to stand, turn around, and fully recline. It should be constructed of wire or heavy plastic and must be well ventilated. Crates/cages excessive in size and exercise pens are not allowed. Smaller dogs and cats may be housed together as a species as long as they are fully socialized and the provisions for movement are met for each animal.

All dogs must have the following current vaccinations:

Rabies
Distemper/Parvo
Bordetella
Coronavirus

All cats must have the following current vaccinations:

Rabies
Feline Leukemia
Rhinothracheitis
Calicivirus
Panleukopenia (distemper)

Ferrets: Housing for ferrets must allow ample room for movement, constructed of wire or heavy plastic, and allow for the appropriate bedding material without spillage. Up to three (3) ferrets may be housed together as long as they are fully socialized and the provisions for movement are met for each animal.

All ferrets must have the following current vaccinations:

Rabies
Distemper

Small mammals: Housing for small mammals (gerbils, guinea pigs, hamsters, mice, rabbits, rats) that provides space for ample movement. Cages must be chew-proof, such as wire or plastic, and have a base deep enough to hold appropriate bedding. Small mammals normally housed together may stay together as long as the aforementioned provisions for movement are met for each animal.

Birds: Cages must allow for adequate movement, minimal flight and be fully ventilated. Up to three (3) birds may be housed together as long as they are fully socialized. Food and water dishes must be easily accessible and not require the opening of main access. Covers need to be provided to deter noise and reduce stress.

Thank you for pre-registering your family and pets. Please review all of the criteria listed in this packet before submitting and address any questions to Emergency Management at 305-289-6018.

Expense Reimbursement Requirements

This document is intended to provide basic guidelines to Human Service and Community-Based Organizations, county travelers, and contractual parties who have reimbursable expenses associated with Monroe County business. These guidelines, as they relate to travel, are from the Monroe County Code of Ordinances and State laws and regulations.

A cover letter (see Attachment B) summarizing the major line items on the reimbursable expense request needs to also contain the following notarized certified statement:

"I certify that the above checks have been submitted to the vendors as noted and that the attached expenses are accurate and in agreement with the records of this organization. Furthermore, these expenses are in compliance with this organization's contract with the Monroe County Board of County Commissioners and will not be submitted for reimbursement to any other funding source."

Invoices should be billed to the contracting agency. Third party payments will not be considered for reimbursement. Remember, the expense should be paid prior to requesting a reimbursement.

Only current charges will be considered, no previous balances.

Reimbursement requests will be monitored in accordance with the level of detail in the contract. This document should not be considered all-inclusive. The Clerk's Finance Department reserves the right to review reimbursement requests on an individual basis. Any questions regarding these guidelines should be directed to 305-292-3534.

Data Processing, PC Time, etc.

The vendor invoice is required for reimbursement. Inter-company allocations are not considered reimbursable expenditures unless appropriate payroll journals for the charging department are attached and certified.

Payroll

A certified statement verifying the accuracy and authenticity of the payroll expense is needed. If a Payroll Journal is provided, it should include: dates, employee name, salary or hourly rate, total hours worked, withholding information and payroll taxes, check number and check amount. If a Payroll Journal is not provided, the following information must be provided: pay period, check amount, check number, date, payee, support for applicable payroll taxes.

Postage, Overnight Deliveries, Courier, etc.

A log of all postage expenses as they relate to the County contract is required for reimbursement. For overnight or express deliveries, the vendor invoice must be included.

Rents, Leases, etc.

A copy of the rental or lease agreement is required. Deposits and advance payments are not allowable expenses.

A log of copy expenses as they relate to the County contract is required for reimbursement. The log must define the date, number of copies made, source document, purpose, and recipient. A reasonable fee for copy expenses will be allowable. For vendor services, the vendor invoice and a sample of the finished product are required.

Supplies, Services, etc.

For supplies or services ordered, a vendor invoice is required.

Telefax, Fax, etc.

A fax log is required. The log must define the sender, the intended recipient, the date, the number called, and the reason for sending the fax.

Telephone Expenses

A user log of pertinent information must be remitted including: the party called, the caller, the telephone number, the date, and the purpose of the call.

Travel and Meal Expenses

Travel expenses must be submitted on a State of Florida Voucher for Reimbursement of Travel Expenses. Travel reimbursement requests must be submitted and will be paid in accordance with Monroe County Code of Ordinances and State laws and regulations. Credit card statements are not acceptable documentation for reimbursement. If attending a conference or meeting a copy of the agenda is needed. Airfare reimbursement requires the original passenger receipt portion of the airline ticket. A travel itinerary is appreciated to facilitate the audit trail. Auto rental reimbursement requires the vendor invoice. Fuel purchases should be documented with paid receipts. Taxis are not reimbursed if taken to arrive at a departure point: for example, taking a taxi from one's residence to the airport for a business trip is not reimbursable. Parking is considered a reimbursable travel expense at the destination. Airport parking during a business trip is not.

A detailed list of charges is required on the lodging invoice. Balance due must be zero. Room must be registered and paid for by traveler. The County will only reimburse the actual room and related bed tax. Room service, movies, and personal telephone calls are not allowable expenses.

CAPITAL PROJECT FUNDING PROCESS

This application is intended for applicants whose facility has a primary purpose of promoting tourism.

The Monroe County Tourist Development Council (TDC) administers the four (4) cent bed tax collected for the purpose of promoting the Florida Keys as a tourist destination. Each year, the TDC advertises a Request for Applications (RFA) for capital project funding through the TDC. Projects must be owned and operated by either a **governmental entity** or **non-profit organization**. Individuals and for-profit organizations and companies **are not eligible** to apply for Capital Projects funds. Applicants must be registered to do business in Florida. All applications will be reviewed by the appropriate District Advisory Committees (DAC's), who shall make recommendations on funding the project to the TDC. Upon approval of recommended funding allocation by the TDC, the administrative office will coordinate with the project coordinator to establish an agreement for the project, and will present the proposed agreement to the County for final approval.

This application will be funded as a fifty percent (50%) reimbursement of funds expended by any individual organization. The applicant must show that all funds (100%) are available for the project at the time of application so that there is no delay in the progress of the project, and that TDC funding is not used as "matching" funds.

IMPORTANT INFORMATION

All information furnished or disclosed as part of the application process is considered public record by the laws of the State of Florida.

The applicant shall not lobby, solicit or act to influence the advisory committee members and/or the TDC board members in any way that may have an effect on the outcome of the competition, discussion or negotiations leading to the allocation of funding, or an award of an agreement as reviewed and approved by the County Attorney's office. Such action may lead to withdrawal of the application from consideration.

Commencement of Project: No portion of the project for which you are seeking TDC funding may commence prior to the approval of an agreement by the Monroe County Board of County Commissioners. Once your agreement has been approved by the BOCC then the project work described in Exhibit A must commence before the end of the fiscal year in which it is funded. Example: FY 2017 funding would be between October 1, 2016 to September 30, 2017, or between the date the BOCC approved your agreement and September 30, 2017. Proof that the project commenced within the fiscal year funded may be requested by the TDC administrative office. For projects requesting \$10,000 and under please see page 6.

Prior to filling out application, please go to www.sunbiz.org to ensure that your organization is registered to do business in the state of Florida. Only applicants that are duly registered will be accepted. **Print out and attach as Exhibit A.**

Cost of preparation and submission of the application is the responsibility of the applicant.

Applicant shall complete, copy, sign (by an authorized officer) and submit the correct number of copies of the application to the Monroe County Purchasing Department. (Please DO NOT use three (3) ring hard binders, soft binders or spiral binding; no binders are preferred.)

Completed Application: The application shall be considered complete upon receipt and should stand alone with no other information being provided after-the-fact other than any additional information that may be requested by the TDC administrative office, or questions from the DAC at the allocation meeting.

All attachments should be noted as such in the top right hand corner of each sheet – please do not use tab inserts.

Applicant shall familiarize itself with referenced online materials noted in this application (sample agreement): <http://www.monroecounty-fl.gov/index.aspx?nid=328>.

Any part of the project for which the applicant wishes to seek reimbursement from the County, must NOT commence prior to the date of County approval.

Be advised that if your organization is awarded funding you will be required to enter into an agreement which delegates you to maintain accurate and complete documentation of the project. You will be required to obtain a signed amendment to the agreement before making any substantive changes to the project or you may nullify the County's obligation to pay. You will be required to comply with the following reimbursement procedures outlined in the sample agreement which can be found at <http://www.monroecounty-fl.gov/index.aspx?nid=328>.

The recipient of TDC capital project funding shall designate a project manager if no licensed architect, engineer or general contractor is involved in the project. If the project is performed by County or City personnel, the project manager shall be the Engineer, Building Official or Construction Manager of that local government.

Taxes: The TDC/County is exempt from Federal, Excise and State of Florida Sales Tax.

Maintenance: The applicant shall be responsible for all maintenance and operational costs of the premises improved or constructed with the use of funding from the TDC/County. The applicant shall be responsible to the TDC/County for the safekeeping and proper use of the property entrusted to applicant's care, to include any and all insurance for the value of the equipment and any maintenance or service contracts relating to such equipment for its service life. Any disposal of assets procured through funding under this agreement shall comply with chapter 274, F.S. or chapter 617, F.S., dependent upon the type of entity funded under this agreement.

Permits: Applicant shall be responsible for securing all federal, state and local development approval and permits necessary to complete the project. Award of funds under this application do not indicate any development approval by the County and applicant shall be required to comply with all County concurrency requirements under land use laws of the County and State. The TDC/County shall not reimburse for the cost of permits.

Insurance: Applicant shall provide the TDC/BOCC with current insurance certificates as per the requirements set forth within the funding agreement. The TDC/County shall not reimburse for the cost of insurance relating to the project for which the applicant is receiving funding.

Performance Guarantee: A successful applicant shall warrant, by signing this application, that applicant has the financial capability of completing the project as planned without the need to request further funding from TDC/County for same. Applicant shall warrant by signing this application and confirm in writing (in the form of bank statements; signed letter from the bank stating that funds are in the bank for the specified project; documentation provided by a financial institution of a line of credit assigned to the specific project within the application) that applicant has the funds in place at the time of the application for grant funds to be able to complete the project prior to seeking reimbursement of TDC funds. A governmental applicant shall provide a line item budget for the project in question, and proof that the budget has been adopted by the governing board of that entity. The applicant by signing the application certifies that: applicant, its principals, and any previously owned business is/are not and have never been in default to Monroe County under the terms of any contract. (Default means failure to fulfill contractual obligations where County had to take legal action to obtain remedy or where a bonding company had to make good for applicant.)

In-kind services: In-kind services (donated/free/volunteered labor; materials; goods; services) up to 25% of the total cost of the project may be considered to meet the 100% funding of the project. Applicant shall provide a schedule of values for each unit of in-kind service and/or goods at the time of the application. Volunteered labor, as a component of in-kind services, will be eligible for reimbursement at a reasonable hourly rate for the type of work/service being performed (e.g. an architect who volunteers to paint will be able to seek reimbursement for the reasonable rate for the painting work performed not the professional rate of an architect). Should funding be allocated, County/TDC reserves the right to deny the application of certain in-kind services and goods and to negotiate a revised schedule of values for permissible items. For example, county will not accept as in-kind, the waiver of governmental fees, or in-kind towards the acquisition of property. The amount of in-kind services you note within your application shall be entered into your final agreement. Applicants will not be able to introduce a request to allow in-kind services after submission of the application.

Project Quotes and Bidding Process:

Governmental Entities: An applicant which is a governmental entity shall comply with the procurement regulations and policies to which it is subject. A copy of these policies will need to be submitted as part of your reimbursement request.

Not-for-Profits: Work **under \$50,000** requires two written quotes **or** a notarized statement as to why such written quotes were not obtainable for the work to complete the project. Work **\$50,000 or more** requires a competitive bid process. These will need to be submitted as part of your reimbursement request.

Construction and Other Contracts: Applicant, by signing the application, warrants that, if awarded funds for the project, all contracts, for construction or otherwise, to complete the project shall be met in compliance with all applicable laws and County purchasing policy and to comply particularly with F.S. Chapter 255, Chapter 274 and Chapter 287. Applicant further agrees to provide TDC/County and their designated representatives with:

- a) access to the project premises for inspection of the progress of the project;
- b) documentation including copies of all sub-contracts/Request For Bids verifying compliance with purchase/construction/architectural contract requirements of the County [Notice to owner: list of sub-contractors must be provided to County]; and
- c) access to all records concerning the project. These records must be retained by applicant for a minimum of four (4) years after the termination date of agreement.

This requirement may be for a different time period than that required by other government agencies. All records must be kept in accordance with Generally Accepted Accounting Principles.

Termination for Default/Convenience: The TDC/County reserves the right to terminate any agreement if, in its opinion, there shall be a failure at any time to properly perform faithfully any portion of the project as funded by TDC/County according to the plan presented with the application, or as modified and accepted in writing by TDC/County. Further, TDC/County reserves the right to terminate payments under this agreement should the anticipated funding become unavailable for any reason. Should termination occur under this provision, TDC/County shall give applicant thirty (30) days notice prior to termination.

Payments: Applicant shall submit all documentation required by the County Finance Department in accordance with instructions from said department, prior to payment of any funds awarded. **The TDC Application for Payment forms provided in the TDC reimbursement package shall be used.** Ten percent (10%) of every progress payment shall be withheld by County until certification of completion of project.

Design/Architectural Costs: Final design plans and architectural costs will be paid upon completion of the physical bricks and mortar portion of the project outlined within the agreement. Applicant shall submit for reimbursement of final design plans and architectural services within the last segment of their proposed project (Exhibit A). This is to ensure that TDC dollars are used for completed projects that are open to the public. No portion of the final design plans or architectural drawings for which you are seeking TDC funding may commence prior to the approval of an agreement by the Monroe County Board of County Commissioners. Applicant may submit a preliminary plan within their application to provide the District Advisory Committee and TDC with an idea of the proposed plan.

Acquisition of Property: Applications for acquisition of property will only be considered if the applicant can confirm availability of funding for one hundred percent (100%) of the purchase price through a bank statement showing that the entity has funding set aside in a line item for the purchase of the property, or that a loan from a financial institution has been fully approved; there are no liens on the property; and a clear title of ownership will be held by the entity requesting funding upon the closing of the purchase of the property. A clear title in the name of the contracting entity will be required to submit for reimbursement of the TDC funds allocated. The property shall be used for a minimum of ten (10) years as a tourist facility. The County will evaluate non-compliance of use as a tourist facility and upon request by the County the

applicant shall pay a prorated reimbursement of funding allocated. The purchase or down payment of the property may not commence prior to approval of a funding agreement between the County and contracted entity. No in-kind services apply to the purchase of property, and payment will be made in one reimbursement check upon completion of the requirements set forth within the funding agreement. A Restrictive Covenant on the property will be required to secure TDC/County funds.

Acknowledgements: Applicant shall be required to display an appropriate public acknowledgment of the support of the Monroe County Tourist Development Council in a publicly prominent area of the project.

Funding Allocations: DAC recommendation on funding allocations shall be limited to recommending allocations which do not exceed the amount requested by the applicant.

Funding requests may be denied, or reduced to a lesser amount than requested by the applicant.

Projects Requesting \$10,000 and Under: Projects requesting \$10,000 and under may enter into a “Streamlined Process” (this eliminates the requirement for a formal contract to be entered into with the Board of County Commission which allows a faster start time for your project; insurance documentation; and County Engineer Department approval of work completed) whereby the applicant will swear or affirm that the work will be completed in accordance with the Streamline Process. Upon approval by the TDC, the administrative office will provide the applicant with a commencement date; project summary sheet; and reimbursement package. Applicant will be required to comply with reimbursement procedures outlined in the sample Project Summary Sheet, which can be found at <http://www.monroecounty-fl.gov/DocumentCenter/Home/View/9761>.

Public Record: All information furnished or disclosed as part of the application process is considered public record by the laws of the State of Florida.

In evaluating applications for acquisition funding, an important consideration is the appropriateness of the size of the site to be acquired. Determinations of the appropriateness of site size will be made on a case-by-case basis and will depend on the characteristics for which the property is considered to be significant. Sufficient property should be acquired to assure that the historic relationship of a structure or archaeological site to its surrounding environment is preserved. However, it is important that no more property than is necessary to achieve established preservation objectives be included in the acquisition project application. As this factor is crucial to favorable consideration of your grant application and will have substantial impact on the cost of the required application documentation, we encourage prospective applicants to consult with the staff of the TDC Administrative Office prior to initiating the required documentation.

f) Public accessibility and use: Indicate the extent to which the property is currently or will be scheduled to be open to the public each year (hours per day, days per week and weeks per year) upon project completion. General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Purpose of Form

A person who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN to the person requesting it (the requester) and, when applicable, to:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),
2. Certify that you are not subject to backup withholding, or
3. Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income.

Note. If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Definition of a U.S. person. For federal tax purposes, you are considered a U.S. person if you are:

- An individual who is a U.S. citizen or U.S. resident alien,
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States,
- An estate (other than a foreign estate), or
- A domestic trust (as defined in Regulations section 301.7701-7).

Special rules for partnerships. Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax on any foreign partners' share of income from such business. Further, in certain cases where a Form W-9 has not been received, a partnership is required to presume that a partner is a foreign person, and pay the withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid withholding on your share of partnership income.

EVENT FUNDING PROCESS

The Monroe County Tourist Development Council (TDC) administers the four (4) cent bed tax collected for the purpose of promoting the Florida Keys as a tourist destination. Each year the TDC invites applicants who are registered to do business in Florida, to apply for funding for events in the Florida Keys. All applications will be reviewed by the appropriate District Advisory Committees (DAC), who shall make recommendations on funding the event to the TDC. Upon approval of recommended funding allocation by the TDC, the administrative office will work with the event sponsor to establish a contract for the event, and will present proposed contract to the Monroe County Board of County Commissioners for final approval.

DEFINITION OF AN EVENT

The special event funding program is intended for an organized special annual event that generates overnight visitors for multiple Monroe County lodging properties, as well as out-of-area marketing exposure, and is open to the general public. Historically these events have included: festivals, concerts, and sporting events. Qualified special events shall guarantee heads-in-beds (overnight visitors) and/or entertain visitors and brand the destination.

TDC will only consider reimbursement of permissible marketing expenditures that highlight the specific special event reflected within the contract with the TDC/BOCC versus the regular programming of a business, organization or the facility.

DESTINATION EVENTS

For the purposes of this solicitation, a Destination event is developed and produced to entertain the public and promote tourism in the Florida Keys and Key West by drawing out-of-county visitors, as well as entertain visitors and brand the destination. Funding is for event marketing purposes only (advertising; promotions; public relations), etc.

The event sponsor, for purposes of this RFA and any resulting contract, shall be the production agent primarily responsible for the production of the event and the entity soliciting funding under this process. The event sponsor shall seek the review and approval of the event marketing budget by the professional agencies of record listed below. No more than 10% of the total allocated funds shall be expended on advertising media costs attributable to in-county placement. A list of TDC permissible marketing expenditures can be viewed in Exhibit A of the sample contract on the Monroe County website at: <http://www.monroecounty-fl.gov/DocumentCenter/Home/View/5163>. No reimbursement will be considered for items that are not covered under Exhibit A.

For our **Advertising Agency of Record:** (Tinsley Advertising), contact Ashely Miller (Ashely@Tinsley.com) or John Underwood (John@Tinsley.com) at (305) 856-6060. For our **Public Relations Agency of Record:** (NewmanPR), contact Carol Shaughnessy (Carol@newmanpr.com) at (305) 797-0579 or Andy Newman (Andy@newmanpr.com) at (305) 461-3300. For our **Internet Agency of Record:** (Floridakeys.com) Contact Clinton Barras (Clinton@floridakeys.com) or Lauren Oropeza (Lauren@floridakeys.com) at (305) 292-1880.

TURNKEY EVENT

District Advisory Committees (DAC) have assigned their top levels of funding to Turnkey events, recognizing that those events provide the highest level of economic impact to their district and serve to brand the destination. The event shall be one that creates a compelling reason to visit that doesn't otherwise exist without the event. Therefore, consideration for the amount of funding allocated to a Turnkey special event shall be predicated upon a showing of the economic impact resulting in room night stays generated by the event attendees.

A Turnkey event shall be considered an all-inclusive event where the event contractor has financial responsibility for every facet of the production, promotion and management of the event. Payment under a contract for a Turnkey event will be made only after completion of the event and proof that the scope of services as described within the contract has been completed.

The DAC when considering funding of a Turnkey event may also specify within the scope of services of the contract, specific marketing components that the DAC feels important to the success of the event.

If a Turnkey event is delayed or canceled for any reason, no payment shall be forthcoming, even if the event contractor has out-of-pocket expenses leading up to the actual event. The TDC, therefore, strongly recommends that the event contractor purchase insurance that covers the cancellation or delay of an event due to "force majeure" or unforeseen circumstances.

Please note that the DAC may deny funding of an event applying as Turnkey and consider funding the application as a Destination event.

APPLICANT RESPONSIBILITIES

Applications can only be accepted from a public entity governed by a county or municipality; or a profit or not-for-profit; or a private business in good standing with the Division of Florida Corporations. Prior to completing an event application, please go to www.sunbiz.org to ensure that your organization is registered to do business in the State of Florida. Only entities (applicants) that are duly registered will be accepted.

Contact the TDC Administrative Office (305) 296-1552 to ascertain date, time and venue of the event funding workshop that will be held within the District which you are applying

to. Each DAC has specific marketing goals and it is strongly recommended that all prospective applicants attend the workshop in the District where you plan to apply for funding to ascertain the marketing direction and expectations of that District as it pertains to event applications.

The cost of preparation and submission of the application is the responsibility of the applicant.

Applicants must ensure that their application is submitted to the Monroe County Purchasing Department by date and time noted on page 1 of the application. Applications that are received after the specified deadline as determined within the RFA will not be accepted. This policy mirrors that of the Board of County Commissioners.

Applicant shall complete, copy, sign (by an authorized officer) and submit the correct number of copies of the application to the Monroe County Purchasing Department (see address on page 1). Please do not use any binders or tab inserts. Should an attachment be required for your application, note the Exhibit number on the top right hand corner of each sheet.

Applicant shall familiarize him/herself with referenced online materials noted on the application check list on page 41. The online materials include a sample contract and sample of scoring system used in determining funding eligibility.

Applicant shall be responsible for securing all federal, state and local permits and approval necessary for the event. Award of funds under this application does not indicate any approval by the County and applicant shall be required to comply with all County laws, rules and requirements.

IMPORTANT INFORMATION

Please consult with the TDC Administrative Office prior to starting the application process if you are uncertain about whether your event would be considered.

The applicant shall not lobby, solicit or act to influence the advisory committee members and/or the TDC board members in any way that may have an effect on the outcome of the competition, discussion or negotiations leading to the allocation of funding, or an award of a contract as reviewed and approved by the County Attorney's office. Such action may lead to withdrawal of the application from consideration.

The application shall be considered complete upon receipt and should stand alone with no other information being provided after-the-fact other than any additional information that may be requested by the TDC administrative office, or questions from the DAC at the allocation meeting.

DAC recommendation on funding allocations shall be limited to recommending allocations which do not exceed the amount requested by the applicant. Funding requests may be denied, reduced to a lower level or accepted at level requested. It is important for the applicant to be aware that scoring the minimum points required to be considered, does not guarantee funding of the event.

All information furnished or disclosed as part of the application process is considered public record by the laws of the State of Florida.

DISTRICT ADVISORY COMMITTEE WORKSHOPS FOR APPLICANTS

Workshops will be held in each of the districts at the following venues and times for those applicants that are interested in applying for funding. Attendance is strongly recommended. *(Please note that all venues and times are subject to change and can be confirmed by calling the TDC administrative office at (305) 296-1552):*

District I:	April 13, 2016	Doubletree Grand Key Resort	3:00 p.m.
District II:	April 12, 2016	Lower Keys Chamber of Commerce	6:00 p.m.
District III:	April 13, 2016	Hawks Cay	9:30 a.m.
District IV:	April 12, 2016	Islander Resort	2:00 p.m.
District V:	April 12, 2016	Murry Nelson Government Center	10:00 a.m.

CRITERIA FOR SCORING OF APPLICATION

The District Advisory Committee will be reviewing your event application and scoring it during the evaluation meeting.

Scoring will be considered using a scale, with 1 being the lowest.

Upon evaluation, the total scores will be tabulated and applications not scoring 17 points or above by a majority of the sitting members, will not be considered for funding. Those events that meet the minimum scoring requirements noted above will be ranked starting with the highest average score. In the case of a tie, the highest score in the Timing of Event will be the determining factor. Points are listed at the end of each Exhibit for ease of scoring by reviewers. View sample scoring sheet at <http://www.monroecounty-fl.gov/DocumentCenter/Home/View/7072>

The minimum points threshold required to be considered, 17, has been set such that events that are considered very good to excellent in their "Purpose, Itinerary & Room Nights", "Soundness of Marketing Plan & Financial Commitment" and "Action Plan" should meet the minimum for consideration regardless of the "Timing of Event". Events that are considered somewhat good in those categories will need to thoughtfully utilize "Timing of Event" points in order to meet the minimum points threshold to be considered. In other words, timing events to be held in slower months and/or to produce room night stays during mid-week days will be important for achieving sufficient minimum scoring. Events that are poor in their "Purpose, Itinerary & Room Nights", "Soundness of Marketing Plan & Financial Commitment" and "Action Plan" will not meet the minimum to be considered.

It is important for the applicant to be aware that scoring the minimum points required to be considered, does not guarantee funding of the event.

DISTRICT I APPLICANTS ONLY (Encompasses the City Limits of Key West)

When applying for funding, it is important to understand the number of lodging units available within this District as it is the maximum number of room nights which may be sold per day – review table 1 below.

Table 1:

District I: Key West	Units (Max. daily room nights)
Hotel/Motel/B&B/Guest House/Inn	5,783
Vacation Rental	925
RV Park & Campground	0
Total	6,708

Source: Florida Department of Business and Professional Regulation, TDC

When evaluating funding allocations (return on investment), it is important to understand how the revenue was derived. Table 2 demonstrates, given its average lodging rates for the past two years, how many room nights this District had to sell to raise enough two-penny bed tax revenue for each level of event funding. The chart is provided to give a clearer context to the value of the bed tax dollar that funds each level.

Table 2:

District I: Key West	
Funding Level	Room Nights
\$10,000	1,820
\$17,000	3,100
\$25,000	4,550
\$35,000	6,380
\$50,000	9,110
\$75,000	13,660
\$100,000	18,210
\$120,000	21,860

The District Advisory Committee may use their discretion when evaluating funding allocations. However, it is important to understand how the income is derived.

Check the box below that best describes the primary purpose of your event:

- To draw out-of-county visitors to the destination and put “Heads in Beds”.
- To provide something to do for the visitor who is already here and enhance their experience while visiting the destination.

EXHIBIT A-2
EVENT ITINERARY

Specifically outline the activities/events that will take place during your event. If your event encompasses several days, break out each day, including the venue. Only include activities that are directly related to the event for which you are seeking funding, and for which your organization is responsible for producing.

Example: Day 1: Opening Party/Registration (include venue and time)
Day 2: Food and Wine Tasting (venues and times)
Day 3: Art Festival (include venue/times and possible street closings)

EXHIBIT A-3

NUMBER OF ROOM NIGHTS ANTICIPATED FOR EVENT

Events are scored based on ability to attract out-of-County visitors to the district in which funding is applied. For the event year in which this application refers, provide the room nights your event is anticipated to generate for this district only according to your selection in A-1. In other words, if you indicated your event’s primary purpose is to “draw out-of-county visitors”, how many room nights do you anticipate you will draw? If you indicated your event is “to enhance the experience for visitors already here”, how many room nights would be influenced by visitors who attend your event? Next, indicate how you arrived at that figure.

Room Nights

1. Formula to calculate **Room Nights to this district** **Total Room nights will calculate automatically upon pressing the tab key on your key board or answering the next question):*

FUNDING REQUEST

Check this box if your event meets the definition of a New Event.

Definition of New Event: An event that has not taken place in this District previously. A New Event choosing this category will be considered with other New Event applications from a separate resource specifically allocated for New Events. *If your event does not score the minimum required score by a majority of the sitting members, your application will not be considered for funding. It is important for the applicant to be aware that scoring the minimum points required to be considered does not guarantee funding of the event.*

I understand that as a New Event this is a \$10,000 grant request.

OR

A New Event may choose to apply under the regular event funding process wherein the new event will compete with previously funded events.

Regular Event Funding: Complete this section if your event is NOT applying as a New Event.

Check the appropriate category (Destination or Turnkey) and grant level you are applying for. If your event does not score the minimum required score by a majority of the sitting members, your application will not be considered for funding. The DAC may also decline funding your application, or fund at a lower funding level. It is important for the applicant to be aware that scoring the minimum points required to be considered does not guarantee funding of the event.

EXHIBIT B
TIMING OF EVENT

Events are scored based on when in the calendar year they are held. Shoulder and off season events receive higher scoring. Additional scoring points are also given for mid-week events. The average of the past two fiscal years' occupancy, as reported by Smith Travel Research, is used to create the Timing of Event Scoring. Points are assigned to each occupancy level range. Table 3 below depicts the points associated with each occupancy level range. Next, it shows the times which your District, during the past two fiscal years, reached each occupancy level range.

DISTRICT II APPLICANTS ONLY

(From City Limits of Key West to the west end of the Seven Mile Bridge)

When applying for funding, it is important to understand the number of lodging units available within this District as it is the maximum number of room nights which may be sold per day – review table 1 below.

Table 1:

District II: Big Pine Key & The Lower Keys	Units (Max. daily room nights)
Hotel/Motel/B&B/Guest House/Inn	246
Vacation Rental	181
RV Park & Campground	1,327
Total	1,754

Source: Florida Department of Business and Professional Regulation, TDC

When evaluating funding allocations (return on investment), it is important to understand how the revenue was derived. Table 2 demonstrates, given its average lodging rates for the past two years, how many room nights this District had to sell to raise enough two-penny bed tax revenue for each level of event funding. The chart is provided to give a clearer context to the value of the bed tax dollar that funds each level.

Table 2:

District II: Big Pine Key & The Lower Keys		
Funding Level	Hotel/Motel/B&B Room Nights	RV Park/ Campground Room Nights*
\$5,000	1,350	2,770
\$7,500	2,030	4,150
\$10,000	2,700	5,540
\$15,000	4,050	8,310
\$17,000	4,590	9,410
\$20,000	5,410	11,070
\$30,000	8,110	16,610

*As DAC II does not have participants in the Smith Travel Research program, published rates were used to determine room nights. Room nights is further broken down for this DAC by lodging type as a super majority of DAC II lodging units are RV Park & Campground sites. Little Palm Island is excluded from calculations.

The District Advisory Committee may use their discretion when evaluating funding allocations. However, it is important to understand how the income is derived.

NUMBER OF ROOM NIGHTS ANTICIPATED FOR EVENT

Events are scored based on ability to attract out-of-County visitors to the district in which funding is applied. For the event year in which this application refers, provide the room nights your event is anticipated to generate for this district only according to your selection in A-1. In other words, if you indicated your event’s primary purpose is to “draw out-of-county visitors”, how many room nights do you anticipate you will draw? If you indicated your event is “to enhance the experience for visitors already here”, how many room nights would be influenced by visitors who attend your event? Next, indicate how you arrived at that figure.

WITNESSETH:

1. In consideration of Ten Dollars (\$10.00) in hand, paid by the LAND AUTHORITY, the receipt of which is hereby acknowledged, the Seller(s) agree to sell to the LAND AUTHORITY certain lands upon the terms and conditions hereinafter set forth, and for the price of **\$78,000.00** for all of the lands and other interests, which lands shall include all tenements, hereditaments, together with all water and other rights, easements, appurtenances, and any and all of the Seller's rights in or arising by reason of ownership thereunto belonging, owned by them, situate and lying in the County of Monroe, State of Florida, more particularly described as follows; to-wit:

**Block 6, Lots 1, 29, and 30, Gulfstream Shores (PB 3-61)
RE# 00565640-000000, 00565920-000000, and 00565930-000000**

2. The Seller(s) agree that they have full right, power and authority to convey, and that they will convey to the LAND AUTHORITY the fee simple title together with legal and practical access thereto clear, free and unencumbered, except subject to the following easements or reservations:

Existing easements for canals, ditches, flumes, pipelines, railroads, public highways and roads, telephone, telegraph, power transmission lines and public utilities.

The LAND AUTHORITY, at the LAND AUTHORITY'S expense, within the time allowed to deliver evidence of title and to examine same, may have the real property surveyed and certified by a registered Florida surveyor. If the survey discloses encroachments on the real property or that improvements located thereon encroach on setback lines, easements, lands of others, or violate any restrictions, contract covenants, or applicable governmental regulations, the same shall constitute a title defect.

Seller(s) shall convey a marketable title subject only to the aforementioned liens, encumbrances, exceptions or qualification set forth herein. Marketable title shall be determined according to applicable title standards adopted by authority of the Florida Bar and in accordance with law. The LAND AUTHORITY shall have sixty (60) days from the effective date of this Agreement in which to examine title. If title is found defective, the LAND AUTHORITY shall, within this specified time period, notify Seller(s) in writing specifying defect(s). If the defect(s) render title unmarketable the Seller(s) will have one hundred twenty (120) days from receipt of notice within which to remove the defect(s), failing which the LAND AUTHORITY shall have the option of either accepting the title as it then is or rescinding the Agreement herein; thereupon the LAND AUTHORITY and the Seller(s) shall release one another of all further obligations under this Agreement. The Seller(s) will, if title is found unmarketable, use diligent effort to correct defect(s) in title within the time provided therefore, including the bringing of necessary suits.

The parties agree that the LAND AUTHORITY, at its sole option, may revise the legal description in the closing instruments required by this Agreement to cut out portions of said lands affected by title defects. In such event, no written amendment of this Agreement shall be required. The Seller's execution and delivery of the closing instruments containing the revised legal description and the LAND AUTHORITY'S acceptance of said instruments shall constitute acceptance of the revised legal description of said lands by the parties.

3. The Seller(s) further agree not to do, or suffer others to do, any act by which the value or title to said lands may be diminished or encumbered. It is further agreed that any loss or damage occurring prior to the vesting of satisfactory title in the LAND AUTHORITY by reasons of the unauthorized cutting or removal of products therefrom, or because of fire, shall be borne by the Seller(s); and that, in the event any such loss or damage occurs, the LAND AUTHORITY may refuse, without liability, to accept conveyance of said lands, or it may elect to accept conveyance upon an equitable adjustment of the purchase price.
4. The Seller(s) further agree that during the period covered by this instrument officers and accredited agents of the LAND AUTHORITY shall have at all proper times the unrestricted right and privilege to enter upon said lands for all proper and lawful purposes, including examination of said lands and the resources upon them. The Seller(s) hereby waive their rights to any and all claims against the LAND AUTHORITY or Monroe County associated with, or arising from ownership of, said lands and this waiver shall survive closing.
5. The Seller(s) will execute and deliver upon demand of the proper officials and agents of the LAND AUTHORITY a good and sufficient deed of warranty conveying to the LAND AUTHORITY a safe title to the said lands of such character as to be satisfactory to the legal counsel of the LAND AUTHORITY and said deed shall provide that the use, occupation and operation of the rights-of-way, easements and reservations retained therein, shall be subordinate to and subject to such rules and regulations as may be prescribed by the LAND AUTHORITY governing the use, occupation, protection and administration of lands.
6. In consideration whereof the LAND AUTHORITY agrees that it will purchase all of said lands and other interests at the price of **\$78,000.00**. The LAND AUTHORITY further agrees that, after the preparation, execution, delivery and recordation of the deed, and after the legal counsel of the LAND AUTHORITY shall have approved the title thus vested in the LAND AUTHORITY, it will cause to be paid to the Seller(s) the purchase price by a check drawn on the account of the LAND AUTHORITY. The LAND AUTHORITY shall pay the following expenses associated with the conveyance of the property: deed recording fees, settlement fees, abstract fees, title examination fees, the Buyer's attorney's fees, and title insurance, as well as the prorata share of prepaid real property taxes allocable to the period subsequent to the vesting of title in the LAND AUTHORITY, or the effective date of possession of such real property by the same, whichever is earlier. WITNESSETH:

1. In consideration of Ten Dollars (\$10.00) in hand, paid by the LAND AUTHORITY, the receipt of which is hereby acknowledged, the Seller(s) agree to sell to the LAND AUTHORITY certain lands upon the terms and conditions hereinafter set forth, and for the price of **\$25,000.00** for all of the lands and other interests, which lands shall include all tenements, hereditaments, together with all water and other rights, easements, appurtenances, and any and all of the Seller's rights in or arising by reason of ownership thereunto belonging, owned by them, situate and lying in the County of Monroe, State of Florida, more particularly described as follows; to-wit:

**Block 2, Lot 32, Eden Pines Colony (PB 4-158)
RE# 00264930-000000**

2. The Seller(s) agree that they have full right, power and authority to convey, and that they will convey to the LAND AUTHORITY the fee simple title together with legal and practical access thereto clear, free and unencumbered, except subject to the following easements or reservations:

Existing easements for canals, ditches, flumes, pipelines, railroads, public highways and roads, telephone, telegraph, power transmission lines and public utilities.

The LAND AUTHORITY, at the LAND AUTHORITY'S expense, within the time allowed to deliver evidence of title and to examine same, may have the real property surveyed and certified by a registered Florida surveyor. If the survey discloses encroachments on the real property or that improvements located thereon encroach on setback lines, easements, lands of others, or violate any restrictions, contract covenants, or applicable governmental regulations, the same shall constitute a title defect.

Seller(s) shall convey a marketable title subject only to the aforementioned liens, encumbrances, exceptions or qualification set forth herein. Marketable title shall be determined according to applicable title standards adopted by authority of the Florida Bar and in accordance with law. The LAND AUTHORITY shall have sixty (60) days from the effective date of this Agreement in which to examine title. If title is found defective, the LAND AUTHORITY shall, within this specified time period, notify Seller(s) in writing specifying defect(s). If the defect(s) render title unmarketable the Seller(s) will have one hundred twenty (120) days from receipt of notice within which to remove the defect(s), failing which the LAND AUTHORITY shall have the option of either accepting the title as it then is or rescinding the Agreement herein; thereupon the LAND AUTHORITY and the Seller(s) shall release one another of all further obligations under this Agreement. 3. The Seller(s) further agree not to do, or suffer others to do, any act by which the value or title to said lands may be diminished or encumbered. It is further agreed that any loss or damage occurring prior to the vesting of satisfactory title in the LAND AUTHORITY by reasons of the unauthorized cutting or removal of products therefrom, or because of fire, shall be borne by the Seller(s); and that, in the event any such loss or damage occurs, the LAND AUTHORITY may refuse, without liability, to accept conveyance of said lands, or it may elect to accept conveyance upon an equitable adjustment of the purchase price.
4. The Seller(s) further agree that during the period covered by this instrument officers and accredited agents of the LAND AUTHORITY shall have at all proper times the unrestricted right and privilege to enter upon said lands for all proper and lawful purposes, including examination of said lands and the resources upon them. The Seller(s) hereby waive their rights to any and all claims against the LAND AUTHORITY or Monroe County associated with, or arising from ownership of, said lands and this waiver shall survive closing.
5. The Seller(s) will execute and deliver upon demand of the proper officials and agents of the LAND AUTHORITY a good and sufficient deed of warranty conveying to the LAND AUTHORITY a safe title to the said lands of such character as to be satisfactory to the legal counsel of the LAND AUTHORITY and said deed shall provide that the use, occupation and operation of the rights-of-way, easements and reservations retained therein, shall be subordinate to and subject to such rules and regulations as may be prescribed by the LAND AUTHORITY governing the use, occupation, protection and administration of lands.
6. In consideration whereof the LAND AUTHORITY agrees that it will purchase all of said lands and other interests at the price of **\$25,000.00**. The LAND AUTHORITY further agrees that, after the preparation, execution, delivery and recordation of the deed, and after the legal counsel of the LAND AUTHORITY shall have approved the title thus vested in the LAND AUTHORITY, it will cause to be paid to the Seller(s) the purchase price by a check drawn on the account of the LAND AUTHORITY. The LAND AUTHORITY shall pay the following expenses associated with the conveyance of the property: deed recording fees, settlement fees, abstract fees, title examination fees, the Buyer's attorney's fees, and title insurance, as well as the prorata share of prepaid real property taxes allocable to the period subsequent to the vesting of title in the LAND AUTHORITY, or the effective date of possession of such real property by the same, whichever is earlier. The Seller(s) shall pay the expenses of documentary stamps to be affixed to the deed and the removal of trash, debris, and structures from the property, if any, and real estate commissions, if any. Full possession of the premises shall pass to the LAND AUTHORITY as of the date payment is made to the Seller(s) subject only to the reservations stated in Section 2 above.
7. It is mutually agreed that an abstract, title insurance policy or other evidence of title to the property herein contracted to be sold, satisfactory to the legal counsel of the LAND AUTHORITY will be obtained by the LAND AUTHORITY at its expense. The Seller(s) expressly agree herein to furnish to the LAND AUTHORITY any documents in Seller(s)'s possession establishing evidence of title including, but not limited to, abstracts, title commitments, title policies and opinions of title.

AGENDA ITEM SUMMARY**

Meeting Date: February 10, 2016

Department: Land Authority

Bulk Item: Yes No

Staff Contact / Phone #: Mark Rosch / 295-5180

Agenda Item Wording: Approval of a resolution adding a portion of Peary Court in Key West to the Acquisition List and authorizing funding toward the City of Key West's purchase of said property for affordable housing.

Item Background: The Key West City Commission is considering purchasing a portion of Peary Court in Key West for affordable workforce housing. The proposed transaction calls for the City to purchase 157 existing units and the rights to build 3 additional units (for a total of 160 units) together with a perpetual affordable housing deed restriction encumbering 48 units the Seller is preparing to build. The proposed purchase price is \$55 million, of which the City proposes to pay using \$10 million of Land Authority funds and \$45 million from the sale of revenue bonds. Both the acquisition of the property and the issuance of the bonds are subject to approval by Key West voters on March 15, 2016. The Southeast Florida Regional Climate Change Compact 50-year sea level rise projection is 14 to 26 inches by the year 2060. In the event of a 24-inch increase in sea level, estimates provided by the South Florida Water Management District indicate approximately 11% of Peary Court will have a 25.1% to 100% probability of being inundated.

The Key West City Commission has nominated the subject property and requested \$10 million via Resolution 16-041. The requested funds would come from the \$12.2 million the Land Authority has budgeted for acquisitions in Key West. These funds consist of tourist impact tax collected in Key West and statutorily restricted for use in Key West.

Advisory Committee Action: On January 21, 2016 the Committee voted 5/0 to approve this resolution.

The attached Appraisal Report has been prepared to comply with my understanding of the requirements of the Uniform Standards of Professional Appraisal Practice.

The subject property is located in the "Old Town" section of Key West, specifically on the southerly side of Palm Avenue, the southeasterly side of Eaton Street, the easterly side of White Street, the northwesterly border of the City of Key West Cemetery, the northwesterly side of Angela Street and the southwesterly side of Eisenhower Drive. The subject property is surrounded mostly by residential uses with some commercial uses nearby on White Street and the Garrison Bight Marina on Palm Avenue and Eisenhower Drive to the Southeast. The subject improvements are located on a polygon, irregular-shaped, corner parcel fronting along the southerly side of Palm Avenue, the southeasterly side of Eaton Street, the easterly side of Street and the southwesterly side of Eisenhower Drive for a total site size of 1,053,434 square feet or 24.1835 acres. The subject site, however, does not include 2+ acres in the middle of the site, which will be retained by the seller for development of 48 affordable housing units. As a result, the net subject site area is approximately 22 acres, or 958,320 square feet. A survey, performed by F.H. Hildebrandt, Island Surveying 3152 Northside Drive, Key West, FL 33040 dated January 31, 2012 and a site plan performed by Allen E. Perez, P.E., Perez Engineering and Development, 1010 East Kennedy Drive Suite 201, Key West, FL 33040, dated July 29, 2015, were utilized for site size, dimensions and building measurements. Any deviations from these sizes would could result in a change in value.

The subject property consists of 49, 2-story wood frame townhouse buildings containing 157, 2-bedroom nontransient residential, units. The total gross rentable building area of the entire complex is 200,382 square feet. Each unit has a one carport with enclosed storage area measuring 351 square feet. The multi-family dwellings were constructed in 1996, according to the Monroe County Tax Appraiser's records. On the table below, a summary of the subject buildings, unit mix and grossing building areas are depicted:

Market Value is defined as the most probable price in cash (or its equivalency) for which the appraised property will sell in a competitive market under all conditions requisite to a fair sale. Market value assumes a normal or reasonable time for exposure on the open market.

This report contains the results of my investigation and analysis made in order to furnish an estimate of the *Market Value of the Fee Simple Interest* of the property described herein. The Fee Simple Interest is the unencumbered value of the subject property; basically, market rents and terms are considered with no regard to existing leases and terms. Since there are no long-term leases encumbering the subject property, and as the tenants are renting on an annual basis or less, a Leased Fee valuation was not applicable in the case at hand. Forty-eight of the existing 157 units are deed restricted as moderate affordable housing units; however, these restrictions will be removed once the new 48 affordable units are constructed (not part of this assignment). Per the City's request, I have valued the subject as an apartment complex with 157 market rate units and also as 157 units leased as moderate affordable (work-force) housing. The reader is cautioned that a title search was not made; thus, no other encumbrances are considered herein.

Based on analysis of market data, inspection, and research, it is my opinion that the “*As Is*” *Market Value of the Fee Simple Interest* of Subject Property commonly known as the Peary Court At Key West, 541 White Street, Key West, Monroe County, Florida, subject to moderate affordable housing rental restrictions for all 157 units, and also subject to definitions, assumptions and limiting conditions, as of September 18, 2015 is:

FIFTY THREE MILLION DOLLARS
(\$53,000,000)

In addition, based on analysis of market data, inspection, and research, it is my opinion that the “*As Is*” *Market Value of the Fee Simple Interest* of Subject Property commonly known as the Peary Court At Key West, 541 White Street, Key West, Monroe County, Florida, subject to market rate rentals all 157 units, and also subject to definitions, assumptions and limiting conditions, as of September 18, 2015 is:

FIFTY SEVEN MILLION DOLLARS
(\$57,000,000)

Finally, based on research analysis of market data, site visit and research, it is my opinion that the “*As Is*” *Market Value (Discounted Sellout/Bulk Sale)* of the Subject Property known as Peary Court At Key West, 541 White Street, subject to definitions, assumptions and limiting conditions, as of September 18, 2015 is:

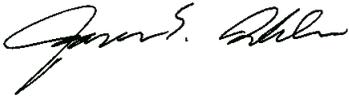

FIFTY SEVEN MILLION DOLLARS
(\$57,000,000)

The valuation herein does not consider any fixtures and equipment other than the typical residential kitchen appliances within the apartments, which I have estimated to have a contributory value of \$120,000.

Re: Appraisal of the 157 unit mixed income apartment complex located at 541 White Street, Key West, Florida 33040.

Meridian File No: 15-PNI

Dear Mr. Scholl:

As requested, we have made the necessary investigations and analyses to appraise the Peary Court apartment complex built in 1996 and 95% occupied. The improvements consist of a 157 unit complex situated on a 24.18 acre site. The property is about 19 years old and appears to be in Average condition. As of the date of our inspection, all units were reportedly rentable. The property is considered a Class B improvement in the local area.

Currently, the subject property sets aside 48 units designated as Work Force affordable housing. The subject's Work Force Housing designation is designed to create moderate rents for the subject property, with each tenant required to have their income fall within a certain range (please see Addenda for Work Force Housing Rent and Income Limits). The current Work Force Housing rental rates vary per unit but average \$2,325 per month. The City of Key West Housing Authority has proposed to operate the subject property as a 100% Work Force Housing project.

The subject property is further described and identified by both legal and narrative descriptions within the text of the following appraisal report.

The purpose of this appraisal was to estimate the market value of the Leased Fee interest in the subject property, as if an un-restricted market rate property and as proposed to be restricted as 100% Work Force Housing. Since the subject property is already at stabilization, we have provided the values of the property as is. We also valued the subject property as if it were a for-sale condominium project. The date of valuation is September 14, 2015.

The intended use of this appraisal is for internal decision making. The intended user of this report is City of Key West to the attention of Jim Scholl, City Manager. No other use or users are intended.

Market value, leased fee interest and other appraisal terms are defined within the text of the following appraisal report.

General Assumptions and Limiting Conditions concerning the valuation of the subject property can be found following this section of the report. This is an Appraisal Report prepared under Standards Rule 2-2(a) and performed under Standard Rule 1 of the Uniform Standards of Professional Appraisal Practice (USPAP).

We have formed the opinion that the hypothetical market value of the Leased Fee interest in the subject property as an un-restricted market rent property, in it's as is condition, assuming any deferred maintenance is cured, including \$157,000 in personal property, based on market conditions prevailing on September 14, 2015, was:

FIFTY SEVEN MILLION SEVENTY THOUSAND DOLLARS
(\$57,070,000)*

We have formed the opinion that the hypothetical market value of the Leased Fee interest in the subject property, as proposed to be restricted as 100% Workforce Housing, in it's as is condition, assuming any deferred maintenance is cured, including \$157,000 in personal property, and with market financing, based on market conditions prevailing on September 14, 2015, was:

FIFTY FOUR MILLION TWO HUNDRED TEN THOUSAND DOLLARS
(\$54,210,000)*

We have formed the opinion that the hypothetical market value of the Leased Fee interest in the subject property, as a for-sale condominium property, in it's as is condition, assuming any deferred maintenance is cured, including \$157,000 in personal property, based on market conditions prevailing on September 14, 2015, was:

FIFTY THREE MILLION TWO HUNDRED TWENTY THOUSAND DOLLARS

The following report was prepared in conformity with the Code of Professional Ethics and Standards of Professional Practice of the Appraisal Institute. As such, it conforms to the Uniform Standards of Professional Appraisal Practice (USPAP) that became effective January 1, 2015. This report meets or exceeds the guidelines of Federal, Financial Institutions Reform, Recovery and Enforcement Act of 1989 (Title XI of FIRREA) and subsequent updates, as issued by the Office of the Comptroller of Currency.

Based upon the steps and investigations taken to appraise the subject property, we are of the opinion we have complied with the Competency Provision of USPAP, as required by the FIRREA Act of 1989 and subsequent updates. This letter of transmittal precedes the appraisal report, further describing the subject property and containing the reasoning and pertinent data leading to the final value estimates.

AGENDA ITEM WORDING:

Approval of the selected contractor, Earth Tech Enterprises, Inc., and contract for a habitat restoration project within Dagny Johnson Key Largo Hammock Botanical State Park as mitigation for the construction of the Key Largo Wastewater Treatment District (KLWTD) wastewater treatment plant.

ITEM BACKGROUND: During the permitting of the KLWTD wastewater treatment plant, the US Fish and Wildlife Service required payment of \$718,504 in mitigation fees into the Monroe County Environmental Land Management and Restoration Fund (Fund 160). The fees must be used to restore a minimum of 4.2 acres of tropical hardwood hammock habitat at a USFWS-approved site on Key Largo. The USFWS approved project involves removing fill, structures, and roads within Dagny Johnson Key Largo Hammock Botanical State Park. A Request for Proposals for a contractor to perform the restoration work was originally advertised in late 2013. However, the Board ultimately rejected all proposals and approved the re-advertisement of the project. The revised RFP was re-advertised with a closing date of December 10, 2015. A selection committee met in a publicly advertised meeting on January 6, 2016 to evaluate the proposals. Based on review of three (3) proposals, the selection committee recommends Earth Tech Enterprises, Inc., the second lowest bidder, as the selected contractor on this project. Earth Tech Enterprises had more experience on similar restoration projects than the lowest bidder.

PREVIOUS RELEVANT BOCC ACTION:

Resolution 360-2005 – authorized the County Land Steward to take over and complete the mitigation obligations of the Key Largo Wastewater Treatment District.

July 18, 2012 – BOCC approved advertisement of RFP for restoration work.

May 13, 2013 – BOCC approved a contract with Metric Engineering to act as project manager.

REQUEST FOR PROPOSALS - HABITAT RESTORATION PROJECT WITHIN
DAGNY JOHNSON KEY LARGO HAMMOCK STATE PARK

SELECTION COMMITTEE

January 6, 2016 Meeting Minutes

The selection committee for the Habitat Restoration Project within Dagny Johnson Key Largo Hammock State Park RFP met on Wednesday, January 6, 2016 at 10 a.m. at the Monroe County Government Center, 2798 Overseas Highway, Marathon, Florida. The following members were present: Beth Bergh, Monroe County Land Steward; Mark Rosch, Executive Director of the Monroe County Land Authority; Trudy Ferraro, Park Biologist – Florida Park Service; and Paul Rice, Park Manager - Florida Park Service. Two members of the public were also in attendance.

The selection committee reviewed the proposed project and scoring criteria. The budget for the proposed project is \$605,000 (as stated in the RFP).

The responses included the following prices:

	ABC Construction, Inc.	Adventure Environmental, Inc.	Earth Tech Enterprises, Inc
Price	\$790,000	\$1,060,000	\$838,000

The committee reviewed all proposals and discussed each scoring criterion, including the cost proposal and the relevant experience of each respondent. Since none of the proposals came within the budgeted amount, the committee discussed what aspects of the project could be completed under each proposal.

After discussion, each committee member, working independently, scored the three responses. The final ranking was: 1. Earth Tech Enterprises, Inc.; 2. ABC Construction, Inc.; and 3. Adventure Environmental, Inc.

The selection committee unanimously agreed that Earth Tech Enterprises, Inc. should be recommended to the Monroe County Board of County Commissioners as the selected contractor for this project. Additionally, the selection committee agreed that if a contract could not be negotiated with Earth Tech Enterprises, Inc. then the County should attempt to negotiate a contract with the next bidder, ABC Construction, Inc.

There being no further business, the meeting was adjourned at approximately 12 pm.

By signing this Agreement, CONTRACTOR represents that the execution of this Agreement will not violate the Public Entity Crimes Act (Section 287.133, Florida Statutes). In addition to the foregoing, CONTRACTOR further represents that there has been no determination, based on an audit, that it or any subconsultant has committed an act defined by Section 287.133, Florida Statutes, as a "public entity crime" and that it has not been formally charged with committing an act defined as a "public entity crime" regardless of the amount of money involved or whether CONTRACTOR has been placed on the convicted vendor list.

CONTRACTOR will promptly notify the COUNTY if it or any subcontractor or subconsultant is formally charged with an act defined as a "public entity crime" or has been placed on the convicted vendor list.

9.8 MAINTENANCE OF RECORDS

9.10 SEVERABILITY

If any term, covenant, condition, or provision of this Agreement (or the application thereof to any circumstance or person) shall be declared invalid or unenforceable to any extent by a court of competent jurisdiction, the remaining terms, covenants, conditions, and provisions of this Agreement shall not be affected thereby, and each remaining term, covenant, condition, and provision of this Agreement shall be valid and shall be enforceable to the fullest extent permitted by law unless the enforcement of the remaining terms, covenants, conditions, and provisions of this Agreement would prevent the accomplishment of the original intent of this Agreement. The COUNTY and CONTRACTOR agree to reform the Agreement to replace any stricken provision with a valid provision that comes as close as possible to the intent of the stricken provision.

9.11 ATTORNEY'S FEES AND COSTS

The COUNTY and CONTRACTOR agree that in the event any cause of action or administrative proceeding is initiated or defended by any party relative to the enforcement or interpretation of this Agreement, the prevailing party shall be entitled to reasonable attorney's fees and court costs, as an award against the non-prevailing party, and shall include reasonable attorney's fees and courts costs, at trial and in appellate proceedings. EXHIBIT A
SCOPE OF WORK
CONTRACT BETWEEN MONROE COUNTY AND EARTH TECH ENTERPRISES, INC.

1. REFERENCE DOCUMENTS

In addition to the information provided directly within this Scope of Work, the documents listed in Section 4.1 of the Contract are provided for reference. For purposes of this Scope of Work, the following order of precedent is established:

1. Attachment A - US FWS May 8, 2015 Biological Opinion;
2. Text of this Scope of Work;
3. Attachment B – August 31, 2015 Restoration Agreement between County and Park;
4. All other remaining attachments.

2. WORK INCLUDED

The Contractor shall furnish all labor, superintendence, materials, power, light, heat, fuel, water, tools, appliances, equipment, supplies, and any other means of construction necessary or proper for performing and completing the Scope of Work (SOW), unless otherwise specifically stated. The Park will be providing the native plant material for planting requirements at no direct cost to the Contractor. However, the Contractor will be responsible for loading and transportation of the material to the site, as well as installation and temporary watering.

The means and methods for construction shall be at the Contractor's discretion, provided they are in accordance with the requirements and restrictions as listed in this SOW and its attachments. It is important to note that the attachments of this SOW, primarily the US FWS Biological Opinion, have specific requirements for construction methods, sequencing, and related practices. The Contractor will be required to comply with ALL requirements and guidance of the Biological Opinion (unless specified otherwise in this SOW) and is encouraged to carefully read and review this and the other Contract attachments, and to request clarification if apparent discrepancies are identified.

The cost of activities considered to be incidental to the Scope of Work described herein shall be considered as part of the general cost of doing the work and shall be included in the prices for the various Contract Pay Items. No additional payment(s) will be made to accommodate these activities, and it is the sole responsibility of the Contractor to determine, including by asking the County for clarification, that the means and methods proposed are feasible and acceptable by the County and in accordance with project requirements. The Contractor shall provide and maintain such tools and equipment as may be necessary, in the opinion of the County and in accordance with industry standards, to perform in a satisfactory and acceptable manner all the work required by the Contract. Only equipment of established reputation and proven efficiency shall be used. The Contractor shall be solely responsible for the adequacy of his workmanship, materials and equipment.

3. QUANTITIES

Site plans showing surveyed locations and dimensions of the project site are included as **Attachment D**. Estimated quantities/units including fill material to be removed, structures to be removed, and asphalt and base to be removed are included in **Attachment C**. All quantities, including measurements of the project area, are considered preliminary estimations and may require adjustment based on subsequent field measurements.

The Contractor will not be able to seek additional compensation for quantities or other unit items beyond their original estimation.

4. PROJECT SCHEDULE

The total maximum construction schedule for completion of the Scope of Work ("Time On Site") is 9 weeks. Financial penalties will be attributed to the Contractor for exceeding the schedule they propose, unless the schedule is exceeded due to specific criteria beyond the control of the Contractor. This criteria consists of inclement weather and direction from the Project Manager, County, State, or federal government to stop work for reasons other than the Contractor's noncompliance with project requirements.

The following time frames are exclusive of federal and state holidays. The term "week" is used to refer to five calendar days, exclusive of weekends. The start of work for the project shall be negotiated with the Contractor at the Pre-Construction Conference (Section 17(D)), but shall be no later than one (calendar) month after delivery of the executed agreement to the Contractor. The schedule may be split such that days without scheduled work do not count towards the scheduled Time On Site, however, the Maximum Schedule for project completion is 12 weeks from the start of work, regardless of actual Time On Site. The nine week scope of work deadline described in the previous paragraph must be completed within this 12 week project completion deadline. Native planting activities may be conducted concurrently with restoration activities, provided that construction sequencing accommodates the work.

The Project Manager must be on site during all construction activities. The Contractor must provide the Project Manager a minimum of six days' notice prior to initiation of work or changes in schedule for clearing and demolition activities. The Project Manager may be able to accommodate schedule changes within a shorter timeframe, however, this shortened response time cannot be guaranteed and lack of availability with less than six days' notice will not be grounds for an extension of the project schedule.

5. HOURS OF OPERATION

Work shall be performed Monday through Friday from 8:00 am to 5:00 pm. The Project Manager must be on site to provide access to the Contractor, and no work may proceed without the physical on-site presence of the Project Manager. Any work to be performed outside of these times must be requested in writing to the Project Manager 48 hours prior to the requested change. The Project Manager will notify the Contractor in writing of any changes in approved work hours.

6. WORK STOPPAGE FOR CONSERVATION MEASURES

Temporary suspension of work may be required in order to provide for conservation/protection of wildlife (Key Largo Wood Rat (KLWR) and Key Largo Cotton Mouse (KLCM)) and for related

environmental issues. Examples are identified in Attachment A, Biological Opinion, which includes if a KLWR or KLCM are found utilizing the construction site. Needs for work stoppage may be identified by the Project Manager, County, Park or the US Fish and Wildlife Service, and will be communicated to the Contractor through the Project Manager. Work stoppage time for this purpose will not be counted toward the project schedule, including the day when a work stoppage was requested, if work had already commenced that day and the stoppage was requested prior to 3pm. If work stoppage for conservation purposes is due to an error or unauthorized/unlawful action by the Contractor, full days of stoppage will not count towards the Time On site project schedule, though construction activities to remediate the problem (at the Contractor's expense) will count towards the Maximum Project Schedule. An example of this stoppage is if improper erosion control measures are utilized, requiring removal of off-site sedimentation, and re-installation of erosion control measures prior to work resuming.

The Contractor is not entitled to additional fees/compensation for demobilization and remobilization, if needed, due to a mandated work stoppage, regardless of reason for the stoppage

7. WORK DURING INCLEMENT WEATHER

The County will grant time extensions, on a day for day basis, for delays caused by the effects of rains or other inclement weather conditions, related adverse soil conditions or suspension of operations due to holidays that prevent the Contractor from productively performing controlling items of work resulting in:

- (1) The Contractor being unable to work at least 50% of the normal work day on pre-determined controlling work items due to adverse weather conditions, holiday suspension; or
- (2) The Contractor must make major repairs to work damaged by weather, provided that the damage is not attributable to the Contractor's failure to perform or neglect; and provided that the Contractor was unable to work at least 50% of the normal workday on pre-determined controlling work items.

No additional compensation will be made for delays caused by the effects of inclement weather. The County will consider the delays in delivery of materials or component equipment that affect progress on a controlling item of work as a basis for granting a time extension if such delays are beyond the control of the Contractor or supplier. Such delays may include an area-wide shortage, an industry-wide strike, or a natural disaster that affects all feasible sources of supply. In such cases, the Contractor shall furnish substantiating letters from a representative number of manufacturers of such materials or equipment clearly confirming that the delays in delivery were the result of an area-wide shortage, an industry-wide strike, etc. No additional compensation will be made for delays caused by delivery of materials.

Should weather conditions prevent the Contractor from being able to conduct work in accordance with this SOW, the Contractor shall notify the County within 4 hours of when the weather conditions have impacted the work. The County's Project Manager shall provide the Contractor with a 24-hour contact number for reporting suspension of work due to inclement weather. Time delays for suspension of work due to inclement weather shall not be counted towards the schedule limits identified in Section 4 of this

SOW, provided: notice has been provided to the Project Manager a minimum of 4 hours prior to the scheduled start of work for the day OR notice is provided to the Project Manager during the work day, while work is being conducted, at the earliest time that inclement weather is observed or publicly reported. Note that for suspension of work due to inclement weather to avoid counting towards the project schedule, ALL work on all project sites must be suspended. If the County or Park determines that weather conditions create unsafe or undesirable conditions for the County, State, or public, for conducting construction activities, the Project Manager shall notify the Contractor of a mandatory suspension of work. Suspension of work mandated by the County shall not be counted towards the maximum schedule requirements for the project. Any partial days worked prior to County notification of mandatory suspension of work shall not be counted towards the maximum project schedule. After notification of mandatory suspension of work, the Project Manager shall notify the Contractor when work can resume. The Contractor shall not be entitled to a demobilization or remobilization fee for suspension of work, either voluntary or mandatory.

8. CONTRACTOR SUPERINTENDENCE

Contractor shall keep on the Project during its progress, a full-time competent English speaking superintendent and any necessary assistants, all satisfactory to the County and Project Manager. The superintendent shall not be changed except with the prior written consent of the County or Project Manager, unless the superintendent proves to be unsatisfactory to the Contractor and ceases to be in its employ. The superintendent shall represent Contractor and all directions given to the superintendent shall be as binding as if given to Contractor and will be confirmed in writing by County or Project Manager upon the written request of Contractor. Contractor shall give efficient supervision to the work, using its best skill and attention. The Park, County, and Project Manager shall be provided telephone number(s) for the superintendent where the superintendent can be contacted during normal working hours, as well as after hours for emergencies.

9. ACCESS

FDEP has given the County, its employees, Contractors, Subcontractor and agents permission to enter the Dagny Johnson Key Largo Hammock Botanical State Park for the purpose of accomplishing this project until December 31, 2020 (Attachment B). Specific routes for construction access and limits of construction are depicted in **Attachment G** and **Attachment D** and described in **Attachments B** and **C**. For this project, the Park has established a maximum speed for any equipment within Park boundaries of 15 miles per hour.

Any changes to the limits of access and construction may not be guaranteed to be approved during the construction phase of the project. The County's response, whether in the affirmative or negative, to any request for a variation in the limits of access, will not be cause for additional time or compensation to the Contractor.

The Contractor shall comply with all codes, ordinances, rules, orders, and other legal requirements of public authorities (including OSHA, EPA, Monroe County, State of Florida, and Florida Building Code), which bear on the performance of the work. The Contractor shall take the responsibility to ensure that all work is performed using adequate safeguards, including but not limited to: proper safe rigging, safety nets, fencing, scaffolding, barricades, chain link fencing, railings, steel plates, safety lights, and ladders, that are necessary for the protection of its employees, as well as the public and County and Park employees. All riggings and scaffolding shall be constructed with good sound materials, be of adequate dimensions for their intended use, and be substantially braced, tied, or secured to ensure absolute safety for those required to use it, as well as those in the vicinity. All riggings, scaffolding, platforms, equipment guards, trenching, shoring, ladders, and similar actions or equipment shall be OSHA approved, as applicable, and in accordance with all federal state and local regulations. All open trenches or holes shall be properly marked and barricaded to assure the safety of both vehicular and pedestrian traffic. No open trenches or holes are to be left open during nighttime or non-working hours without the prior written approval of the Project Manager. Contractor shall retain and make available to the County all such records, accounts and books, financial or otherwise, correspondence, memoranda, and reports constituting a "public record" within the meaning of Florida Statute 119.011(12) (2015), which relate to the Project and to any claim thereof for a period of five (5) fiscal years following completion (Final Completion of the Project) or termination of agreement.

The Contractor agrees to maintain an accounting system that provides for accounting records that are supported with adequate documentation and adequate procedures for determining allowable costs.

Contractor shall develop the proper forms and reports acceptable to the County for the administration and management of the Contract Documents.

13. DRAWINGS

A. CONTRACTOR TO CHECK DRAWINGS AND DATA

The Contractor shall verify all dimensions, quantities, and details or other data received from the County, and shall notify the County of any errors, omissions, conflicts, and discrepancies found therein. The Contractor shall submit to the County a Request for Information (RFI), consecutively numbered in a format provided by or acceptable to the County, detailing all errors, omissions, conflicts, and discrepancies found therein within three calendar days of discovery. The County will provide a response to all RFIs submitted by the Contractor. The Contractor will not be allowed to take advantage of any errors or omissions, as full instructions will be furnished by the County, should such errors or omissions be discovered.

Contractor shall not be liable for damages resulting from errors, omissions, or discrepancies in the Contract Documents, unless Contractor recognized such error, omission, or discrepancy, and knowingly failed to report it to County or Project Manager.

B. SUPPLEMENTAL DRAWINGS

The County or Project Manager shall have the right to modify the details of the plans and specifications, to supplement the plans and specifications with additional plans, drawings, or additional information, as the work proceeds, all of which shall be considered as part of the Contract Documents. In the event of disagreement between the written and graphic portions of the Contract Documents, the written portion(s) shall govern.

14. PERMITS AND AUTHORIZATIONS

The Contractor shall be responsible for reviewing all permits and authorizations previously obtained for the project, including the US FWS Biological Opinion. The Contractor will be responsible for modifying the permits, as needed, to accomplish the proposed scope of work, obtaining additional permits not previously obtained including any that may not be identified in this scope of work, and abiding by all permit terms and conditions. Obtaining, paying for, and abiding by permits shall be considered as incidental to conducting the construction activities proposed for the project and shall not be grounds for requests for additional compensation. Note that prior to submittal for authorization or modification of an existing authorization, the County and Park must review and approve such submittal. Proposals requiring modification of existing authorizations must detail the modifications that are required, as County/Park approval for these cannot be guaranteed.

MONROE COUNTY DEMOLITION PERMIT

The project may require a County demolition permit, it is the Contractor's responsibility to determine the applicability of this permit and obtain it as needed. The Contractor shall coordinate with the Project Manager to demonstrate the applicability of this permit.

NPDES

The project will require an FDEP National Pollution Discharge Elimination System (NPDES) Permit, which must be obtained by and abided by the Contractor for the duration of the project. The Contractor must develop an Erosion Control Plan (ECP) to be approved by the Project Manager prior to initiation of construction. The Contractor is responsible for obtaining,

completing, and paying for any required NPDES applications, permits, and permit conditions, including inspection and reporting.

DEWATERING

Dewatering is not anticipated to be required for this project. If dewatering is necessary, the contractor shall be responsible for obtaining Dewatering Permits and shall provide normal dewatering equipment including, but not limited to, surface pumps, sump pumps, and trenching/digging machinery. Provide normal dewatering methods including, but not limited to, constructing shallow surface drainage trenches/ditches, using sand blankets, sumps, and siphons. Costs of dewatering will be considered incidental to the scope of work.

15. Maintenance of Traffic

The Contractor shall provide, as required and professionally prudent, Maintenance of Traffic (MOT) for the work site, for both vehicular and pedestrian traffic, including for any instances when construction vehicles or equipment are entering or exiting County Road 905 (CR905). When applicable, MOT activities shall be conducted under the direction of Contractor staff by a Worksite Traffic Supervisor certified in the advanced training category by a Florida Department of Transportation approved training Provider. Approved Providers will be posted on the Department's website at the following URL address: <http://www.dot.state.fl.us/rddesign/MOT/MOT.shtm>. Use approved alternate Worksite Traffic Supervisors when necessary. MOT costs shall be considered as incidental to the scope of work.

16. WORK SCHEDULE

Within 14 calendar days after receipt of the executed Contract, the Contractor shall submit to the County or Project Manager a work schedule for the project. The County or Project Manager will review and respond to the Contractor within seven calendar days of receipt of the proposed work schedule.

The work schedule shall show the various activities of work in sufficient detail to demonstrate a reasonable and workable plan to complete the project within the contract time. The work schedule shall show the order and interdependence of activities and the sequence for accomplishing the work. It shall describe all activities in sufficient detail so that the County or Project Manager can readily identify the work and measure the progress of each activity. It shall show each activity with a beginning work date, a duration, and a monetary value. It shall include start and completion dates for each scope item.

The Contractor shall provide sufficient information to indicate coordination activities with utility owners that have facilities within the limits of construction have been resolved. The Contractor shall incorporate in the schedule any utility adjustment schedules included in the Contract Documents unless the utility company and the County mutually agree to changes to the utility schedules shown in the Contract. The County has identified that utilities exist in the vicinity of, and parallel to, CR 905. However, additional unidentified utilities may exist within the project site.

The Contractor shall submit a working plan with the schedule, consisting of a concise written description of the construction plan.

The County or Project Manager will return inadequate schedules to the Contractor for corrections. The Contractor shall resubmit a corrected schedule within seven calendar days from the date of the County or Project Manager's return transmittal.

The Contractor shall submit an updated Work Progress Schedule, for County or Project Manager's acceptance, if there is a significant change in the planned order or duration of an activity. The County or Project Manager will review the corrected schedule and respond within seven calendar days of receipt.

By acceptance of the schedule, the County or Project Manager do not endorse or otherwise certify the validity or accuracy of the activity durations or sequencing of activities. The County or Project Manager will use the accepted schedule as the baseline against which to measure progress. If the Contractor fails to finalize either the initial or a revised schedule in the time specified, the County or Project Manager will withhold all Contract payments until the County or Project Manager accepts the schedule.

The Contractor shall provide an overall schedule at the pre-construction meeting and weekly schedule at progress meetings. The Contractor shall keep the Project Manager, Park, and County informed of work schedules, at minimum, on a weekly basis, including work performed, upcoming work scheduled, and changes to previously identified/proposed work schedules. Weekly coordination is anticipated to be primarily through email, with phone calls and in-person meetings on an as-needed basis. Coordination of work schedule activities are considered to be incidental, to and part of, the Contractor's proposed budget.

17. COORDINATION

A. GENERAL

Contractor is responsible to contact the Project Manager prior to commencing any activities in the Park, prior to changing the active construction area, and prior to implementing or changing maintenance of traffic on the adjacent CR 905.

B. DISCOVERY AND NOTIFICATION

If at any time the Contractor identifies situations on or associated with the work site that are, or could pose, a danger or significant management problem for the Park, the County, or the public at-large, or a change to the scope of work is required, then the Contractor must notify the Project Manager as soon as these issues are identified.

C. PUBLIC

The Contractor shall maintain a professional demeanor at all times when dealing with members of the public. All Contractor staff members on a work site shall dress in a professional manner in accordance with industry standards for the type of work being conducted. The Contractor shall not make representation, statements, or commitments as an official agent of the County or Park, instead referring any public inquiries to the Project Manager.

D. PRE-CONSTRUCTION CONFERENCE

Within five days after delivery of the executed Contract by the County to the Contractor, but before starting the work, a commencement conference will be scheduled and hosted by the Contractor, at the Park office in Key Largo, to review the schedule and provide procedures for processing Applications for Payment, procedures for communication and related project logistics. Present at the conference will be representatives from the Park, the County (including the Project Manager), and the Contractor.

18. EQUIPMENT

Contractor shall only utilize its staff members to operate equipment that have been appropriately trained in accordance with industry standards, all equipment must be maintained in good working order, used in accordance with manufacturer recommendations and ANSI (American National Standards Institute) standards and associated Best Management Practices, and shall not be stored in areas other than those approved by the Project Manager. The Contractor is responsible for maintenance of equipment including repairs due to damage for any reason, and for the safety and security of equipment. The County or Park shall not be liable for any damage to or loss of equipment from the project site.

19. UTILITIES

Contractor shall perform utility location using Sunshine State One Call, on the work site involving ground disturbing activities (including tree plantings, relocations etc.) or where underground utilities may otherwise be disturbed, as a task incidental to those activities. The Contractor shall immediately notify the Project Manager when previously unidentified utilities are identified on the project site in a location where they may be damaged or disturbed.

Where the Contractor's operations could cause damage or inconvenience to telephone, fiber optic, television, electrical power, oil, gas, water, sewer, or irrigation systems, the Contractor shall make all arrangements necessary for the protection of these utilities and services or any other known utilities.

The Contractor shall notify all utility companies that are affected by the construction operation at least 48 hours in advance. Under no circumstance shall the Contractor expose any utility without first obtaining permission from the appropriate agency. Once permission has been granted, the Contractor shall locate, expose, and provide temporary support for all existing underground utilities and utility poles where necessary.

The Contractor and his Subcontractors shall be solely and directly responsible to the owner and operators of such properties for any damage, injury, expense, loss, inconvenience, delay, suits, actions, or claims of any character brought because of any injuries or damage which may result from the construction operations under the Contract Documents.

Neither the County nor its officers or agents shall be responsible to the Contractor for damages as a result of the Contractor's failure to protect utilities encountered in the work.

In the event of interruption to domestic water, sewer, storm drain, or other utility services as a result of accidental breakage due to construction operations, the Contractor shall promptly notify the proper authority. The Contractor shall cooperate with said authority in restoration of service as promptly as possible and bear all costs of repair. In no event shall interruption of any utility service be allowed unless granted by the owner of the utility.

In the event water service lines that interfere with trenching are encountered, the Contractor may, by obtaining prior approval of the water utility, cut the service, dig through, and restore the service with similar and equal materials at the Contractor's expense and as approved by the County or Project Manager.

The Contractor shall replace, with material approved by the County or Project Management, at Contractor's expense, any and all other laterals, existing utilities, or structures removed or damaged during construction, unless otherwise provided for in the Contract Documents and as approved by the County or Project Manager. The Contractor shall replace, with material approved by the County or Project Manager, at Contractor's expense, any existing utilities damaged during the work.

20. TRASH CLEANUP AND REMOVAL

The Contractor is responsible for maintaining the project site in a professional and presentable manner and for ensuring that debris and hazardous substances do not pose a threat to harm surrounding public lands, ecological resources, or members of the public. The Contractor will be responsible for removal of all trash and debris within the project site, as well as removal of off-site trash and debris generated on the project site. Any personal trash generated by the Contractor (including food containers) must be bagged and removed from the site on a daily basis. In accordance with the conditions of the US FWS Biological Opinion, vegetative and demolition debris will not be permitted to remain on site overnight - **it must be removed and disposed of by the end of each day**. The Contractor may dispose of clean fill within the Park property in the entrance channel at Port Bougainville or, if Port Bougainville is filled and permission from the Park is granted, Carysfort Marina, as identified in **Attachment G** and as described in further detail in **Section 26(A)** of this SOW.

21. POST-CONSTRUCTION MAINTENANCE

The Park will be responsible for the maintenance and management of the project site after the completion of restoration activities and approval by the Project Manager.

22. STAGING AREAS/WORK SITES

A. LOCATIONS

The Contractor shall carefully review available locations within the project corridor regarding where to perform the staging operations, and to minimize impacts to the surrounding areas and the environment. All staging areas must be approved by the Project Manager prior to use, noting that any proposed staging outside of the construction limits may require additional work at the Contractor's sole expense to restore the site to pre-existing conditions. The Contractor is responsible for identification of the limits

of the work zone and vegetative trimming, and for providing this information to the Project Manager for verification prior to initiation of work in a particular area.

B. PLAN

A staging plan must be submitted to and approved by the Project Manager prior to the start of construction and issuance of the Notice to Proceed. Such staging plan shall be revised and resubmitted as necessary during construction.

23. ENVIRONMENTAL CONSIDERATIONS

A. PROTECTION OF LISTED SPECIES

The project site contains habitat for federal and state protected species including the KLWR and KLCM. The Contractor is responsible for coordinating work with the Project Manager and may need to adjust construction methodologies and construction schedule for certain activities, in order to avoid impacts to protected species. The Contractor will not receive additional compensation for construction methods or adjustments in construction methods or schedules to protect species. Accordingly, the Contractor should become familiar with all wildlife conservation requirements identified in **Attachment A**, and shall plan to utilize construction methodologies and take additional precautions as necessary to avoid impacts to protected species. Key conditions for protection of KLWR and KLCM include:

- All vegetation to be removed must be cut by hand (chain saws and similar hand-held equipment allowed);
- All vegetative debris, with the exception of small piles of vegetation (less than 25 cubic feet), and demolition debris must be removed daily and will not be allowed to be stored on site overnight, either open or containerized;
- The heavy equipment allowed for specific use within designated areas will be limited to the smallest size necessary to safely remove any structures, keeping impacts as minimal as possible;
- If a living KLWR or KLCM is encountered during construction, all construction activities in the vicinity must cease until the animal leaves of its own volition;
- If a dead KLWR or KLCM is found during construction, all construction activities in the vicinity must stop, the animal must be left in place and construction activities may not resume until the US FWS has authorized work to resume;
- Vegetation removal is not permitted for the purpose of allowing access for machinery larger than the minimum size equipment needed for the work.

In addition to KLWR and KLCM, Dagny Johnson Park provides habitat for numerous other wildlife species, including several threatened/endangered species. The Contractor must be careful not to disturb areas outside of the designated work zone, and must report any wildlife sightings, encounters with protected species, or injuries to protected species, to the Project Manager immediately. The County/Park staff will be relocating tree snails during the clearing of vegetation, as described in below in Section 23(B).

B. CLEARING OF VEGETATION AND PROTECTION OF SURROUNDING VEGETATION

This project is within a State Botanical Park, therefore, the Contractor must use extreme caution and avoid impacting vegetation outside of the footprint of the restoration site. Contractor is responsible for preventing impacts to all off-site trees and other vegetation, as well as to specifically identified trees to remain within the limits of construction. Protection measures may include tree protection fencing and root pruning.

Trimming as required for site access must be conducted by the Contractor in accordance with the most recent version of the ANSI A-300 standards and associated best management practices. Tree trimming activities shall be conducted by hand under the direction of a Contractor staff member (or subcontractor) that is an ISA Certified Arborist. (Pruning will not be conducted by Park staff.)

Clearing or removal of trees is only authorized within the limits of construction. Prior to commencing any clearing or trimming work, the Contractor shall submit a "Clearing Plan" to the Project Manager which identifies the boundaries and dimensions of the proposed clearing and trimming areas and shall specify methods for protecting vegetation outside of those areas. Additionally, the Contractor shall delineate the limits of the proposed clearing on the site. Once the Contractor has received permission to proceed with the proposed clearing and trimming, the Contractor shall allow the County's Project Manager and Park staff to inspect cut vegetation for the presence of tree snails prior to disposal of or chipping of cut debris. All removals shall be flush-cut level with the existing grade.

If it is found that additional tree removal (outside of the areas identified in the Clearing Plan) is required for trees in conflict with the proposed restoration work, then the Contractor must obtain approval from Project Manager prior to conducting the removal.

All vegetation removed through trimming or clearing activities must be properly disposed of by the Contractor. It may be disposed of off-site at an approved facility or chipped for use as mulch for new plantings, in accordance with the restrictions listed in the Biological Opinion.

All vegetation protection requirements shall be considered as incidental to project costs.

C. DECONTAMINATION PROTOCOL FOR INVASIVE SPECIES

Dagny Johnson Park is considered a sensitive habitat, and must be protected from introduction of invasive plant species. All equipment, including but not limited to vehicles, trailers, ATV's, and chippers, must be cleaned with a pressure washer prior to entering the project site. This decontamination protocol includes spraying down all equipment surfaces including the undercarriage and tires to ensure that mud, vegetative debris, and other debris is not transported into the Park from offsite locations. Equipment such as chain saws, loppers, etc. used for cut stump treatment must be wiped down and cleaned, prior to arrival at the project site so that they are free of debris.

The Project Manager may inspect equipment at any time for adherence to this protocol and may refuse entry of any vehicle or equipment not in compliance.

D. EROSION CONTROL AND SEDIMENTATION

Erosion control measures shall be installed prior to the beginning of any work activity. Erosion control measures shall remain in place and be maintained until all authorized work has been completed and the site has been stabilized. The Contractor must comply with all environmental permits, including measures identified in the National Pollutant Discharge Elimination System (NPDES) Stormwater Pollution Prevention Plan and Sediment and Erosion Control Plan. The Contractor must inspect installation of all erosion/control devices and immediately repair defective items. The Contractor may have to conduct water quality sampling and analysis in accordance with current State or National Pollutant Discharge Elimination System (NPDES) permit requirements, report non-conformity with Monroe County specifications or standards, State Water Quality Standards or permits. If dewatering or bank disturbance activities are proposed, the Contractor will have to monitor turbidity levels in receiving or adjacent bodies of water and provide turbidity monitoring logs to the Project Manager.

24. HAZARDOUS MATERIAL

The Contractor shall abide by the requirements described in this section.

A. IN GENERAL

The Contractor shall handle, transport, and dispose of hazardous materials in accordance with all Local, State and Federal requirements including the following:

- a. SSPC Guide 7;
- b. Federal Water Pollution Control Act; and
- c. Resource Conservation and Recovery Act (RCRA).

The Contractor shall accept responsibility for the collection, sampling, classification, packaging, labeling, accumulation time, storage, manifesting, transportation, treatment and disposal of hazardous waste, both solid and liquid. Separate all solid and liquid waste and collect all liquids used at hygiene stations and handle as hazardous materials/waste. Obtain written approval from the County for all hazardous materials/waste stabilization methods before implementation.

The Contractor shall obtain an EPA/FDEP Hazardous Waste Identification Number (EPA/FDEP ID Number) before transporting and/or disposing of any hazardous materials/waste. List the County as the generator of all hazardous materials/waste. Submit the following for the County or Project Manager's approval before transporting, treatment, or disposal, of any hazardous materials/waste:

- a. Name, address, and qualifications of the transporter;
- b. Name, address, and qualifications of the treatment facility;
- c. Proposed treatment and/or disposal of all Hazardous Materials/Waste.

The Contractor shall transport all hazardous materials/waste in accordance with applicable 40 CFR 263 (2015) Standards. Provide a copy of all completed Hazardous Materials/Waste manifest/bills of lading to the County or Project Manager within 21 days of each shipment.

Determination of appropriate debris disposal methods is the responsibility of the Contractor.

B. ASBESTOS

Asbestos containing materials (ACM) are not known to occur on the project site, as described in **Attachment F**.

C. LEAD BASED PAINT

Facilities at the Port Bougainville site were identified as having lead based paint (LBP). The Contractor must ensure that all OSHA (Occupational Safety and Health Administration) and other federal, state, and local requirements are followed for the proper handling and disposal of LBP, and provide documentation of compliance with these requirements to the Project Manager.

25. CONSTRUCTION MEANS AND METHODS

Where not specified in the SOW or attached exhibits, the Contractor shall be solely responsible for the means, methods, techniques, sequences, and procedures of construction. The Contractor shall supervise and direct the work competently and efficiently, devoting such attention thereto and applying such skills and expertise as may be necessary to perform the work in accordance with the Contract Documents. The Contractor shall provide the County with a description of the means and methods upon request. Specific requirements for and restrictions pertaining to construction means and methods are listed below.

The Contractor may propose alternative means and methods for consideration that do not directly comply with one or more provisions of this SOW. However, unless the Contractor has received written acceptance of proposed alternative means and methods from the County, all proposed bids and pricing will be required to be bound to all standard conditions and provisions in this SOW. The Contractor may propose alternative means and methods for construction to the Project Manager after contract award, however, acceptance of these cannot be guaranteed, and acceptance may be contingent upon a negotiated reduction in fees.

26. DEMOLITION

Demolition must be conducted in such a manner as not to unduly disturb the adjacent sensitive environmental habitat, potential KLWR and KLCM utilizing the project site and infrastructure components that are intended to remain. At minimum, the Contractor will be responsible for restoring, at its own expense and to the County's satisfaction, any environmental or infrastructure resource outside of the limits of disturbance that is damaged as a result of construction activity. Guidance and restrictions on demolition activity are included in the US FWS Biological Opinion (**Attachment A**).

A. DISPOSAL OF RUBBLE AND DEBRIS

The Contractor may dispose of clean fill within the Park property in the entrance channel at Port Bougainville or, if Port Bougainville is filled and permission from the Park is granted, Carysfort Marina, as identified in **Attachment G**. Fill disposed of offsite (either not meeting the definition of clean fill or by contractor choice) must be disposed of in accordance with all applicable federal, state, and local regulations. The Contractor must provide information to the County to document the disposal location and proper handling of all fill material.

B. CLEAN FILL

For the purpose of this Contract 'Clean Fill' shall be defined as clean lime-rock fill (free of contaminants), concrete rubble (smaller than 4 feet, rebar protruding no further than six inches, with no paint or coating that has not been approved by the Park), brick, crushed glass, PVC (chipped to smaller than six inches), clay roof or floor tiles, and ceramic floor tiles free of sealants. Other material including wood, metal, and asphalt is not considered clean fill. Material containing lead based paint is not considered to be clean fill.

C. GRADING

All work under this Contract shall be constructed in accordance with the lines and grades shown on the Construction Drawings, or as directed by the Project Manager. The full responsibility for keeping alignment and grade rests upon the Contractor. The Contractor, prior to commencing construction, shall have established bench marks and base-line controlling points. The Contractor shall so place excavation and other materials so as to cause no inconvenience in the use of the reference marks provided. The Contractor shall remove any obstructions placed by the Contractor contrary to this provision.

D. SURVEY

The Contractor shall furnish all stakes, templates, and other materials necessary for establishing and maintaining the lines and grades necessary for control and construction of the work.

The Contractor shall establish all horizontal and vertical controls necessary to construct the work in conformity to the Contract Documents. The Contractor shall perform all calculations required, and set all stakes needed such as grade stakes, offset stakes, reference point stakes, slope stakes, and other reference marks or points necessary to provide lines and grades for construction.

E. SAFEGUARD MARKS

The Contractor shall safeguard all points, stakes, grade marks, monuments and bench marks made or established on the work, bear the cost of re-establishing them if disturbed, and bear the entire expense of rectifying work improperly installed due to not maintaining, protecting, or removing without authorization such established points, stakes, and marks. The Contractor shall safeguard all existing and known property corners, monuments, and marks adjacent to but not related to the work and, if required, shall bear the cost of re-establishing them if disturbed or destroyed.

27. OWNERSHIP OF REMOVED MATERIAL

Once fill, debris, and other material required to be removed from the project site have left Park property, it will become the sole possession of the Contractor. The Contractor must provide documentation to the County as to the disposition and location of the material, but it is at the Contractor's discretion where to take the material for disposal or if it can be beneficially reused. If the Contractor is able to lawfully sell or reuse material required to be removed for the scope of work for this project, for financial gain, the County and Park are not owed compensation for such financial gain

28. SITE SPECIFIC OPERATIONS - PORT BOUGAINVILLE SITE

Additional information including estimates of cubic yards of fill, square yards, and linear feet of pavement, and anticipated demolition methodologies are provided in **Attachment C**, Design Specifications and **Attachment D**, Project Plans. The Contractor shall complete the restoration activities described below.

1. IN GENERAL

The intent of the project is to remove structures (vacant since approximately the late 1970's) and associated infrastructure and fill for the purpose of restoring upland hammock habitat. The existing paved roadway will be reduced within the existing footprint, to create a 12 foot wide "meandering" (non-linear) paved trail for pedestrian and vehicular access.

2. ACCESS

The Contractor will be provided access via a dirt road located on the ocean side of CR 905 at power pole 240. Prior to construction, vegetation along the access road and on access routes within the Park outside of construction areas must be hand-trimmed by the Contractor (under direction of its ISA Certified Arborist), to the minimum width to allow one-lane transit. Any variations in the access routes identified in **Attachment G** and work areas identified in Attachments C and D must be approved by the Project Manager. Within the construction area, trees may be removed for equipment access and to facilitate construction activities, after request approved by the Project Manager. Trimming and clearing must comply with Section 23 of this SOW.

• RESTORATION ACTIVITIES

The Port Bougainville project site comprises 6.16 acres, with work consisting of a combination of removal of structures, removal of fill, removal of roads, and planting, on seven areas as follows. (The area identified as "Fill Area" on Attachment D is not included in this scope of work). Note that areas with substantial fill have been identified, however all areas, unless otherwise designated in the Biological Opinion, with a base elevation higher than the surrounding natural grade will be required to be graded to match the surrounding elevation. The post-construction grade must be within 18 inches of the average surrounding grade, as measured (by the Project Manager) from multiple locations based on site conditions. Grading is intended to provide a smooth transition with offsite contours, and must be at a slope of 4:1 or shallower.

Foundations, structures and utilities greater than 12 inches below the final grade in areas of fill removal may remain, provided that clean soil is backfilled over them as applicable to match the surrounding grade.

All demolished materials must be removed from the site daily to minimize the possibility of KLWR and KLCM usage. Existing asphalt to remain shall not be damaged and must be repaired at Contractor's expense if damaged during demolition activities. Where possible, path meanders should incorporate the location of manholes

- 1) Tennis Courts: 1.21 Acres. Removal of asphalt and chain link fencing. This area is identified on the Project Plans (**Attachment D**) on Sheet C-1.

- 2) Bathhouse: 0.30 Acres. Removal of structure. This area is identified on the Project Plans (**Attachment D**) on Sheet C-1.
- 3) House: 0.45 Acres. Removal of structure, removal of fill material to return area to elevation even with surrounding natural grade. This area is identified on the Project Plans (**Attachment D**) on Sheet C-9.
- 4) Restaurant and Tunnel: 1.30 Acres. Removal of structures, planting native plants supplied by Park. This area is identified on the Project Plans (**Attachment D**) on Sheets C-6 and Sheet C-7.
- 5) Lodge: 0.62 Acres. Removal of structures, removal of broken asphalt and fill material to return area to elevation even with surrounding natural grade. This area is identified on the Project Plans (**Attachment D**) on Sheet C-8.
- 6) Foundation: The removal of this structure has been deleted from the project as required by the Biological Opinion. Only the asphalt leading to the structure is to be removed. This area is identified on the Project Plans (**Attachment D**) on Sheet C-9.
- 7) Roads: 2.15 Acres. Removal of asphalt and base material. Asphalt removal will require saw-cutting to leave the desired 12-foot remaining asphalt roadway intact. This area is identified on the Project Plans (**Attachment D**) on Sheets C-2 through C-6. Contractor to selectively remove asphalt to follow the cleanest/best path, providing a meandering pattern where possible, and avoiding exposing manhole covers.

- **PLANTING**

Planting must be performed using native stock grown in the Park's Native Plant Nursery. The Park will provide a maximum of 300 three-gallon plants to be planted within the limits of construction after completion of restoration activities. The Park staff will determine the appropriate material for the site and will provide the Contractor with the plants and a planting plan (at no direct cost to the Contractor). The Project Manager will instruct the Contractor on the location of the planting areas and placement of planting materials. Contractor will be responsible for transportation of plants from John Pennekamp State Park in Key Largo to the project site.

Installation

The Contractor will be required to install native vegetation at the Port Bougainville site, in the area designated by the Park. The Contractor must conduct planting activities in accordance with the most recent version of ANSI standards and associated best management practices, and in accordance with the following Park requirements:

- 1) The depth of planting holes shall be twice the width of the root ball mass and soil from the pot to allow the roots to properly spread out.
- 2) Planting holes may not be dug by auger, they must be mechanically excavated or hand dug.
- 3) Plants shall be installed so that the root ball mass and soil protrude approximately one-inch above the hole.
- 4) Any roots that are wound around and root bound in the pot will be carefully broken apart prior to installation in the hole.

- 5) Soil that is removed for the hole will be replaced to fill the hole and may be amended as needed to ensure plant survival.
- 6) The use of fertilizers will not be required. If needed, organic fertilizers can be used at a minimal rate as needed to ensure survival of the plants.

Mulch

The Contractor must place a three inch layer of mulch over the excavated planting pit of each newly installed plant, leaving a three-inch gap around the trunk. Mulch must be free of dyes and viable seeds, and must not consist of cypress material. Mulch may consist of vegetative material cut and chipped on site, which was required to be removed for access and/or construction.

Irrigation

Contractor shall, as a routine part of, and incidental to, plant installation, provide irrigation of new plantings in accordance with the following:

- 1) All new plantings shall be irrigated to capacity at the time of installation;
- 2) After plant installation, the Contractor must provide irrigation for all newly installed vegetation in quantities sufficient to fill planting pits to field capacity;
- 3) Watering shall be done via water truck/hose, not temporary pipes, and shall be in accordance with the following schedule (which is not considered part of the project schedule in Section II C): Water plants three days per week for the first two weeks, and two days per week for the next four weeks, for a total of six weeks, unless the areas receive equivalent rainfall;
- 4) The Park will coordinate site access for watering after completion of construction;
- 5) The Park does not have an accessible freshwater source for filling water tanks. Identification of a water source for irrigation (or other) needs is the responsibility of the Contractor.

Soil Compaction

The Contractor shall avoid soil compaction in areas of plant installation. If the Contractor is unable to avoid soil compaction, the Contractor will be required to aerate the soil using an air spade.

- COMPLIANCE WITH MAY 8, 2015 US FWS BIOLOGICAL OPINION
The US FWS Biological Opinion, provided as Attachment A of this SOW, has specific conditions and requirements for construction. The following summary of requirements from the Biological Opinion (BO) is included here for emphasis and illustrative purposes only; the original language of the Biological Opinion must be followed and take precedence over the summary version provided herein. Required activities for construction of artificial wildlife nests and wildlife monitoring will be conducted by Park personnel.
 - All vegetation will be trimmed from within the designated work areas by the Contractor using chain saws or hand tools only (collectively defined as machinery), unless otherwise permitted in the BO. Care will be taken to avoid any tree removal on the edges of the defined work area to the maximum extent possible. All cut vegetation will be removed daily, and piles or other accumulations of vegetation will not be left overnight, with the exception

of small piles of vegetation (less than 25 cubic feet), which may be permanently deposited in adjacent hammock habitat. Concrete or any debris is prohibited in any area. All demolished materials must be removed from each work area daily to minimize the possibility of KLWR and KLCM usage. Any vegetation to be used as mulch must be mulched and stored at the designated temporary mulch staging area at the end of each workday.

- Park will provide native vegetation from stock grown in the Park's native plant nursery to be planted within the areas disturbed by heavy equipment after the completion of restoration activities to supplement natural recruitment and ensure successful hammock restoration. The Park will instruct the Contractor on the location of the planting area and placement of planting materials. Based on Service recommendations, the trees and shrubs will be planted at densities no lower than one plant per 50 square feet of planting area, and no higher than one plant per 25 square feet of planting area.
- In order to avoid compaction of soil in cleared areas and to ensure plant colonization and growth, disking or air spades (near existing trees) will be used, as needed, to loosen soils compacted by equipment.
- Heavy equipment will be used in some of the work areas as described below. The size of the heavy equipment used will be limited to the available access to each individual work area. The selected heavy equipment will be limited to the smallest size necessary to safely remove any structures, keeping impacts as minimal as possible. Vegetation will not be removed to allow the use of larger heavy equipment.
- The outer edge of the staging area, site ingress/egress, asphalt areas, and other areas for all locations where heavy equipment will be used shall be plotted with / by Global Positioning System unit, mapped, and provided to the Project Manager. These areas will delineated with coordination with the Service and will be roped off prior to construction.
- Tennis Courts Specific Activity and Minimization Measures: The asphalt and fill from within the tennis court will be removed with heavy equipment. The outer rocky edges of the tennis courts will not be removed. Based on Service recommendations, FDEP will create an inward sloping wall during fill removal to be no less than 2:1 (width:height). However, due to varying elevations surrounding the tennis courts, this may not be feasible in all areas and the FDEP will coordinate with the Service to adjust this slope should it be deemed necessary. No fill removal is proposed on the access roads or in between the courts. Any fence removal, if desired, will occur with minimum vegetation removal. Fence removal work will be conducted from inside the tennis courts, and all materials will be brought inward, toward the center of the courts. Machinery, which could include heavy equipment, will be used for the fence removal. All lights will be removed, including those outside of the fenced area. While access to the tennis courts is available via open paths, the heavy equipment will not increase the size of access or staging areas.
- Bathhouse Specific Activity and Minimization Measures: Materials will be demolished and removed by hand only and carried to small construction vehicles staged at the asphalt edge. The current width of the recommended location of ingress/egress is a maximum 13 feet. The size of the access or staging areas will not be enlarged. Machinery, which could include heavy equipment, may be used to cut and remove vegetation from within the designated

work area. However, tree removal on the edges of the defined work area shall be avoided to the maximum extent possible.

- House Specific Activity and Minimization Measures: While there is adequate access for heavy equipment to be utilized at the house, the location will require some removal of hammock to allow for a maximum of 13-foot wide ingress/egress. Machinery, which could include heavy equipment, will be used to cut and remove vegetation from the ingress/egress area and from within the designated work area. However, care will be taken to avoid any tree removal on the edges of the defined ingress/egress and work area to the maximum extent possible.
- Restaurant and Tunnel Specific Activity and Minimization Measures: There is adequate access for heavy equipment to be utilized at the restaurant and tunnel. The size of the access or staging areas will not be enlarged. Machinery, which could include heavy equipment, may be used to cut and remove vegetation from within the designated work area. However, care will be taken to avoid any tree removal on the edges of the defined work area to the maximum extent possible.
- Lodge Specific Activity and Minimization Measures: There is adequate access for heavy equipment to be utilized at the lodge. The current ingress/egress width is a maximum of 13 feet. The size of the access or staging areas will not be enlarged. The stacked natural wood piles will be dispersed in the hammock or used in the construction of artificial nests throughout the Park. Any natural logs not used for nests shall be removed by hand to the outer limits of the lodge area where they will be cut and loaded onto small construction vehicles for removal from the site. Milled wood or lumber cannot be used in artificial nest construction or dispersed into the hammock and must be discarded. Care will be taken to not disturb the fill, particularly on the edges, when removing the concrete foundation. Machinery, which could include heavy equipment, will be used to cut and remove vegetation from within the designated work area. However, care will be taken to avoid any tree removal on the edges of the defined work area to the maximum extent possible. No fill will be removed from this location.
- Foundation Specific Activity and Minimization Measures: Due to the high density of KLCM and the amount of quality hammock that would need to be removed, no demolition will occur at this site. No vegetation or fill will be removed from within the foundation work area. The asphalt leading up to the site will be removed, with heavy equipment, up to the vegetated edge of the extent of the asphalt. Care will be taken to avoid any tree removal on the edges of the defined work area to the maximum extent possible.
- Roads Specific Activity and Minimization Measures: Asphalt will be removed with the exception of a 12-foot wide roadway that will be left intact. Saw-cutting will be used to remove the asphalt following the cleanest/best path, providing a meandering pattern where possible (avoiding exposing manhole covers). Additionally, the machinery removing the asphalt roadways will not disturb an area greater than the area being removed and will avoid any tree removal on the edges to the maximum extent possible.
- If a living KLWR or KLCM is encountered during land clearing or demolition, all work will immediately stop and the animal will be allowed to leave the area under its own volition.

Land clearing and demolition work will not resume until the animal has left the project site. If a dead KLWR or KLCM is encountered during land clearing or demolition, all work will immediately stop, and the animal will be left *in situ*. The original material surrounding it will be immediately returned to its original configuration to the maximum extent practicable. The Service will then be contacted for further instructions. Demolition or debris removal will not resume until authorized by the Service.

Dear Mr. Rice:

This document transmits the U.S. Fish and Wildlife Service's (Service) Biological Opinion to Florida Department of Environmental Protection (DEP) for the revised North Key Largo restoration project located in Monroe County, Florida. This document amends the Service's 2011 Biological Opinion (41420-2011-F-0183; BO)(Service 2011) for the removal of structures on Dagny Johnson Key Largo Hammock Botanical State Park (Dagny) and analyzes the effects of the revised project on the endangered American crocodile (*Crocodylus acutus*), the endangered Key Largo cotton mouse (*Peromyscus gossypinus allapaticola*; KLCM), the endangered Key Largo woodrat (*Neotoma floridana smalli*; KLWR), the endangered Schaus swallowtail butterfly (*Heraclides aristodemus ponceanus*; Schaus), the threatened eastern indigo snake (*Drymarchon corais couperi*), and the threatened Stock Island tree snail (*Orthalicus reses reses*; SITS) in accordance with section 7 of the Endangered Species Act of 1973, as amended (Act) (87 Stat. 884; 16 U.S.C. 1531 *et seq.*).

The Service is consulting with DEP on this project under section 7 of the Act because there is a Federal nexus from the expenditure of compensation funds from the federally funded Key Largo Wastewater Treatment Plant. The funds were transferred to Monroe County as compensation resulting from the Service's evaluation of the construction and expansion of the Key Largo Wastewater Treatment Plant (Biological Opinion [41420-2000-T-0736] [Service 2001], Technical Assistance [TA] [41420-2006-FA-1604] [Service 2006]). According to the terms of the Service's October 2006 TA letter to the Key Largo Wastewater Treatment District, the Service agreed the funds may be used cooperatively with the DEP to restore tropical hardwood hammock on the island of Key Largo. The biological opinion for the original North Key Largo

restoration project was issued on August 17, 2011, and analyzed hand clearing of structures to address hazards in Dagny. DEP is requesting to modify the project to include the use of heavy equipment¹ to complete the restoration work within Dagny at the Port Bougainville (Port B) restoration sites.

This amendment only addresses restoration work at the Port B site. Any modifications to the project at Dagny's other two sites (Old Roads and Nike Radar) would need to be addressed in a separate amendment. This Biological Opinion only provides updates and revisions to the applicable portions of the original BO. However, the Conclusion and Incidental Take Statement (associated assessment, Reasonable and Prudent Measures, and Terms and Conditions) are comprehensive and cover the entire project. The pages in which revisions are made are indicated in the header of each section.

This amendment is based on information provided in the November 2013 draft Request for Proposal for Habitat Restoration Project within Dagny Johnson Key Largo Hammock State Park (Monroe County 2013; RFP), email messages, telephone conversations, site visits, and other sources of information. A complete record of this consultation is on file at the South Florida Ecological Services Office, Vero Beach, Florida.

Consultation History (Page 2)

During a phone conversation on November 22, 2013, DEP and Monroe County requested to reinstate formal consultation with the Service to modify the restoration project at Port B, located within Dagny, for the KLWR and KLCM. Over the next several months, the Service conducted several meetings with DEP and Monroe County to identify the feasibility of modifying the original project to use heavy equipment to conduct restoration and to gather species information.

On February 26, 2014, the Service, DEP, and Monroe County discussed the restoration plans at the Port B site. The parties agreed that a site visit would be required to: 1) better define the work area, 2) identify if the use of heavy equipment was feasible, what restrictions would be required, and 3) evaluate the need for additional surveys in the event heavy equipment was used.

On March 10, 2014, the Service conducted a site visit of the Port B restoration areas. During this meeting the Service identified the necessary survey areas. It was determined that trapping surveys would be conducted by the Service with participation by the DEP and any biologists who may do work as part of the restoration project.

The Service conducted trapping surveys for KLWR and KLCM at the various work areas within Port B outlined in the project between April 7, 2014, and April 11, 2014.

¹ Heavy equipment refers to heavy-duty vehicles, specially designed for executing construction tasks, most frequently ones involving earthwork operations. Heavy equipment includes vehicles such as excavators, loaders, and dump trucks and come in various sizes. The size of the heavy equipment used will be limited to the available access to each individual work area and will be the smallest size necessary to safely remove any structures, keeping impacts as minimal as possible.

On June 24, 2014, the Service met with DEP and Monroe County at the Port B restoration areas to discuss survey results and outline the potential effects from the use of heavy equipment. Potential ingress/egress and staging areas were identified as well as some possible additional minimization measures for each location in the event heavy equipment would be used.

On July 31, 2014, the Service spoke with the DEP by phone regarding the potential impacts from restoration and to finalize the minimization efforts that would be required to reduce the effects of using heavy equipment on the soils and to listed species.

As of July 31, 2014, the Service had received all the information necessary for reinitiation of formal consultation as required in the regulations governing interagency consultations (50 CFR § 402.14).

BIOLOGICAL OPINION

DESCRIPTION OF PROPOSED ACTION (Page 2)

The DEP, in coordination with Monroe County, proposes to perform upland hammock restoration activities consisting primarily of demolition and removal of structures, fill removal, grading, and planting of native vegetation. Funds that were transferred to Monroe County as compensation resulting from the Service's June 11, 2001, BO and October 26, 2006, TA will be used to accomplish the required minimum of 4.2 acres of hammock restoration. Any restoration work completed using this funding will be conducted by a contractor hired by Monroe County in accordance with the County's purchasing procedures. The project proposes to restore the same acreage identified in the original BO which includes 13.16 acres of hammock in North Key Largo. The Service recognizes that the entire project may not be completed with the amount of available compensation funds. The requirements for restoration in the referenced BO and TA will be considered fulfilled when a minimum of 4.2 acres of hammock have been restored.

The portion of the project that is proposed in Port B comprises 6.16 acres of hammock in seven distinct areas. The seven work areas are identified as the: Tennis Courts, Bathhouse, House, Restaurant and Tunnel, Lodge, Foundation, and Roads. An onsite staging area will be identified to temporarily hold mulch that will be distributed on site.

The project will include the following general restoration activities and minimization measures within Port B:

1. All vegetation will be trimmed by workers using chain saws or hand tools (collectively defined as machinery) from within the designated work areas unless otherwise discussed in this amendment. Care will be taken to avoid any tree removal on the edges of the defined work area to the maximum extent possible. All cut vegetation will be removed daily, and piles or other accumulations of vegetation will not be left overnight with the exception of small vegetation piles (less than 25 cubic feet), which may be permanently deposited in adjacent hammock habitat.

2. Concrete or any debris is prohibited in any area. All demolished materials must be removed from each work area daily to minimize the possibility of KLWR and KLCM usage. Any vegetation to be used as mulch must be mulched and stored at the designated temporary mulch staging area at the end of each workday.
3. Feral cats are a major threat impacting federal and state endangered species within Dagny and on the Service's neighboring public lands. DEP will continue to allow Service staff to conduct feral cat monitoring and trapping within the park boundaries. DEP will procure and monitor six remote cameras within the park boundaries, and within 1 year from project completion develop and implement a strategy for long-term, management of feral cats within Dagny.
4. DEP will secure the necessary materials to construct artificial KLWR nest structures. The nest structures will be constructed at the Bathhouse, House, Restaurant and Tunnel, and Lodge at least 3 months prior to the start of any restoration activity. DEP will organize any work force that may be required to construct the nest structures. The Service has had success in constructing artificial KLWR nest structures and will provide support for the design and construction of the artificial nest.
5. DEP will provide native vegetation from stock grown in Dagny's native plant nursery to be planted within the areas disturbed by heavy equipment after the completion of restoration activities to supplement natural recruitment and ensure successful hammock restoration. The DEP will instruct Monroe County's contractor on the location of the planting area and placement of planting materials. Based on Service recommendations, the trees and shrubs will be planted at densities no lower than one plant per 50 square feet of planting area, and no higher than one plant per 25 square feet of planting area. The DEP will monitor the planted vegetation for 3 years and will provide additional plants if the survival rate falls below 75 percent.
6. In order to avoid compaction of soil in cleared areas and to ensure plant colonization and growth, disking or air spades (near existing trees) will be used, as needed, to loosen soils compacted by equipment.
7. Heavy equipment will be used in some of the work areas as described below. The size of the heavy equipment used will be limited to the available access to each individual work area. The selected heavy equipment will be limited to the smallest size necessary to safely remove any structures, keeping impacts as minimal as possible. Vegetation will not be removed to allow the use of larger heavy equipment.
8. The outer edge of the staging area, site ingress/egress, asphalt areas, and other areas for all locations where heavy equipment will be used shall be plotted with Global Positioning System unit, mapped, and provided to the contractor and any onsite biologist. These areas will delineated with coordination with the Service and will be roped off prior to construction.

A description of each of the Port B restoration areas size, general restoration activities proposed, survey effort, and area specific restoration activities and minimization measures are as follows:

1. Tennis Courts: Size: 1.21 acres. Restoration activity: Removal of asphalt, chain link fencing and collection of fill from within the tennis court areas from the fence line inward (toward individual courts).

Survey effort: No trapping was conducted at the tennis courts during the week of surveying performed by the Service.

Specific activity and minimization measures: The asphalt and fill from within the tennis court will be removed with heavy equipment. The outer rocky edges of the tennis courts will not be removed. Based on Service recommendations, DEP will create an inward sloping wall during fill removal to be no less than 2:1 (width:height). However, due to varying elevations surrounding the tennis courts this may not be feasible in all areas and the DEP will coordinate with the Service to adjust this slope should it be deemed necessary. No fill removal is proposed on the access roads or in between the courts. Any fence removal, if desired, will occur with minimum vegetation removal. Fence removal work will be conducted from inside the tennis courts and all materials will be brought inward, toward the center of the courts. Machinery, which could include heavy equipment, will be used for the fence removal. All lights will be removed, including those outside of the fenced area. While access to the tennis courts is available via open paths, the heavy equipment will not increase the size of access or staging areas.

2. Bathhouse: Size: 0.30 acres. Restoration activity: Removal of structure and scattered debris.

Surveys: No trapping was conducted at the bathhouse during the week of surveying performed by the Service.

Specific activity and minimization measures: Materials will be demolished and removed by hand only and carried to small construction vehicles staged at the asphalt edge. The current width of the recommended location of ingress/egress is a maximum 13 feet. The size of the access or staging areas will not be enlarged. Machinery, which could include heavy equipment, may be used to cut and remove vegetation from within the designated work area. However, tree removal on the edges of the defined work area shall be avoided to the maximum extent possible. Because of the debris removal, prior to demolition, a minimum of 6 artificial nests will be constructed in multiple locations surrounding the bath house area.

3. House: Size: 0.45 acres. Restoration activity: Removal of structure, removal of fill material to return the area to an elevation even with surrounding natural grade.

Surveys: Surveys were conducted over 3 nights at the house. Over the course of trapping, a KLCM was captured at 3 different trap sites (2 individuals, 1 recapture).

Specific activity and minimization measures: While there is adequate access for heavy equipment to be utilized at the house, the location will require some removal of hammock to allow for a maximum of 13-foot wide ingress/egress. Machinery, which could include heavy equipment, will be used to cut and remove vegetation from ingress/egress area and from within the designated work area. However, care will be taken to avoid any tree removal on the edges of the defined ingress/egress and work area to the maximum extent possible. Due to the high density of KLCM, prior to demolition a minimum of 12 artificial nests will be constructed in multiple locations surrounding the house area.

4. Restaurant and Tunnel: Size: 1.30 acres. Restoration activity: Removal of structures and planting native plants supplied by DEP as described in minimization measure 5 listed above.

Surveys: Surveys were conducted over 4 nights at the restaurant and tunnel. Over the course of trapping a KLCM was captured at 3 different trap sites (2 individuals, 1 recapture).

Specific activity and minimization measures: There is adequate access for heavy equipment to be utilized at the restaurant and tunnel. The size of the access or staging areas will not be enlarged. Machinery, which could include heavy equipment, may be used to cut and remove vegetation from within the designated work area. However, care will be taken to avoid any tree removal on the edges of the defined work area to the maximum extent possible. Due to the high density of KLCM, prior to demolition a minimum of 10 artificial nests will be constructed in multiple locations surrounding the tunnel area.

5. Lodge: Size: 0.62 acres. Restoration activity: Removal of structures, wood piles, broken asphalt, and collection of concrete foundation to return the area to an elevation even with surrounding natural grade.

Surveys: Surveys were conducted over 4 nights at the lodge. Both KLWR's and KLCM were caught during trapping at the lodge. At least one targeted species was captured on each night traps were set. KLCM were caught at 2 different trap sites (2 individuals, 1 recapture) on 3 nights that traps were set. KLWR's were caught at 3 different trap sites (2 individuals, 1 recaptured twice) on 3 nights the traps were set. Both KLCM and KLWR's were caught within and around the structure. One KLWR was spotted entering a nest after being released.

Specific activity and minimization measures: There is adequate access for heavy equipment to be utilized at the lodge. The current ingress/egress width is a maximum of 13 feet. The size of the access or staging areas will not be enlarged. The stacked natural wood piles will be dispersed in the hammock or used in the construction of artificial nests throughout Dagny. Any natural logs not used for nests shall be removed by hand to the outer limits of the lodge area where they will be cut and loaded onto small construction

vehicles for removal from the site. Milled wood or lumber cannot be used in artificial nest construction or dispersed into the hammock and must be discarded. Care will be taken to not disturb the fill, particularly on the edges, when removing the concrete foundation. Machinery, which could include heavy equipment, will be used to cut and remove vegetation from within the designated work area. However, care will be taken to avoid any tree removal on the edges of the defined work area to the maximum extent possible. Due to the high density of both KLWR's and KLCM, prior to demolition a minimum of 18 artificial nests be constructed in multiple locations surrounding the lodge area, using natural logs from within the lodge. No fill will be removed from this location.

6. Foundation: Size: 0.13 acres. Restoration activity: Removal of structure.

Surveys: Surveys were conducted over 3 nights at the foundation. Over the course of trapping a KLCM was captured at 3 different trap sites (2 individuals, 1 recapture).

Specific activity and minimization measures: Due to the high density of KLCM and the amount of quality hammock that would need to be removed, no demolition will occur at this site. No vegetation or fill will be removed from within the foundation work area. The asphalt leading up to the site will be removed, with heavy equipment, up to the vegetated edge of the extent of the asphalt. Care will be taken to avoid any tree removal on the edges of the defined work area to the maximum extent possible.

7. Roads: Size: 2.15 acres. Restoration activity: Removal of asphalt.

Surveys: No trapping was conducted in association with the roads during the week of surveying performed by the Service.

Specific activity and minimization measures: Asphalt will be removed with the exception of a 12-foot wide roadway that will be left intact. Saw-cutting will be used to remove the asphalt following the cleanest/best path, providing a meandering pattern where possible, and avoiding exposing manhole covers. Additionally, the machinery removing the asphalt roadways will not disturb an area greater than the area being removed and will avoid any tree removal on the edges to the maximum extent possible.

Action Area (Page 3)

The action area was originally defined as approximately 19.07 acres of hammock and transitional wetlands at three previously disturbed sites. The introduction of heavy equipment expands the area in which KLWR and KLCM will be affected. However, this temporary loss of habitat does not expand the original action area. The action area specific to the revised project is the combined footprints of the Port B work areas (6.16 acres).

STATUS OF THE SPECIES/CRITICAL HABITAT

Analysis of the species/critical habitat likely to be affected

Other species in the Action Area (Page 12)

In addition to the KLWR and KLCM, the American crocodile, eastern indigo snake, Schaus, and SITS also occur within the project's action area.

The project area is within the boundaries of designated critical habitat for the American crocodile. Suitable nesting habitat for the American crocodile will not be affected. Therefore, the Service finds the proposed project may affect, but is not likely to adversely affect the American crocodile and its designated critical habitat.

Historically, the eastern indigo snake ranged throughout the upland habitats of the Florida Keys; however, its present distribution is uncertain. Suitable habitat for the eastern indigo snake includes a mosaic of habitats in which they establish home ranges of up to 183 acres for males, and up to 120 acres for females (Layne and Steiner 1996). The large home range of eastern indigo snakes makes surveying difficult. The DEP has agreed to implement the Eastern Indigo Snake Protection Measures (Service 2013); therefore, the Service finds the proposed project may affect, but is not likely to adversely affect the eastern indigo snake.

The Schaus is a blackish-large brown and yellow butterfly found in the tropical hardwood hammocks extending from Southern Miami-Dade County to Lower Matecumbe Key. All restoration sites contain suitable habitat for the Schaus. Schaus were documented within Dagny during pedestrian surveys conducted by the DEP's environmental consultant. No additional surveys for Schaus were conducted specifically for this project and no Schaus were identified during the Service's on site visits. The scope of work does not include the removal of plant species used by the Schaus and a minimal amount of vegetation removal is expected to occur. Therefore the Service finds the proposed project may affect, but is not likely to adversely affect the Schaus.

SITS feed primarily on wild tamarind (*Lysiloma bahamensis*), willow bustic (*Bumelia salicifolia*), poisonwood (*Metopium toxiferum*), gumbo limbo (*Bursera simaruba*), pigeon plum (*Coccoloba diversifolia*), ironwood (*Krugiodendron ferreum*), wild lime, mastic (*Mastichodendron foetidissimum*), and strongbark (*Bouyeria* sp.), but may also feed on other species. All of these tree species are found within Dagny and may be present in a density or environment at the work areas that creates a microclimate (shade, humidity, temperature) favorable for tree snails. While no protocol surveys for SITS were conducted and no SITS were identified during the Service's on site visits, the sites contain suitable habitat for this species and SITS are known to be present within Dagny. The scope of work requires a minimal amount of vegetation removal. To minimize the possibility affecting the SITS, the DEP has agreed to stop work if the SITS are found within a designated work area and to contact the Service for guidance, before work is continued. Therefore, the Service finds the proposed project may affect, but is not likely to adversely affect the SITS.

EFFECTS OF THE ACTION

The project site contains suitable habitat and is located within the geographic range of the KLWR and KLCM. Both KLWRs and KLCM are currently found within the proposed construction footprint. The time required to complete construction of the project is not known. It is unknown when new hammock will be mature enough for KLWRs and KLCM to utilize the work areas.

Analyses for effects of the action (Page 17)

Direct Effects: The restoration activities and temporary habitat loss during the clearing and removal of structures, fill, and roads may result in take of the KLWR and the KLCM. The probability of incidental take is dependent upon the number of KLWRs and KLCM in the area, their dispersal abilities, and the amount and distribution of available, suitable habitat. The use of heavy equipment can crush or injure individual KLWRs and KLCM and destroy or degrade nesting and foraging habitat. In addition, construction activities may adversely affect KLWRs and KLCM by causing them to leave the area and miss foraging and mating opportunities. Individuals fleeing the area may be more vulnerable to predation. Therefore, the probability of take during restoration work at Port B has increased with the additional use of heavy equipment. With proper safeguards in place, direct mortality of the KLWR and the KLCM as a result of the added use of heavy equipment can be minimized.

The proposed action will directly result in the temporary loss of 6.16 acres of potentially suitable habitat, some of which provides foraging and breeding habitat for KLWRs and KLCM. A total of 2,498 acres of suitable KLWR and KLCM habitat currently occurs in North Key Largo. Therefore, the project will result in temporary impacts to less than 0.5 percent of the geographic range of these species, and much of that 0.5 percent is currently concrete, asphalt or road beds.

Species response to the proposed action

The project will result in increased human activity (*e.g.*, equipment, construction personnel, surveys, replanting, etc.). As a result, KLWRs and KLCM may leave the area and miss foraging and mating opportunities. Individuals fleeing the area may be more vulnerable to predation. The increase in human activity could cause the KLWR and the KLCM to avoid using existing adjacent habitat, resulting in additional temporary habitat loss. However, KLWRs and KLCM present adjacent to the restoration activities could acclimate to the human activities and not abandon adjacent habitat. The number of individuals that will be present at the time of the action is not known. The data collected from surveys cannot accurately determine population density estimates of KLWRs or KLCM within the work areas. The Service anticipates that with the implemented minimization measures, planting of native hammock vegetation, and installation of artificial nest structures on lands adjacent to the work areas that KLWRs and KLCM will eventually reoccupy the work areas.

The following sections address the entire project.

CONCLUSION

After reviewing the current status of the KLWR and KLCM, the environmental baseline for the action area, the effects of the proposed action, and the cumulative effects, it is the Service's biological opinion that the revised project, as proposed, is not likely to jeopardize the continued existence of the KLWR or the KLCM.

Our conclusion is based on the fact that the original project will result in the temporary loss of 19.07 acres of KLWR and KLCM habitat which includes the 6.16 acres of KLWR and KLCM habitat within Port B where the use of heavy equipment will be used to complete the removal of existing structures. Therefore, the revised project will result in temporary impacts to habitat that are less than 0.5 percent of the geographic range of these species. In addition, KLWR and KLCM are expected to reoccupy the work areas over time with the implemented minimization measures, planting of native hammock vegetation, and installation of artificial nest structures on lands adjacent to the work areas. Furthermore, the restoration is expected to benefit the overall survival and recovery of the KLWR and KLCM because of the improvements to the habitat and the addition of the artificial nests. Critical habitat has not been designated for the KLWR and KLCM; therefore, none will be affected.

INCIDENTAL TAKE STATEMENT

Section 9 of the Act and Federal regulation pursuant to section 4(d) of the Act prohibit the take of endangered and threatened species, respectively, without special exemption. Take is defined as to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture or collect, or to attempt to engage in any such conduct. Harm is further defined by the Service to include significant habitat modification or degradation that results in death or injury to listed species by significantly impairing essential behavioral patterns, including breeding, feeding, or sheltering. Harass is defined by the Service as intentional or negligent actions that create the likelihood of injury to listed species to such an extent as to significantly disrupt normal behavior patterns which include, but are not limited to, breeding, feeding, or sheltering. Incidental take is defined as take that is incidental to, and not the purpose of, the carrying out of an otherwise lawful activity. Under the terms of section 7(b)(4) and section 7(o)(2), taking that is incidental to, and not intended as part of the agency action, is not considered to be prohibited taking under the Act provided such taking is in compliance with the terms and conditions of this incidental take statement.

The terms and conditions described below are nondiscretionary and must be undertaken by the DEP so they become binding conditions of any grant or permit issued to the DEP, as appropriate, for the exemption in section 7(o)(2) to apply. The DEP has a continuing duty to regulate the activity covered by this incidental take statement. If the DEP (1) fails to assume and implement the terms and conditions or (2) fails to require DEP to adhere to the terms and conditions of the incidental take statement through enforceable terms that are added to the permit or grant document, the protection coverage of section 7(o)(2) may lapse. In order to monitor the impact

of incidental take, the DEP, must report the progress of the action and its impact on the species to the Service as specified in the incidental take statement [50 CFR § 402.14(i)(3)].

AMOUNT OR EXTENT OF TAKE ANTICIPATED

The number of individual KLWR and KLCM that will be present at time of the action is not known. The data collected from surveys cannot be used to accurately determine population density estimates of KLWRs or KLCM within the work areas. The Service finds that the project will result in harm (*i.e.*, habitat loss) to the KLWR and KLCM from the construction activities to restore 19.07 acres of habitat. In addition, harassment of the KLWR and KLCM is anticipated from disturbance as a result of the removal of debris and restoring natural grade. The Service anticipates that the entire project, including the 19.07 acres of restoration and use of heavy equipment, will result in the take of five KLWR and seven KLCM from either mortality, injury, harm, or harassment.

If, during the course of this action, this level of take is exceeded, such take would represent new information requiring review of the reasonable and prudent measures provided. All work should stop and the reasonable and prudent measures must be modified immediately.

EFFECT OF THE TAKE

In the accompanying biological opinion, the Service determined this level of anticipated take is not likely to result in jeopardy to the KLWR or KLCM. No critical habitat has been designated for either of these species; therefore, none will be destroyed or adversely modified.

REASONABLE AND PRUDENT MEASURES

(Includes all measures from the original BO that Service believes are necessary and appropriate to reduce take and to minimize the impacts of incidental take of KLWR and KLCM from the project (original and revised).

The Service believes the following reasonable and prudent measures are necessary and appropriate to reduce take and to minimize the impacts of incidental take of KLWR and KLCM:

1. Further minimize the adverse effects of the action to the KLWR and KLCM and other species through avoidance of certain areas (as described in the Terms and Conditions, below), use of appropriate land clearing techniques and planting appropriate native species.
2. Evaluate the success of the restoration plan through appropriate monitoring.
3. Minimize the adverse effects of feral animal predation on the KLWR and KLCM.

TERMS AND CONDITIONS

To implement the above reasonable and prudent measures, the Service has outlined the following terms and conditions. In accordance with the Interagency Cooperation Regulation (50 CFR § 402), these terms and conditions must be complied with to implement the reasonable and prudent measures:

- 1a. DEP will not restore 0.15 acre of emerging hammock at the Port B site marked as “Fill Area” in Figure 2 in the BO.
- 1b. Trapping for presence of KLWR and KLCM was conducted by the service between April 7, 2014, and April 11, 2014, and is no longer required prior to restoration activities at the Port B location, as long as construction occurs or is completed by January 2016. If construction is not completed prior to January 2016, the DEP will coordinate with the Service to determine if additional surveys are necessary. Additionally, trapping for presence at the other two sites (Old Roads and Nike Radar) is no longer required unless there is a change in the scope of work to be conducted at those locations beyond what is discussed in the original BO. If the presence of KLWR or KLCM is documented at Old Roads or Nike Radar, the Service will be contacted to delineate areas that will be avoided.
- 1c. Procedures used to clear and grub the proposed sites will be designed to minimize the potential for harm to the KLWR and KLCM. Existing hammock vegetation outside of the Port B work areas described in this amendment will not be impacted. A qualified biologist with documented experience identifying the KLWR and the KLCM (as described in Term and Condition 2b) will be on site during the debris removal, vegetation clearing and building demolition. If a living KLWR or KLCM is encountered during land clearing or demolition, all work will immediately stop and the animal will be allowed to leave the area under its own volition. Land clearing and demolition work will not resume until the animal has left the project site. If a dead KLWR or KLCM is encountered during land clearing or demolition, all work will immediately stop, the animal will be left *in situ*. The original material surrounding it will be immediately returned to its original configuration to the maximum extent practicable. The Service will then be contacted (see 4, below) for further instructions. Demolition or debris removal will not resume until authorized by the Service. All KLCM or KLWRs observed will be recorded and this information will be provided to the Service within 10 business days of completion of land clearing and demolition.
- 1d. Prior to any removal, the DEP will coordinate with the Service on the removal of any existing debris piles that are not removed by hand outside of the Port B work areas discussed in this amendment to determine if formal consultation is necessary. At Old Roads and Nike Radar, demolition of concrete structures will be demolished using a hand-held or equipment-mounted pneumatic or hydraulic jackhammer where feasible to allow any KLWRs and KLCM hiding in or under the existing structures to leave the project site, minimizing potential injuries.

- 1e. DEP will avoid disturbance of any stick or other pile nests, and contact the Service if any are encountered.
- 1f. Native hammock species planted at the “Restaurant & Tunnel” location will include pigeon plum (*Coccoloba diversifolia*), wild coffee (*Psychotria nervosa*), torchwood (*Amyris elemifera*) and wild lime (*Zanthoxylum fagara*).
2. Surveys consisting of live trapping for KLWR and KLCM will be conducted, at a minimum, at the sites at 1, 3 and 5 years after the restoration is completed to evaluate the success of the restoration.
 - a. All procedures will follow the Service’s protocol for small mammal surveys. The following information will be recorded for each KLWR or KLCM captured during the trapping: GPS location; the species of the each animal captured; the date each animal was captured; the location of each animal captured; the sex, approximate age, and mass (in grams) of each animal captured; and any other noteworthy observations.
 - b. All KLWRs and KLCM captured will immediately be released unharmed at the trap site following the recording of data. Any other threatened and endangered species encountered within the project footprint will be recorded. Black rats captured during the live-trapping event will be euthanized humanely. The date and GPS location of each black rat captured as well as standard biological data will be recorded.
 - c. A summary report will be provided to Service within 30 days of completion of the initial live trapping activities. If no KLWR or KLCM are captured during the 1, 3, and 5 year surveys, the DEP will coordinate with the Service to review survey methods and predator control management.
 - d. Experienced biologists are necessary to minimize take during the live-trapping and monitoring of the KLWR and the KLCM specified in this amendment. Qualifications include education, experience with required techniques, and knowledge of the specific species being evaluated. Qualified individuals will be considered by the Service at the request of the DEP and Monroe County and must obtain a valid 10(a)(1)(A) permit.
3. Control feral and free-ranging domestic cats on the project sites in perpetuity, and educate the public about the harm to the KLWR, KLCM, and other native wildlife species that results when domestic cats are allowed to roam freely or are released into the wild. This includes starting a feral cat trapping program on Dagny. Educational elements include:
 - a. Current hammock exhibit at John Pennekamp Coral Reef State Park visitor center will be expanded in size and include information about exotic species/predators to local flora and fauna and will specifically discuss the adverse effects of cats on

native wildlife.

- b. An interpretive exhibit will be established at the Tunnel site located near the end of the pavement (edge of ADA accessible area) and will display restoration activities and imperiled species/predators to said species and will specifically discuss the adverse effects of cats on native wildlife.
- c. Winter-time interpretive walks at Port B conducted by staff and volunteers will include a discussion on imperiled species in the area, predators to those species, and a discussion on the adverse effects of cats on native wildlife.

REPORTING

Upon locating a dead KLWR or KLCM specimen, initial immediate notification must be made to the nearest Service Law Enforcement Office (10426 NW 31st Terrace, Miami, Florida 33172; 305-526-2610; 305-526-2610). Secondary notification should be made to the FWC (South Region, 8535 Northlake Boulevard West Palm Beach, Florida 33412; 561-625-5122). Care must be taken in handling any dead specimens of proposed or listed species found in the project area to preserve the specimen or its remains in the best possible condition. In conjunction with the preservation of any dead specimens, the finder has the responsibility to ensure evidence intrinsic to determining the cause of death of the specimen is not unnecessarily disturbed. The finding of dead specimens does not imply enforcement proceedings pursuant to the Act. The reporting of dead specimens is required to enable the Service to determine if take is reached or exceeded and to ensure the terms and conditions are appropriate and effective.

CONSERVATION RECOMMENDATIONS

Section 7(a)(1) of the Act directs Federal agencies to utilize their authorities to further the purposes of the Act by carrying out conservation programs for the benefit of endangered and threatened species. Conservation recommendations are discretionary agency activities to minimize or avoid adverse effects of a proposed action on listed species or critical habitat, to help implement recovery plans, or to develop information. The Service is not proposing any conservation recommendations at this time.

REINITIATION - CLOSING STATEMENT

This concludes formal consultation on the revised project. As provided in 50 CFR § 402.16, reinitiation of formal consultation is required when discretionary Federal agency involvement or control over the action has been retained and if: (1) the amount or extent of incidental take is exceeded; (2) the agency action is subsequently modified in a manner that causes an effect to a listed species or critical habitat not considered in this opinion; (3) new information reveals effects of the agency action that may affect listed species or critical habitat in a manner or to an extent not considered in this opinion; or (4) a new species is listed or critical habitat designated that may be affected by the action. In instances where the amount or extent of incidental take is exceeded, any operations causing such take must cease pending reinitiation.

Thank you for your cooperation in the effort to conserve fish and wildlife resources. If you have any questions regarding this project, please contact Shawn Christopherson at 772-469-4336.

Sincerely yours,

Donald R. Progulske

TRAPPING PROTOCOL TO DETERMINE PRESENCE OF THE KEY LARGO WOODRAT (*Neotoma floridana smalli*) AND THE KEY LARGO COTTON MOUSE (*Peromyscus gossypinus allapaticola*)

5/9/2005

This protocol is to be used when trapping to determine presence/absence of the Key Largo woodrat (KLWR) and Key Largo cotton mouse (KLCM) in a given area.

1. Individuals conducting the trapping should have a permit and previous experience in live trapping small mammals (or be trained by an experienced person). They must also be able to identify any species that may be captured during the trapping event.
2. Surveys should include all potential KLWR/KLCM habitats within the area and, if landowner permission can be obtained, adjacent lands with potential KLWR/KLCM habitat.
3. Trapping should be conducted over the entire project area using a grid system of Sherman live-traps spaced at 10-15 meter intervals.
4. Traps should be set for four consecutive nights per trapping season or until an individual of each species is caught. Unexpected drops in temperature may cause a disruption in consecutive trapping nights.
5. Trapping will not be conducted when nighttime temperatures are forecast to be <60° F. If temperatures are forecast to be in the mid to low 60's, cotton balls (4-5) will be placed in the trap along with the bait.
6. Bait should consist of crimped oats and any combination of the following ingredients: peanut butter, grapes, apples and/or sunflower seeds.
7. In areas where fire ants are present, 10% Carbaryl (Sevin) dust will be placed immediately under the traps so that KLWRs/KLCM will not come in immediate contact with it. Other approved methods will be considered.
8. Traps should be checked and all KLWRs/KLCM released no later than 3 hours after official sunrise.
9. Upon capture of a KLWR or KLCM, authorized personnel identified by the Service will be contacted immediately.
10. All captured individuals shall be handled for as briefly as possible in a humane manner during the time it takes to tag, examine, identify, and collect necessary biological samples. OPTIONAL: All KLWRs captured in the wild will have blood

samples taken by authorized personnel for genetic analysis. PIT (passive-induced transponder) tags in conjunction with ear tags will be used for individual woodrat identification and such identification will be applied by authorized personnel. All KLWRs/KLCM shall be released at their point of capture, if possible.

11. Any black rats (*Rattus rattus*) captured during woodrat trapping will be euthanized humanely. If raccoons are disturbing traps (determined by missing bait or closed traps), the Service will be contacted and an appropriate method for minimizing trap disturbance will be implemented. If raccoon trapping is deemed necessary, the raccoons will be trapped using appropriately sized traps (e.g., Tomahawk). Domestic cats are to be released on the perimeter of the study area near residences and any feral cats captured in the traps will be brought to the local animal shelter.
12. Presence of KLWRs/KLCM can be documented in a single trapping period. To determine absence, traps shall be operated seasonally (fall, winter, spring, summer) for 2 years.
13. Site description and trapping data should be recorded. Site description should include GPS location and property Real Estate number, habitat on the project area and adjacent lands, and trapping design relative to habitat distribution. Daily trapping data should include number of KLWRs/KLCM trapped per day, non-target species, and lost or missing traps. Sex, age, and reproductive status of Key Largo cotton mice will also be reported. Digital photographs of trap setups and captured animals should be included with the final report. All data, including all verified data, GIS files, metadata, photographs, reports and final reports will be delivered via CD- or DVD-ROM. All trapping information should be submitted to the following offices:

AGREEMENT

THIS AGREEMENT is made the 31st day of August 2015 by and between STATE OF FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION, DIVISION OF RECREATION AND PARKS, 3900 Commonwealth Boulevard, Mail Station 500, Tallahassee, Florida 32399-3000, herein called DRP, and MONROE COUNTY, FLORIDA, 1100 Simonton Street, Key West, Florida 33040, herein called the County.

WHEREAS, DRP wishes to complete the restoration work as described in the DRP document "North Key Largo Restoration Project" (Exhibit "A"); and

WHEREAS, the County has possession of mitigation monies as a result of the construction of the Key Largo wastewater treatment plant which construction necessitated the review and approval of the U.S. Fish and Wildlife Service ("USFWS"); and

WHEREAS, a condition of USFWS's approval was the payment of a mitigation fee into the Monroe County Environmental Land Management and Restoration Fund which must be utilized to complete the restoration of a minimum of 4.2 acres of tropical hardwood hammock habitat in North Key Largo and any proposed mitigation project claiming to meet this requirement must be reviewed and approved by USFWS; and

WHEREAS, according to a Biological Opinion issued by USFWS on May 8, 2015 (Exhibit "B"), the restoration work proposed by DRP in the "North Key Largo Restoration Project" document meets USFWS mitigation requirements; and

WHEREAS, DRP wishes to complete this restoration project utilizing the mitigation monies received and contributed by the County as a result of the construction of the Key Largo wastewater treatment plant and the County is in agreement with this proposal.

NOW, THEREFORE, this Agreement is intended to outline the terms of the restoration project proposed for Dagny Johnson Key Largo Hammock Botanical State Park and this Agreement is subject to the following terms and conditions:

1. **PERMISSION TO ENTER PROPERTY.** DRP as lessee under Board of Trustees of the Internal Improvement Trust Fund of the State of Florida Lease No. 3267 hereby grants the County the non-exclusive permission to enter Dagny Johnson Key Largo Hammock Botanical State Park (the "Property"), for the sole purpose of habitat restoration (the "Project"), from the date of this Agreement through December 31, 2020. This Agreement is personal to the County and may not be assigned or transferred without the prior written consent of DRP.

The Project consists of restoration work as described in the DRP document "North Key Largo Restoration Project" attached as Exhibit "A," and as authorized in the Biological Opinion from the US Fish & Wildlife Service dated May 8, 2015, attached as Exhibit "B." DRP understands that all of the restoration work described in the "North Key Largo Restoration Project" will not necessarily be completed under the Project.

DRP and the County agree that the work will proceed in the following order: Port Bouganville site, Nike Radar site, and the Old Roads site.

DRP gives the County and its respective employees, contractors, subcontractors and agents permission to enter upon the Property to perform and undertake the Project from the date of this Agreement until December 31, 2020.

In the event that any dispute arises between the parties or with the County's contractors, both DRP and County agree to attempt to resolve the issues by meet and confer sessions between representatives of each of the parties.

No work shall commence until after sunrise and must be completed by sunset, unless such work is coordinated with and approved by the park manager of Dagny Johnson Key Largo Hammock Botanical State Park ("Park Manager").

DRP and its duly authorized agents retain the right to enter the Property or to engage in management activities not inconsistent with the use herein provided.

2. **PROOF OF LIABILITY INSURANCE.** The County's contractors shall provide proof of liability insurance to the Park Manager prior to entering the Property. The liability insurance shall be in amounts not less than \$200,000 per person and \$300,000 per incident or occurrence for personal injury, death and property damage. Such policies shall name the State of Florida Department of Environmental Protection, Division of Recreation and Parks and the Board of Trustees of the Internal Improvement Trust Fund of the State of Florida as additional insureds. The County, as a political subdivision of the State of Florida, represents to DRP that it has purchased suitable Public Liability, Vehicle Liability, and Workers' Compensation Insurance, or is self-insured, in amounts adequate to respond to any and all claims under federal or state actions for civil rights violations, which are not limited by Section 768.28, Florida Statutes, and Chapter 440, Florida Statutes, as well as any and all claims within the limitations of Section 768.28, Florida Statutes, and Chapter 440, Florida Statutes, arising out of the activities governed by this Agreement.

3. LIABILITY. The County shall assist in the investigation of injury or damage claims either for or against DRP or the State of Florida pertaining to the County's respective areas of responsibility under this Agreement or arising out of the County's respective management programs or activities and shall contact DRP regarding the legal action deemed appropriate to remedy such damage or claims. Nothing in this Agreement extends the waiver of sovereign immunity above the statutory limits of Section 766.28, Florida Statutes, for either party.

4. PAYMENT. No payment of money shall be due to DRP under this Agreement. The County shall use some or all of the mitigation funds, not to exceed the amount of \$713,000 to perform or contract for the performance of the Project. There are no third party beneficiaries of this Agreement. Under Section 713.11, Florida Statutes, no lien of the County's contractors can attach to the land which is the subject of the Project. Funding contemplated under this Agreement is subject to annual appropriation by the County.

North Key Largo Restoration Project

Introduction

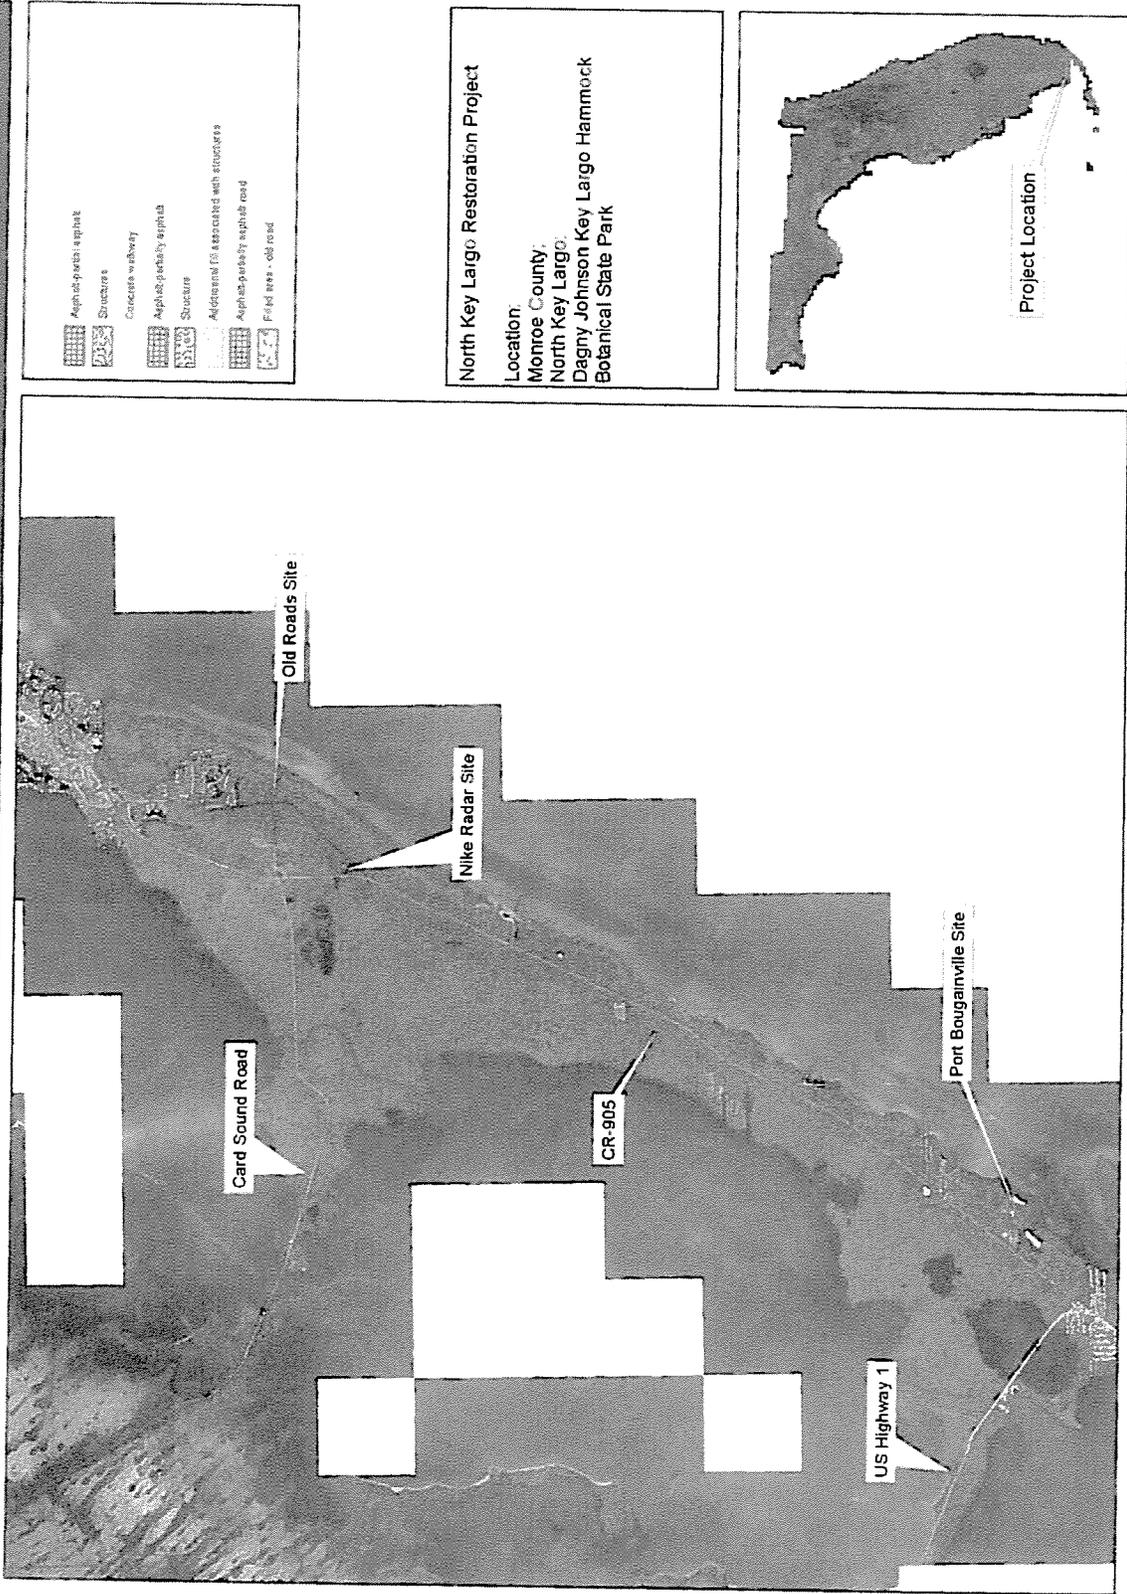

There are three main site locations included in this restoration project: Port Bougainville, the Nike Radar Site, and the North Key Largo Roads (old CR 905 and Card Sound Road).

All sites in this project are located within North Key Largo which encompasses the area north of the intersection of US Highway 1 and CR 905. The majority of North Key Largo is currently in public ownership, preserved as conservation land. The US Fish and Wildlife Service's Crocodile Lakes National Wildlife Refuge is located west of CR 905 while the Dagny Johnson Key Largo Hammock Botanical State Park is located east of CR 905. A few private parcels are scattered on either side of CR905. The project sites are located within the Botanical State Park. These areas are dominated by hardwood hammock, salt marsh, and mangrove wetland natural communities, although the majority of the areas to be restored in the project are within hardwood hammock. There are small sections of transitional zone habitat located at both the Port Bougainville site and the Old Roads site.

General Project Description

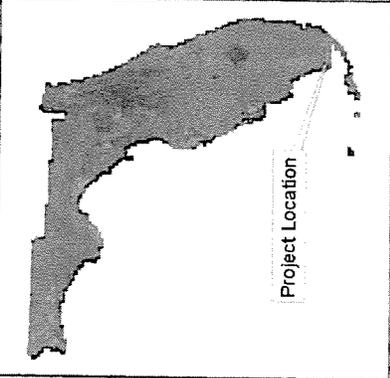

The main purpose of this project is to restore the areas to historic natural elevations without disturbing areas that have satisfactorily succeeded to expected natural communities. All building structures will be removed and areas scraped down to a more natural grade to match surrounding natural community structure. All roads, sidewalks, parking areas, and game courts will be broken up and removed. All "clean fill" from the demolition will be sent to either the entrance channel at Port Bougainville or Carysfort Marina both of which are currently under restoration and are permitted to receive clean fill material. 'Clean fill' is considered clean lime-rock fill (free of contaminants), concrete rubble (smaller than 4 feet, no rebar protruding no further than 6", no paint or coating not approved by KERF), brick, crushed glass, PVC (chipped to smaller than 6"), clay roof or floor tiles and ceramic floor tiles free of sealants. Other material including wood, metal, asphalt, etc will be removed from the site and disposed of at a permitted waste facility.

Port Bougainville Site

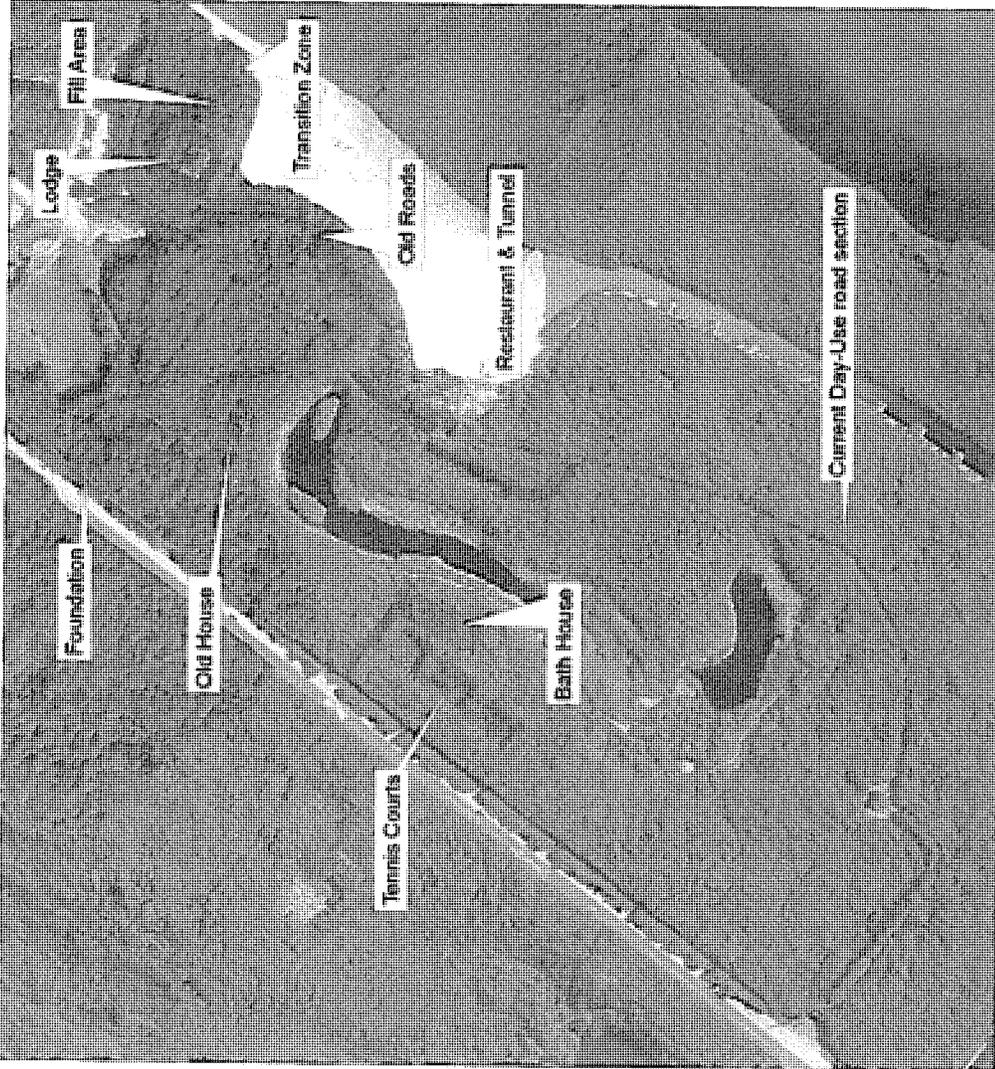

Port Bougainville is a parcel that consists of a variety of habitats, including hardwood hammock, mangrove and salt marsh. During the 1970's and early 1980's this property was under construction to develop a large resort. The construction did not make it to completion and was acquired by the State of Florida through the Conservation and Recreational Lands (CARL) Program. Since that time, it has undergone several phases of restoration with the goal to restore the whole area back to the historic natural condition. As shown below previous restoration efforts have included (to name a few) filling in of the boat basin, removal of a large fill pile within the mangroves, removal of several partially built buildings, and filling of a 'pit'. All of these areas have been restored back to historical natural elevations and native vegetation planted in areas where needed.

This phase of restoration would see the removal of the remaining buildings/structures and fill associated with the initial development. Most of the old roads in the area will also be removed, except for the section located in the current day-use section which will be minimized to twelve feet. The areas will be graded down to match surrounding natural elevations. All demolished materials will be removed from the site daily to minimize the possibility of Key Largo woodrat and Key Largo cotton mice usage. Due to the healthy hardwood hammock lying adjacent to the site, only one site, the Restaurant & Tunnel location, will be planted using native stock grown in the Park's Native Plant Nursery. Natural recruitment will occur quite readily in the other areas.

Old Roads Site

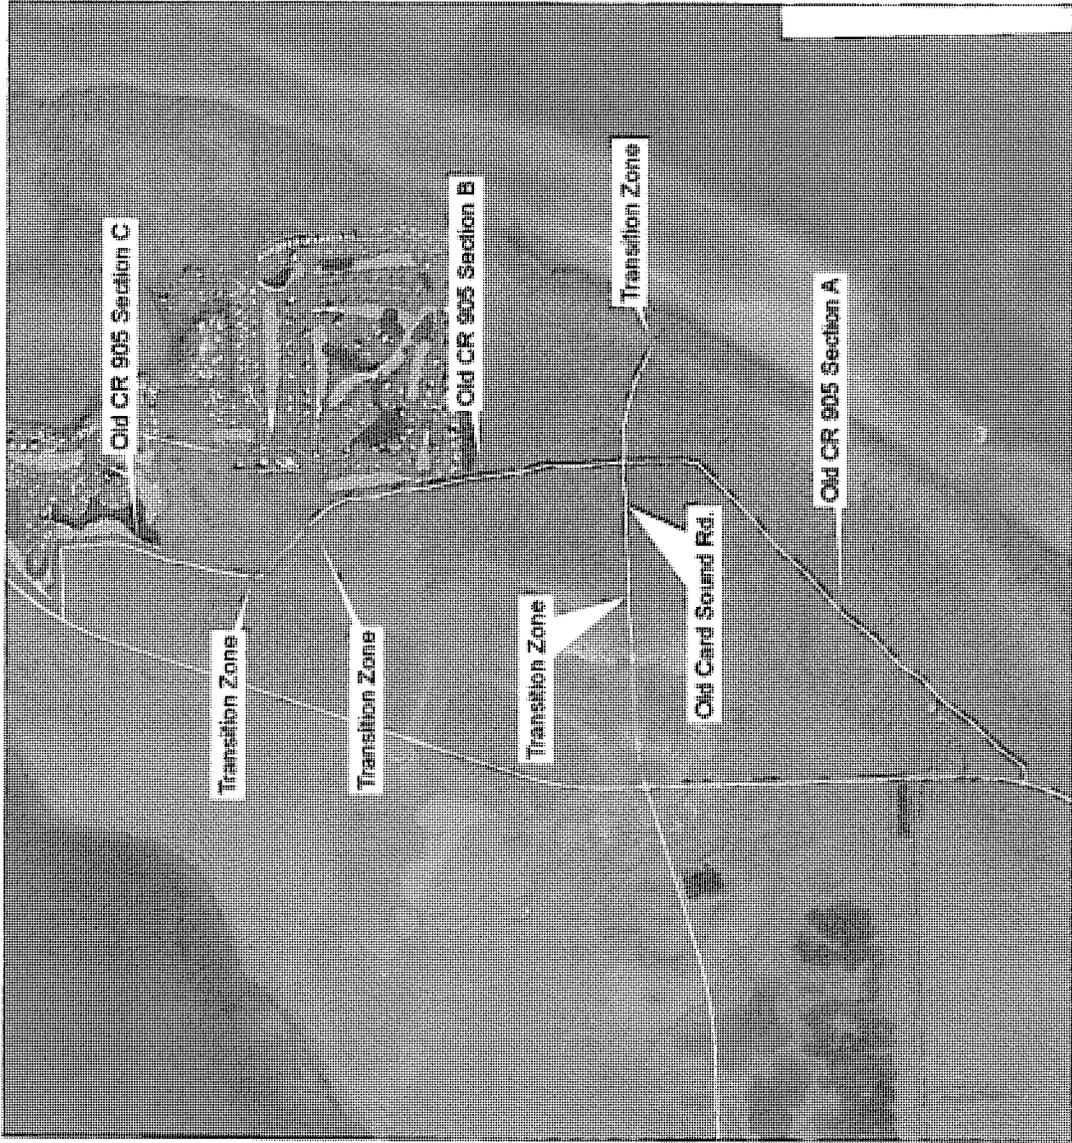

The third site location is the area of North Key Largo encompassing old CR 905 and old Card Sound Road. These sections of road are no longer in use as highways; instead they are used as trails through the restricted 'back-country' area of Dagny Johnson Key Largo Hammock Botanical State Park (KL).

This phase of the project will include the removal of portions of old CR 905 and old Card Sound Road. The goal will be to reduce the current width to 10 feet, which will still allow vehicular access to the area but minimize the disturbance footprint. Extra roadbed will be removed to create 'movement' along the road, which is currently mostly a straight road. The ends of the roadbeds will remain at the current width and slowly taper in to 10 feet to allow for turn-around locations. Associated fill and asphalt will be removed on a daily basis from site to minimize the possibility of Key Largo woodrat and Key Largo cotton mice usage. Due to the healthy hardwood hammock lying adjacent to the roadbeds, no vegetative plantings will be necessary as recruitment will happen naturally. Upon completion, approximately **4.86** acres of hammock and **0.49** acres of transitional zone habitat will be restored.

Nike Radar Site

The Nike Radar Site is a parcel of land located just south of the three way intersection of CR 905 and Card Sound Road. It contains the remnants of a Nike Radar military facility which was fully operational between June 1965 and June 1979. The State of Florida acquired the property in June of 1987. Since that time no restoration has occurred besides treating for non-native plant species. All radar towers will remain in place to mark the area's historical significance in North Key Largo.

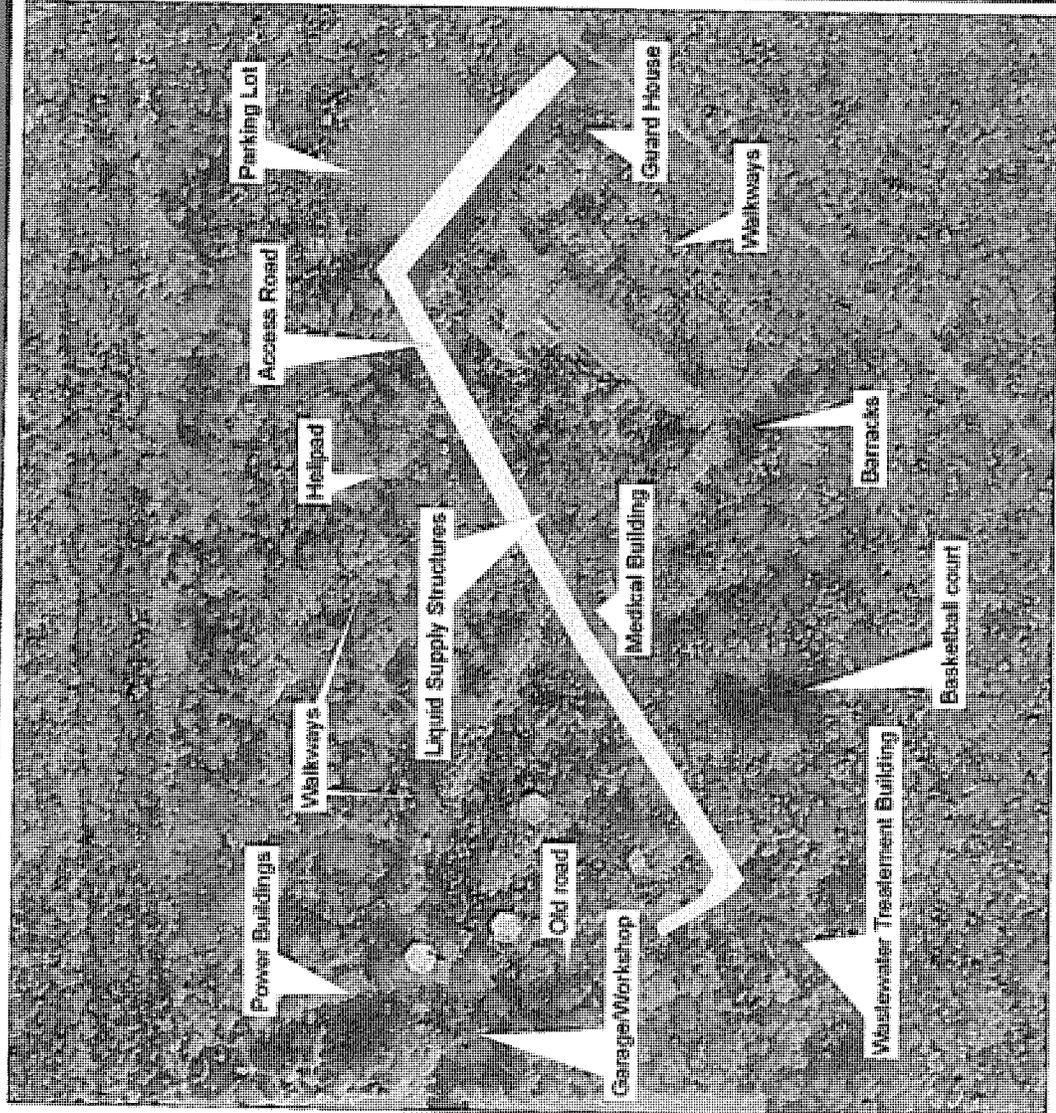

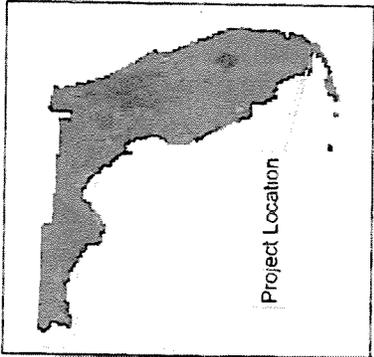

The goal of this phase will be to remove all building structures, walkways, parking lot, basketball court, etc. The access road will be minimized to a 10 foot width. All associated fill will also be removed and the area graded down to match surrounding natural elevations. All demolished materials will be removed from the site daily to minimize the possibility of Key Largo woodrat and Key Largo cotton mice usage. Due to the adjacent healthy hardwood hammock lying adjacent to the site, no vegetative plantings will be necessary as recruitment will happen naturally. The Florida Park Service recognizes the historic nature of this site and will be conducting a full Historical Evaluation Survey in accordance with the Florida Department of State's Division of Historical Resources. All wastewater treatment structures will be evaluated and removed in accordance with Monroe County Health Department regulations. Asbestos is a known component of at least one of the structures on this site so all requirements regarding this substance will be followed when evaluating and removing.

Summary

In total the proposed restoration project will restore approximately 13.46 acres of hardwood hammock and 0.64 acres of transitional zone habitats.

Permitting Conditions

The following agencies may require permit authorization of the proposed restoration project: US Fish and Wildlife Service, South Florida Water Management District, US Army Corps of Engineers, DEP Regulatory, Monroe County, NOAA Florida Keys National Marine Sanctuary, Monroe County Department of Health, and Department of State – Historic Resources.

Contractor Considerations

The selected Contractor will be supplied with a detailed scope of work and copies of all permits. Additionally, State Park personnel will conduct a pre-construction meeting with the Contractor to review all permit conditions and to discuss site considerations. Park personnel will provide project oversight throughout the entire project.

Site Access

Port Bougainville site: Access will be available via a dirt road located on the ocean side of CR 905 at power pole 240. Vegetation along the access road will be trimmed by Park staff to allow one-lane transit.

Old Road site: Access will be available via dirt/paved road on the ocean side of CR 905 at power pole 90. Vegetation along the access road will be trimmed by Park staff to allow one-lane transit.

Nike Radar Site: Access will be available via dirt/paved road on the ocean side of CR 905 at power pole 90. Vegetation along the access road will be trimmed by Park staff to allow one-lane transit.

Listed Species Considerations

Key Largo Woodrat

The Key Largo woodrat (*Neotoma floridana smalli*) is a federally endangered species that is found within North Key Largo hammocks. According to the USFWS Multi-species Recovery Plan for South Florida, the remaining hardwood hammock habitats are critical for the survival of the Key Largo woodrat. The Plan also states that habitat restoration is a priority action necessary to protect and conserve the remaining woodrat population.

In consideration of the potential for woodrat occurrence at the project sites, a presence/absence trapping event will occur at all project areas in accordance with USFWS trapping protocols (Appendix 1). Project guidelines may be modified for those areas where woodrats are found.

Post construction Monitoring and Success Criteria

Once final elevations are achieved, the restoration area will be permanently delineated with corner markers and the boundary will be identified using GPS. This site will be monitored using photo points established prior to construction. Additionally, the site will be periodically monitored by Park personnel for the presence of invasive exotic vegetation.

TRAPPING PROTOCOL TO DETERMINE PRESENCE OF THE KEY LARGO WOODRAT (*Neotoma floridana smalli*) AND THE KEY LARGO COTTON MOUSE (*Peromyscus gossypinus allapaticola*) 5/9/2005

This protocol is to be used when trapping to determine presence/absence of the Key Largo woodrat (KLWR) and Key Largo cotton mouse (KLCM) in a given area.

1. Individuals conducting the trapping should have a permit and previous experience in live trapping small mammals (or be trained by an experienced person). They must also be able to identify any species that may be captured during the trapping event.
2. Surveys should include all potential KLWR/KLCM habitats within the area and, if landowner permission can be obtained, adjacent lands with potential KLWR/KLCM habitat.
3. Trapping should be conducted over the entire project area using a grid system of Sherman live-traps spaced at 10-15 meter intervals.
4. Traps should be set for four consecutive nights per trapping season or until an individual of each species is caught. Unexpected drops in temperature may cause a disruption in consecutive trapping nights.
5. Trapping will not be conducted when nighttime temperatures are forecast to be $<60^{\circ}\text{F}$. If temperatures are forecast to be in the mid to low 60's, cotton balls (4-5) will be placed in the trap along with the bait.
6. Bait should consist of crimped oats and any combination of the following ingredients: peanut butter, grapes, apples and/or sunflower seeds.
7. In areas where fire ants are present, 10% Carbaryl (Sevin) dust will be placed immediately under the traps so that KLWRs/KLCM will not come in immediate contact with it. Other approved methods will be considered.
8. Traps should be checked and all KLWRs/KLCM released no later than 3 hours after official sunrise.
8. Upon capture of a KLWR or KLCM, authorized personnel identified by the Service will be contacted immediately.

9. All captured individuals shall be handled for as briefly as possible in a humane manner during the time it takes to tag, examine, identify, and collect necessary biological samples. OPTIONAL: All KLWRs captured in the wild will have blood samples taken by authorized personnel for genetic analysis. PIT (passive-induced transponder) tags in conjunction with ear tags will be used for individual woodrat identification and such identification will be applied by authorized personnel. All KLWRs/KLCM shall be released at their point of capture, if possible.
10. Any black rats (*Rattus rattus*) captured during woodrat trapping will be euthanized humanely. If raccoons are disturbing traps (determined by missing bait or closed traps), the Service will be contacted and an appropriate method for minimizing trap disturbance will be implemented. If raccoon trapping is deemed necessary, the raccoons will be trapped using appropriately sized traps (e.g. Tomahawk). Domestic cats are to be released on the perimeter of the study area near residences and any feral cats captured in the traps will be brought to the local animal shelter.
11. Presence of KLWRs/KLCM can be documented in a single trapping period. To determine absence, traps shall be operated seasonally (fall, winter, spring, summer) for two years.
12. Site description and trapping data should be recorded. Site description should include GPS location and property Real Estate number, habitat on the project area and adjacent lands, and trapping design relative to habitat distribution. Daily trapping data should include number of KLWRs/KLCM trapped per day, non-target species, and lost or missing traps. Complete and verified data will be delivered via CD-ROM (preferred) and/or by software compressed (zipped) file. All digital and hardcopy information that is part of the project must be included in the final report (i.e. GIS data, reports, metadata, photos, and other supporting materials). Sex, age, and reproductive status of Key Largo cotton mice will also be reported. All trapping information should be submitted to the following offices:

Dear Mr. Rice:

This document transmits the U.S. Fish and Wildlife Service's (Service) Biological Opinion to Florida Department of Environmental Protection (DEP) for the revised North Key Largo restoration project located in Monroe County, Florida. This document amends the Service's 2011 Biological Opinion (41420-2011-F-0183; BO)(Service 2011) for the removal of structures on Dagny Johnson Key Largo Hammock Botanical State Park (Dagny) and analyzes the effects of the revised project on the endangered American crocodile (*Crocodylus acutus*), the endangered Key Largo cotton mouse (*Peromyscus gossypinus allapaticola*; KLCM), the endangered Key Largo woodrat (*Neotoma floridana smalli*; KLWR), the endangered Schaus swallowtail butterfly (*Heracles aristodemus ponceanus*; Schaus), the threatened eastern indigo snake (*Drymarchon corais couperi*), and the threatened Stock Island tree snail (*Orthalicus reses reses*; SITS) in accordance with section 7 of the Endangered Species Act of 1973, as amended (Act) (87 Stat. 884; 16 U.S.C. 1531 *et seq.*).

The Service is consulting with DEP on this project under section 7 of the Act because there is a Federal nexus from the expenditure of compensation funds from the federally funded Key Largo Wastewater Treatment Plant. The funds were transferred to Monroe County as compensation resulting from the Service's evaluation of the construction and expansion of the Key Largo Wastewater Treatment Plant (Biological Opinion [41420-2000-T-0736] [Service 2001], Technical Assistance [TA] [41420-2006-FA-1604] [Service 2006]). According to the terms of the Service's October 2006 TA letter to the Key Largo Wastewater Treatment District, the Service agreed the funds may be used cooperatively with the DEP to restore tropical hardwood hammock on the island of Key Largo. EXECUTIVE SUMMARY

Florida and the Florida Keys are the home to some unique flora and fauna. Decades of development in sensitive areas have destroyed or altered natural habitat. Abandoned buildings and aging infrastructure has created accidental habitation for invasive species. In an effort to advance native species and protect their habitat the Florida Department of Environmental Protection with the Florida Parks Service has embarked on a Hammock Restoration program in the Florida Keys where they have acquired land ownership.

North Key Largo Restoration Project is one such project. Three specific sites that have scared the surface, destroyed habitat and changed the environment in sensitive Hardwood Hammock forest. The Dagny Johnson Key Largo Hammock Botanical State Park contains the three locations targeted for restoration.

In preparation for this document the Environmental Opinion was studied and applicable precautions and guidelines were implemented. This document is prepared as a design guideline as well as providing specifications and bid documents. The format for this document was streamlined with the Florida Parks Service to assure we meet the expectations and requirements of our obligations.

1.0 INTRODUCTION

1.1 Project Location

North Key Largo Hammock Restoration Project consists of 3 devisable locations. These specifically are “Old Roads”, “Port Bougainville” and “Nike Radar Site”. All located east of Card Sound Road.

All 3 sites in this project are located within North Key Largo which encompasses the area north of the US 1 split to the west. The majority of North Key Largo is currently in public ownership, preserved as a conservation land. The US Fish and Wildlife Service’s Crocodile Lakes National Wildlife Refuge is located west of CR 905 while the Dagny Johnson Key Largo Hammock Botanical State Park is located east of CR 905. The project sites are located within the Dagny Johnson Key Largo Botanical State Park.

These areas dominated by hardwood hammock, salt marsh and mangrove wetland natural communities, although the majority of the areas to be restored in the project are within hardwood hammock. There are small sections of the transitional zone habitat located at both the Port Bougainville site and Old Roads site.

1.2 General Project Description

The main purpose of this project is to restore the areas to historic natural elevations without disturbing areas that have satisfactorily succeeded to expected natural communities. All building structures will be removed and areas scraped down to a more natural grade to match the natural community structure. Because the natural areas are adjacent to the project areas accomplishing nature grade will be easily discernible. All roads, sidewalks, parking areas, and game courts will be broken up and removed as noted on plans.

All “clean fill” from the demolition and excavation will be sent to either the entrance channel at Port Bougainville or Carysfort Marina by the direction of the Parks Service. Both of these fill sites are under restoration and permitted to receive clean fill material. See Special Conditions for clean fill specs. All other materials not designated Clean Fill shall be removed from the site and disposed of at a permitted waste facility.

1.3 Survey Mapping

Site survey was completed January 2012. Where topographic elevations are provided, bid items generally will be volume quantities. Florida Minimum Technical Standards for Land Surveys, horizontal being per rural (linear) standards, 1’ in 5,000’ and vertical being 0.1’.

1.4 Permitting

Florida Parks Service shall acquire all necessary permits. FDEP has issued the Biological Opinion (BO) for this project. The BO is Exhibit B in the Reference section at the end of this document.

The following agencies have administrative and permitting authority over this project:

- South Florida Water Management District (SFWMD)
- Florida Department of Environmental Protection (FDEP)

- US Fish and Wild Life
- Army Corps of Engineers
- Monroe County
- NOAA Florida National Marine Sanctuary
- Monroe County Health Department
- Department of State – Historical Resources

2.0 OLD ROADS

2.1 Introduction

Old Roads is an existing road system within the park. The qualifying roads are as showed in **Figure 2-1**. They are weathered asphalt of various width and thickness. The base is built up lime rock of varying thickness. The purpose of this restoration is to reduce the width to a standard 10' from the existing 12' to 26' in order to allow nature to close in satisfying the requirements of the Environmental Opinion.

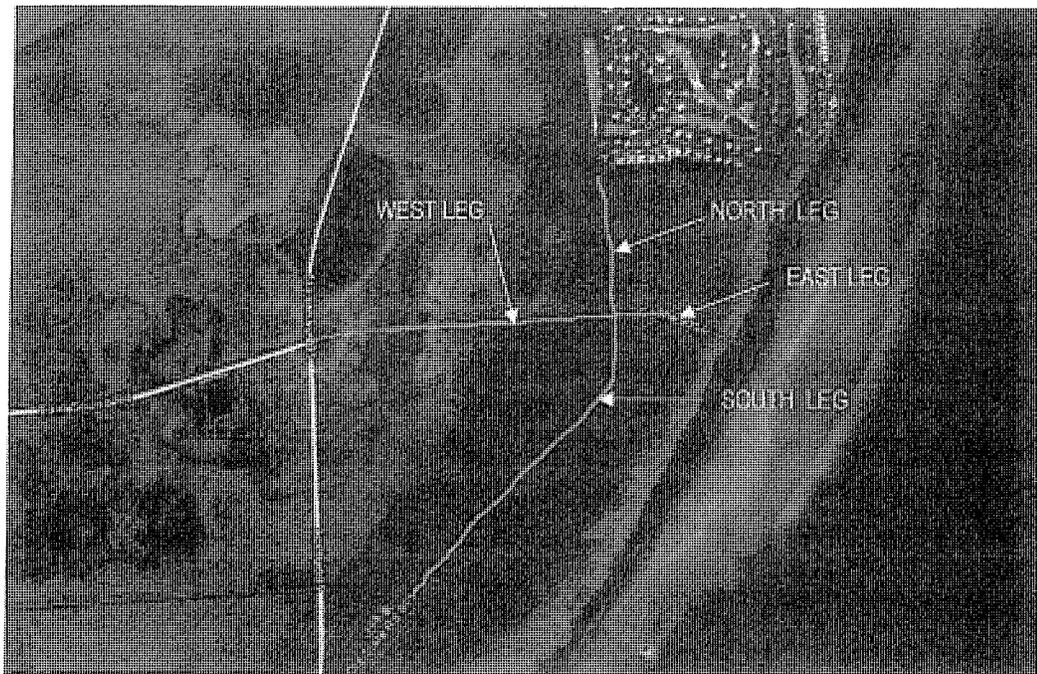

Figure 2-1. Old Roads System

2.2 Demolition Plan

Demolition Plans are provided to scale. Contractor shall use these plans for direction and understanding the project scope in the most detailed aspect. Quantities are based on these plans.

2.3 Detailed Project Description

Old Roads is divided into 4 legs and labeled on the plans as North Leg, South Leg, East Leg and West Leg. Pavement is to be saw-cut providing for a clean edge. Parks personnel may alter the alignment based on field observations. Base material is varied in depth. Once pavement is removed, a 1 foot shoulder of base material shall remain adjacent to the new edge to prevent undermining of the base under the pavement. See typical cross sections on plan sheet C-3.19.

2.4 Special Conditions

2.4.1 Mobilization

Mobilization is paid for by Lump Sum. 50% can be paid with first invoice, 50% upon completion of the project. Additions and Deducts are not allowed for this item.

2.4.2 Saw Cutting of Existing Pavement

Payment for Saw Cutting of Existing Pavement shall be by Linear Foot. Asphalt must be cut full depth before removal when adjacent pavement is to remain. Contractor shall use a mechanical pavement saw capable of wet cutting to reduce dust. Cutting may be required on two sides of pavement.

Measurement shall be field measured in linear feet.

2.4.3 Remove Asphalt Pavement

Payment for Remove Asphalt Pavement shall be a Square Yard pay item. Remove Asphalt Pavement shall include loading and hauling off-site the asphalt.

Contractor shall NOT be allowed to drive 6 wheel dump trucks on the existing paved surface. Excavator shall be limited to Rubber tired skid steer type equipment or other equipment approved by the engineer.

Measurement shall be by field measurement in square yards.

2.4.4 Remove Lime Rock Base

Payment for Lime Rock Base Removal shall be a Ton pay item. Remove Lime Rock Base Pavement shall include loading and hauling off-site the lime rock base. Rock base is defined as contaminated base material not to be used as CLEAN FILL.

Contractor shall NOT be allowed to drive 6 wheel dump trucks on the 10' finished paved surface. Contractor must keep trucks on the full width pavement while demolition of the asphalt. Excavator shall be limited to Rubber tired skid steer type equipment or other equipment approved by the engineer.

Measurement shall be determined by load tickets from disposal site in tons.

2.4.5 Clean Fill

Payment for Clean Fill shall be per 6 Wheel Truck Load. Clean fill as defined in the General Specifications includes Lime Rock Base material. If Lime Rock Base material is used as clean fill on site, it is paid for per 6 wheel truck load hauled. If disposed of, Lime Rock Base Removal shall be paid for as Lime Rock Base Removal.

Measurement shall be per truck load relocated on site.

2.5 Quantities

Quantity estimates shown are for bidding purposes only. Actual quantities for payment shall be based on field measurements or qualified load tickets from a qualified disposal site. See Specifications for density of related pay items.

3.0 PORT BOUGAINVILLE

3.1 Introduction

Port Bougainville is a collection of scattered entities once a developing resort project that was never completed but abandoned. It includes wood structures, concrete structures, asphalt surfaces, concrete structures, fill areas and excavated areas. There is a road system that will be altered and portions demolished. **Figure 3-1** provides an aerial view of the site and points out the vast scope of this project.

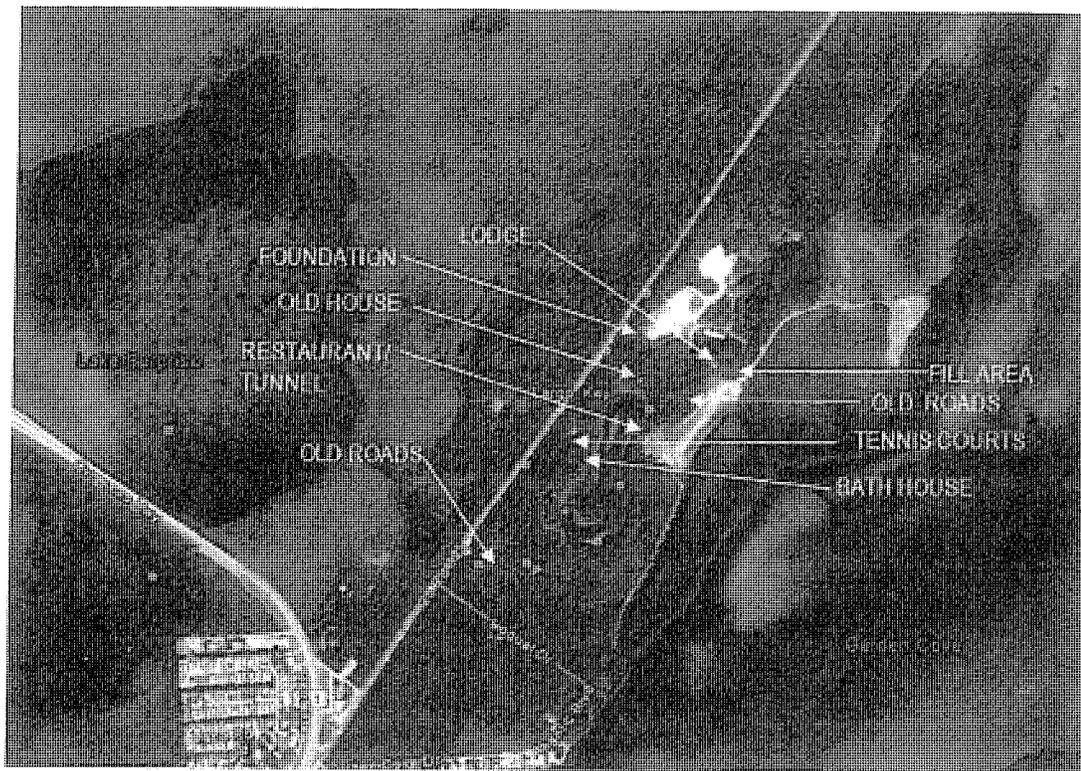

Figure 3-1. Port Bougainville Site

3.2 Demolition Plan

Demolition Plans are provided to scale. Contractor shall use these plans for direction and understanding the project scope in the most detailed aspect. Quantities are based on these plans.

3.3 Detailed Project Description

Port Bougainville has 8 specific demolition sites.

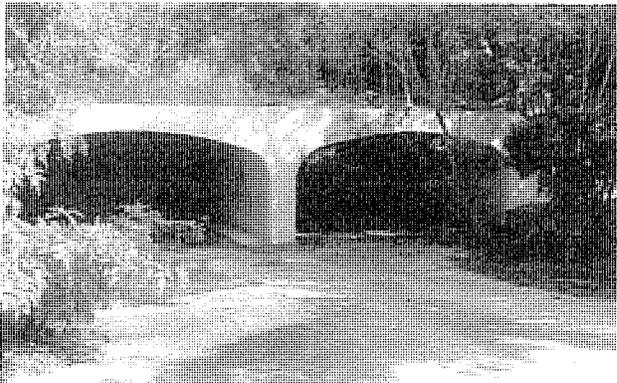

1. Tennis Courts
2. Bath House
3. Restaurant and Tunnel
4. Lodge and Associated Fill
5. Foundations
6. Fill Area

7. Old Roads/Parking Lot
8. Old House

The Tennis Courts are made up of a built up site and deteriorating asphalt surface. Removal of the fill and asphalt is required.

The Bath house is an old concrete block structure that shall be removed in total.

Restaurant and Tunnel is a huge concrete structure. The old restaurant building sits on the tunnel structure. The entire concrete structure and surrounding appurtenances shall be removed. Because this structure is so complex and large it will be a Lump Sum pay item. Bidders shall be given the opportunity to evaluate the structure before bidding on the project.

Shown is the tunnel structure, a large concrete tunnel of which the base is at natural grade and the top of the structure is elevated with fill around both sides. There is nearly collapsed restaurant building on top of the structure.

The Lodge and associated fill encompasses a fill site that is largely grown over with natural vegetation on unnatural elevation to the surrounding hammock. The building is a major wood structure with solid sawn cypress beams and columns. Bidders shall determine a value of these cypress members and submit with the bid documents. The

State of Florida can take possession of these timbers but cannot sell or auction them off. The Florida Parks Service and FDEP shall determine if the awarded contractor shall keep them and deduct the estimated values from the final contract balance.

Foundations are found in a heavily forested area spread out for 100 feet. The foundation is a series 12 piers emerging approximately 2 to 3 feet above natural grade and two slabs.

Fill area shown on the survey are odd mounds spoil material left during the construction of the old Port Bougainville development. The material is identified as natural coral rock from the excavation to create the adjacent lake. This material may qualify as clean fill on site. Florida Parks Service shall verify material once excavation begins to allow it to be used as clean fill.

Old Roads are identified. Old Roads in the Port Bougainville site shall be narrowed from the existing width to 12' maximum. At the divided boulevard area near the entrance of the park the west bound lane

shall be completely removed. The asphalt parking lot near the tunnel shall be removed as asphalt surfaces.

The Old House structure is identified as a wood structure with a concrete foundation. Both the structure and the foundation shall be removed and the site grade leveled out to match existing adjacent grades.

4.0 NIKE RADAR SITE

4.1 Introduction

The Nike Site is an abandoned Nike Missile Base (Battery B). It is not known exactly when it was built, but Battery B was relocated from Homestead to Key Largo in 1965. The site includes several buildings, paved surfaces, a waste water package plant and other small miscellaneous structures. There are 4 radar towers in the complex. These radar towers are NOT to be removed. They are to be preserved. **Figure 4-1** provides an aerial view of the site and points out the vast scope of this project.

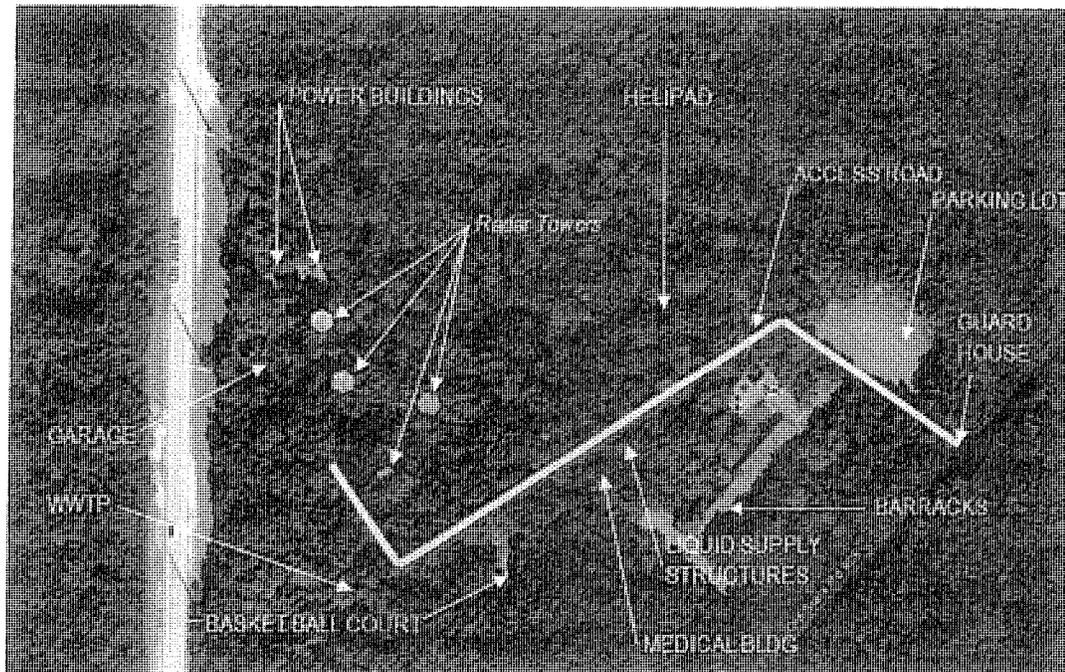

Figure 4-1. Nike Missile Base

Although many of the structures are difficult to see in the recent aerial, the survey shows all features. Also not labeled are the other miscellaneous asphalt surfaces to be removed. As shown on the Demolition Plan.

4.2 Demolition Plan

Demolition Plans are provided to scale. Contractor shall use these plans for direction and understanding the project scope in the most detailed aspect. Quantities are based on these plans.

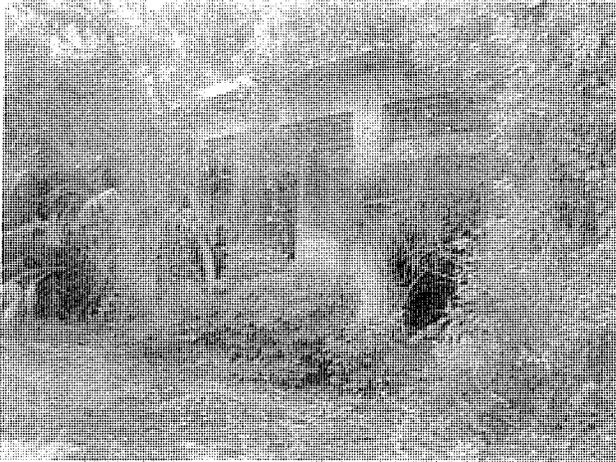

4.3 Detailed Project Description

Nike Radar site has 8 specific demolition sites.

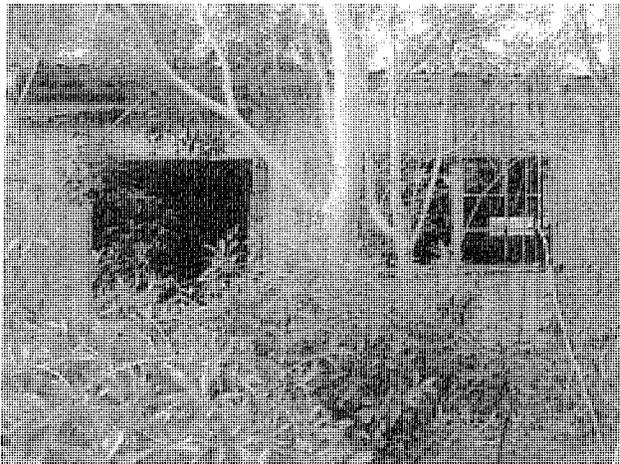

1. Power Buildings
2. Garage
3. Wastewater Treatment Plant (WWTP)
4. Liquid Supply Structure

5. Medical Building
6. Helipad
7. Basketball Court
8. Barracks
9. Guard House
10. Parking Lot
11. Access Road and paved surfaces

The following are photographs from the Nike Missile site taken in December 2011.

Power Building are two large structures housing power and transformer equipment. These items are LUMP SUM bid items including removal of all existing equipment. Foundations shall be removed and site leveled to existing adjacent grades.

One structure pictured above is a concrete block structure. The second power building is a metal building pictured right.

The Garage is a smaller concrete block structure also a LUMP SUM item includes removal of the foundation and leveling to existing adjacent grades.

The Waste Water Treatment Plant is a small package plant. This WWTP will not require an abandonment permit from FDEP. The plant shall be disassembled and removed.

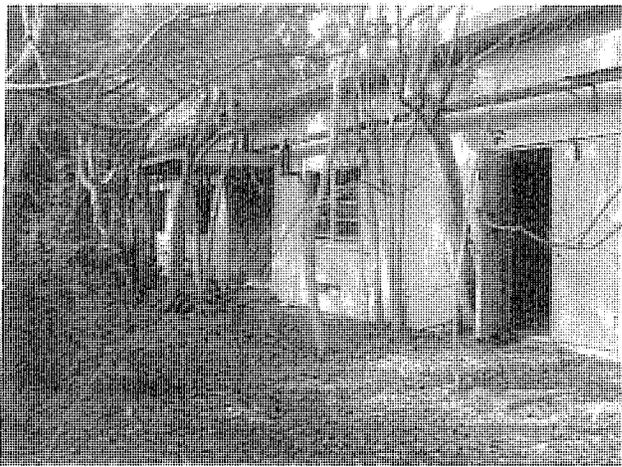

Liquid Supply structure is a small free standing structure used to store chemicals and paints. Some old containers are still in the structure. These must be removed and determined if they are HazMat

materials. HazMat materials must be handled and permitted in accordance with State and Federal regulations.

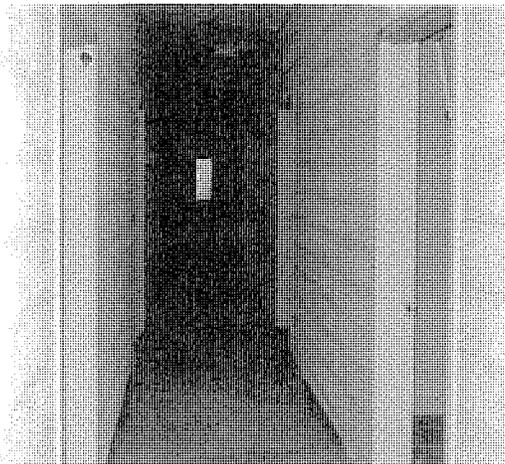

The Medical Building is near the barracks and is a small wood structure as shown.

The Helipad is an old eroded asphalt surface of unknown thickness. This is a square yard pay item.

The Basketball court is a simple asphalt surface with very little fill material. This will be a square yard removal item.

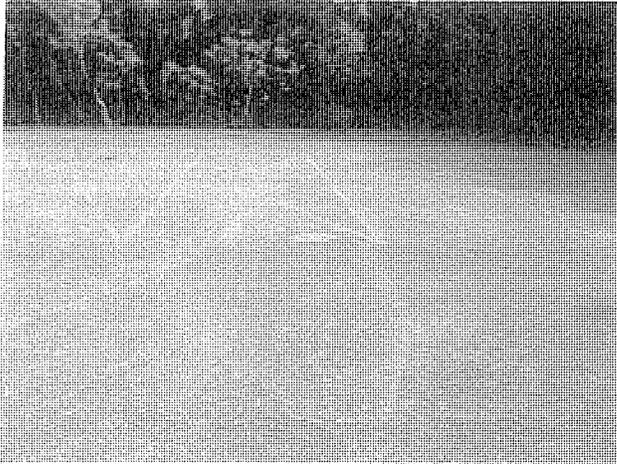

The barracks is the largest of the structures on the Nike Radar site. As shown on the survey it is a long slender building with short wings on either ends. The structure is concrete block. Mostly at a natural grade this entity is a LUMP SUM pay item. This entity includes removal of the foundation.

Pictured right is an interior corridor representation. As shown the interior walls are also concrete block. The interior of the building contains many mechanical, plumbing and electrical appurtenances that will have to be examined for volatile fluids and or gases. Asbestos and lead paint testing shall be by others determined by the Florida Parks Service.

The Guard house is located at the end of the parking lot before entry on to the Old Roads. It is a small, wood structure at natural grade.

Access Road and other paved surfaces are throughout the development site. As labeled on the Demolition Plans. These thin asphalt and concrete surface shall be removed to natural grade. This item is a square yard pay item.

The parking lot is a large rectangular paved surface. The condition of the surface can be seen in the photograph to the left. Other walkways and paved surfaces are shown on the topographic survey. There are many paved paths walk ways and of various thickness and condition. Although there are many variables from surface to surface, all paved surfaces are included in the Paved Surface pay item.

Re.: Lead-Based Paint Survey Report
North Key Largo Restoration Project
Port Bougainville
Key Largo, Monroe County, Florida
PSI Project No. 0784763-1

Dear Ms. McCafferty:

Professional Service Industries, Inc. (PSI) is pleased to inform you of our findings for the above referenced project. The purpose of the lead-based paint (LBP) survey was to evaluate the presence of lead in painted surfaces or other surface coatings at the Port Bougainville Site. The survey parameters were limited to the collection of a single paint-chip sample from each different type of building component and subsurface associated with the site. Mr. Jeremy A. Cotrell of PSI conducted paint-chip sampling on March 14, 2012. The site consists of three structures; a marina building, a wood structure and a two story duplex building.

The collected paint-chip samples were submitted to PSI's Pittsburgh, PA laboratory for analysis by Atomic Absorption Spectroscopy (AAS), using PSI Method WI-503, modified from EPA Method SW846 7420. This analytical method provides a fully documented procedure for determining low concentrations of lead in solvent reducible coatings.

The U.S. Environmental Protection Agency (EPA), U.S. Department of Housing & Urban Development (HUD) and Title XXIX – Public Health, Chapter 381.983 of the Florida Statutes have defined LBP as any paint or coating found to contain equal to or in excess of 0.5% by weight if analyzing paint chip samples.

The following chart lists a description of each material sampled, sample location, and laboratory analysis of the sample collected. The laboratory analytical report is included in Attachment A. Only samples LBP-74 – LBP-79 are applicable to this report.

Sample Number	Sample Color, Substrate Description	Sample Location	Lead Concentration*
LBP-74	Brown Concrete Block Wall/ Concrete Substrate	Marina Building	<0.0081
LBP-75	Lt. Brown Concrete Block Wall/ Concrete Substrate	Marina Building	<0.018
LBP-76	White & Brown Concrete Wall/ Concrete Substrate	Marina Building	<0.020
LBP-77	Pink Concrete Wall/ Concrete Substrate	Marina Building	<0/018

Sample Number	Sample Color, Substrate Description	Sample Location	Lead Concentration*
LBP-78	White Interior Drywall/ Drywall Substrate	Two Story Duplex	0.013
LBP-79	Pink Interior Drywall/ Drywall Substrate	Two Story Duplex	<0.010

Lead concentrations measured as % lead by weight.
* = Paint with a lead concentration greater than 0.5% by weight is considered to be lead-based paint by HUD.

The lead concentrations of five samples were below the applicable laboratory detection limits. The lead concentration for sample LBP-78 was below the EPA/HUD level for lead-based paint but above the laboratory reporting limit for the sample. Therefore, the paint represented by this sample is considered to contain a measurable concentration of lead.

Please note, OSHA Lead in Construction Standard (29 CFR 1926.62) does not include a definition for lead-based paint. Instead, OSHA is concerned with the airborne concentration of lead workers are exposed to during work that causes the disturbance of lead containing materials. Therefore, any employers whose workers perform tasks that disturb painted components containing any concentration of lead should ensure that their workers are properly trained and exposure monitoring is performed in accordance with the OSHA standard and avoid activities (sanding, torch cutting, grinding, abrading) which could produce lead fume or respirable dust.

Construction work is defined as work for construction, alteration and/or repair, including painting and decorating. It includes but is not limited to the following:

- Demolition or salvage of structures where lead or materials containing lead in any concentration are present;
- Removal or encapsulation of materials containing lead;
- New construction, alteration, repair, or renovations of structures. Substrates, or portions thereof, that contain lead, or materials containing lead;
- Lead contamination/emergency cleanup.

The results reported herein are considered sufficient in detail and scope to determine the presence of LBP in the buildings. PSI warrants that the findings contained herein have been prepared in general accordance with accepted practices as applied by similar professionals in the community. Changes in the state of the art or in applicable regulations cannot be anticipated and have not been addressed in this report.

~~There is a distinct possibility that conditions may exist which could not be identified within the scope of the study or which were not apparent during the site visit. The inspection covered only those areas, which were exposed and/or physically accessible to the inspector. The study is also limited to the information available from the client at the time it was conducted. No other warranties are implied or expressed.~~

1. EXECUTIVE SUMMARY

Professional Service Industries, Inc. (PSI) conducted a Demolition Asbestos Survey of the North Key Largo Restoration Project - Port Bougainville Site located in Key Largo, Monroe County, Florida on March 14, 2012. The subject site consisted of a former marina building, a wood structure, and a two-story duplex. The former marina structure is constructed of poured concrete floor slab, stucco/concrete block walls, plaster hallway ceiling with a rough texture coat occupying approximately 18,000 square feet. The wood structure is constructed of poured concrete floor slab, asphalt walkway with a membrane roof system occupying approximately 12,000 square feet. The two-story duplex structure is constructed of a poured concrete floor slab, drywall with joint compound interior walls, popcorn ceiling with a membrane roof system occupying approximately 2,500 square feet. The assessment was performed for the John Pennekamp Coral Reef State Park – Port Bougainville Site. This survey was conducted at the request of the client for future demolition of the structure.

The scope of the Asbestos Demolition Survey was to identify, quantify and assess the condition of suspect asbestos containing materials (ACM) in the building, as well as the collection and analysis of bulk samples. The assessment included the sampling of interior and exterior suspect ACM. Roofing was sampled as part of this assessment.

Based on the methodologies described in this report, PSI did not identify ACM at the subject site.

2. INTRODUCTION

A Demolition Asbestos Survey of the North Key Largo Restoration Project - Port Bougainville Site located in Key Largo, Florida has been conducted by PSI to identify Asbestos Containing Materials within the building. This survey was conducted on March 14, 2012.

The survey was generally conducted in four phases as follows:

- **Phase 1 – Record Document Review-** Drawings, floor plans, historical data or other documents provided to PSI or made available on site were evaluated for the general construction history and layout of the facility. Other documents such as maintenance records, operation and maintenance plans, laboratory results, etc., provided to PSI or made available on site were also reviewed. This data was used to focus the walk through and scope of work to be followed over the course of our visual inspection and sampling.
- **Phase 2 – Visual Inspection-** A visual inspection of the facility was conducted to identify, quantify and assess the condition of suspect ACM. The inspection team access each area and recorded suspect asbestos containing materials present. Each material was visually estimated for total quantity within the space. The general condition and friability was also recorded.
- **Phase 3 – Sample Collection and Analysis-** Samples were collected for each suspect homogeneous area. Samples were submitted to PSI's accredited laboratory for analysis by Polarized Light Microscopy (PLM).
- **Phase 4 - Project Report** - This report outlines the assessment findings based on the interviews, testing results and field observations. The report also discusses other observations concerning the workplace as they impacted the sampling events. This report includes a discussion of sampling methodology, locations, analytical methods, results, and conclusions.

2.1 AUTHORIZATION

Authorization to perform this asbestos survey was given by a submitted Purchase Order issued by the John Pennekamp Coral Reef State Park, dated February 24, 2011.

2.2 SITE DESCRIPTION

The subject site upon which this assessment was conducted is the North Key Largo Restoration Project - Port Bougainville Site located in Key Largo, Monroe County, Florida. The subject site consisted of a former marina building, a wood structure, and a two-story duplex. The former marina structure is constructed of poured concrete floor slab, stucco/concrete block walls, plaster hallway ceiling with a rough texture coat occupying approximately 18,000 square feet. The wood structure is constructed of poured concrete floor slab, asphalt walkway with a membrane roof system occupying approximately 12,000 square feet. The two-story duplex structure is constructed of a poured concrete floor slab, drywall with joint compound interior walls, popcorn ceiling with a membrane roof system occupying approximately 2,500 square feet.

2.3 PROJECT BACKGROUND

The survey was conducted on the North Key Largo Restoration Project - Port Bougainville Site for future demolition. PSI was not provided any documentation for review prior to conducting the survey.

2.4 PURPOSE AND SCOPE

The purpose of this asbestos survey was to determine the presence of ACM in the referenced buildings which are scheduled for future demolition.

The Asbestos Demolition Survey was completed in general accordance with the authorized scope of work as identified in the contract between PSI and the client.

3. ASSESSMENT ACTIVITIES

The visual inspection and sampling activities were conducted on March 14, 2012, by Mr. John Emerson and Mr. Jeremy Cottrell of PSI. Prior to the commencement of asbestos survey activities, the client provided site contact information and assisted in providing access to the facility.

3.1 RECORD DOCUMENT REVIEW

PSI did not review drawings, floor plans, historical data, maintenance records, previous survey reports, laboratory reports or other documents for information regarding construction history and building materials.

3.2 VISUAL INSPECTION

PSI's inspector accessed each room or area of the subject site to identify suspect homogenous areas of ACM. Suspect ACM was categorized into homogeneous areas on the basis of color, texture, appearance, use and apparent construction era (where available). Each homogeneous area was given a unique material description. Quantities were visually estimated by the inspector.

In addition to identification of each material and quantities, the inspector also determined friability. A friable material is defined as any material able to be crushed, crumbled, pulverized or reduced to a powder by hand press when dry. The inspector used a hand pressure test to determine friability. Each material was further assessed for overall condition. Conditions were rated as good, fair or poor. Materials in good condition included those materials which were in the same condition as when installed showing only minor age deterioration. Materials in fair condition included those materials which had apparent age deterioration and minor damage, however the matrix of the material remained substantially intact. Materials in poor condition included all materials with damage or significant damage and evidence that the material's matrix has failed or has begun to fail.

3.3 SAMPLING AND ANALYSIS

PSI's asbestos inspector, under the supervision of a Principal Consultant developed a sampling scheme for suspect ACM at the facility.

- PSI did not sample any system which presented a hazard to the inspection team such as energized electrical systems or within confined spaces,
- PSI analyzed no more than 32 samples by Polarized Light Microscopy.

3.3 SAMPLING AND ANALYSIS (CONT.)

Each sample location was sprayed with amended water and was kept wet during the entire sampling process. Samples were collected by coring through the material from the surface down to the base substrate. All layers of the material were extracted in placed into a sample container for transport to the laboratory. Sample containers were sealed and labeled with a unique sample ID. Following sample extraction, the sample location was sealed using a clear liquid encapsulant or covered with tape. Restoration of finishes and materials to their pre-sampling condition was not provided.

In accordance with the agreement between PSI and the client, roofing materials were sampled by coring through the roof system to the base deck material. PSI applied a temporary patch to the roof core location following sample extraction. Due to the destructive nature of roof sampling however, PSI does not warrant a water tight condition following sample extraction, nor can PSI guarantee the continuance of any roof system warranties by other entities.

Samples were submitted to PSI's accredited laboratory in Pittsburgh, Philadelphia. PSI's laboratory is accredited by the National Voluntary Laboratory Accreditation Program (NVLAP), accreditation No. 101350-0. Samples were analyzed by Polarized Light Microscopy (PLM) EPA 600/M4-82-020: "Interim Method of the Determination of Asbestos in Bulk Insulation Samples."

Samples were dried, homogenized, and representative portions were examined with a stereobinocular microscope. If no asbestos is found in a sample, "NAD" (No Asbestos Detected) is reported. If asbestos is found in a sample, the percentage and type of asbestos is reported. Point Counting verification of low concentration samples was not performed.

4. CONCLUSIONS

PSI has performed an Asbestos Demolition Survey of the subject site in general accordance with PSI Proposal No. 0784-43672R, dated January 27, 2012. Based on the results of this assessment, the following conclusions have been developed.

4.1 ASBESTOS CONTAINING MATERIALS

PSI did not identify asbestos containing materials during this survey.

The facility included in this Demolition Asbestos Survey was the North Key Largo Restoration Project - Port Bougainville Site in Key Largo, Monroe County, Florida. The subject site consisted of an old marina building, a wood structure, and a two-story duplex. The old marina structure is constructed of poured concrete floor slab, stucco/concrete block walls, plaster hallway ceiling with a rough texture coat walkway ceiling system occupying approximately 18,000 square feet. The wood structure is constructed of poured concrete floor slab, asphalt walkway with a membrane roof system occupying approximately 12,000 square feet. The two-story duplex structure is constructed of poured concrete floor slab, drywall with joint compound interior walls, popcorn ceiling with a membrane roof system occupying approximately 2,500 square feet.

During the visual inspection, PSI tested 12 homogenous areas of suspect ACM and collected 32 samples representing these materials. A complete detail of all suspect materials, locations, quantities and conditions may be found in the following table and in the appendices of this report. Please note sample number 75-143 is associated with a separate survey and is not representative of materials currently observed. The following data is a summary of materials sampled as part of this survey.

Data Interpretation

A material is considered an asbestos containing material if at least one sample from the homogenous area is confirmed to contain greater than one percent asbestos (>1.0%) under laboratory analysis. In addition, OSHA's construction standard considers all thermal systems insulation and surfacing materials in a facility constructed prior to 1981 to be presumed asbestos containing (PACM) and all flooring to be assumed asbestos containing unless it is demonstrated through laboratory analysis to contain 1.0% asbestos or less. The National Emissions Standard for Hazardous Air Pollutants further classifies ACM as regulated (RACM), Category I non-friable ACM or Category II non-friable ACM.

PSI did not identify asbestos containing materials during this survey.

If additional suspect ACM is identified during the proposed demolition activities, work should be halted and a Florida Licensed Asbestos Consultant retained to assess the materials.

5. WARRANTY

Asbestos Survey

The information contained in this report is based upon the data furnished by the Client and observations and test results provided by PSI. These observations and results are time dependent, are subject to changing site conditions, and revisions to Federal, State and local regulations.

PSI warrants that these findings have been promulgated after being prepared in general accordance with generally accepted practices in the asbestos and/or lead-based paint testing and abatement industries. PSI also recognizes that raw laboratory test data are not usually sufficient to make all abatement and management decisions.

As directed by the client, PSI did not provide any service to investigate or detect the presence of moisture, mold or other biological contaminants in or around any structure, or any service that was designed or intended to prevent or lower the risk of the occurrence of the amplification of the same. Client acknowledges that mold is ubiquitous to the environment with mold amplification occurring when building materials are impacted by moisture. Client further acknowledges that site conditions are outside of PSI's control, and that mold amplification will likely occur, or continue to occur, in the presence of moisture. As such, PSI cannot and shall not be held responsible for the occurrence or recurrence of mold amplification.

No other warranties are implied or expressed.

Use by Third Parties

This report was prepared pursuant to the contract PSI has with the John Pennekamp Coral Reef State Park. That contractual relationship included an exchange of information about the subject site that was unique and between PSI and its client and serves as the basis upon which this report was prepared. Because of the importance of the communication between PSI and its client, reliance or any use of this report by anyone other than John Pennekamp Coral Reef State Park, for whom it was prepared, is prohibited and therefore not foreseeable to PSI.

Reliance or use by any such third party without explicit authorization in the report does not make said third party a third party beneficiary to PSI's contract with the client. Any such unauthorized reliance on or use of this report, including any of its information or conclusions, will be at third party's risk. For the same reasons, no warranties or representations, expressed or implied in this report, are made to any such third party.

Unidentifiable Conditions

This report is necessarily limited to the conditions observed and to the information available at the time of the work. Due to the nature of the work, there is a possibility that there may exist conditions which could not be identified within the scope of work or which were not apparent at the time of our site work. This report is also limited to information available from the client at the time it was conducted. ~~The report may not represent all conditions at the subject site as it only reflects the information gathered from specific locations.~~

If no resolution can be agreed upon within 30 days after the first meet and confer session, the issue or issues shall be discussed at a public meeting of the Board of County Commissioners. - (a) Keep and maintain public records that ordinarily and necessarily would be required by the public agency in order to perform the service.
- (b) Provide the public with access to public records on the same terms and conditions that the public agency would provide the records and at a cost that does not exceed the cost provided in Chapter 119, Florida Statutes, or as otherwise provided by law.
- (c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law.
- (d) Meet all requirements for retaining public records and transfer, at no cost, to the public agency all public records in possession of the contractor upon termination of the contract and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All records stored electronically must be provided to the public agency in a format that is compatible with the information technology systems of the public agency.

Section 24. NON-WAIVER OF IMMUNITY

Notwithstanding the provisions of Sec. 768.28, Florida Statutes, the participation of the COUNTY and FSU in this Agreement and the acquisition of any commercial liability insurance coverage, self-insurance coverage, or local government liability insurance pool coverage shall not be deemed a waiver of immunity to the extent of liability coverage, nor shall any contract entered into by the COUNTY be required to contain any provision for waiver.

Section 25. PRIVILEGES AND IMMUNITIES

All of the privileges and immunities from liability, exemptions from laws, ordinances, and rules and pensions and relief, disability, workers' compensation, and other benefits which apply to the activity of officers, agents, or employees of any public agents or employees of the COUNTY, when performing their respective functions under this Agreement within the territorial limits of the COUNTY shall apply to the same degree and extent to the performance of such functions and duties of such officers, agents, volunteers, or employees outside the territorial limits of the COUNTY.

Section 26. LEGAL OBLIGATIONS AND RESPONSIBILITIES

Non-Delegation of Constitutional or Statutory Duties. This Agreement is not intended to, nor shall it be construed as, relieving any participating entity from any obligation or responsibility imposed upon the entity by law except to the extent of actual and timely performance thereof by any participating entity, in which case the performance may be offered in satisfaction of the obligation or responsibility. Further, this Agreement is not intended to, nor shall it be construed as, authorizing the delegation of the constitutional or statutory duties of the COUNTY, except to the extent permitted by the Florida Constitution, state statute, and case law.

Section 27. NON-RELIANCE BY NON-PARTIES

No person or entity shall be entitled to rely upon the terms, or any of them, of this Agreement to enforce or attempt to enforce any third-party claim or entitlement to or benefit of any service or program contemplated hereunder, and the COUNTY and FSU agree that neither the COUNTY nor FSU or any agent, officer, or employee of either shall have the authority to inform, counsel, or otherwise indicate that any particular individual or group of individuals, entity or entities, have entitlements or benefits under this Agreement separate and apart, inferior to, or superior to the community in general or for the purposes contemplated in this Agreement.

Section 28. ATTESTATIONS

FSU agrees to execute such documents as the COUNTY may reasonably require, to include a Public Entity Crime Statement, an Ethics Statement, and a Drug-Free Workplace Statement.

Section 29. NO PERSONAL LIABILITY

No covenant or Agreement contained herein shall be deemed to be a covenant or Agreement of any member, officer, agent or employee of Monroe County in his or her individual capacity, and no member, officer, agent or employee of Monroe County shall be liable personally on this Agreement or be subject to any personal liability or accountability by reason of the execution of this Agreement.

Section 30. EXECUTION IN COUNTERPARTS

This Agreement may be executed in any number of counterparts, each of which shall be regarded as an original, all of which taken together shall constitute one and the same instrument and any of the parties hereto may execute this Agreement by signing any such counterpart.

Section 31. SECTION HEADINGS

Section headings have been inserted in this Agreement as a matter of convenience of reference only, and it is agreed that such section headings are not a part of this Agreement and will not be used in the interpretation of any provision of this Agreement.

Section 32. INDEMNIFICATION

Notwithstanding any minimum insurance requirements prescribed elsewhere in this Agreement, subject to and without waiving the provisions of Section 768.28, Florida Statutes, each party agrees to defend, indemnify, and hold harmless the other party for any and all claims arising out of the wrongful actions of the first party, its employees, contractors, and agents, including (i) any claims, actions or causes of action, (ii) any litigation, administrative proceedings, appellate proceedings, or other proceedings relating to any type of injury (including death), loss, damage, fine, penalty or business interruption, and (iii) any costs or expenses that may be asserted against, initiated with respect to, or sustained by, any indemnified party by reason of, or in connection with, (A) any activity of FSU or any of its employees, agents, or other invitees during the term of this Agreement, (B) the negligence or willful misconduct of FSU or any of its employees, agents, or other invitees, or (C) FSU's default in respect of any of the obligations that it undertakes under the terms of this Agreement, except to the extent the claims, actions, causes of action, litigation, proceedings, costs or expenses arise from the intentional or sole negligent acts or negligent acts in part or omissions of the COUNTY or any of its employees, agents, or invitees (other than FSU). Insofar as the claims, actions, causes of action, litigation, proceedings, costs or expenses relate to events or circumstances that occur during the term of this Agreement, this section will survive the expiration of the term of this Agreement or any earlier termination of this Agreement.

Section 33. INDEPENDENT CONTRACTOR

At all times and for all purposes hereunder, FSU is an independent CONTRACTOR and not an employee of the Board of County Commissioners. No statement contained in this Agreement shall be construed so as to find FSU or any of his/her employees, contractors, servants, or agents to be employees of the Board of County Commissioners for Monroe County. As an independent contractor FSU shall provide independent, professional judgment and comply with all Federal, state, and local statutes, ordinances, rules and regulations applicable to the services to be provided.

Section 34. DELAY

FSU agrees that no charges or claims for damages shall be made by it for any delays or hindrances attributable to the COUNTY during the progress of any portion of the services specified in this contract. AGENDA ITEM WORDING: Presentation of a resolution to the Board of County Commissioners from the Affordable Housing Advisory Committee (AHAC) recommending and supporting the County funding and completing a workforce housing study to support development of inclusionary housing requirements for hospitality and commercial sector to build workforce housing.

ITEM BACKGROUND: In 2008, the Monroe County Affordable Housing Advisory Committee (AHAC) was established to comply with requirements in Ch. 420, F.S., related to the County's participation in the State Housing Initiatives Partnership Program (SHIP). At that time, the BOCC created Section 2-701 of the Monroe County Code, which establishes the duties of the AHAC, consistent with the statutory requirements.

In August, 2014, the BOCC approved an agreement with the FCRC Consensus Center, FSU, for professional services on an Affordable Workforce Housing Stakeholder Assessment, in order to assess the current workforce/affordable housing situation in the County and propose a process for developing recommendations to increase the supply of affordable housing. The report recommends that the BOCC assign a number of additional duties to the AHAC to address increasing affordable housing in order to address the current workforce/affordable housing situation.

Per Section 7-201(c) of the code, "the advisory committee may perform additional responsibilities related to affordable housing at the request of the BOCC, including creating best management practices for the development of affordable housing in the community."

The Board of County Commissioners adopted Ordinance 014-2015 amending Section 2-700 of the Monroe County Code to establish the 14 members of the affordable housing advisory committee.

The Board of County Commissioners also adopted Resolution 139-2015 and Resolution 189-2015 to add additional duties to the committee to create a Workforce Housing Development Plan; including assigning Task 10: develop strategies to assist in developing inclusionary housing requirements for hospitality and commercial sector to build workforce housing.

PREVIOUS RELEVANT BOCC ACTION: On May 21st, 2008, the Board of County Commissioners adopted Ordinance 014-2008, which created Sections 2-700 through 2-703 of the Monroe County Code to establish the Affordable Housing Advisory Committee, including its membership requirements and assigned duties.

At a regular meeting held on August 20, 2014, the BOCC discussed a possible need to reconvene the Monroe County Affordable Housing Advisory Committee, and also approved an agreement with the FCRC Consensus Center, FSU, for professional services on an Affordable Workforce Housing Stakeholder Assessment.

At the May 20, 2015 BOCC meeting, the BOCC adopted Resolution 139-2015 establishing the duties of the Affordable Housing Advisory Committee.

At a regular meeting held on June 10, 2015, the BOCC adopted Ordinance 014-2015 amending Section 2-700 of the Monroe County Code to establish the 14 members of the affordable housing advisory

committee and directed staff to amend Resolution 139-2015 to add one additional duty to the committee to evaluate and propose additional mechanisms to qualify and monitor the occupants of deed restricted affordable housing.

At the June 10, 2015 BOCC meeting, three additional members were appointed to the committee.

At the July 15, 2015 BOCC meeting, the BOCC adopted Resolution 189-2015 adding one additional duty to the committee to evaluate and propose additional mechanisms to qualify and monitor the occupants of deed restricted affordable housing.

At the October 21, 2015 BOCC meeting, the AHAC provided an update to the BOCC with the submission of a resolution providing recommendations to the BOCC on the three assignments to be completed by October 2015, as assigned to the AHAC pursuant to Resolution 189-2015.

At the January 20, 2016 BOCC meeting, the BOCC appointed a replacement member to the AHAC to fulfill the position of a member that resigned.

AGENDA ITEM SUMMARY**

AGENDA ITEM WORDING: Discussion and direction related to the Administrative Fees included within the ground leases the County has approved for the development of affordable housing and direction on requests to waive the administrative fees which were originally intended to reimburse the County for the coordination of affordable housing.

ITEM BACKGROUND: In October 2015, the County received a request from Steven and Jessica Foureman, owners of a affordable housing unit #38 in Islander Village, to waive the 1.5% Administrative Fee stipulated in the Ground Lease between Monroe County and Islander Village, LLC. Per the ground lease, the 1.5% of the purchase price is an administrative fee is to be paid to the County for review of the contract and assistance with coordinating the closing on the Affordable Housing Unit.

The relevant ground lease provision states: Section 12.08 Administrative Fees. *With the exception of the initial sales by Initial Lessee, the Lessor or its designee shall be entitled to charge three and one-half percent (3½%) of the Purchase Price (gross compensation however described) for any transferred interest (other than simple security mortgage interests or rental agreements) in which Lessor identified the purchaser, as an administrative fee for coordinating the closing on any Affordable Housing Unit, said fee to be paid by the selling Unit Owner at the time of closing. This fee does not include other seller and buyer closing related costs such as title insurance, documentary stamps, intangible taxes, prorated taxes, real estate commissions, insurance, homeowners' assessments, loan expenses and the like, or rental management or processing fees for rental units. In the event Lessor was unable to identify a purchaser, Lessor shall still be entitled to an administrative fee of one and one-half percent (1½ %) of the Purchase Price for review of the contract and assistance with coordinating the closing on the Affordable Housing Unit. After the initial sales by Initial Lessee, the Lessor or its designee shall be authorized to designate closing, escrow and title agents involved in all transactions involving interests subject to this Lease. After the initial sale of each Affordable Housing Unit by Initial Lessee, Lessor or its designee may, initially and from time to time, establish, promulgate, revise and/ or waive all or part of such fees related to the administration of this Lease and any Subleases, but in no event may Lessor increase the amount of the administrative fee to an amount in excess of three and one-half percent (3½%) for an owner who purchased his or her Affordable Housing Unit without actual, constructive or regulatory notice of the potential applicability of a greater percentage fee.*

County staff notified the Fouremans that staff could not administratively waive the Administrative Fee and that the request would need to go before the BOCC. In the interim, the Fouremans have agreed to an escrow agreement to establish an interest-bearing escrow account for the 1.5% Administrative Fee until this matter is presented to the BOCC for direction. Since that date, another buyer (Paul Reed and Sophie Tornek - unit #13 in Park Village) submitted a check for the 1.5% Administrative Fee and did not request a waiver of the fee.

In reviewing this request, County staff has identified that four [1-Park Village, 2-Flagler Village, 3-Islander Village and 4-Blue Water] of the six [1-Park Village, 2-Flagler Village, 3-Islander Village, 4-Blue Water and 5&6- Habitat for Humanity of the Upper Keys] existing affordable housing ground leases include the same Administrative Fee provision [*the remaining two ground leases with Habitat for Humanity of the Upper Keys include a modified administrative fee provision of 0.005% for the transfer of improvements*] (excerpts from ground leases are attached).

Additionally, staff has not found any evidence of prior payment of the Administrative Fee by affordable housing unit owner-seller(s). (There is one other current pending transaction for unit #13 in Park Village that has placed the 1.5% admin fee in an escrow account). Staff has reviewed sales transaction records and, based on information retrieved, identified that approx. 27 transactions have occurred of units subject to the administrative fee provision (see attached table and summary table below). If the 1.5% administrative fee were collected on these prior sales

1/2 %) of the Purchase Price (gross compensation however described) for any transferred interest (other than simple security mortgage interests or rental agreements) in which Lessor identified the purchaser, as an administrative fee for coordinating the closing on any Affordable Housing Unit, said fee to be paid by the selling Unit Owner at the time of closing. This fee does not include other seller and buyer closing related costs such as title insurance, documentary stamps, intangible taxes, prorated taxes, real estate commissions, insurance, homeowners' assessments, loan expenses and the like, or rental management or processing fees for rental units. After the initial sales by Initial Lessee, the Lessor or its designee shall be authorized to designate closing, escrow and title agents involved in all transactions involving interests subject to this Lease. After the initial sale of each Affordable Housing Unit by Initial Lessee, Lessor or its designee may, initially and from time to time, establish, promulgate, revise and/or waive all or part of such fees related to the administration of this Lease and any Subleases, but in no event may Lessor increase the amount of the administrative fee to an amount in excess of three and one-half percent (3 1/2 %) for an owner who purchased his or her Affordable Housing Unit without actual, constructive or regulatory notice of the potential applicability of a greater percentage fee.

Language Conferring Monroe County Free Legislative Discretion to Amend Subject Ground Lease's "Affordable Restrictions"?: Yes, at Article I - Definitions.

"Affordable Restrictions" shall mean the affordable or employee housing regulations as set forth in Chapter 9.5 and any other applicable sections of the Monroe County Land Development Regulations or County Code, as hereinafter amended, except that in no event shall the Lessor decrease the lawfully permissible sales price for an Affordable Housing Unit to less than the specified sales price for moderate income housing as set forth in the

Land Development Regulations in effect at the time of execution of this Lease where the effect upon an owner/Sublessee/mortgagee would be to divest such person or entity of value upon which such person reasonably and fairly relied to their detriment. The substance of the Affordable Restrictions may be freely amended in the Lessor's legislative discretion, particularly with respect to administrative, monitoring and enforcement mechanisms, but any such amendment shall not materially diminish the lawfully established and equitably vested resale value or the reasonable alienability of an Affordable Housing Unit. However, Lessor may restrict Affordable Housing Unit resales and rentals to use as "Employee Housing" as defined in the Affordable Restrictions, as amended from time to time. Moreover, Lessor may establish in its Affordable Restrictions "means" or "assets" criteria that limit potential buyer or rental pools. Any such amendment shall not increase Initial Lessee's responsibilities as set forth herein. It is the intent and purpose and shall be the effect of this Lease and any Affordable Restrictions to ensure that the affordability of Affordable Housing Units and dedicated real property upon which they are located is maintained and enforced such that any administrative rule, policy or interpretation thereof, made by Lessor or its designees relating to the maximum total amount of consideration and cost permitted to be in any way involved in a purchase or rental transaction (including but not limited to purchase price, lease assignment fees, rents or any other compensation given or received in or "outside" of a related transaction) shall never exceed the affordability criteria reasonably established by Monroe County for the dwelling units involved. In every case, the construction and interpretation of terms, conditions and restrictions imposed by this Lease and the Affordability Restrictions shall be made in favor of an interpretation that ensures long term affordability benefits for the respective housing resources inure to the benefit of Monroe County, its economy and its community character.

With the exception of the initial sales by Initial Lessee, the Lessor or its designee shall be entitled to charge three and one-half percent (3 ½ %) of the Purchase Price (gross compensation however described) for any transferred interest (other than simple security mortgage interests or rental agreements) in which Lessor identified the purchaser, as an administrative fee for coordinating the closing on any Affordable Housing Unit, said fee to be paid by the selling Unit Owner at the time of closing. This fee does not include other seller and buyer closing related costs such as title insurance, documentary stamps, intangible taxes, prorated taxes, real estate commissions, insurance, homeowners' assessments, loan expenses and the like, or rental management or processing fees for rental units. In the event Lessor was unable to identify a purchaser, Lessor shall still be entitled to an administrative fee of one and one-half percent (1 ½ %) of the Purchase Price for review of the contract and assistance with coordinating the closing on the Affordable Housing Unit. After the initial sales by Initial Lessee, the Lessor or its designee shall be authorized to designate closing, escrow and title agents involved in all transactions involving interests subject to this Lease. After the initial sale of each Affordable Housing Unit by Initial Lessee, Lessor or its designee may, initially and from time to time, establish, promulgate, revise and/or waive all or part of such fees related to the administration of this Lease and any Subleases, but in no event may Lessor increase the amount of the administrative fee to an amount in excess of three and one-half percent (3 ½ %) for an owner who purchased his or her Affordable Housing Unit without actual, constructive or regulatory notice of the potential applicability of a greater percentage fee.

"Affordable Restrictions" shall mean the affordable or employee housing regulations as set forth in Chapter 9.5 and any other applicable sections of the Monroe County Land Development Regulations or County Code, as hereinafter amended, except that in no event shall the Lessor materially and adversely alter the obligations or rights of Lessee under this Lease or decrease the lawfully permissible sales price or rental rate for an Affordable Housing Unit to less than the specified sales price or rental rates for moderate income housing as set forth in the Land Development Regulations in effect at the time of execution of this Lease where the effect upon an owner/Sublessee/mortgagee would be to divest such person or entity of value upon which such person reasonably and fairly relied to their detriment. The substance of the Affordable Restrictions may be freely amended in the Lessor's legislative discretion, particularly with respect to administrative, monitoring and enforcement mechanisms, but any such amendment shall not materially diminish the lawfully established and equitably vested resale value or the reasonable alienability of "home-ownership" Affordable Housing Units, or in the case of rental-only units or projects, shall not materially and adversely diminish or interfere with the Lessee's substantive benefits conferred under this Lease or any of its non-administrative terms. However, Lessor may restrict Affordable Housing Unit resales and rentals to use as "Employee Housing" as defined in

Moreover, Lessor may establish in its Affordable Restrictions "means" or "assets" criteria that limit potential buyer or rental pools. Any such amendment shall not increase Initial Lessee's responsibilities as set forth herein. It is the intent and purpose and shall be the effect of this Lease and any Affordable Restrictions to ensure that the affordability of Affordable Housing Units and dedicated real property upon which they are located is maintained and enforced such that any administrative rule, policy or interpretation thereof, made by Lessor or its designees relating to the maximum total amount of consideration and cost permitted to be in any way involved in a purchase or rental transaction (including but not limited to purchase price, lease assignment fees, rents or any other compensation given or received in or "outside" of a related transaction) shall never exceed the affordability criteria reasonably established by Monroe County for the dwelling units involved. In every case, the construction and interpretation of terms, conditions and restrictions imposed by this Lease and the Affordability Restrictions shall be made in favor of ensuring that long term affordability benefits for the respective housing resources inure to the benefit of Monroe County, its economy and its community character. In all cases of conflict between local and federal LIHTC rental, tenant eligibility and other guidelines, Lessee shall be entitled to adhere to governing federal (LIHTC) requirements without being deemed in breach of this Lease or the Affordable Restrictions.

Re: Islander Village 5030 5th Ave #38 – selling my home

Dear Lessor,

Our names are Steven and Jessica Foureman and we are the owners of 5030 5th Avenue #38, Key West, FL. 33040 in the Islander Village Community. According the Land Lease we are required to give you notice that I would like to sell my home.

We have found buyer and a purchase contract for \$315,000 has been executed. According to the chart provided by Tiffany at the County Growth Management Division the 2015 maximum resale for a 3 br unit is: $4.75 \times \text{Median Income of } \$70,400 = \$334,400$. Therefore the home is being sold well under the maximum resale price as allowed by code.

The contract and buyer qualification documents have been sent to Tiffany Stankiewicz, Monroe County Planner, for her approval. Our realtor Debbie Batty checked with Tiffany last Friday, submitted final requested documents yesterday, and the approval will be issued this week.

We would like to respectfully request that the 1.5% Administration Fee be waived. It is contemplated in section 12.08 of the lease that it can be waived. It is very difficult for us to pay an administration fee for "review of the contract and assistance with the coordination" when there is no assistance available or provided by Lessor.

If we do not hear from the Lessor within 10 days of this letter we will assume the contract is acceptable, and the waiver of the administration fee is granted.

Please let me know if we can provide any further information regarding this transaction.

Thank you so much for your consideration.

Sincerely ~

In the event the spouse, heirs, devisees, legatees or beneficiaries of a deceased Owner do not meet the requirements for affordable housing, such persons shall not occupy the premises and shall not be entitled to possession, except and only to the extent that the Lessor permits same, under conditions that it determines furthers the goals and public purposes of this Lease and the Affordable Restrictions. Therefore, in such event, the heirs of the decedent shall, if required by Lessor, transfer their interest in the Affordable Housing Unit in accordance with the provisions of this Article XII and cooperate with the Lessor in accomplishing same. Section 12.08 Administrative Fees. With the exception of the initial sales by Initial Lessee, the Lessor or its designee shall be entitled to charge three and one-half percent (3 ½ %) of the Purchase Price (gross compensation however described) for any transferred interest (other than simple security mortgage interests or rental agreements) in which Lessor identified the purchaser, as an administrative fee for coordinating the closing on any Affordable Housing Unit, said fee to be paid by the selling Unit Owner at the time of closing. This fee does not include other seller and buyer closing related costs such as title insurance, documentary stamps, intangible taxes, prorated taxes, real estate commissions, insurance, homeowners' assessments, loan expenses and the like, or rental management or processing fees for rental units. After the initial sales by Initial Lessee, the Lessor or its designee shall be authorized to designate closing, escrow and title agents involved in all transactions involving interests subject to this Lease. After the initial sale of each Affordable Housing Unit by Initial Lessee, Lessor or its designee may, initially and from time to time, establish, promulgate, revise and/or waive all or part of such fees related to the administration of this Lease and any Subleases, but in no event may Lessor increase the amount of the administrative fee to an amount in excess of three and one-half percent (3 ½ %) for an owner who purchased his or her Affordable Housing Unit without actual, constructive or regulatory notice of the potential applicability of a greater percentage fee.

AGENDA ITEM WORDING: Approval of a resolution requesting SB 306/HB 143 be amended to also authorize Counties to qualify as a “*coastal community*” as defined in the proposed bills which create F.S. 403.70325, to allowing qualifying counties to also participate in a pilot program to regulate or ban disposable plastic bags, in addition to municipalities.

ITEM BACKGROUND: F.S. 403.7033 prohibits local governments from enacting any rule, regulation, or ordinance regarding use, disposition, sale, prohibition, restriction or tax of such auxiliary containers, wrappings, or disposable plastic bags.

House Bill 143 and Senate Bill 306 propose amendments to F.S. 403.7033 and create F.S. 403.70325 authorizing “...*certain municipalities to establish pilot programs to regulate or ban disposable plastic bags.*” and providing a definition of “*coastal community*” defining those municipalities who would qualify to participate. The current bills do not allow for participation by Counties – only municipalities. This resolution requests an amendment to the proposed bills to include those Counties who qualify as a “*coastal community*” under the definition as proposed and expresses support of these bills with the amendment.

PREVIOUS RELEVANT BOCC ACTION:

4/15/2015 BOCC adopted *Resolution No. 102a-2015* supporting the initiatives by local governments in Florida to lessen the negative impact of single-use bags on our environment and requesting expansion of state legislation to include counties, in addition to municipalities, and to allow the regulation and/or ban of single-use plastic bags by both municipalizes and counties.

WHEREAS, Monroe County is diligent in its efforts to preserve the beautiful environment that supports the tourism industry which is so vital to the economy of Monroe County and the State of Florida; and

WHEREAS, plastic bags are detrimental because they do not fully degrade in our oceans or land environment and they introduce unsafe chemicals into our environment; and

WHEREAS, plastic bags create the potential for death of land and marine animals through entanglement and ingestion; and

WHEREAS, the expansive usage of single-use shopping bags and their typical disposal rates creates an impediment to the County's waste reduction and recycling goals while creating unsightly litter; and

WHEREAS, single-use plastic bags are difficult to recycle and frequently contaminate material that is processed through the County's curbside recycling and composting programs; and

WHEREAS, reusable bags are considered to be the best option to reduce waste and litter, protect wildlife and conserve resources; and

WHEREAS, the Board of County Commissioners for Monroe County acknowledges that some businesses have taken affirmative steps to accomplish this goal and recognizes their proactive efforts; and

WHEREAS, it is in the public interest for the Board of County Commissioners for Monroe County to encourage and enable the location of a viable reusable bag manufacturing operation in the State of Florida; and

WHEREAS, it is in the public interest for the Florida Legislature to provide statewide deregulation of the proliferation of single-use shopping bags; and

WHEREAS, if the State does not act to regulate the proliferation of single-use shopping bags the Board of County Commissioners for Monroe County would like to potentially enact regulations governing the use of plastic checkout bags;

NOW THEREFORE, BE IT RESOLVED BY THE BOARD OF COUNTY COMMISSIONERS OF MONROE COUNTY, FLORIDA:

SECTION 1. Monroe County is committed to the long-term goal of reducing the harms of plastic pollution on our fragile environment and committed to ensuring a thriving, attractive and safe environment for current and future residents and tourists.

SECTION 2. Monroe County does hereby support initiatives to lessen the negative impact of single-use plastic bags specifically, and supports the promotion of reusable shopping bags as the best alternative to single-use plastic or single-use paper bags.

SECTION 3. Monroe County supports the State Legislature's action to allow local municipalities in the State of Florida to regulate their own local communities in an effort to alleviate the harms cause by single-use shopping bags; and, therefore, Monroe County opposes any statewide preemption on local efforts to determine the best course of action with regards to protection of the local environment and tourism economy.

SECTION 4. Monroe County respectfully requests the State Legislature expand their legislation to also include counties, in addition to municipalities, to allow the regulation and/or ban of single-use plastic bags by both municipalities and counties.

**BOARD OF COUNTY COMMISSIONERS
AGENDA ITEM SUMMARY**

Meeting Date: January 20, 2016

Department: Sustainability/Projects

Bulk Item: No X

Staff Contact /Phone #: Rhonda Haag, 453-8774

AGENDA ITEM WORDING: Approval to enter into a contract with Earth Tech Enterprises, Inc. for \$202,384 to remove an existing ineffective weed barrier system and install a new air curtain system on Canal #266 (located between Baileys Lane and Witters Lane in Doctor's Arm Big Pine Key); to demolish portions of an existing ineffective weed barrier and install a new air curtain system at on Canal #287 (located between Atlantis Drive and Hollerich Drive in Big Pine Key); and to waive the waive the requirement to submit financial statements with their proposal.

ITEM BACKGROUND: Proposals were first received on June 24, 2015. Only one proposal was received for \$381,100, which was 217% over the budgeted amount of \$175,000. The proposal was rejected with the approval of the BOCC. The RFP was readvertised and new proposals were received on December 15, 2015.

Two proposals were received, the low proposal was received for \$202,384, which is 150% above the budgeted amount of \$135,000. This proposal did not include Financial Statements, which was a requirement in the Request for Proposal. The vendor misunderstood the RFP and indicated they normally provide the financial statements only when they are the low bidder, due to the confidential nature of the documents. The Financial Statements were provided after the proposal opening, per request from staff, and are acceptable. Approval is being requested to waive this requirement and accept the proposal with this irregularity, which was amended to satisfactory condition after the opening.

The second proposal is for \$ 308,850, which is \$106,466 higher than the low proposal and also 225% above the budgeted amount, and which contained the financial statements.

A separate award of a contract for 2 years for operation and maintenance of both systems is being evaluated and will be presented for approval in the future. It was included in the RFP and the proposal received from the vendor.

Canal #266 and #287 Air Curtain Installation projects are part of the *Canal Restoration Demonstration Program*, and are designed to evaluate the cost and effectiveness of *installation of air curtains as weed barriers*, to prevent seaweed from entering the canals where it becomes trapped, drops to the canal bottoms and decays. These projects are the fourth and fifth of the County's specified six demonstration canal projects. These canals are among the worst as to water quality in the entire County. The two projects are being issued under one solicitation for cost effectiveness. As a reminder, Canal #266 was also a demonstration project for organic muck removal. Installation of an air curtain will help reduce new accumulation of seaweed in that canal.

PREVIOUS RELEVANT BOCC ACTION:

May 20, 2015 – Approval to advertise the RFP.

July 15, 2015 – Approval to reject proposals and readvertise the RFP

When both additions and credits covering related Work or substitutions are involved in a change the allowance for overhead and profit shall be figured on the basis of net increase, if any, with respect to that change.

5.6.2 Add that portion of the Contract Sum properly allocable to materials and equipment delivered and suitably stored at the site for subsequent incorporation in the completed construction (or, if approved in advance by the Owner, suitably stored off the site at a location agreed upon in writing), less retainage;

5.6.3 Subtract the aggregate of previous payments made by the Owner; and

5.6.4 Subtract amounts, if any, for which the Sustainability/Projects Director has withheld or nullified a Certificate for Payment as provided in Paragraph 9.5 of the General Conditions.

5.7 Retainage of 10% will be withheld in accordance with section 218.735 (8)(b), Florida Statutes.

5.8 Reduction or limitation of retainage, if any, shall be as follows:
Monroe County is exempt from and not subject to Florida Statutes 255.078, "Public Construction Retainage". Reduction or limitation of retainage, if any, shall be reduced incrementally at the discretion of and upon the approval of the Sustainability/Projects Director.

Further, this Agreement is not intended to, nor shall it be construed as, authorizing the delegation of the constitutional or statutory duties of the County, except to the extent permitted by the Florida constitution, state statute, and case law.

SECTION 00750 - GENERAL CONDITIONS OF THE CONTRACT

1.0 GENERAL PROVISIONS

1.1 Basic Definitions

1.1.1 **The Contract Documents:** The Contract Documents consist of the Agreement between Owner and Contractor, Conditions of the Contract (General, Supplementary and other Conditions), Drawings, Specifications, addenda issued prior to execution of the Contract, Owners proposal documents, other documents listed in the Agreement and Modifications issued after execution of the Contract, and the Contractor's proposal and supporting documentation. A Modification is (1) a written amendment to the Contract signed by both parties, (2) a Change Order, (3) a Construction Change Directive or (4) a written order for a minor change in the Work issued by AMEC/Engineer.

1.1.2 **The Contract:** The Contract represents the entire and integrated agreement between the parties hereto and supersedes prior negotiations, representations or agreements, either written or oral. The Contract may be amended or modified only by a Modification. The Contract Documents shall not be construed to create a contractual relationship of any kind (1) between the Engineer and Contractor, (2) between Sustainability/Projects Director and Contractor, (3) between the AMEC/Engineer and Sustainability/Projects Director, (4) between the Owner and a Subcontractor or (5) between any persons or entities other than the Owner and Contractor. The Owner shall, however, be entitled to enforce the obligations under the Contract intended to facilitate performance of the duties of Sustainability/Projects Director and AMEC/Engineer.

1.1.3 **The Work:** The term "Work" means the construction and services required by the Contract Documents, whether completed or partially completed, and includes all other labor, materials, equipment and services provided or to be provided by the Contractor to fulfill the Contractor's obligations. The Work may constitute the whole or a part of the Project.

1.1.4 **The Project:** The Project is the total construction of which the Work performed under the Contract Documents may be the whole or a part and which may include construction by other Contractors and by the Owner's own forces including persons or entities under separate contracts not administered by Sustainability/Projects Director.

1.1.5 **The Drawings:** The Drawings are the graphic and pictorial portions of the Contract Documents, wherever located and whenever issued, showing the design, location and dimensions of the Work, generally including plans, elevations, sections, details, schedules and diagrams.

1.1.6 **The Specifications:** The Specifications are that portion of the Contract Documents consisting of the written requirements for materials, equipment, construction systems, standards and workmanship for the Work, and performance of related services.

1.1.7 **The Project Manual:** The Project Manual is the volume usually assembled for the Work which may include the proposal requirements, sample forms, Conditions of the Contract and Specifications.

1.2 Execution, Correlation and Intent

1.2.2 Execution of the Contract by the Contractor is a representation that the Contractor has visited the site, become familiar with local conditions under which the Work is to be performed and correlated personal observations with requirements of the Contract Documents.

1.2.3 The intent of the Contract Document is to include all items necessary for the proper execution and completion of the Work by the contractor. The Contract Documents are complementary, and what is required by one shall be as binding as if required by all; performance by the Contractor shall be required only to the extent consistent with the Contract Documents and reasonably inferable from them as being necessary to produce the intended results.

1.2.4 Organization of the Specifications into divisions, sections and articles, and arrangement of Drawings shall not control the Contractor in dividing the Work among Subcontractors or in establishing the extent of Work to be performed by any trade.

1.2.5 Unless otherwise stated in the Contract Documents, words which have well-known technical or construction industry meanings are used in the Contract Documents in accordance with such recognized meanings.

1.2.6 Where on any of the drawings a portion of the Work is drawn out and the remainder is indicated in outline, the parts drawn out shall also apply to all other like portions of the Work.

1.3 Ownership and Use of Engineer's Drawings, Specifications and Other Documents

1.3.1 The Drawing, Specifications and other documents prepared by the AMEC/Engineer are instruments of the Engineer's service through which the Work to be executed by the Contractor is described. The Contractor may retain one contract record set. Neither the Contractor nor any Subcontractor, Sub-subcontractor or material or equipment supplier shall own or claim a copyright in the Drawings, Specifications and other documents prepared by the AMEC/Engineer. All copies of them, except the Contractor's record set, shall be returned or suitably accounted for to AMEC/Engineer on request, upon completion of the Work. The Drawings, Specifications and other documents prepared by the Engineer, and copies thereof furnished to the Contractor, are for use solely with respect to the Project. They are not to be used by the Contractor or any Subcontractor, Sub-subcontractor or material or equipment suppliers unless they are granted a limited license to use and reproduce applicable portions of the Drawings, Specifications and other documents prepared by the Engineer appropriate to and for use in the execution of their Work under the Contract Documents. All copies made under this license shall bear the statutory copyright notice, if any, shown on the Drawings, Specifications and other documents prepared by the Engineer. Submittal or distribution to meet official regulatory requirements or for other purposes in connection with this Project is not to be construed as publication in derogation of copyright or other reserved rights

1.3.2 Unless otherwise provided in the Contract Documents, the Contractor will be furnished, two (2) original sealed copies and one (1) electronic copy of Drawings, Specifications and the Project Manual free of charge for the execution of the Work. Additional copies may be obtained from AMEC/Engineer at a fee of \$5.00 per page for full size drawings (.25 per page for written specifications or 11"x 17" drawings).

1.4 Capitalization

1.4.1 Terms capitalized in these General Conditions include those which are (1) specifically defined, (2) the titles of numbered articles and identified references to Paragraphs, Subparagraphs and Clauses in the document or (3) the titles of other documents published by the American Institute of Architects.

1.5 Interpretation

1.5.1 In the interest of brevity the Contract Documents frequently omit modifying words such as "all" and "any" and articles such as "the" and "an," but the fact that a modifier or an article is absent from one statement and appears in another is not intended to affect the interpretation of either statement.

2.0 OWNER

2.1 Definition

2.1.1 The Owner is Monroe County. The term "Owner" means the Owner or the Owner's authorized representative.

2.2 Information and Services Required of the Owner

2.2.2 Not applicable

2.2.3 Not applicable

2.2.4 Information or services under the Owner's control shall be furnished by the Owner with reasonable promptness to avoid delay in orderly progress of the Work.

2.2.5 Unless otherwise provided in the Contract Documents, the Contractor will be furnished two (2) original sealed copies and one (1) electronic copy of Drawings, Specifications and the Project Manual free of charge for the execution of the Work as provided in Subparagraph 1.3.2.

2.2.6 The Owner shall forward all communications to the Contractor through Sustainability/Projects Director and may contemporaneously provide the same communications to the Engineer.

2.2.7 The foregoing are in addition to other duties and responsibilities of the Owner enumerated herein and especially those in respect to Article 6 (Construction by Owner or by Other Contractors), Article 9 (Payments and Completion) and Article 11 (Insurance and Bonds).

2.3 Owner's Right to Stop the Work

2.3.1 If the Contractor fails to correct Work which is not in accordance with the requirements of the contract Documents as required by Paragraph 12.2 or persistently fails to carry out Work in accordance with the Contract Documents, the Owner, by written order signed personally or by an agent specifically so empowered by the Owner, may order the Contractor to stop the Work, or any portion thereof, until the cause for such order has been eliminated; however, the right of the Owner to stop the Work shall not give rise to a duty on the part of the Owner to exercise this right for the benefit of the Contractor or any other person or entity.

2.4 Owner's Right to Carry Out the Work

2.4.1 If the Contractor defaults or neglects to carry out the Work in accordance with the Contract Documents and fails within a three-day period after receipt of written notice from the Owner to commence and continue correction of such default or neglect with diligence and promptness, the Owner may after such three-day period give the Contractor a second written notice to correct such deficiencies within a three-day period. If the Contractor within such second three-day period after receipt of such second notice fails to commence and continue to correct any deficiencies, the Owner may, without prejudice to other remedies the Owner may have, correct such deficiencies. In such case an appropriate Change Order shall be issued deducting from payments then or thereafter due the Contractor the cost of correcting such deficiencies, including compensation for another contractor or subcontractor or Sustainability/Projects Director's and Engineer's and their respective consultants' additional services and expenses made necessary by such default, neglect or failure. If payments then, or thereafter, due the Contractor are not sufficient to cover such amounts, the Contractor shall pay the difference to the Owner. In the event of clean-up issues, Owner has right to provide a minimum of 24 hours' notice. In the event of safety issues determined to be of a serious nature, as determined by AMEC/Engineer, notice will be given, and contractor is required to rectify deficiency immediately.

3.0 CONTRACTOR

3.1 Definition

3.1.1 The Contractor is the person or entity identified as such in the Agreement and is referred to throughout this Agreement as if singular in number. The term "Contractor" means the Contractor or the Contractor's authorized representative.

3.1.2 The plural term "Contractors" refers to persons or entities who perform construction under Conditions of the Contract that are administered by Sustainability/Projects Director, and that are identical or substantially similar to these Conditions.

3.2 Review of Contract Documents and Field Conditions by Contractor

3.2.1 The Contractor shall carefully study and compare the Contract Documents with each other and with information furnished by the Owner pursuant to Subparagraph 2.2.2 and shall at once report to AMEC/Engineer errors, inconsistencies or omissions discovered. The Contractor shall not be liable to the Owner, Sustainability/Projects Director or AMEC/Engineer for damage resulting from errors, inconsistencies or omissions in the Contract Documents unless the Contractor recognized such error, inconsistency or omission and knowingly failed to report it to AMEC/Engineer. If the Contractor performs any construction activity knowing it involves a recognized error, inconsistency or omission in the Contract Documents without such notice to AMEC/Engineer, the Contractor shall assume appropriate responsibility for such performance and shall bear an appropriate amount of the attributable costs for correction.

3.2.2 The Contractor shall take field measurements and verify field conditions and shall carefully compare such field measurements and conditions and other information known to the Contractor with the Contract Documents before commencing activities. Errors, inconsistencies or omissions discovered shall be reported to AMEC/Engineer at once.

3.3 Supervision and Construction Procedures

3.3.1 The Contractor shall supervise and direct the Work, using the Contractor's best skill and attention. The Contractor shall be solely responsible for and have control over construction means, methods, techniques, sequences and procedures and for coordinating all portions of the Work under this Contract, subject to overall coordination of AMEC/Engineer as provided in Subparagraphs 4.6.3 and 4.6.5.

3.3.2 The Contractor shall be responsible to the Owner for acts and omissions of the Contractor's employees, Subcontractors and their agents and employees, and other persons performing portions of the Work under a contract with the Contractor.

3.3.3 The Contractor shall not be relieved of obligations to perform the Work in accordance with the Contract Documents either by activities or duties of Sustainability/Projects Director or AMEC/Engineer in its administration of the Contract, or by test, inspections or approvals required or performed by persons other than the Contractor.

3.3.4 The Contractor shall inspect portions of the Project related to the Contractor's Work in order to determine that such portions are in proper condition to receive subsequent work.

3.3.5 The Contractor shall verify that the Construction Documents being worked with are the most recent and updated available, including all Addenda information. Also the Contractor will perform the work strictly in accordance with this contract.

3.4 Labor and Materials

3.4.1 Unless otherwise provided in the Contract Documents, the Contractor shall provide and pay for labor, materials, equipment, tools, construction equipment and machinery, water, heat, utilities, transportation, and other facilities and services necessary for proper execution and completion of the Work, whether temporary or permanent and whether or not incorporated or to be incorporated in the Work.

3.4.2 The Contractor shall enforce strict discipline and good order among the Contractor's employees and other persons carrying out the Contract. The Contractor shall not permit employment of unfit persons or persons not skilled in tasks assigned to them.

3.4.3 The Contractor is responsible for the conduct of his employees at all times. Misconduct, destruction of property, unsafe practices, or violation of any Federal or State regulations including abuse of alcohol or drugs, will be cause for permanent dismissal from the project. - .2 failure of the Work to comply with the requirements of the Contract Documents; or
- .3 terms of special warranties required by the Contract Documents.

4.7.9 **Injury or Damage to Person or Property.** If either party to the Contract suffers injury or damage to person or property because of an act or omission of the other party, of any of the other party's employees or agents, or of others for whose acts such party is legally liable, written notice of such injury or damage, whether or not insured, shall be given to the other party within a reasonable time not exceeding 21 days after first observance. 6.1.3 It shall be the responsibility of the Contractor to coordinate his work with the work of other contractors on the site. The Owner and Sustainability/Projects Director shall be held harmless for any and all costs associated with improper coordination.

6.2 Mutual Responsibility

6.2.1 The Contractor shall afford the Owner's own forces, AMEC/Engineer and other contractors' reasonable opportunity for introduction and storage of their materials and equipment and performance of their activities, and shall connect and coordinate the Contractor's construction and operations with theirs as required by the Contract Documents.

6.2.2 If part of the Contractor's Work depends for proper execution or results upon construction or operations by the Owner's own forces or other contractors, the Contractor shall, prior to proceeding with that portion of the Work, promptly report to any apparent discrepancies or defects in such other construction that would render it unsuitable for such proper execution and results. Failure of the Contractor so to report shall constitute an acknowledgment that the Owner's own forces or other contractors' completed or partially completed construction is fit and proper to receive the Contractor's Work, except as to defects not then reasonably discoverable.

6.2.3 Costs caused by delays or by improperly timed activities or defective construction shall be borne by the Contractor. The Contractor's sole remedy as against the Owner for costs caused by delays or improperly timed activities or defective construction shall be an extension of time.

6.2.4 The Contractor shall promptly remedy damage wrongfully caused by the Contractor to completed or partially completed construction or to property of the Owner or other contractors as provided in Subparagraph 10.2.5.

6.2.5 Claims and other disputes and matters in question between the Contractor and other contractors shall be subject to the provisions of Paragraph 4.7 provided the other contractors have reciprocal obligations.

6.2.6 The Owner and other contractors shall have the same responsibilities for cutting and patching as are described for the Contractor in Paragraph 3.14.

6.2.7 Should the Contractor contend that he is entitled to an extension of time for completion of any portion or portions of the work, he shall, within (72) hours of the occurrence of the cause of the delay, notify Sustainability/Projects Director in writing, of his contention: setting forth (A) the cause for the delay, (B) a description of the portion or portions of work affected thereby, and (C) all details pertinent thereto. A subsequent written application for the specific number of days of extension of time requested shall be made by the Contractor to Sustainability/Projects Director within (72) hours after the delay has ceased to exist.

.1 It is a condition precedent to the consideration or prosecution of any claim for an extension of time that the foregoing provisions be strictly adhered to in each instance and, if the Contractor fails to comply, he shall be deemed to have waived the claim.

.2 The Contractor agrees that whether or not any delay, regardless of cause, shall be the basis for an extension of time he shall have no claim against the Owner or Sustainability/Projects Director for an increase in the Contract price, nor a claim against the Owner or Sustainability/Projects Director for a payment or allowance of any kind for damage, loss or expense resulting from delays; nor shall the Contractor have any claim for damage, loss

or expense resulting from interruptions to, or suspension of, his work to enable other contractors to perform their work. The only remedy available to the Contractor shall be an extension of time.

6.3 Owner's Right to Clean Up

6.3.1 If a dispute arises among the Contractor, other contractors and the Owner as to the responsibility under their respective contracts for maintaining the premises and surrounding area free from waste materials and rubbish as described in Paragraph 3.15, the Owner may clean up and allocate the cost among those responsible as Sustainability/Projects Director determines to be just.

7.0 CHANGES IN THE WORK

7.1 Changes

7.1.1 Changes in the Work may be accomplished after execution of the Contract, and without invalidating the Contract, by Change Order, Construction Change Directive or order for a minor change in the Work, subject to the limitations stated in this Article 7 and elsewhere in the Contract Documents.

7.1.2 A Change Order shall be based upon agreement among the Owner, Sustainability/Projects Director, AMEC/Engineer and Contractor; a Construction Change Directive requires agreement by the Owner and Sustainability/Projects Director and may or may not be agreed to by the Contractor.

7.1.3 Changes in the Work shall be performed under applicable provisions of the Contract Documents, and the Contractor shall proceed promptly, unless otherwise provided in the Change Order, Construction Change Directive or order for a minor change in the Work.

7.1.4 If unit prices are stated in the Contract Documents or subsequently agreed upon, and if quantities originally contemplated are so changed in a proposed Change Order or Construction Change Directive that application of such unit prices to quantities of Work proposed will cause substantial inequity to the Owner or Contractor, the applicable unit prices shall be equitably adjusted.

7.2 Change Orders

7.2.1 A change Order is a written instrument prepared by AMEC/Engineer and signed by the Owner, Sustainability/Projects Director and Contractor stating their agreement upon all of the following:

- .1 a change in the Work;
- .2 the amount of the adjustment in the Contract Sum, if any; and
- .3 the extent of the adjustment in the Contract Time, if any.

7.2.2 The cost or credit to the Owner resulting from a change in the Work shall be determined in one or more of the following methods:

- .1 mutual acceptance of lump sum properly itemized and supported by sufficient substantiating data to permit evaluation and payment, and approved by the appropriate authority in writing;

AIR CURTAIN INSTALLATION, WATER QUALITY IMPROVEMENT PROJECTS, CANALS
#266 DOCTOR'S ARM & #287 ATLANTIC ESTATES, BIG PINE KEY, MONROE COUNTY, FL

.2 unit prices stated in the Contract Documents or subsequently agreed upon, and approved by the appropriate authority in writing;

.3 cost to be determined in a manner agreed upon by the parties and a mutually acceptable fixed or percentage fee;

.4 or by method provided in subparagraph 7.2.3.

7.2.3 If none of the methods set forth in Clauses 7.2.1 or 7.2.2 is agreed upon, the Contractor, provided a written order signed by the Owner or Sustainability/Projects Director is received, shall promptly proceed with the Work involved. The cost of such Work shall then be determined by daily force accounts in a form acceptable to the Owner and Sustainability/Projects Director. The daily force account forms shall identify Contractor and /or Subcontractor personnel by name, total hours for each man, each piece of equipment and total hours for equipment and all material(s) by type for each extra Work activity claim. Each daily force account form shall be signed by the designated Sustainability/Projects Director representative no later than the close of business on the day the Work is performed to verify the items and hours listed. Extended pricing of these forms shall be submitted to Sustainability/Projects Director with all supporting documentation required by Sustainability/Projects Director for inclusion into a change order. Unless otherwise provided in the Contract Documents, cost shall be limited to the following: cost of materials, including sales tax and cost of delivery; cost of labor, including social security, old age and unemployment insurance, and fringe benefits required by agreement or custom; works' or workmen's compensation insurance; and the rental value of equipment and machinery. Markups for overhead and profit will be in accordance with subparagraph 7.2.4. Pending final determination of cost, payments on account shall be made as determined by Sustainability/Projects Director. The amount of credit to be allowed by the Contractor for any deletion or change, which results in a net decrease in the Contract Sum, will be the amount of the actual net cost to the Owner as confirmed by Sustainability/Projects Director. When both additions and credits covering related Work or substitutions are involved in any one change, the allowance for overhead and profit shall be figured on the basis of the net increase, if any with respect to that change.

7.2.4 The actual cost of Changes in the Work may include all items of labor or material, power tools, and equipment actually used, utilities, pro rata charges for foreman, and all payroll charges such as Public Liability and Workmen's Compensation Insurance. No percentage for overhead and profit shall be allowed on items of Social Security and Sales Tax. If deductions are ordered the amount of credit shall be net cost to Owner as defined in section 5.6.1 of the Contract. Items considered as overhead shall include insurance other than that mentioned above, bond or bonds, superintendent, timekeeper, clerks, watchmen, use of small tools, miscellaneous supplies, incidental job costs, warranties, and all general home/field office expenses. The actual cost of Changes in the Work (other than those covered by unit prices set forth in the Contract Documents) shall be computed as follows:

.1 if the Contractor performs the actual Work, the maximum percentage mark-up for overhead shall be five percent (5%) and the maximum percentage for profit shall be five percent (5%);

.2 if the Subcontractor performs the actual Work, the subcontractor's percentage mark-up for overhead and profit shall be a maximum addition of ten percent (10%). If the Contractor does not perform the Work, the maximum mark-up for managing the Work will be five percent (5%);

3. If the Subcontractor performs part of the actual Work, his percentage mark-up for overhead and profit shall be a maximum addition of ten percent (10%) on his direct Work only. If the Contractor performs part of the actual Work, his percentage mark-up for overhead and profit shall be a maximum addition of ten percent (10%) on his direct Work only.

7.2.5 The Contractor shall furnish to the Owner through Sustainability/Projects Director, an itemized breakdown of the quantities and prices used in computing the value of any change that might be ordered. Any additional supporting documentation requested by Sustainability/Projects Director such as certified quotations or invoices shall be provided by the Contractor to Sustainability/Projects Director at no additional cost to the Owner.

7.2.6 If the Contractor claims that any instructions given to him by AMEC/Engineer, by drawings or otherwise, involve extra Work not covered by the Contract, he shall give Sustainability/Projects Director written notice thereof within five (5) days after the receipt of such instructions and before proceeding to execute the work, except in emergencies endangering life or property, in which case the Contractor shall proceed in accordance with Paragraph 10.3.

.1 The written notice to Sustainability/Projects Director for the Extra Work shall include a complete description of the extra Work, the total cost and a detailed cost breakdown by labor, material and equipment for each additional activity required to be performed. Mark-ups shall be limited as specified elsewhere in this Article.

.2 Except as otherwise specifically provided, no claim for additional cost shall be allowed unless the complete notice specified by this subparagraph is given by the Contractor.

7.2.7 Unless otherwise agreed in writing, the Contractor shall carry on the Work and maintain its progress during any dispute or claim proceeding, and Owner shall continue to make payments to the Contractor in accordance with the Contract Documents. Disputes unresolved shall be settled in accordance with subparagraph 4.7. The Contractor shall maintain completed daily force account forms in accordance with subparagraph 7.2.3 for any dispute or claim item.

7.3 Authority

7.3.1 AMEC/Engineer will have authority to order minor changes in the Work not involving adjustment in the Contract sum or extension of the Contract Time and not inconsistent with the intent of the Contract Documents. Such changes shall be effected by written order issued through AMEC/Engineer and shall be binding on the Owner and Contractor. The Contractor shall carry out such written order promptly.

8.0 TIME

8.1 Definitions

8.1.1 Unless otherwise provided, Contract Time is the period of time, including authorized adjustments, allotted in the Contract Documents for Substantial Completion of the Work.

8.1.2 The date of commencement of the Work is the date established in the Agreement. The date shall not be postponed by the failure to act of the Contractor or of persons or entities for which the Contractor is responsible.

8.1.3 The date of Substantial Completion is the date certified by Sustainability/Projects Director in accordance with Paragraph 9.8.

AIR CURTAIN INSTALLATION, WATER QUALITY IMPROVEMENT PROJECTS, CANALS
#266 DOCTOR'S ARM & #287 ATLANTIC ESTATES, BIG PINE KEY, MONROE COUNTY, FL

8.1.4 The term "day" as used in the Contract Documents shall mean calendar day unless otherwise specifically defined.

8.1.5 The Owner/Sustainability/Projects Director shall be the final judge as to whether Substantial Completion has been achieved and certifies the date to the Contractor.

8.2 Progress and Completion

8.2.1 Time limits stated in the Contract Documents are of the essence of the Contract. By executing the Agreement the Contractor confirms that the Contract Time is a reasonable period for performing the Work.

8.2.2 The Contractor shall not knowingly, except by agreement or instruction of the Owner in writing, prematurely commence operations on the site or elsewhere prior to the effective date of insurance required by Article 11 to be furnished by the Contractor. The date of commencement of the Work shall not be changed by the effective date of such insurance.

8.2.3 The Contractor shall proceed expeditiously with adequate forces and shall achieve Substantial Completion within the Contract Time.

8.3 Delays and Extensions of Time

8.3.1 If the Contractor is delayed, at any time, in the progress of the Work by any act or neglect of the Owner, Sustainability/Projects Director, or the AMEC/Engineer, or by any employee of either, or by any separate contractor employed by the Owner, or by changes ordered in the Work, or by fire, unusual delay in transportation, adverse weather conditions not reasonably anticipatable, unavoidable casualties or any causes beyond the Contractor's control, or by delay authorized by the Owner, Sustainability/Projects Director, or by any other cause which Sustainability/Projects Director determines may justify the delay, then the Contract Time shall be extended by no cost Change Order for such reasonable time as Sustainability/Projects Director may determine, in accordance with subparagraph 6.2.7.

8.3.2 Any claim for extension of time shall be made in writing to Sustainability/Projects Director not more than Seventy-two (72) hours after the commencement of the delay in accordance with paragraph 6.2.7; otherwise it shall be waived. Any claim for extension of time shall state the cause of the delay and the number of days of extension requested. If the cause of the delay is continuing, only one claim is necessary, but the Contractor shall report the termination of the cause for the delay within seventy-two (72) hours after such termination in accordance with paragraph 6.2.7; otherwise, any claim for extension of time based upon that cause shall be waived.

8.3.3 No claim for an increase in the Contract Sum for either acceleration or delay will be allowed for extensions of time pursuant to this Paragraph 8.3 or for other changes in the Construction Schedules.

8.3.4 If the Project is delayed as a result of the Contractor's refusal or failure to begin the Work on the date of commencement as defined in Paragraph 8.1.2, or his refusal or failure to carry the Work forward expeditiously with adequate forces, the Contractor causing the delay shall be liable for, but not limited to, delay claims from other Contractors which are affected.

9.0 PAYMENTS AND COMPLETION

9.1 Contract Sum

AIR CURTAIN INSTALLATION, WATER QUALITY IMPROVEMENT PROJECTS, CANALS
#266 DOCTOR'S ARM & #287 ATLANTIC ESTATES, BIG PINE KEY, MONROE COUNTY, FL

9.1.1 The Contract Sum is stated in the Agreement and, including authorized adjustments, is the total amount payable by the Owner to the Contractor for performance of the Work under the Contract Documents.

9.2 Schedule of Values

9.2.1 Before submittal of the first Application for Payment, the Contractor shall submit to AMEC/Engineer, a schedule of values allocated to various portions of the Work, prepared in such form and supported by such data to substantiate its accuracy as AMEC/Engineer may require. This schedule, unless objected to by Sustainability/Projects Director, shall be used as a basis for reviewing the Contractor's Applications for Payment.

9.3 Applications for Payment

9.3.1 At least fifteen days before the date established for each progress payment, the Contractor shall submit to AMEC/Engineer an itemized Application for Payment for Work completed in accordance with the schedule of values. Such application shall be notarized and supported by such data substantiating the Contractor's right to payment as the Owner or Sustainability/Projects Director may require, such as copies of requisitions from Subcontractors and material suppliers, and reflecting retainage if provided for elsewhere in the Contract Documents.

.1 Such applications may include request for payment on account of changes in the Work which have been properly authorized by Construction Change Directives but not yet included in Change Orders.

.2 Such applications may not include requests for payment of amounts the Contractor does not intend to pay to a Subcontractor or material supplier because of a dispute or other reason.

9.3.2 Unless otherwise provided in the Contract Documents, payments shall be made on account of materials and equipment delivered and suitably stored at the site for subsequent incorporation in the Work. If approved in advance by the Owner, payment may similarly be made for materials and equipment suitably stored off the site at a location agreed upon in writing. Payment for materials and equipment stored on or off the site shall be conditioned upon compliance by the Contractor with procedures satisfactory to the Owner to establish the Owner's title to such materials and equipment or otherwise protect the Owner's interest, and shall include applicable insurance, storage and transportation to the site for such materials and equipment stored off the site.

9.3.3 The Contractor warrants that title to all Work covered by an Application for Payment will pass to the Owner no later than the time of payment. The Contractor further warrants that upon submittal of an Application for Payment all Work for which approval for payment have been previously issued and payments received from the Owner shall, to the best of the Contractor's knowledge, information and belief, be free and clear of liens, claims security interests or encumbrances in favor of the Contractor, Subcontractors, material suppliers, or other persons or entities making a claim by reason of having provided labor, materials and equipment relating to the Work. All Subcontractors and Sub-subcontractors shall execute an agreement stating that title will so pass, upon their receipt of payment from the Contractor. The warranties are for the administrative convenience of the Owner only and do not create an obligation on the part of the

AIR CURTAIN INSTALLATION, WATER QUALITY IMPROVEMENT PROJECTS, CANALS

Owner to pay directly any unpaid subcontractor, laborer or materialmen. Such persons must seek payment from the Contractor or his public construction bond surety only.

9.4 Approval for Payment

9.4.1 AMEC/Engineer will assemble a Project Application for Payment by combining the Contractor's applications with similar applications for progress payments from other Contractors and certify the amounts due on such applications.

9.4.2 After the AMEC/Engineer's receipt of the Project Application for Payment, AMEC/Engineer will either recommend approval to the Sustainability/Projects Director for the Application for Payment, with a copy to the Contractor, for such amount as AMEC/Engineer recommends to the Sustainability/Projects Director is properly due, or notify the Contractor in writing of AMEC/Engineer's reasons for withholding approval in whole or in part as provided in Subparagraph 9.5.1

9.4.3 The issuance of a separate Approval for Payment will constitute representations made by AMEC/Engineer to the Owner, based on their individual observations at the site and the data comprising the Application for Payment submitted by the Contractor, that the Work has progressed to the point indicated and that, to the best of AMEC/Engineer's knowledge, information and belief, quality of the Work is in accordance with the Contract Documents. The foregoing representations are subject to an evaluation of the Work for conformance with the Contract Documents upon Substantial Completion, to results of subsequent tests and inspections, to minor deviations from the Contract Documents correctable prior to completion and to specific qualifications expressed by AMEC/Engineer. The issuance of a separate Approval for Payment will further constitute a representation that the Contractor is entitled to payment in the amount approved. However, the issuance of a separate Approval for Payment will not be a representation that AMEC/Engineer has (1) made exhaustive or continuous on-site inspections to check the quality or quantity of the Work, (2) reviewed the Contractor's construction means, methods, techniques, sequences or procedures, (3) reviewed copies of requisitions received from Subcontractors and material suppliers and other data requested by the Owner to substantiate the Contractor's right to payment or (4) made examination to ascertain how or for what purpose the Contractor has used money previously paid on account of the Contract Sum.

9.5 Decisions to Withhold Approval

9.5.1 AMEC/Engineer may decline to approve an Application for Payment if, in his opinion, the application is not adequately supported. If the Contractor and AMEC/Engineer cannot agree on a revised amount, AMEC/Engineer shall process the Application for the amount it deems appropriate. AMEC/Engineer may also decline to approve any Application for Payment because of subsequently discovered evidence or subsequent inspections. It may nullify, in whole or part, any approval previously made to such extent as may be necessary in its opinion because of: (1) defective Work not remedied; (2) third party claims filed or reasonable evidence indicating probable filing of such claims; (3) failure of the Contractor to make payments properly to Subcontractors or for labor, materials, or equipment; (4) reasonable evidence that the Work cannot be completed for the unpaid balance of the Contract Sum; (5) damage to AMEC/Engineer, Sustainability/Projects Director, the Owner, or another contractor working at the project; (6) reasonable evidence that the Work will not be completed within the

AIR CURTAIN INSTALLATION, WATER QUALITY IMPROVEMENT PROJECTS, CANALS

contract time; (7) persistent failure to carry out the Work in accordance with the Contract Documents.

No payment shall be made to the Contractor until certificates of insurance or other evidence of compliance by the Contractor, with all the requirements of Article 11, have been filed with the Owner and Sustainability/Projects Director.

9.5.2 When the above reasons for withholding approval are removed, approval will be made for amounts previously withheld.

9.6 Progress Payments

9.6.1 After AMEC/Engineer has issued an Approval for Payment, the Owner shall make payment in the manner and within the time provided in the Contract Documents, and shall so notify AMEC/Engineer. From the total of the amount determined to be payable on a progress payment, a retainage in accordance with the Florida Local Government Prompt Payment Act, Chapter 218, Florida Statutes will be deducted and retained by the Owner until the final payment is made. The balance of the amount payable, less all previous payments, shall be approved for payment. .1 It is understood and agreed that the Contractor shall not be entitled to demand or receive progress payment based on quantities of Work in excess of those provided in the proposal or covered by approved change orders, except when such excess quantities have been determined by AMEC/Engineer and Sustainability/Projects Director to be a part of the final quantity for the item of Work in question.

.2 No progress payment shall bind the Owner to the acceptance of any materials or Work in place, as to quality or quantity. All progress payments are subject to correction at the time of final payments.

9.6.2 The Contractor shall promptly pay each Subcontractor, upon receipt of payment from the Owner, out of the amount paid to the Contractor on account of such Subcontractor's portion of the Work, the amount to which said Subcontractor is entitled, reflecting percentages actually retained from payments to the Contractor on account of such Subcontractor's portion of the Work. The Contractor shall, by appropriate agreement with each Subcontractor, require each Subcontractor to make payments to Sub-subcontractors in similar manner.

9.6.3 AMEC/Engineer will, on request, furnish to a Subcontractor, if practicable, information regarding percentages of completion or amounts applied for by the Contractor and action taken thereon by the Owner and Sustainability/Projects Director on account of portions of the Work done by such Subcontractor.

9.6.4 Neither the Owner nor Sustainability/Projects Director shall have an obligation to pay, or to see to, the payment of money to a Subcontractor except as may otherwise be required by law.

9.6.5 Payment to material suppliers shall be treated in a manner similar to that provided in Subparagraphs 9.6.2, 9.6.3 and 9.6.4.

9.6.6 A progress payment, or partial or entire use or occupancy of the Project by the Owner shall not constitute acceptance of Work not in accordance with the Contract Documents.

9.6.7 All material and work covered by partial payments made shall thereupon become the sole property of the Owner, and by this provision shall not be construed as relieving the Contractor from the sole responsibility for the materials and Work upon which payments have

**AIR CURTAIN INSTALLATION, WATER QUALITY IMPROVEMENT PROJECTS, CANALS

been made or the restoration for any damaged material, or as a waiver of the right of the Owner or Sustainability/Projects Director to require the fulfillment of all the terms of the Contract.

9.6.8 Except in case of bona fide disputes, or where the Contractor has some other justifiable reason for delay, the Contractor shall pay for all transportation and utility services not later than the end of the calendar month following that in which services are rendered and for all materials, tools, and other expendable equipment which are delivered at the site of the Project. The Contractor shall pay to each of his Subcontractors, not later than the end of the calendar month in which each payment is made to the Contractor, the representative amount allowed the Contractor on account of the Work performed by the Subcontractor. The Contractor shall, by an appropriate agreement with each Subcontractor, also require each Subcontractor to make payments to his suppliers and Sub-subcontractors in a similar manner.

9.7 Substantial Completion

9.7.1 Substantial Completion is the stage in the progress of the Work when the Work or designated portion thereof is sufficiently complete in accordance with the Contract Documents so the Owner can occupy or utilize the Work for its intended use.

9.7.2 When the Contractor considers that the Work, or a portion thereof which the Owner agrees to accept separately, is substantially complete, the Contractor and AMEC/Engineer shall jointly prepare a comprehensive list of items to be completed or corrected. The Contractor shall proceed promptly to complete and correct items on the list. Failure to include an item on such list does not alter the responsibility of the Contractor to complete all Work in accordance with the Contract Documents. Upon receipt of the list, AMEC/Engineer will make an inspection to determine whether the Work or designated portion thereof is substantially complete. If the inspection discloses any item, whether or not included on the list, which is not in accordance with the requirements of the Contract Documents, the Contractor shall, before issuance of the Certificate of Substantial Completion, complete or correct such item upon notification by AMEC/Engineer. The Contractor shall then submit a request for another inspection by AMEC/Engineer, to determine Substantial Completion. When the Work or designated portion thereof is substantially complete, AMEC/Engineer will prepare a Certificate of Substantial Completion, shall establish responsibilities of the Owner and Contractor for security, maintenance, heat, utilities, damage to the Work and insurance, and shall fix the time within which the Contractor shall finish all items on the list accompanying the Certificate. Warranties required by the Contract Documents shall commence on the date of Substantial Completion of the Work or designated portion thereof unless otherwise provided in the Certificate of Substantial Completion. The Certificate of Substantial Completion shall be submitted to the Owner and Contractor for their written acceptance of responsibilities assigned to them in such Certificate.

9.7.3 Upon Substantial Completion of the Work or designated portion thereof and upon application by the Contractor and certification by AMEC/Engineer and Sustainability/Projects Director, the Owner shall make payment, reflecting adjustment in retainage, if any, for such Work or portion thereof as provided in the Contract Documents.

9.8 Partial Occupancy or Use

9.8.1 The Owner may occupy or use any completed or partially completed portion of the Work at any stage when such portion is designated by separate agreement with the Contractor, provided such occupancy or use is consented to by the insurer as required under Subparagraph

11.3.1 and authorized by public authorities having jurisdiction over the Work. Such partial occupancy or use may commence whether or not the portion is substantially complete, provided the Owner and Contractor have accepted in writing the responsibilities assigned to each of them for payments, retainage if any, security, maintenance, heat, utilities, damage to the Work and insurance, and have agreed in writing concerning the period for correction of the Work and commencement of warranties required by the Contract Documents. When the Contractor considers a portion substantially complete, the Contractor and AMEC/Engineer shall jointly prepare a list as provided under Subparagraph 9.8.2. Consent of the Contractor to partial occupancy or use shall not be unreasonably withheld. The stage of the progress of the Work shall be determined by written agreement between the Owner and Contractor or, if no agreement is reached, by decision of Sustainability/Projects Director.

9.8.2 Immediately prior to such partial occupancy or use, the Owner, Sustainability/Projects Director, AMEC/Engineer and Contractor shall jointly inspect the area to be occupied or portion of the Work to be used in order to determine and record the condition of the Work.

9.9.3 Unless otherwise agreed upon, partial occupancy or use of a portion or portions of the Work shall not constitute acceptance of Work not complying with the requirements of the Contract Documents.

9.9 Final Completion and Final Payment

9.9.1 Upon completion of the Work, the Contractor shall forward to AMEC/Engineer a written Notice that the Work is ready for final inspection and acceptance and shall also forward to AMEC/Engineer a final Contractor's Application for Payment. Upon receipt, AMEC/Engineer will promptly make such inspection. When AMEC/Engineer finds the Work acceptable under the Contract Documents and the Contract fully performed, AMEC/Engineer will promptly issue a final Approval for Payment stating that to the best of their knowledge, information and belief, and on the basis of their observations and inspections, the Work has been completed in accordance with terms and conditions of the Contract Documents and that the entire balance found to be due the Contractor and noted in said final Approval is due and payable. AMEC/Engineer's final Approval for Payment will constitute a further representation that conditions listed in Subparagraph 9.10.2 as precedent to the Contractor's being entitled to final payment have been fulfilled.

9.9.2 Neither final payment nor any remaining retained percentage shall become due until the Contractor submits to AMEC/Engineer and Sustainability/Projects Director (1) an affidavit that payrolls, bills for materials and equipment, and other indebtedness connected with the Work for which the Owner or the Owner's property might be responsible or encumbered (less amounts withheld by Owner) have been paid or otherwise satisfied, (2) a certificate evidencing that insurance required by the Contract Documents to remain in force after final payment is made, is currently in effect and will not be canceled or allowed to expire until at least 30 days' prior written notice has been given to the Owner, (3) a written statement that the Contractor knows of no substantial reason that the insurance will not be renewable to cover the period required by the Contract Documents, (4) consent of surety, if any, to final payment and (5), if required by the Owner, other data establishing payment or satisfaction of obligations, such as receipts, releases and waivers of liens, claims, security interests or encumbrances arising out of the Contract. The following documents (samples included in section 1027) are required for Final Payment:

- (1) Application and Certificate for Payment
- (2) Continuation Sheet

- (3) Certificate of Substantial Completion
- (4) Contractor's Affidavit of Debts and Claims
- (5) Contractor's Affidavit of Release of Liens
- (6) Final Release of Lien
- (7) Contractor shall provide two (2) hard copies in tabulated divided binders and one (1) saved electronically tabbed and indexed in Adobe Acrobat file (.PDF) format delivered on a downloadable CD/DVD of all the following but not limited to:

- A. Project Record Documents (As Built Documents).
- B. Operating and maintenance data, instructions to the Owner's personnel.
- C. Warranties, bond and guarantees.
- D. Keys and keying schedule.
- E. Spare parts and maintenance materials.
- F. Electronic copies of approved submittals
- G. Evidence of payment and final release of liens and consent of surety to final release (includes final release from all utilities and utility companies).

9.9.3 Acceptance of final payment by the Contractor, a Subcontractor or material supplier shall constitute a waiver of claims by that payee except those previously made in writing and identified by that payee as unsettled at the time of final Application for Payment. Such waivers shall be in addition to the waiver described Subparagraph 4.7.5.

9.10 Payment of Subcontractors

9.10.1 Any requirement of this Article 9 that the Contractor furnish proof to the Owner or Sustainability/Projects Director that the subcontractors and materialmen have been paid is for the protection and convenience of the Owner only. Unpaid subcontractors and materialmen may only seek payment from the Contractor and the surety that provided the Contractor's Public Construction Bond. **The Contractor must insert this paragraph 9.10 in all its contracts with subcontractors and materialmen.**

10.0 PROTECTION OF PERSONS AND PROPERTY

10.1 Safety Precautions and Programs

10.1.1 The Contractor shall be responsible for initiating, maintaining and supervising all safety precautions and programs in connection with the performance of the Contract. The Contractor shall submit the Contractor's safety program to AMEC/Engineer for review, approval and coordination with the safety programs of other Contractors.

10.1.2 In the event the Contractor encounters on the site material reasonably believed to be asbestos or polychlorinated biphenyl (PCB) which has not been rendered harmless, the

AIR CURTAIN INSTALLATION, WATER QUALITY IMPROVEMENT PROJECTS, CANALS

Contractor shall immediately stop Work in the area affected and report the condition to the Owner, Sustainability/Projects Director and AMEC/Engineer in writing. The Work in the affected area shall not thereafter be resumed except by written agreement of the Owner and Contractor if in fact the material is asbestos or polychlorinated biphenyl (PCB) and has not been rendered harmless. The Work in the affected area shall be resumed in the absence of asbestos or polychlorinated biphenyl (PCB), or when it has been rendered harmless, by written agreement of the Owner and Contractor.

10.1.3 The Contractor shall not be required pursuant to Article 7 to perform without consent any Work relating to asbestos or polychlorinated biphenyl (PCB).

10.1.5 If reasonable precautions will be inadequate to prevent foreseeable bodily injury or death to persons resulting from a material or substance encountered on the site by the Contractor, the Contractor shall, upon recognizing the condition, immediately stop Work in the affected area and report the condition to AMEC/Engineer and Sustainability/Projects Director in writing. The Owner, Contractor and Sustainability/Projects Director shall then proceed in the same manner described in Subparagraph 10.1.2.

10.1.6 The Owner shall be responsible for obtaining the services of a licensed laboratory to verify a presence or absence of the material or substance reported by the Contractor and, in the event such material or substance is found to be present, to verify that it has been rendered harmless. 12.1.1 If a portion of the Work is covered contrary to AMEC/Engineer's request or to requirements specifically expressed in the Contract Documents, it must, if required in writing by AMEC/Engineer, be uncovered for their observation and be replaced at the Contractor's expense without change in the Contract Time.

12.1.2 If a portion of the Work has been covered which AMEC/Engineer has not specifically requested to observe prior to its being covered, AMEC/Engineer may request to see such Work and it shall be uncovered by the Contractor, if such Work is in accordance with the Contract Documents, costs of uncovering and replacement shall, by appropriate Change Order, be charged to the Owner, if such Work is not in accordance with the Contract Documents, the Contractor shall pay such costs unless the condition was caused by the Owner or one of the other Contractors in which event the Owner shall be responsible for payment of such costs.

12.2.1 The Contractor shall promptly correct Work rejected by AMEC/Engineer or failing to conform to the requirements of the Contract Documents, whether observed before or after Substantial Completion and whether or not fabricated, installed or completed. The Contractor shall bear costs of correcting such rejected Work, including additional testing and inspections and compensation for AMEC/Engineer's services and expenses made necessary thereby.

12.2.2 If, within one year after the date of Substantial Completion of the Work or designated portion thereof, or after the date for commencement of warranties established under Subparagraph 9.9, or by terms of an applicable special warranty required by the Contract Documents, any of the Work is found to be not in accordance with the requirements of the Contract Documents, the Contractor shall correct it promptly after receipt of written notice from the Owner to do so unless the Owner has previously given the Contractor a written acceptance of such condition. This period of one year shall be extended with respect to portions of Work first performed after Substantial Completion by the period of time between Substantial Completion and the actual performance of the Work. This obligation under this Subparagraph 12.2.2 shall survive acceptance of the Work under the Contract and termination of the Contract. Establishment of the time period of one year as described in Subparagraph 12.2.2, relates only to the specific obligation of the Contractor to correct the Work, and has no relationship to the time within which the obligation to comply with the Contract Documents may be sought to be enforced, nor to the time within which proceedings may be commenced to establish the Contractor's liability with respect to the Contractor's obligations other than specifically to correct the Work.

12.3 Acceptance of Nonconforming Work

12.3.1 If the Owner prefers to accept Work which is not in accordance with the requirements of the Contract Documents, the Owner may do so instead of requiring its removal and correction, in which case the Contract Sum will be reduced as appropriate and equitable. 2. The second part consists of the general clean-up, the concerted effort by all trade contractors working on the project. A minimum of one (1) crew is to be utilized by each contractor, or 10%, whichever is more.
3. The third part consists of the Owner cleaning up for a particular trade contractor should adequate notice not compel him to clean up his work. In this case, the appropriate contractors will be back charged.

Shortly after the award of the contract and prior to the beginning of work, an Activity Hazard Analysis (phase plan) shall be prepared by the contractor and submitted to Monroe County for approval. The analysis will address the hazards for each activity to be performed in that phase and will present the procedures and safeguards necessary to eliminate the hazards or reduce the risk to an acceptable level. The analysis will be discussed by the contractor and Monroe County on-site representatives at the Preparatory Inspection Meeting. SECTION 00980 - CONTRACTOR QUALITY CONTROL PLAN

1.1 AMEC/Engineer DUTIES AND RESPONSIBILITIES

- A. AMEC/Engineer will monitor all work performed by the Contractor and assist the Contractor with his conformance of the work to the Contract Drawings and Specifications.

1.2 CONTRACTOR'S DUTIES AND RESPONSIBILITIES

- A. The Contractor is responsible for the quality of the work performed by his work force on this project as well as the quality of the material, equipment and supplies furnished by him to be incorporated into the work.
- B. The Contractor will provide a Quality Control Plan for approval and designate a Quality Control Representative who will be on site at all times while the respective Contractor's work is in progress and will have the authority and responsibility to accept or reject items of work. The Contractor's Quality Control Representative may delegate his duties but the primary responsibility and authority will rest on him.
- C. The Contractor's Quality Control Representative will coordinate the submittal of all shop drawings, product data and samples to AMEC/Engineer. Any submittal that is at variance to the contract requirements must be identified as such and transmitted to AMEC/Engineer for submittal and approval by the Owner. No work requiring submittal of a shop drawing, product data or sample shall commence until the submittal has been reviewed and approved by AMEC/Engineer.
- D. The Contractor will bear the responsibility of scheduling all required testing and inspections by the designated material-testing laboratory, in a timely fashion, to prevent needless cancellations and delays of work activities. Any costs caused by untimely notification shall be borne by the Contractor.
- E. The Contractor's Quality Control Representative will review his drawings, procurement documents and contracts to insure that the technical information provided and all work performed is in accordance with the latest revisions of the Contract Drawings and Specifications.
- F. The Contractor's Quality Control Representative will perform an inspection upon receipt at the site of the work of all materials, equipment and supplies including those furnished to him by the Owner. Notes from this inspection will be filled out on the appropriate form and included with the Contractor Daily Quality Control Report. Items which are damaged or not in conformance with the respective submittals, quality standards, contract drawings and specifications shall be brought to the attention of Monroe County representative AMEC/Engineer on site and then will be identified and segregated from accepted items. Items thus identified will not be incorporated into the work until corrective action acceptable to AMEC/Engineer is completed. Items determined unsalvageable will be

removed from the job site. These items shall be noted as deficient in the applicable section of the Contractor Daily Quality Control Report.

1.3 INSPECTION AND TESTING

A. INSPECTION PLAN

Sustainability/Projects Director utilizes a multi-point inspection plan for each separate feature of work to be performed under this Contract, i.e., work described by each division of the technical provision section of the contract specifications. This plan consists of the following:

1. Preparatory Inspection—Prior to commencing the work, the Contractor's Quality Control Representative will meet with Sustainability/Projects Director's representative AMEC/Engineer and check the following items at a minimum for conformance:
 - (a) Approval of shop drawings and submittals.
 - (b) Approval of inspection and test reports of materials and equipment to be utilized.
 - (c) Completion of previous operations of preliminary work.
 - (d) Availability of materials and equipment required.
 - (e) Potential utility outages.
 - (f) Any other preparatory steps dependent upon the particular operation.
 - (g) Quality standards.
 - (h) Safety or environmental precautions to be observed. (Phase Hazard)

Note: AMEC/Engineer will record the minutes to this inspection meeting and distribute accordingly.

2. Initial Inspection—Upon completion of a representative sample of a given feature of the work, the Contractor's Quality Control Representative will meet with Sustainability/Projects Director's representative AMEC/Engineer and check the following items at a minimum for conformance:
 - (a) Workmanship to established quality standards.
 - (b) Conformance to contract drawings and specifications.
 - (c) Construction methods, equipment and tools utilized.
 - (d) Materials and articles utilized.
 - (e) Adequacy of testing methods.
 - (f) Adequacy of shop drawings.
 - (g) Adequacy of safety or environmental precautions.

Note: AMEC/Engineer will record the minutes to this inspection meeting and distribute accordingly.

3. **Follow-up Inspections**—The Contractor's Quality Control Representative will inspect the work daily to assure the continuing conformance of the work to the workmanship standards established during the preparatory and initial inspections.

Additionally, as a part of the follow-up inspection, sign-off sheets will be utilized as often as possible. The intent of these sheets is to achieve concurrence from other trade contractors and responsible parties that ensuing work can indeed commence over underlying work. This will prevent oversights and omissions which could elevate costs. Sign-off sheets shall be used for, but not be limited to, concrete, drywall, ceilings, painting, roofing substrates and flooring. These reports are to be generated by the Contractor and submitted to AMEC/Engineer Superintendent for approval prior to the start-up of work.

Failure to generate a sign-off sheet or to attain proper signatures prior to covering up underlying work may affect payment for that piece of work if ensuing problems are detected or not. This disciplinary action shall be carried out via the Nonconformance Report. (See Section 1.4.B of this plan.)

Note: The Contractor shall be responsible to record these inspections and all other project related activities encountered throughout the day on the Contractor Daily Quality Control Report.

4. **Completion Inspections**—Upon completion of a given feature of the work, the Contractor's Quality Control Representative will meet with the Sustainability/Projects Director representative AMEC/Engineer, if he so desires to attend, to perform an inspection of the completed work. Nonconforming items will be identified and corrected prior to commencement of the next operation.

Note: The Contractor shall conduct and report corrections of this inspection which shall be a required submittal.

5. **Follow-On Inspections**—Upon execution of the contractor's completion inspection in elements of the work which result in concealment; such as, ceiling and drywall installations, the Contractor shall schedule and conduct multi-trade or singular inspections prior to covering installation.

Note: AMEC/Engineer will record the minutes to this inspection meeting.

6. **Pre-Final Inspection**—Upon substantial completion of the project work AMEC/Engineer shall coordinate and conduct a universal inspection of all areas and elements of the work. The Sustainability/Projects Director may be represented if she so desires. This inspection shall be completed at least (15) days prior to the final substantial completion inspection which shall be conducted by AMEC/Engineer. All deficiencies and incomplete work should be completed prior to the final substantial completion inspection.

B. OPERATION AND CHECK OUT TESTING

The Contractor will provide personnel and equipment to perform the operational tests and check-out of the equipment, facilities or equipment constructed, fabricated or installed under this Contract. The Sustainability/Projects Director representative AMEC/Engineer will coordinate and witness all such tests. Notification should be given at least ten (10) days in advance of the scheduled tests.

C. FINAL INSPECTION

AMEC/Engineer will coordinate and attend all final inspections of the work. The Sustainability/Projects Director may be represented if she so desires. Prior to requesting a final inspection, all tests for the equipment and systems must be completed.

See Section 01700 for contract closeout.

1.4 REPORTING

Maintaining accurate and retrievable records is extremely important in the Quality Assurance Program. These records will act as a main source of information in the present and in the future for the entire Sustainability/Projects Director team. The main report that will be utilized to provide this information is the Daily Quality Control Report. Nonconformance Reports may also be issued.

A. DAILY QUALITY CONTROL REPORT

The Daily Quality Control Report shall be used to document the summary of daily inspection activities performed by the Contractor's designated Quality Control Representative. It shall include any of the steps of inspection that are performed that day, all test monitoring and any rework of nonconforming items. The daily Quality Control Report section of the Daily Superintendent's Report will be routinely used for daily reporting requirements. When the magnitude or complexity necessitates such, a more separate and comprehensive form will be used. Reference Contractor's Daily Report, and as needed Contractor Daily Quality Control Report, Section 01385.

B. NONCONFORMANCE REPORT

Nonconformance Reports will be issued for work that is found to be in nonconformance with the contract documents or the referenced quality standards. The report will be issued by Sustainability/Projects Director.

It is not the intent to routinely and repeatedly issue nonconformance reports, but to issue them only after normal enforcement standards have been exhausted, or if the work performed is a detriment to the project.

A copy of the Nonconformance Report will be forwarded to the Site Project Manager for his information and/or action. It should also be included in the Contractor's Daily Quality Report package for general review.

Nonconformance Reports will be signed off once the deficient item or items have adequately been corrected. This will be done by the issuing Superintendent and Project Manager. These sign-offs will be included with a corresponding corrective action taken. Significant nonconformance needs to be addressed to prevent recurrence. The signed-off report will also be submitted for review.

Work activities affected by a Nonconformance Report will proportionally counter-affect payments. Whether that be partial or full retainage will be left up to the discretion of Sustainability/Projects Director.

1.5 AUDITS

- A. Sustainability/Projects Director may choose at its option to perform Contractor audits of their Contractor Quality Control Plan at any time. Reports of these audit results will be forwarded to the Project Manager for his action. Any action items noted during an audit for the Contractor will be followed up and documented to insure compliance and avoid recurrence.

1.6 SUMMARY

The intention of this plan is to create a system of checks and balances that will minimize delays caused by rework and a lack of planning and maximize production and insure that the finished product is one that the entire construction team can pride themselves in. These goals can be achieved by giving the Owner exactly what he has bought. The Owner will expect no more and through Quality Assurance, the construction team will provide no less.

SECTION 01421 - REFERENCE STANDARDS AND DEFINITIONS

PART 1 – GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of Contract, including General and Supplementary Conditions and other Division 1 Specifications Sections, apply to this Section.

1.2 DEFINITIONS

- A. General: Basic Contract definitions are included in the conditions of this Contract.
- B. Indicated: The term "indicated" refers to graphic representations, notes or schedules on the Drawings, or other Paragraphs or Schedules in the Specifications, and similar requirements in the Contract Documents. Where terms such as "shown", "noted", "scheduled", and "specified" are used, it is to help the reader locate the reference; no limitation on location is intended.
- C. Directed: Terms such as "directed", "requested", "authorized", "selected", "approved", "required", and "permitted" mean "directed by AMEC/Engineer", "requested by AMEC/Engineer", and similar phrases.
- D. Approve: The term "approved", where used in conjunction with AMEC/Engineer's action on the Contractor's submittals, applications, and requests, is limited to AMEC/Engineer's duties and responsibilities as stated in the Conditions of the Contract.
- E. Regulation: The term "regulations" includes laws, ordinances, statutes, and lawful orders issued by authorities having jurisdiction, as well as rules, conventions, and agreements within the construction industry that control performance of the Work.
- F. Furnish: The term "furnish" is used to mean "supply and deliver to the Project site, ready for unloading, unpacking, assembly, installation, and similar operations."
- G. Install: The term "install" is used to describe operations at project site including the actual "unloading, unpacking, assembly, erection, placing, anchoring, applying, working to dimension, finishing, curing, protecting, cleaning, and similar operations."
- H. Provide: The term "provide" means "to furnish and install, complete and ready for the intended use."
- I. Installer: An "Installer" is the Contractor or an entity engaged by the Contractor, either as an employee, subcontractor, or contractor of lower tier for performance of a particular construction activity, including installation, erection, application, and similar operations. Installers are required to be experienced in the operations they are engaged to perform.
1. The term "experienced", when used with the term "Installer", means having a minimum of five previous projects similar in size and scope to

this Project, being familiar with the special requirements indicated, and having complied with requirements of the authority having jurisdiction.

2. Trades: Use of titles such as "carpentry" is not intended to imply that certain construction activities must be performed by accredited or unionized individuals of a corresponding generic name, such as "carpenter". It also does not imply that requirements specified apply exclusively to tradespersons of the corresponding general name.
3. Assignment of Specialists: Certain Sections of the Specifications require that specific construction activities shall be performed by specialists who are recognized experts in the operations to be performed. The specialists must be engaged for those activities, and assignments are requirements over which the Contractor has no choice or option. Nevertheless, the ultimate responsibility for fulfilling Contract requirements remains with the Contractor.
 - a. This requirement shall not be interpreted to conflict with enforcement of building codes and similar regulations governing the Work. It is also not intended to interfere with local trade union jurisdictional settlements and similar conventions.

- J. Project Site is the space available to the contractor for performance of construction activities, either exclusively or in conjunction with others performing other work as part of the Project. The extent of the Project site is shown on the Drawings and may or may not be identical with the description of the land on which the Project is to be built.
- K. Testing Laboratories: A "testing laboratory" is an independent entity engaged to perform specific inspections or tests, either at the Project Site or elsewhere, and to report on and, if required, to interpret results of those inspection or tests.

1.3 SPECIFICATION FORMAT AND CONTENT EXPLANATION

- A. Specification Format: These Specifications are organized into Divisions and Sections based on the Construction Specifications Institute's 16-Division format and MASTER FORMAT numbering system.
- B. Specification Content: This specification uses certain conventions in the use of language and the intended meaning of certain terms, words, and phrases when used in particular situations or circumstances. These conventions are explained as follows:
 1. Abbreviated Language: Language used in Specifications and other Contract Documents is the abbreviated type. Words and meanings shall be interpreted as appropriate. Words that are implied, but not stated shall be interpolated as the sense required. Singular words will be interpreted as plural and plural words interpreted as singular where applicable and the context of the Contract Documents so indicates.
 2. Imperative and streamlined language is used generally in the Specifications. Requirements expressed in the imperative mood are to be performed by the Contractor. At certain locations in the text, for clarity, subjective language is used to describe responsibilities that must be fulfilled indirectly by the Contractor, or by others when so noted.

- a. The words "shall be" shall be included by inference wherever a colon (:) is used within a sentence or phrase.

1.4 INDUSTRY STANDARDS

- A. **Applicability of Standards:** Except where the Contract Documents include more stringent requirements, applicable construction industry standards have the same force and effect as if bound or copied directly into the Contract Documents to the extent referenced. Such standards are made a part of the Contract Documents by reference.
- B. **Publication Dates:** Comply with the standard in effect as of the date of the Contract Documents.
- C. **Conflicting Requirements:** Where compliance with two or more standards is specified, and the standards may establish different or conflicting requirements for minimum quantities or quality levels. Refer requirements that are different, but apparently equal, and uncertainties to Sustainability/Projects Director for a decision before proceeding.
 1. **Minimum Quantity or Quality Levels:** The quantity or quality level shown or specified shall be the minimum provided or performed. The actual installation may comply exactly with the minimum quantity or quality specified, or it may exceed the minimum within reasonable limits. In complying with these requirements, indicated numeric values are minimum or maximum, as appropriate for the context of the requirements. Refer uncertainties to AMEC/Engineer for a decision before proceeding.
- D. **Copies of Standards:** Each entity engaged in construction on the Project is required to be familiar with industry standards applicable to that entity's construction activity. Copies of applicable standards are not bound with the Contract Documents.
 1. Where copies of standards are needed for performance of a required construction activity, the Contractor shall obtain copies directly from the publications source.
- E. **Abbreviations and Names:** Trade association names and titles of general standards are frequently abbreviated. Where such acronyms or abbreviations are used in the Specifications or other Contract Documents, they mean the recognized name of the trade association, standards generating organization, authority having jurisdiction, or other entity applicable to the context of the text provision. Refer to the "Encyclopedia of Associations", published by Gale Research Co., available in most libraries.
- F. **Abbreviations and Names:** Trade association names and titles of general standards are frequently abbreviated. The following abbreviations and acronyms, as referenced in the Contract Documents, mean the associated names. Names and addresses are subject to change and are believed, but are not assured, to be accurate and up-to-date as of the date of the Contract Documents.

 - 1. Refer to the General Conditions for terms of the Contractor's period for correction of the Work.
- B. Related Sections: Not Applicable
- C. Disclaimers and Limitations: Manufacturer's disclaimers and limitations on product warranties do not relieve the Contractor or the warranty on the Work that incorporates the products. Manufacturer's disclaimers and limitations on product warranties do not relieve suppliers, manufacturers, and subcontractors required to countersign special warranties with the Contractor.
- D. Separate Prime Contracts: Each prime contractor is responsible for warranties related to its own contract.

1.3 DEFINITIONS

- A. Standard products warranties are preprinted written warranties published by individual manufacturers for particular products and are specifically endorsed by the manufacturer to the Owner.

To that end, the administrator may, by way of enumeration and not by way of limitation, have the following specific powers and duties to:

(a) Administer and carry out the directives and policies of the board of county commissioners and enforce all orders, resolutions, ordinances, and regulations of the board to assure that they are faithfully executed.

(b) Report to the board on action taken pursuant to any directive or policy within the time set by the board and provide an annual report to the board on the state of the county, the work of the previous year, and any recommendations as to actions or programs the administrator deems necessary for the improvement of the county and the welfare of its residents.

(c) Provide the board, or individual members thereof, upon request, with data or information concerning county government and to provide advice and recommendations on county government operations to the board.

(d) Prepare and submit to the board of county commissioners for its consideration and adoption an annual operating budget, a capital budget, and a capital program.

 - (o) Order, upon advising the board, any agency under the administrator's jurisdiction as specified in the administrative code to undertake any task for any other agency on a temporary basis if he or she deems it necessary for the proper and efficient administration of the county government to do so.

 - (q) Perform such other duties as may be required by the board of county commissioners.

Change is inevitable, and how each individual and organization responds to it defines its strength and resiliency. With the recent retirements of Dent and Debbie, and the upcoming departure of Connie – it is time to modify our organizational and managerial structure. You are receiving this e-mail because you are one of the leaders of Monroe County government and have accepted the responsibility of leading us into the future – thank you!

Attached is a new Table of Organization (Organizational Chart). The chart demonstrates the County's new structure and reporting order. In the interest of streamlining operations, the County will no longer have a Deputy County Administrator, Division Directors or a Public Works Director. We are eliminating those layers of our operations, and added two (2) Assistant County Administrators to which I have appointed Christine Hurley and Kevin Wilson. I'm confident this new structure will allow us to continue moving Monroe County in the right direction. These changes will also result in an annual decrease of over \$200,000 in managerial oversight costs.

All Department Heads and Managers (shown on the attached plan) should plan on attending Senior Management Team meetings (previously known as Division Director Meetings) on most Thursday mornings beginning at 9:30 am (Schedule attached). The meetings will now be called the Senior Management Team meeting. Order of business will include a "whip around" discussion of each department's recent activities for the first hour or so and then the normal discussion of the BOCC agenda items. Some of you may or may not need to attend the discussion of agenda items. Your County Administrator or Assistant County Administrator will make that decision and discuss it with you. Attendance via PolyCom is encouraged - currently PolyCom systems are available in Key Largo, Marathon, and Key West.

The legal department will be handling all BOCC agenda item submittals, publishing of the BOCC agendas, etc. beginning with agenda item submittals due June 30, 2015. Please submit your items to Katherine Peters.

Lindsey Ballard will be replacing Connie, therefore the monthly accomplishments for compilation of the County Administrator's Report to the BOCC, should be sent to Lindsey Ballard.

Further, if you have not already done so, please make sure you fill out, sign and process the attached "Monroe County Purchasing Authorization Form." Department Heads are authorized to sign up to \$5,000. Once this form is processed, the County Administrator's office will no longer need to approve purchases for less than \$5000. Tina Boan is working on an amendment to the Purchasing Authority to reflect the new organizational chart that will be reviewed and approved by the BOCC. Once that is completed, purchasing limits may be increased for Department Heads.

F. Purchasing Authority:

Purchasing Authority is defined as signature verification of original invoicing for receipt of the ordered goods or services for payment by Purchase Order, Audit Slip, or other fiscal documents. Unless specifically authorized by ordinance, all contracts, however titled - Memorandum of Agreement, Agreement, Memorandum of Understanding, Contract etc. - shall be approved by the Board of County Commissioners.

- In order to ensure proper fiscal control, purchasing authority shall be limited to the County Administrator, Deputy County Administrator, Purchasing Director, Division Directors, and Department Director, unless a designee is approved and authorized by the County Administrator or Deputy County Administrator. The County Administrator and Deputy County Administrator shall have authority to sign requests to purchase up to \$49,999.99. The Purchasing Director and Division Directors shall sign off on all purchase orders and shall have authority to sign purchase orders up to \$25,000 without the Administrator or Deputy Administrator signatures.

AGENDA ITEM WORDING: Approval to advertise a *Request for Proposals* for installing an *in situ muck aeration system* in Canal #48 in Key Largo, or an alternate location if needed, and providing a 2-year period of operations and maintenance.

ITEM BACKGROUND: This Canal #48 *in situ muck aeration installation* project is the first project to be conducted after the initial set of the *Canal Restoration Demonstration Projects*, and is designed to evaluate the cost and effectiveness of utilizing an *in situ aeration technology* which introduces oxygen to stimulate bacteria and other organisms to degrade the accumulated muck. The presence of the muck has depleted the dissolved oxygen levels in the canal waters and the removal of the muck and addition of oxygen will help to restore the canal waters to State Department of Environmental Protection Dissolved Oxygen standards. Canal #48 in Key Largo on Sound Drive was selected utilizing the *Canal Management Master Plan* ranking criteria.

If an access agreement for equipment cannot be obtained, alternative canals include #84 Rock Harbor, #349 Cudjoe, or #345 Cudjoe.

The traditional methods of reducing the amount of accumulated muck require the removal of the material and are expensive and disruptive of the use of the canal. The County wants to test alternative methods that may be far cheaper for the muck removal process. Operations and maintenance includes maintenance of the equipment and payment of the monthly electrical costs to operate the equipment for a period of two years.

This project will be the new sixth demonstration canal project to be solicited. This canal is among the worst as to water quality in the entire County. AMEC will complete the design and specifications, the County will apply for the environmental permit applications.

Purpose and Need

Purpose and Need

The purpose of this project is to address safety conditions pertaining to structural and functional deficiencies associated with the majority of the twenty-three Florida Keys Historic Bridges through repair/rehabilitation and/or removal options. Over the years, the historic bridges have deteriorated to various states of disrepair. The bridges now pose safety issues for both trail users and boaters, as well as environmental hazards. In addition, the bridges were built to standards that do not meet current state requirements, thereby categorizing them as "Functionally Obsolete". The Project Development and Environment (PD&E) Study will further examine improvement options, costs, and funding sources to address the deficiencies of the twenty-three bridges. The PD&E Study will also evaluate 1) retrofitting the Florida Keys Historic Bridges (without existing trail) to scenic overlooks, as well as 2) the potential reconnection (through the addition of a new structural component to fill the existing span gap) of the historic South Pine Channel Bridge, to allow for the completion of the Florida Department of Environmental Protection's (FDEP) Florida Keys Overseas Heritage Trail. It should be noted that four of the twenty-three historic bridges [Niles Channel Bridge, Bahia Honda Bridge, Seven Mile Bridge, and Channel #5 Bridge] contain span gaps or navigational breaks in order to meet United States Coast Guard (USCG) 40' and 65' vertical clearance navigational requirements as they traverse USCG designated navigable waterways. Inclusion of a trail facility on these four bridges will be evaluated through a separate study due to the challenges associated with building new bridge structural components to USCG navigational standards. The need for the project is based on the following primary and secondary criteria:

PRIMARY CRITERIA

STRUCTURAL AND FUNCTIONAL DEFICIENCIES

Based on Bridge Inspection Reports conducted in 2012 - 2013 by FDEP and a review of the Bridge Inspection Reports conducted in 2013 by FDOT, the twenty-three Florida Keys Historic Bridges have been determined to be "Structurally Deficient" [defined as bridge elements that are found to be in poor condition or worse].

While the overall condition of the substructure of the twenty-one concrete spandrel arch bridges is satisfactory [receiving a National Bridge Inventory (NBI) General Condition Rating (GCR) of 6 (with 0 as failed condition and 9 as excellent condition)], the overall condition of the superstructure (deck slab overhangs and transverse steel I-beams) of each bridge ranges from fair to imminent failure [with NBI GCRs of 5 or lower] categorizing the superstructure as Structurally Deficient. The deck slab overhangs on numerous bridges have deteriorated so badly that portions of the overhangs are threatening to collapse into the water (the Niles Channel Bridge has already experienced this in 2011). Of major concern are the concrete spalls on the underside of the deck slab overhangs, exposing a significant amount of corroded reinforcing steel. Likewise, several of the transverse steel I-beams have deteriorated to a point where they are beyond reasonable repair; failure of the steel I-beams is imminent. Generally, the transverse steel I-beams remain present on bridges that have had the deck slab overhangs removed. The exposed steel I-beams show evidence of corrosion, and severe rust stains are present where the beams meet the face of the concrete spandrel arches (substructure). Corrosion and rust is additionally

evident at locations where the transverse steel I-beams have been cut back to reflect the original 13-foot width of the bridges. Further, five of the bridges still have an abandoned utility pipe attached to the side of the concrete spandrel arches. The pipe and pipe supports are in very poor condition. Even where the utility pipe has been removed, corroded pipe supports remain.

The substructures of both the Bahia Honda Bridge and Seven Mile Bridge range from satisfactory to poor condition. However, the steel truss and steel girder superstructure sections of the Bahia Honda Bridge range from imminent failure to failed condition [with NBI GCRs of 1 or 0]. Similarly, the deck slab overhangs and steel girder superstructure segment of the Seven Mile Bridge range from imminent failure to failed condition [with NBI GCRs of 1 or 0].

It should also be noted that the handrails along the bridges are currently substandard as they do not meet the minimum FDOT height requirement of 42" for pedestrian and bicycle railings. This substandard element poses a concern related to trail user safety along the bridges and, thereby, categorizes the bridges as "Functionally Obsolete".

The primary focus of this project is to address the integrity issues of the bridge structures in order to improve safety conditions for trail users and boaters. Bridge closures (and hence closure of the Florida Keys Overseas Heritage Trail) have already occurred due to public safety concerns. Signs warning boaters of falling debris have additionally been placed at various bridge locations. The proposed bridge improvements (repair/rehabilitation versus removal of deteriorating cantilevered road deck) are specifically intended to:

- Prevent the collapse of the deck slab overhangs and transverse steel I-beams (and, hence, falling debris into the surrounding sensitive environment);
- Remove corroded steel within the concrete spandrel arches to promote long term rehabilitation of the substructure and prevent further concrete substructure spalling;
- Address the functionally obsolete handrails of the bridges as they do not comply with current FDOT design standards; and
- Enhance the overall aesthetics of the bridges by addressing corroded, cracking, and deteriorating bridge elements.

SECONDARY CRITERIA

NATURAL RESOURCES

Another need for the project is to reduce adverse impacts to the highly sensitive surrounding natural environment and associated resources (protected waters, habitats, and species) as a result of falling debris from the deteriorating cantilevered road deck of the bridges.

The bridges span the Florida Keys National Marine Sanctuary which encompasses the Florida Keys, federal refuges (e.g., Key Deer National Wildlife Refuge), state parks (e.g., Bahia Honda and Long Key), and FDEP designated aquatic preserves (e.g., Coupon Bight Aquatic Preserve at Big Pine Key). The Florida Keys National Marine Sanctuary is classified as Special Waters Outstanding Florida Waters, and the entire sanctuary is considered a Habitat Area of Particular Concern due to its important ecological role in the life cycles of federally managed fish species. Accordingly, submerged aquatic vegetation (seagrass), mangrove swamp habitat, coral and coral reefs, live/hard bottom, and sand/mud bottom found within the sanctuary serve as Essential Fish Habitat for several federally-managed fish species and their prey. The Florida Keys National Marine Sanctuary further provides important and/or critical habitat for a number of listed species such as the West Indian manatee, various species of sea turtles, the American crocodile, and elkhorn and staghorn corals. It should additionally be noted that the bridges span Bahia Honda State Park, also classified as Other Outstanding Florida Waters, and several Verified Impaired Florida Waters.

As indicated through the above-identified features, the habitats and waters surrounding the bridges are highly protected. The proposed bridge improvements are intended to provide a holistic approach to addressing the falling debris of the deteriorating bridge elements, thereby reducing potential adverse impacts (and more so cumulative adverse effects) to surrounding wildlife, habitat, and water resources. The FDOT and FDEP are interested in seeking blanket biological opinions from resource agencies in order to address concerns regarding the issuance of permits as well as associated mitigation strategies as a result of improvements in a comprehensive manner.

RECREATIONAL USE

While the twenty-three historic bridges currently serve as part of the Florida Keys Overseas Heritage Trail, the trail facility is incomplete. Completion of the trail over the last several years has been a challenge due to the deteriorating condition of the superstructure of each bridge, particularly as portions of the deck slab overhangs on numerous bridges have collapsed or are threatening to collapse into the water. For this reason, some of the bridges or spans of the bridges have been converted to fishing piers or have been closed for public access.

The Florida Keys Overseas Heritage Trail Master Plan (completed in 2000) was prepared by Monroe County in partnership with FDEP, FDOT, and the National Park Service to fulfill the expressed vision by Monroe County citizens to have a continuous trail along US Highway 1 spanning the length of the Florida Keys in order to 1) enhance community recreational opportunities, 2) provide safe non-motorized transportation to schools and businesses, and 3) enable residents and visitors to enjoy natural resources along US Highway 1 (such as federal refuges and state parks). As such, completion of the Florida Keys Overseas Heritage Trail is a top priority for citizens of the area, Monroe County, FDEP, and other project stakeholders. The project is intended to:

- Reinstate the use of the historic bridges for recreational purposes by allowing for the completion of the trail;
- Meet goals of the Florida Keys Overseas Heritage Trail Master Plan and several other local plans; and
- Enhance recreational opportunities for both trail users and boaters by addressing the integrity issues of the bridge structures to improve safety conditions.

Once repair/rehabilitation and/or removal options have been analyzed to address the deteriorating bridge elements, improvements intended to allow for the incorporation of a future trail facility on the historic bridges to complete the Florida Keys Overseas Heritage Trail [i.e., retrofitting the Florida Keys Historic Bridges (without existing trail) to scenic overlooks and reconnecting the historic South Pine Channel Bridge to fill the existing span gap] will be evaluated as part of the PD&E Study.

Project Description

This project will address safety conditions due to structural and functional deficiencies associated with the majority of the twenty-three Florida Keys Historic Bridges through repair/rehabilitation and/or removal options. Once repair/rehabilitation and/or removal options have been analyzed to address the deteriorating bridge elements, the project will also evaluate 1) retrofitting the Florida Keys Historic Bridges (without existing trail) to scenic overlooks, as well as 2) the potential reconnection (through the addition of a new structural component to fill the existing span gap) of the historic South Pine Channel Bridge. These improvements are ultimately intended to allow for the incorporation of a future trail facility on the historic bridges to complete the Florida Department of Environmental Protection's (FDEP) Florida Keys Overseas Heritage Trail, a shared-use path supporting recreational activities. It should be noted that four of the twenty-three historic bridges [Niles Channel Bridge, Bahia Honda Bridge, Seven Mile Bridge, and Channel #5 Bridge] contain span gaps or navigational breaks in order to meet United States Coast Guard (USCG) 40' and 65' vertical clearance navigational requirements as they traverse USCG designated navigable waterways. Inclusion of a trail facility on these four bridges will be evaluated through a separate study due to the challenges associated with building new bridge structural components to USCG navigational standards.

The twenty-three Florida Keys Historic Bridges span approximately 63 miles in Monroe County extending from East Rockland Key at Rockland Channel Bridge (Mile Marker 9.8), the southernmost historic bridge, to Lower Matecumbe Key at Channel #2 Bridge (Mile Marker 73.0), the northernmost historic bridge. The twenty-three bridges are a subset of forty-two bridges originally constructed as part of the Overseas Railroad, completed in 1912. The bridges are considered property of the FDEP's Division of State Lands Board of Trustees of the Internal Improvement Trust Fund as they serve as part of the FDEP's Florida Keys Overseas Heritage Trail. The bridges do not fall within Florida Department of Transportation (FDOT) right-of-way.

The bridges are additionally a component of the Florida Keys Scenic Highway corridor and parallel existing US Highway 1, which connects the islands of the Florida Keys to the mainland. While the twenty-three historic bridges are not included on Florida's Strategic Intermodal System (SIS) network, they span or are in proximity to a designated SIS facility (Atlantic Intracoastal Waterway).

An ETDM Programming Screen is being conducted for this project by the FDOT in cooperation with the FDEP. Although, FDOT is leading the ETDM screening event, FDEP is serving as the lead agency on the project. FDOT and FDEP, in coordination with other state and federal agencies, will review the twenty-three bridges as a single resource (and, therefore, as one project) in order to facilitate a more holistic approach in addressing the bridge deficiencies. As such, the range of improvement options, costs, and funding sources to address the deficiencies of the bridges will be explored in detail and refined during the Project Development and Environment (PD&E) Study. Use of the bridges for recreational purposes will also be considered during the PD&E Study. Information resulting from the ETDM screening event is intended to inform the scope and cost of the PD&E Study. Currently, FDEP plans to seek state funding to conduct the PD&E Study through a Legislative Budget Request in January 2016. While other potential sources to fund remaining project phases are unknown at this time, the project will maintain eligibility to receive future state and federal funding.

BACKGROUND

The twenty-three historic bridges were constructed in the early 1900s as part of the Key West Extension of the Florida East Coast Railway (also known as the Overseas Railroad). All of the historic bridges, with the exception of the Bahia Honda Bridge and the majority of the Seven Mile Bridge, are of concrete spandrel arch construction. The Bahia Honda Bridge and a portion of the Seven Mile Bridge consist of steel trusses and steel plate girders, respectively. While each historic bridge varies in length, all were originally built to a standard width of 13 feet.

In the late 1930s/early 1940s, the Overseas Railroad was converted to the Overseas Highway. As such, the 13-foot wide railroad bridges were widened to 27 feet (out-to-out) or 22 feet (curb-to-curb) to accommodate two vehicular travel lanes and railings, doubling the width of the traffic bed. Transverse steel I-beams, spaced 10 feet apart, were laid across the width of the concrete spandrel arch railroad bridges to cantilever over the sides. These beams supported concrete overhang slabs and railings constructed from old Florida East Coast Railway track. A similar deck was constructed over the steel plate girders of the Seven Mile Bridge and on top of the steel trusses of the Bahia Honda Bridge.

In the early 1980s, the historic bridges were decommissioned to vehicular traffic as new, parallel vehicular bridges were constructed by the FDOT as part of US Highway 1. The twenty-three historic bridges that remain are listed on the National Register of Historic Places.

Currently, the bridges exist in various conditions as a result of rehabilitation projects over the years. Based on Bridge Inspection Reports conducted in 2012 - 2013 by FDEP and a review of the Bridge Inspection Reports conducted in 2013 by FDOT, a total of fourteen bridges still have overhangs; four of these fourteen bridges [Ohio-Missouri Bridge, Ohio-Bahia Honda Bridge, Missouri-Little Duck Bridge, and Lower Sugarloaf Bridge] have been prioritized for immediate attention as the overhangs are in imminent failure condition. Accordingly, the deck slab overhangs have been entirely

removed from seven of the bridges and partially removed from the Seven Mile Bridge. Some of the bridges have been rehabilitated in an attempt to preserve their historic character, keeping the corroded deck slab overhangs and transverse steel I-beams intact. In some cases, the rehabilitation method involved adding Carbon Fiber Reinforced Polymer (CFRP) / Near Surface Reinforcement along the top surface of the center deck slab, continuous into the overhang slabs, to prevent the overhang slabs from collapsing. In addition, at least one bridge had additional steel braces added to support the deck slab overhangs. Further, some of the bridges or spans of the bridges have been converted to fishing piers, or spans of some bridges have been removed to allow channel breaks for navigational purposes.

It should be noted that while the twenty-three historic bridges serve as part of the Florida Keys Overseas Heritage Trail, the trail facility is currently incomplete. In 2000, Monroe County (in partnership with FDEP, FDOT, and the National Park Service) prepared the Florida Keys Overseas Heritage Trail Master Plan to fulfill the expressed vision by Monroe County citizens to have a continuous trail along US Highway 1 spanning the length of the Florida Keys in order to 1) enhance community recreational opportunities, 2) provide safe non-motorized transportation to schools and businesses, and 3) enable residents and visitors to enjoy natural resources along US Highway 1. As such, completion of the Florida Keys Overseas Heritage Trail is a top priority for citizens of the area, Monroe County, FDEP, and other project stakeholders. Once work to repair/rehabilitate and/or remove deteriorating bridge elements has been performed, improvements intended to allow for the incorporation of a future trail facility on the historic bridges (to complete the Florida Keys Overseas Heritage Trail) will be evaluated as part of the PD&E Study.

ATTACHMENT 1: Bridge Inventory in the EST presents the existing conditions, repairs that have been performed to date, and potential improvements proposed for each bridge.

PROJECT SET-UP

Due to the fact that the twenty-three historic bridges [presented as twenty-three individual feature segments in the Environmental Screening Tool (EST)] will be reviewed as a single resource, one ETDM Project has been established in the EST. However, for management and reporting purposes of EST data, the twenty-three bridges have been divided into three geographic clusters. Each cluster of bridges corresponds to an EST alternative. The three clusters (or EST alternatives) are defined below.

Alternative 1- East Rockland Key to Big Pine Key

The twelve bridges that compose Cluster 1 or Alternative 1, the southernmost historic bridges extending from East Rockland Key (south) to Big Pine Key (north), include:

- Rockland Channel Bridge (Feature 1)
- Shark Channel Bridge (Feature 2)
- Saddlebunch #5 Bridge (Feature 3)
- Saddlebunch #4 Bridge (Feature 4)
- Saddlebunch #3 Bridge (Feature 5)
- Saddlebunch #2 Bridge (Feature 6)
- Lower Sugarloaf Bridge (Feature 7)
- Park Channel Bridge (Feature 8)
- Bow Channel Bridge (Feature 9)
- Kemp Channel Bridge (Feature 10)
- Niles Channel Bridge (Feature 11)
- South Pine Channel Bridge (Feature 12)

Alternative 2- Big Pine Key to Marathon

The six bridges that compose Cluster 2 or Alternative 2, the more central historic bridges extending from Big Pine Key (south) to Marathon (north), include:

- Spanish Harbor Bridge (Feature 13)
- Bahia Honda Bridge (Feature 14)
- Ohio-Bahia Honda Bridge (Feature 15)
- Ohio-Missouri Bridge (Feature 16)
- Missouri-Little Duck Bridge (Feature 17)
- Seven Mile Bridge (Feature 18)

Alternative 3- Marathon to Lower Matecumbe Key

The five bridges that compose Cluster 3 or Alternative 3, the northernmost historic bridges extending from Marathon (south) to Lower Matecumbe Key (north), include:

- Toms Harbor Channel Bridge (Feature 19)
- Toms Harbor Cut Bridge (Feature 20)
- Long Key Bridge (Feature 21)
- Channel #5 Bridge (Feature 22)
- Channel #2 Bridge (Feature 23)

TRANSPORTATION PLAN CONSISTENCY

While existing US Highway 1 bridge improvements and projects to retrofit various Florida Keys Historic Bridges to include segments of the Florida Keys Overseas Heritage Trail are identified in the FY 2016 - FY 2020 FDOT Work Program, the State Transportation Improvement Program (STIP), and the Monroe County Comprehensive Plan 2010-2030 Update, uniform enhancements to address the structural and functional deficiencies of the twenty-three historic bridges are not reflected in the referenced plans.

Several local plans [including the Lower Keys Livable Communikeys Plan, US-1 Corridor Enhancement Plan, Florida Scenic Highway Interpretive Master Plan and Corridor Management Plan, Monroe County Bicycle and Pedestrian Plan, and the Florida Keys Overseas Heritage Trail (FKOHT) Master Plan] currently classify the completion of the Florida Keys Overseas Heritage Trail (extending from Mile Marker 0 to Mile Marker 106.5 using the twenty-three historic bridges) as a priority project. However, the FKOHT Master Plan also recommends the removal of the deck slab overhangs from all bridges where overhangs remain with the exception of two bridges. The Bow Channel Bridge and the Ohio-Missouri Bridge are proposed to be maintained to reflect the historical character of the old Overseas Highway. The Seven Mile Bridge and Bahia Honda Bridge are additionally recommended to be preserved.

Once the scope for the Florida Keys Historic Bridges PD&E Study is complete, FDOT will work to modify the FDOT Work Program and STIP to ensure the identified bridge improvements are included in these above-referenced documents. These two documents will additionally be updated to reflect funding required for future project phases (Design and Construction) based upon the refined improvements, costs, and funding sources determined as a result of the PD&E Study. FDOT and FDEP will also coordinate with Monroe County, and the various municipalities along the project corridor, to ensure that the Florida Keys Historic Bridges project is consistent with the respective local comprehensive plans.

AGENDA ITEM WORDING: Approval of a resolution expressing support of the Monroe County Board of County Commissioners for HB 1223 and SB 1544 that will enact State-level coordination of efforts and activities being taken around the State to prepare for and respond to impacts related to extreme weather and climate change including flooding, drought, storm surge, high tides, tropical-storm winds, extreme heat, and saltwater intrusion of drinking-water aquifers.

ITEM BACKGROUND:

This legislation is intended to encourage the State and state agencies to strengthen and support the activities taking place in Southeast Florida and elsewhere in the state to prepare for and respond to impacts related to extreme weather and climate change.

The legislation defines "weather events" as including but not limited to extreme heat, drought, wildfire, sea-level change, high tides, storm surge, saltwater intrusion, storm water runoff, flash floods, inland flooding and coastal flooding.

It calls for the creation of an interagency workgroup of the heads for agencies including FWC, Water Management Districts, and Emergency Management to share information and coordinate state efforts to address weather impacts and assess the relevance, level and significance fo current agency efforts to address the impacts of weather events. It will produce an annual report to the Governor and Legislature, assessing the various efforts underway around the State, and creating a uniform vulnerability assessment to help identify and evaluate currently unaddressed impacts.

Attached is a resolution expressing support for the weather-related impacts legislation and a copy of the HB 1223. The Senate bill is identical.

AGENDA ITEM SUMMARY**

AGENDA ITEM WORDING: Discussion and direction regarding formation and implementation of a County public-private partnership policy, procedures, and guidelines consistent with F.S. 287.05712.

ITEM BACKGROUND: In 2013, the Florida Legislature enacted Chapter 2013-223, Laws of Florida, Section 2 which was codified at F.S. 287.05712, entitled "Public - private partnerships" (the "P3 Statute"). The P3 Statute was designed to provide local governments with new and alternative options to finance, deliver, develop, construct, improve, renovate, expand, equip, install, maintain, operate, and manage public projects, buildings, facilities, and infrastructure through public-private partnership agreements ("P3") formed between the public governing body and private-sector entities that allow for greater private sector participation in creating qualifying projects.

Monroe County has not developed its own policy, procedures, and guidelines to implement P3s. A P3 policy, procedures, and guidelines would provide a uniform structure to foster collaboration between Monroe County and private-sector entities for implementation of P3 qualifying projects for public use in the County. It would aim to improve execution of P3 initiatives and define the responsibilities and partnerships for the County and private-sector entities.

(1) Definitions.--As used in this section, the term:

(a) “Affected local jurisdiction” means a county, municipality, or special district in which all or a portion of a qualifying project is located.

(c) “Fees” means charges imposed by the private entity of a qualifying project for use of all or a portion of such qualifying project pursuant to a comprehensive agreement.

(d) “Lease payment” means any form of payment, including a land lease, by a public entity to the private entity of a qualifying project for the use of the project.

(e) “Material default” means a nonperformance of its duties by the private entity of a qualifying project which jeopardizes adequate service to the public from the project.

(h) “Proposal” means a plan for a qualifying project with detail beyond a conceptual level for which terms such as fixing costs, payment schedules, financing, deliverables, and project schedule are defined.

(i) “Qualifying project” means:

1. A facility or project that serves a public purpose, including, but not limited to, any ferry or mass transit facility, vehicle parking facility, airport or seaport facility, rail facility or project, fuel supply facility, oil or gas pipeline, medical or nursing care facility, recreational facility, sporting or cultural facility, or educational facility or other building or facility that is used or will be used by a public educational institution, or any other public facility or infrastructure that is used or will be used by the public at large or in support of an accepted public purpose or activity;

2. An improvement, including equipment, of a building that will be principally used by a public entity or the public at large or that supports a service delivery system in the public sector;

3. A water, wastewater, or surface water management facility or other related infrastructure; or

4. Notwithstanding any provision of this section, for projects that involve a facility owned or operated by the governing board of a county, district, or municipal hospital or health care system, or projects that involve a facility owned or operated by a municipal electric utility, only those projects that the governing board designates as qualifying projects pursuant to this section.

(l) “Service contract” means a contract between a public entity and the private entity which defines the terms of the services to be provided with respect to a qualifying project.

(2) Legislative findings and intent.--The Legislature finds that there is a public need for the construction or upgrade of facilities that are used predominantly for public purposes and that it is in the public's interest to provide for the construction or upgrade of such facilities.

(a) The Legislature also finds that:

1. There is a public need for timely and cost-effective acquisition, design, construction, improvement, renovation, expansion, equipping, maintenance, operation, implementation, or installation of projects serving a public purpose, including educational facilities, transportation facilities, water or wastewater management facilities and infrastructure, technology infrastructure, roads, highways, bridges, and other public infrastructure and government facilities within the state which serve a public need and purpose, and that such public need may not be wholly satisfied by existing procurement methods.

2. There are inadequate resources to develop new educational facilities, transportation facilities, water or wastewater management facilities and infrastructure, technology infrastructure, roads, highways, bridges, and other public infrastructure

and government facilities for the benefit of residents of this state, and that a public-private partnership has demonstrated that it can meet the needs by improving the schedule for delivery, lowering the cost, and providing other benefits to the public.

3. There may be state and federal tax incentives that promote partnerships between public and private entities to develop and operate qualifying projects.

4. A procurement under this section serves the public purpose of this section if such procurement facilitates the timely development or operation of a qualifying project.

(b) It is the intent of the Legislature to encourage investment in the state by private entities; to facilitate various bond financing mechanisms, private capital, and other funding sources for the development and operation of qualifying projects, including expansion and acceleration of such financing to meet the public need; and to provide the greatest possible flexibility to public and private entities contracting for the provision of public services.

(3) Public-private partnership guidelines task force.--

(a) There is created the Partnership for Public Facilities and Infrastructure Act Guidelines Task Force for the purpose of recommending guidelines for the Legislature to consider for purposes of creating a uniform process for establishing public-private partnerships, including the types of factors responsible public entities should review and consider when processing requests for public-private partnership projects pursuant to this section.

(b) The task force shall be composed of seven members, as follows:

1. The Secretary of Management Services or his or her designee, who shall serve as chair of the task force.

2. Six members appointed by the Governor, as follows:

a. One county government official.

b. One municipal government official.

c. One district school board member.

d. Three representatives of the business community.

(c) Task force members must be appointed by July 31, 2013. By August 31, 2013, the task force shall meet to establish procedures for the conduct of its business and to elect a vice chair. The task force shall meet at the call of the chair. A majority of the members of the task force constitutes a quorum, and a quorum is necessary for the purpose of voting on any action or recommendation of the task force. All meetings shall be held in Tallahassee, unless otherwise decided by the task force, and then no more than two such meetings may be held in other locations for the purpose of taking public testimony. Administrative and technical

support shall be provided by the department. Task force members shall serve without compensation and are not entitled to reimbursement for per diem or travel expenses.

(d) In reviewing public-private partnerships and developing recommendations, the task force must consider:

1. Opportunities for competition through public notice and the availability of representatives of the responsible public entity to meet with private entities considering a proposal.

2. Reasonable criteria for choosing among competing proposals.

3. Suggested timelines for selecting proposals and negotiating an interim or comprehensive agreement.

4. If an accelerated selection and review and documentation timelines should be considered for proposals involving a qualifying project that the responsible public entity deems a priority.

5. Procedures for financial review and analysis which, at a minimum, include a cost-benefit analysis, an assessment of opportunity cost, and consideration of the results of all studies and analyses related to the proposed qualifying project.

6. The adequacy of the information released when seeking competing proposals and providing for the enhancement of that information, if deemed necessary, to encourage competition.

7. Current exemptions from public records and public meetings requirements, if any changes to those exemptions are necessary, or if any new exemptions should be created in order to maintain the confidentiality of financial and proprietary information received as part of an unsolicited proposal.

8. Recommendations regarding the authority of the responsible public entity to engage the services of qualified professionals, which may include a Florida-registered professional or a certified public accountant, not otherwise employed by the responsible public entity, to provide an independent analysis regarding the specifics, advantages, disadvantages, and long-term and short-term costs of a request by a private entity for approval of a qualifying project, unless the governing body of the public entity determines that such analysis should be performed by employees of the public entity.

(e) The task force must submit a final report of its recommendations to the Governor, the President of the Senate, and the Speaker of the House of Representatives by July 1, 2014.

(f) The task force is terminated December 31, 2014. The establishment of guidelines pursuant to this section or the adoption of such guidelines by a responsible public entity is not required for such entity to request or receive proposals for a qualifying project or to enter into a comprehensive agreement for a qualifying project. A responsible public entity may adopt guidelines so long as such guidelines are not inconsistent with this section.

(4) Procurement procedures.--A responsible public entity may receive unsolicited proposals or may solicit proposals for qualifying projects and may thereafter enter into an agreement with a private entity, or a consortium of private entities, for the building, upgrading, operating, ownership, or financing of facilities.

(a) The responsible public entity may establish a reasonable application fee for the submission of an unsolicited proposal under this section. The fee must be sufficient to pay the costs of evaluating the proposal. The responsible public entity may engage the services of a private consultant to assist in the evaluation.

(b) The responsible public entity may request a proposal from private entities for a public-private project or, if the public entity receives an unsolicited proposal for a public-private project and the public entity intends to enter into a comprehensive agreement for the project described in such unsolicited proposal, the public entity shall publish notice in the Florida Administrative Register and a newspaper of general circulation at least once a week for 2 weeks stating that the public entity has received a proposal and will accept other proposals for the same project. The timeframe within which the public entity may accept other proposals shall be determined by the public entity on a project-by-project basis based upon the complexity of the project and the public benefit to be gained by allowing a longer or shorter period of time within which other proposals may be received; however, the timeframe for allowing other proposals must be at least 21 days, but no more than 120 days, after the initial date of publication. A copy of the notice must be mailed to each local government in the affected area.

(c) A responsible public entity that is a school board may enter into a comprehensive agreement only with the approval of the local governing body.

(d) Before approval, the responsible public entity must determine that the proposed project:

1. Is in the public's best interest.
2. Is for a facility that is owned by the responsible public entity or for a facility for which ownership will be conveyed to the responsible public entity.
3. Has adequate safeguards in place to ensure that additional costs or service disruptions are not imposed on the public in the event of material default or cancellation of the agreement by the responsible public entity.
4. Has adequate safeguards in place to ensure that the responsible public entity or private entity has the opportunity to add capacity to the proposed project or other facilities serving similar predominantly public purposes.
5. Will be owned by the responsible public entity upon completion or termination of the agreement and upon payment of the amounts financed.

(e) Before signing a comprehensive agreement, the responsible public entity must consider a reasonable finance plan that is consistent with subsection (11); the project cost; revenues by source; available financing; major assumptions; internal rate of return on private investments, if governmental funds are assumed in order to deliver a cost-feasible project; and a total cash-flow analysis beginning with the implementation of the project and extending for the term of the agreement.

(f) **In considering an unsolicited proposal**, the responsible public entity may require from the private entity a technical study prepared by a nationally recognized expert with experience in preparing analysis for bond rating agencies. In evaluating the technical study, the responsible public entity may rely upon internal staff reports prepared by personnel familiar with the operation of similar facilities or the advice of external advisors or consultants who have relevant experience.

(5) Project approval requirements.--An unsolicited proposal from a private entity for approval of a qualifying project must be accompanied by the following material and information, unless waived by the responsible public entity:

(a) A description of the qualifying project, including the conceptual design of the facilities or a conceptual plan for the provision of services, and a schedule for the initiation and completion of the qualifying project.

(b) A description of the method by which the private entity proposes to secure the necessary property interests that are required for the qualifying project.

(c) A description of the private entity's general plans for financing the qualifying project, including the sources of the private entity's funds and the identity of any dedicated revenue source or proposed debt or equity investment on behalf of the private entity.

(d) The name and address of a person who may be contacted for additional information concerning the proposal.

(e) The proposed user fees, lease payments, or other service payments over the term of a comprehensive agreement, and the methodology for and circumstances that would allow changes to the user fees, lease payments, and other service payments over time.

(f) Additional material or information that the responsible public entity reasonably requests.

(6) Project qualification and process.--

(a) The private entity must meet the minimum standards contained in the responsible public entity's guidelines for qualifying professional services and contracts for traditional procurement projects.

(b) The responsible public entity must:

1. Ensure that provision is made for the private entity's performance and payment of subcontractors, including, but not limited to, surety bonds, letters of credit, parent company guarantees, and lender and equity partner guarantees. For the components of the qualifying project which involve construction performance and payment, bonds are required and are subject to the recordation, notice, suit limitation, and other requirements of [s. 255.05](#).

2. Ensure the most efficient pricing of the security package that provides for the performance and payment of subcontractors.

3. Ensure that provision is made for the transfer of the private entity's obligations if the comprehensive agreement is terminated or a material default occurs.

(c) After the public notification period has expired in the case of an unsolicited proposal, the responsible public entity shall rank the proposals received in order of preference. In ranking the proposals, the responsible public entity may consider factors that include, but are not limited to, professional qualifications, general business terms, innovative design techniques or cost-reduction terms, and finance plans. The responsible public entity may then begin negotiations for a comprehensive agreement with the highest-ranked firm. If the responsible public entity is not satisfied with the results of the negotiations, the responsible public entity may terminate negotiations with the proposer and negotiate with the second-ranked or subsequent-ranked firms, in the order consistent with this procedure. If only one proposal is received, the responsible public entity may negotiate in good faith, and if the public entity is not satisfied with the results of the negotiations, the public entity may terminate negotiations with the proposer. Notwithstanding this paragraph, the responsible public entity may reject all proposals at any point in the process until a contract with the proposer is executed.

(d) The responsible public entity shall perform an independent analysis of the proposed public-private partnership which demonstrates the cost-effectiveness and overall public benefit before the procurement process is initiated or before the contract is awarded.

(e) The responsible public entity may approve the development or operation of an educational facility, a transportation facility, a water or wastewater management facility or related infrastructure, a technology infrastructure or other public infrastructure, or a government facility needed by the responsible public entity as a qualifying project, or the design or equipping of a qualifying project that is developed or operated, if:

1. There is a public need for or benefit derived from a project of the type that the private entity proposes as the qualifying project.
2. The estimated cost of the qualifying project is reasonable in relation to similar facilities.
3. The private entity's plans will result in the timely acquisition, design, construction, improvement, renovation, expansion, equipping, maintenance, or operation of the qualifying project.

(f) The responsible public entity may charge a reasonable fee to cover the costs of processing, reviewing, and evaluating the request, including, but not limited to, reasonable attorney fees and fees for financial and technical advisors or consultants and for other necessary advisors or consultants.

(g) Upon approval of a qualifying project, the responsible public entity shall establish a date for the commencement of activities related to the qualifying project. The responsible public entity may extend the commencement date.

(h) Approval of a qualifying project by the responsible public entity is subject to entering into a comprehensive agreement with the private entity.

(7) Notice to affected local jurisdictions.--

(a) The responsible public entity must notify each affected local jurisdiction by furnishing a copy of the proposal to each affected local jurisdiction when considering a proposal for a qualifying project.

(b) Each affected local jurisdiction that is not a responsible public entity for the respective qualifying project may, within 60 days after receiving the notice, submit in writing any comments to the responsible public entity and indicate whether the facility is incompatible with the local comprehensive plan, the local infrastructure development plan, the capital improvements budget, any development of regional impact processes or timelines, or other governmental spending plan. The responsible public entity shall consider the comments of the affected local jurisdiction before entering into a comprehensive agreement with a private entity. If an affected local jurisdiction fails to respond to the responsible public entity within the time provided in this paragraph, the nonresponse is deemed an acknowledgment by the affected local jurisdiction that the qualifying project is compatible with the local comprehensive plan, the local infrastructure development plan, the capital improvements budget, or other governmental spending plan.

(8) Interim agreement.--Before or in connection with the negotiation of a comprehensive agreement, the public entity may enter into an interim agreement with the private entity proposing the development or operation of the qualifying project. An interim agreement does not obligate the responsible public entity to enter into a comprehensive agreement. The interim agreement is discretionary with the parties and is not required on a qualifying project for which the parties may proceed directly to a comprehensive agreement without the need for an interim agreement. An interim agreement must be limited to provisions that:

(a) Authorize the private entity to commence activities for which it may be compensated related to the proposed qualifying project, including, but not limited to, project planning and development, design, environmental analysis and mitigation, survey, other activities concerning any part of the proposed qualifying project, and ascertaining the availability of financing for the proposed facility or facilities.

(b) Establish the process and timing of the negotiation of the comprehensive agreement.

(c) Contain such other provisions related to an aspect of the development or operation of a qualifying project that the responsible public entity and the private entity deem appropriate.

(9) Comprehensive agreement.--

(a) Before developing or operating the qualifying project, the private entity must enter into a comprehensive agreement with the responsible public entity. The comprehensive agreement must provide for:

1. Delivery of performance and payment bonds, letters of credit, or other security acceptable to the responsible public entity in connection with the development or operation of the qualifying project in the form and amount satisfactory to the responsible public entity. For the components of the qualifying project which involve construction, the form and amount of the bonds must comply with [s. 255.05](#).

2. Review of the design for the qualifying project by the responsible public entity and, if the design conforms to standards acceptable to the responsible public entity, the approval of the responsible public entity. This subparagraph does not require the private entity to complete the design of the qualifying project before the execution of the comprehensive agreement.

3. Inspection of the qualifying project by the responsible public entity to ensure that the private entity's activities are acceptable to the public entity in accordance with the comprehensive agreement.

4. Maintenance of a policy of public liability insurance, a copy of which must be filed with the responsible public entity and accompanied by proofs of coverage, or self-insurance, each in the form and amount satisfactory to the responsible public entity and reasonably sufficient to ensure coverage of tort liability to the public and employees and to enable the continued operation of the qualifying project.

5. Monitoring by the responsible public entity of the maintenance practices to be performed by the private entity to ensure that the qualifying project is properly maintained.

6. Periodic filing by the private entity of the appropriate financial statements that pertain to the qualifying project.

7. Procedures that govern the rights and responsibilities of the responsible public entity and the private entity in the course of the construction and operation of the qualifying project and in the event of the termination of the comprehensive agreement or a material default by the private entity. The procedures must include conditions that govern the assumption of the duties and responsibilities of the private entity by an entity that funded, in whole or part, the qualifying project or by the responsible public entity, and must provide for the transfer or purchase of property or other interests of the private entity by the responsible public entity.

8. Fees, lease payments, or service payments. In negotiating user fees, the fees must be the same for persons using the facility under like conditions and must not materially discourage use of the qualifying project. The execution of the comprehensive agreement or a subsequent amendment is conclusive evidence that the fees, lease payments, or service payments provided for in the comprehensive agreement comply with this section. Fees or lease payments established in the comprehensive agreement as a source of revenue may be in addition to, or in lieu of, service payments.

9. Duties of the private entity, including the terms and conditions that the responsible public entity determines serve the public purpose of this section.

(b) The comprehensive agreement may include:

1. An agreement by the responsible public entity to make grants or loans to the private entity from amounts received from the federal, state, or local government or an agency or instrumentality thereof.

2. A provision under which each entity agrees to provide notice of default and cure rights for the benefit of the other entity, including, but not limited to, a provision regarding unavoidable delays.

3. A provision that terminates the authority and duties of the private entity under this section and dedicates the qualifying project to the responsible public entity or, if the qualifying project was initially dedicated by an affected local jurisdiction, to the affected local jurisdiction for public use.

(10) Fees.--An agreement entered into pursuant to this section may authorize the private entity to impose fees to members of the public for the use of the facility. The following provisions apply to the agreement:

(a) The responsible public entity may develop new facilities or increase capacity in existing facilities through agreements with public-private partnerships.

(b) The public-private partnership agreement must ensure that the facility is properly operated, maintained, or improved in accordance with standards set forth in the comprehensive agreement.

(c) The responsible public entity may lease existing fee-for-use facilities through a public-private partnership agreement.

(d) Any revenues must be regulated by the responsible public entity pursuant to the comprehensive agreement.

(e) A negotiated portion of revenues from fee-generating uses must be returned to the public entity over the life of the agreement.

(11) Financing.--

(a) A private entity may enter into a private-source financing agreement between financing sources and the private entity. A financing agreement and any liens on the property or facility must be paid in full at the applicable closing that transfers ownership or operation of the facility to the responsible public entity at the conclusion of the term of the comprehensive agreement.

(b) The responsible public entity may lend funds to private entities that construct projects containing facilities that are approved under this section.

(c) The responsible public entity may use innovative finance techniques associated with a public-private partnership under this section, including, but not limited to, federal loans as provided in Titles 23 and 49 C.F.R., commercial bank loans, and hedges against inflation from commercial banks or other private sources. In addition, the responsible public entity may provide its own capital or operating budget to support a qualifying project. The budget may be from any legally permissible funding sources of the responsible public entity, including the proceeds of debt issuances. A responsible public entity may use the model financing agreement provided in [s. 489.145\(6\)](#) for its financing of a facility owned by a responsible public entity. A financing agreement may not require the responsible public entity to indemnify the financing source, subject the responsible public entity's facility to liens in violation of [s. 11.066\(5\)](#), or secure financing by the responsible public entity with a pledge of security interest, and any such provision is void.

(d) A responsible public entity shall appropriate on a priority basis as required by the comprehensive agreement a contractual payment obligation, annual or otherwise, from the enterprise or other government fund from which the qualifying projects will

be funded. This required payment obligation must be appropriated before other noncontractual obligations payable from the same enterprise or other government fund.

(12) Powers and duties of the private entity.--

(a) The private entity shall:

1. Develop or operate the qualifying project in a manner that is acceptable to the responsible public entity in accordance with the provisions of the comprehensive agreement.

2. Maintain, or provide by contract for the maintenance or improvement of, the qualifying project if required by the comprehensive agreement.

3. Cooperate with the responsible public entity in making best efforts to establish interconnection between the qualifying project and any other facility or infrastructure as requested by the responsible public entity in accordance with the provisions of the comprehensive agreement.

4. Comply with the comprehensive agreement and any lease or service contract.

(b) Each private facility that is constructed pursuant to this section must comply with the requirements of federal, state, and local laws; state, regional, and local comprehensive plans; the responsible public entity's rules, procedures, and standards for facilities; and such other conditions that the responsible public entity determines to be in the public's best interest and that are included in the comprehensive agreement.

(c) The responsible public entity may provide services to the private entity. An agreement for maintenance and other services entered into pursuant to this section must provide for full reimbursement for services rendered for qualifying projects.

(d) A private entity of a qualifying project may provide additional services for the qualifying project to the public or to other private entities if the provision of additional services does not impair the private entity's ability to meet its commitments to the responsible public entity pursuant to the comprehensive agreement.

(13) Expiration or termination of agreements.--Upon the expiration or termination of a comprehensive agreement, the responsible public entity may use revenues from the qualifying project to pay current operation and maintenance costs of the qualifying project. If the private entity materially defaults under the comprehensive agreement, the compensation that is otherwise due to the private entity is payable to satisfy all financial obligations to investors and lenders on the qualifying project in the same way that is provided in the comprehensive agreement or any other agreement involving the qualifying project, if the costs of operating and maintaining the qualifying project are paid in the normal course. Revenues in excess of the costs for operation and maintenance costs may be paid to the investors and lenders to satisfy payment obligations under their respective agreements. A responsible public entity may terminate with cause and without prejudice a comprehensive agreement and may exercise any other rights or remedies that may be available to it in accordance with the provisions of the comprehensive agreement. The full faith and credit of the responsible public entity may not be pledged to secure the financing of the private entity. The assumption of the development or operation of the qualifying project does not obligate the responsible public entity

to pay any obligation of the private entity from sources other than revenues from the qualifying project unless stated otherwise in the comprehensive agreement.

(14) Sovereign immunity.--This section does not waive the sovereign immunity of a responsible public entity, an affected local jurisdiction, or an officer or employee thereof with respect to participation in, or approval of, any part of a qualifying project or its operation, including, but not limited to, interconnection of the qualifying project with any other infrastructure or project. A county or municipality in which a qualifying project is located possesses sovereign immunity with respect to the project, including, but not limited to, its design, construction, and operation.

(15) Construction.--This section shall be liberally construed to effectuate the purposes of this section. This section shall be construed as cumulative and supplemental to any other authority or power vested in or exercised by the governing board of a county, district, or municipal hospital or health care system including those contained in acts of the Legislature establishing such public hospital boards or [s. 155.40](#). This section does not affect any agreement or existing relationship with a supporting organization involving such governing board or system in effect as of January 1, 2013.

(a) This section does not limit a political subdivision of the state in the acquisition, design, or construction of a public project pursuant to other statutory authority.

(b) Except as otherwise provided in this section, this section does not amend existing laws by granting additional powers to, or further restricting, a local governmental entity from regulating and entering into cooperative arrangements with the private sector for the planning, construction, or operation of a facility.

(c) This section does not waive any requirement of [s. 287.055](#).

AGENDA ITEM WORDING: Approval to advertise a public hearing to consider an ordinance creating Sections 23-43 through 23-47 of the Monroe County Code, to provide a reduction in assessed value for construction or reconstruction of homesteaded property completed after January 7, 2003 for the purpose of providing living quarters for parents or grandparents of property owners, pursuant to F.S 193.703 and the 2002 amendment to the Florida Constitution known as the "Granny Flats" Amendment.

ITEM BACKGROUND: In 2002, Florida voters overwhelmingly approved an amendment to the Florida Constitution providing for a reduction in assessed value for ad valorem taxation for the portion of assessed value of homestead property attributable to construction or reconstruction of the portion of the property being used as living quarters by parents or grandparents of the property owner or owner's spouse (a/k/a the "Granny Flats" Amendment). As a result, in 2003, the Florida legislature passed F.S. 193.703. The statute allows the local governing body to adopt an ordinance providing for a a reduction in the assessed value of homestead property equal to any increase in assessed value of the property resulting from the construction or reconstruction of the property for the purpose of providing living quarters for one or more parents or grandparents for whom the living quarters are providing for who are at least 62 years of age, who reside on the property and do not claim a homestead exemption in any other county or state.

The estimated fiscal impact is unknown. Twenty-nine counties have reported reductions based on a local "Granny Flats" ordinance. Based on the results in those counties, the likely impact will be in the range of \$35K to \$150K per year in reduced property value revenue although it is possible that the reduction in revenue could approach \$500K.

ORDINANCE NO. ____- 2016

AN ORDINANCE RELATING TO AD VALOREM TAXATION, CREATING SECTIONS 23-43 THROUGH 23-47 OF THE MONROE COUNTY CODE, PROVIDING FOR A REDUCTION IN ASSESSED VALUE OF HOMESTEAD PROPERTY RESULTING FROM CONSTRUCTION OR RECONSTRUCTION OF LIVING QUARTERS FOR PARENTS OR GRANDPARENTS OF THE PROPERTY OWNER OR OWNER'S SPOUSE IF AT LEAST ONE OF THE PARENTS OR GRANDPARENTS FOR WHOM THE LIVING QUARTERS ARE PROVIDED IS AT LEAST 62 YEARS OF AGE; REQUIRING DELIVERY OF THE ORDINANCE TO PROPERTY APPRAISER AND TAX COLLECTOR; PROVIDING FOR SEVERABILITY; PROVIDING FOR THE REPEAL OF ALL ORDINANCES IN CONFLICT; PROVIDING FOR INCORPORATION INTO THE MONROE COUNTY CODE OF ORDINANCES; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, on November 5, 2002, voters statewide overwhelmingly approved an amendment to the Florida Constitution providing for a reduction in assessed value for ad valorem taxation for qualifying portions of homestead property used as living quarters by parents or grandparents; and

WHEREAS, this amendment, subsequently incorporated in Art. VII, § 4(e) of the Florida Constitution, was approved to encourage Florida families to care for their elderly at home rather than relying on institutions where care is often subsidized by state and federal tax dollars; and

WHEREAS, the 2002 Legislature adopted HB 313 creating Section 193.703 of the Florida Statutes providing applicable requirements and procedures for implementation of this Constitutional Amendment as a county option; and

WHEREAS, the Board of County Commissioners may adopt an ordinance to provide for a reduction in the assessed value of homesteaded property equal to any increase in assessed value of the property which results from the construction or reconstruction of the property for the purpose of providing living quarters for one or more parents or grandparents for whom the living quarters are providing for and they must be at least 62 years of age; and

WHEREAS, the Board of County Commissioners finds that enactment of an ordinance providing a tax reduction will encourage Monroe County property owners to care for their parents and grandparents at home.

NOW, THEREFORE, BE IT ORDAINED BY THE BOARD OF COUNTY COMMISSIONERS OF MONROE COUNTY, FLORIDA, AS FOLLOWS:

SECTION 1. Article II, Division 3 of the Monroe County Code (sections 23-43 through 23-____), entitled "Reduction in Assessed Value of Homestead Property for Providing Living

Reconstruction means all types of reconstruction governed by the County's building code.

Section 23-44. Reduction in Assessed Value of Homestead Property.

There is hereby granted to the owner of homesteaded property a reduction in assessed value of that property equal to any increases in assessed value of the property resulting from the construction or reconstruction of the property for the purpose of providing living quarters for one or more natural or adoptive parents or grandparents of the owner of the property, or of the owner’s spouse, if at least one of the parents or grandparents for whom the living quarters are provided resides therein and is at least 62 years of age. The reduction shall be administered as provided in F.S. § 193.703 and F.A.C. Chapter 12D-8.0068, as amended from time to time.

Section 23-45. Application.

Dear County Commissioners,

I am writing to you on behalf of my boss's request (Scott Russell, Monroe County Property Appraiser). This is in regards to a benefit which may help residents of Monroe County. As you can see from past e-mails this has been inquired about for some time now. I have put together a memo which outlines the basics of this classification (not exemption) which starts with the passing of an Ordinance by the County.

I hope that you will take this into consideration, since our office has had a couple of inquiries concerning this issue.

Thank you,

So it doesn't look like we have adopted this. Also as a note, it cannot be tacked onto the amendment for the additional senior homestead exemption because that would violate the single subject rule that Florida has. Even though the topics are similar. It would take another ordinance.

Thank you Kathy, my notes read as follows:

- Board of County Commissioners may adopt an ordinance to provide for a reduction in the assessed value of Homestead property equal to any increase in assessed value of the property which results from the construction or reconstruction of the property for the purpose of providing living quarters for one or more parents or grandparents for whom the living quarters are provided for and they must be at least 62 years of age.
- The reduction in the assessed value shall apply to all taxing authorities
- The construction or reconstruction must have been substantially completed on or before January 1 on which the assessment reduction is first applied for
- Property owner must be receiving Homestead exemption in order to qualify
- Property owner must apply for this reduction every year
- This reduction is not considered an exemption, but rather a classification
- The Property Appraiser's office shall determine the increase in the just value of the property due to the construction or reconstruction of the living quarters which are provided to the parents/grandparents and reduce the assessed value by that much (each year value will need to be calculated)
- In no year may the assessment reduction exceed 20% of the total assessed value of the property
- The construction of the living quarters for the parents/grandparents must have been substantially completed after January 7, 2003, and built for the purpose of providing living quarters for one or more parent/grandparent
- In determining if the parent or grandparent is the natural or adoptive parent/grandparent shall rely on any other information that the property appraiser determines is relevant.
- If the value of the new living quarters are over 20% of the total assessed value of the property, then property appraiser shall use 20%

**BOARD OF COUNTY COMMISSIONERS
AGENDA ITEM SUMMARY**

Meeting Date: 02/10/2016 - KW

Department: County Attorney

Bulk Item: Yes X No

Staff Contact: Cynthia Hall, (305) 292-3470

AGENDA ITEM WORDING: Report on status of KWRU rate application pending in front of Florida Public Service Commission, Docket No. 150071-SU; discussion and direction to staff.

ITEM BACKGROUND: On June 30, 2015, KWRU filed an application for an increase in wastewater rates with the Florida Public Service Commission. A copy of documents filed in the case can be found at <http://www.psc.state.fl.us/dockets/cms/docketdetails2.aspx?docket=150071>. A customer meeting was held on December 10, 2015 at 6 pm at Old City Hall in Key West. An initial order on the rate application will be issued by March 21, 2016. Thereafter, parties have the right to protest the proposed order until April 11, 2016, after which a final order will issue.

The application seeks approximately a 98% increase in rates. Rates were last increased in 2009. A preliminary analysis based on FY15 invoices from KWRU to the County shows that the amount of the annual increase to the County would be approximately +\$198K based on usage in FY15. The County has not formally petitioned to intervene, but continues to actively monitor the case.

PREVIOUS RELEVANT BOCC ACTION: At the December 2015 meeting, the BOCC asked that staff bring back periodic updates on the rate proceeding.

AGENDA ITEM SUMMARY**

Meeting Date: February 10, 2016
Bulk Item: Yes X No

Division: County Attorney
Staff Contact /Phone #: Steve Williams/292-3470

AGENDA ITEM WORDING: Authorization to initiate litigation against H. Keith Munt and the property located at 1238 Long Beach Drive, Big Pine Key, Florida, to seek compliance with the County Codes and enforce a lien arising from code compliance case number CE08080209.

ITEM BACKGROUND:

This property is the subject of a code compliance case for the lack of a valid permit for construction and/or completion thereof, and for the failure to bring the structure into compliance with building codes within a reasonable period of time. The fines total \$2,472,800.00 as of January 22, 2016 and will continue to accrue at \$1,100.00 per day until compliance is achieved.

CE08080209: The Special Magistrate found the property in violation and ordered a compliance date of November 25, 2009. The property owner did not gain compliance by the deadline ordered by the Special Magistrate and the fine(s) began to accrue on November 26, 2009. The County's lien was recorded on November 3, 2009 and the Final Order was re-recorded on October 20, 2011. The code case remains open for non-compliance and failure to pay outstanding fines and costs.

The property is not homesteaded and there are no pending foreclosure actions at this time.

Under the policy adopted in Resolution 057-2014 the available legal options in regard to the County's lien on this property are:

1. Initiate litigation against the property owner for injunction, foreclosure, money judgment and writ of execution;
2. Allow the liens to remain against the property owner, the subject property and any other property owned by the property owner; and/or
3. Reduce the amount of the fines.

PREVIOUS RELEVANT BOCC ACTION: N/A

CONTRACT/AGREEMENT CHANGES: N/A

STAFF RECOMMENDATIONS: County staff recommends initiating litigation (option 1) against the property owner for injunction, foreclosure, money judgment and writ of execution.

MEMORANDUM

TO: Steve Williams, Assistant County Attorney
FROM: Kathleen Windsor, Sr. Code Compliance Research Analyst
DATE: January 23, 2016
SUBJECT: Recommendation to County Attorney's Office for further action.

SUMMARY:

As a result of the Final Order in code compliance case CE08080209, daily fines in the amount of \$1,100.00 per day have accrued for approximately 2248 days for a total of \$2,472,800.00 and continue to accrue. All attempts to gain voluntary compliance from the property owner have failed. The subject property, owned by H. Keith Munt, remains in violation of Monroe County Code.

CASE CE08080209 BACKGROUND:

The violations in this case are the result of a complaints received by the Code Compliance Department for the lack of a valid permit for construction and/or completion thereof, and the failure to bring the structure into compliance with building codes within a reasonable period of time. A site inspection ensued and research was conducted. Subsequently a "Notice of Violation/Notice of Hearing" was mailed via certified mail to the property owner H. Keith Munt on September 29, 2009 to appear at the Special Magistrate Hearing on October 29, 2009. The return receipt was signed on October 9, 2009. The hearing was held and no one appeared on behalf of the property owner. At the hearing, the Code Compliance Special Magistrate found the property in violation of:

- MCC Sec. 21-20.(b) - To-Wit: THIS PROPERTY MUST BE KEPT FREE OF HIGH GRASS AND WEEDS.
- MCC Sec. 6-27.(b)(2)h - To-Wit: YOUR BUILDING PERMIT 961-0029 EXPIRED ON JULY 15, 2008 AND IS NOW NULL AND VOID. THIS PROPERTY HAS BEEN DEEMED UNSAFE BY THE BUILDING OFFICIAL DUE TO THE LACK OF A VALID PERMIT FOR CONSTRUCTION. ** PER FBC 105.4.1.2 - SINCE A NEW PERMIT WAS NOT OBTAINED WITHIN 180 DAYS FROM THE DATE THE PERMIT BECAME NULL AND VOID, THE BUILDING OFFICIAL IS AUTHORIZED TO REQUIRE THAT ANY WORK WHICH HAS BEEN COMMENCED OR COMPLETED BE REMOVED FROM THE BUILDING SITE.
- MCC Sec. 6-27.(b)(2)k - To-Wit: THE STRUCTURE ON YOUR PROPERTY MEETS THE PHYSICAL CRITERIA OF AN UNSAFE STRUCTURE AND HAS NOT BEEN BROUGHT INTO COMPLIANCE WITH THE BUILDING CODE FOLLOWING THE EXPIRATION OF REASONABLE PERIODS OF TIME AFTER NOTIFICATION BY THE CODE INSPECTOR AND THE BUILDING OFFICIAL, THEREFORE THIS PROPERTY HAS BEEN DEEMED UNSAFE BY THE BUILDING OFFICIAL.

The Special Magistrate imposed daily fine(s) totaling \$1,100.00 per day (3 counts) to accrue if compliance was not achieved by November 25, 2009, issuing a *Final Order* for same.

Compliance was not achieved by that date and the Final Order was recorded as a lien on behalf of the BOCC on November 3, 2009. On March 18, 2010 a letter was sent to the property owner advising them of the lien and the continuation of fines and costs until compliance was achieved.

Subsequently a “*Notice of Motion to Authorize Collection Proceedings and Notice of Hearing*” was mailed to the property owner on April 8, 2010 and a hearing was held on May 5, 2010. The Special Magistrate issued an “*Order Authorizing Foreclosure*”.

As of January 22, 2016 no permit applications for the completion of the structure or modification of the plans updating them to the current building codes have been submitted, and permit 96100029 remains expired as of July 15, 2008. Staff has exhausted all other mechanisms available to persuade the property owner to achieve compliance.

As of January, the total amount of the lien is \$2,473,584.41 (\$2,472,800.00 fines and \$784.41 costs), and the costs and fines will continue to accrue until compliance is achieved and the lien is paid.

STAFF RECOMMENDATIONS:

Proceed to Monroe County BOCC asking for approval to proceed with litigation to compel the property owner H. Keith Munt, to comply with various county ordinances and correct the code violations of Code Compliance Case CE08080209.

Owner/ Tenant: H. Keith Mont Physical Address: Long Beach Drive
KEY: Big Pine RE: LOT: 34 BK: SUB:

Comments:
Construction Site abandoned and unsafe.

Permit has expired. Was issued in 1998.
Permit has already had (3) extensions.

I have reviewed the documents/photographs provided to me regarding the above Code Enforcement Case.

It is my opinion, based upon these documents/photographs that the structure is:

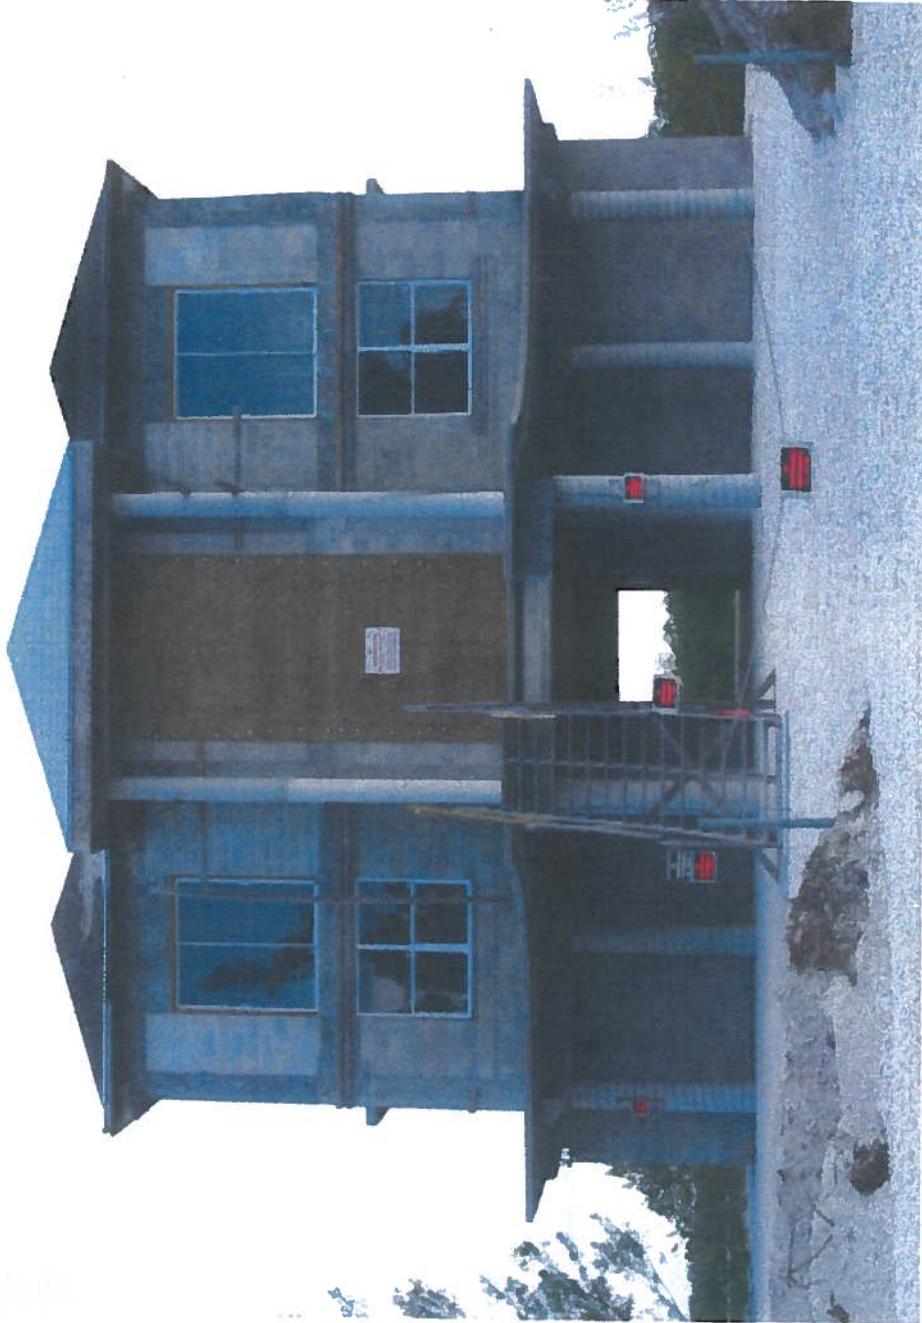

X Unsafe and will will not require a building permit to bring violation into compliance

Not being maintained in a safe and sanitary condition and is in violation of MCC 6-4(A)(C) The Standard Unsafe Building Abatement Code as adopted.

**Re: Munt Residence
1238 Long Beach Drive
Big Pine Key, Florida**

Dear Mr. Munt:

At your request, I have reviewed all of the information you provided concerning the above referenced property. The property was damaged on October 24, 2005, by wind and water forces associated with Hurricane Wilma.

I met with you on the site May 24, 2006, to discuss the damage. Although the home only suffered minor damage from the storm, before any repairs can be completed the building permit must be re-activated. For a variety of reasons the building permit had expired. You indicated the Building Department requested a statement from a professional engineer addressing the current condition of the structure and various structural elements before any repairs could begin.

The home is a concrete block structure supported of round concrete columns. The columns are constructed on concrete auger foundations typical for the area. The first and second floor are concrete supported on Hambro steel joists. Pre-engineered trusses makeup the roof structure. The home was designed to resist 155 mph wind.

October 1, 2005, was the implementation date of the 2004 Florida Building Code. This was a major revision to the current state wide building code. Unfortunately, any repairs or renovations of your home must comply with the provisions of the 2004 building code. The code has specific provisions for alterations to existing buildings.

Under the current code, when a structural element is altered or renovated more than 25%, that structural element must be brought up to current code. Structural elements include roofs, walls, supporting columns, floor framing, roof framing, etc.

For an incomplete structure Hurricane Wilma did little apparent damage. I'm not sure how high the water rose at your property, but there was no visible water mark on the concrete columns. Storm force winds did penetrate the interior, but given the incomplete status of the project, little damage occurred.

I again visited the site on June 12th, 2006, to assess areas that must be re-constructed once the permit is issued. The following repairs/re-construction is necessary:

1. The entire roofing system must be removed and replace. Many of the shingles and much of the underlying felt has been blown away or damaged. The current roofing cannot be salvaged and must be replaced.
2. With roofing replacement, much of the plywood roof sheathing must be replace. Certainly the lower panels that are exposed must be replaced, but any plywood that shows any water discoloration or signs of de-lamination must be replaced. Current code will require 5/8" plywood sheathing be installed.
- 3 All of the fascia material must be replaced due to weather exposure.
4. The house was constructed using the Hambro concrete floor system. Due to time and exposure to the elements, much of the steel bar joists are corroded. All structural steel must be sand blasted clean and primed to prevent further corrosion damage.
5. Rear wall exterior plywood sheathing around the glass doors must be replaced. I observed warped edges and de-lamination in the plywood.
6. The window bucks have been exposed to the elements for quite some time. Replace as necessary to insure proper window fit and alignment..

Electrical and plumbing construction had only been completed through rough-in. They appeared to be fine, requiring only the proper completion and subsequent Building Department inspection.

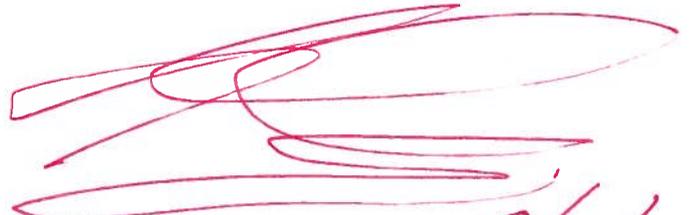

It is my professional opinion the current condition of the structural elements, with the exception of those listed above, are adequate and acceptable for project completion under the original permitted design and specifications.

Mr. Munt

This project has been under construction for many years. There have been at least two significant code revisions since the project was designed and permitted. Once the permit is re-issued, I implore you to take the necessary actions to finish and secure this home.

If you have any questions, please contact me on my cell phone at 813-765-0264.
Thank you.

Sincerely,

owner-builder limitations provided in this paragraph. To qualify for exemption under this paragraph, an owner must personally appear and sign the building permit application. The permitting agency shall provide the person with a disclosure statement in substantially the following form:

Disclosure Statement: State law requires asbestos abatement to be done by licensed contractors. You have applied for a permit under an exemption to that law. The exemption allows you, as the owner of your property, to act as your own asbestos abatement contractor even though you do not have a license. You must supervise the construction yourself. You may move, remove or dispose of asbestos-containing materials on a residential building where you occupy the building and the building is not for sale or lease, or the building is a farm outbuilding on your property. If you sell or lease such building within 1 year after the asbestos abatement is complete, the law will presume that you intended to sell or lease the property at the time the work was done, which is a violation of this exemption. You may not hire an unlicensed person as your contractor. Your work must be done according to all local, state and federal laws and regulations which apply to asbestos abatement projects. It is your responsibility to make sure that people employed by you have licenses required by state law and by county or municipal licensing ordinances.

105.4 Conditions of the permit.

105.4.1 Permit intent. A permit issued shall be construed to be a license to proceed with the work and not as authority to violate, cancel, alter or set aside any of the provisions of the technical codes, nor shall issuance of a permit prevent the building official from thereafter requiring a correction of errors in plans, construction or violations of this code. Every permit issued shall become invalid unless the work authorized by such permit is commenced within 6 months after its issuance, or if the work authorized by such permit is suspended or abandoned for a period of 6 months after the time the work is commenced.

105.4.1.1 If work has commenced and the permit is revoked, becomes null and void or expires because of lack of progress or abandonment, a new permit covering the proposed construction shall be obtained before proceeding with the work.

105.4.1.2 If a new permit is not obtained within 180 days from the date the initial permit became null and void, the building official is authorized to require that any work which has been commenced or completed be removed from the building site. Alternately, a new permit may be issued on application, providing the work in place and required to complete the structure meets all applicable regulations in effect at the time the initial permit became null and void and any regulations which may have become effective between the date of expiration and the date of issuance of the new permit.

105.4.1.3 Work shall be considered to be in active progress when the permit has received an approved inspection within 180 days. This provision shall not be applicable in case of civil commotion or strike or when the building work is halted due directly to judicial injunction, order or similar process.

105.4.1.4 The fee for renewal reissuance and extension of a permit shall be set forth by the administrative authority.

105.5 Expiration. Reserved.

105.6 Suspension or revocation. Reserved.

105.7 Placement of permit. The building permit or copy shall be kept on the site of the work until the completion of the project.

105.8 Notice of commencement. As per Section 713.135, *Florida Statutes*, when any person applies for a building permit, the authority issuing such permit shall print on the face of each permit card in no less than 18-point, capitalized, bold-faced type: "WARNING TO OWNER: YOUR FAILURE TO RECORD A NOTICE OF COMMENCEMENT MAY RESULT IN YOUR PAYING TWICE FOR IMPROVEMENTS TO YOUR PROPERTY. IF YOU INTEND TO OBTAIN FINANCING, CONSULT WITH YOUR LENDER OR AN ATTORNEY BEFORE RECORDING YOUR NOTICE OF COMMENCEMENT."

105.9 Asbestos. The enforcing agency shall require each building permit for the demolition or renovation of an existing structure to contain an asbestos notification statement which indicates the owner's or operator's responsibility to comply with the provisions of Section 469.003, *Florida Statutes*, and to notify the Department of Environmental Protection of his or her intentions to remove asbestos, when applicable, in accordance with state and federal law.

105.10 Certificate of protective treatment for prevention of termites. A weather-resistant job-site posting board shall be provided to receive duplicate treatment certificates as each required protective treatment is completed, providing a copy for the person the permit is issued to and another copy for the building permit files. The treatment certificate shall provide the product used, identity of the applicator, time and date of the treatment, site location, area treated, chemical used, percent concentration and number of gallons used, to establish a verifiable record of protective treatment. If the soil chemical barrier method for termite prevention is used, final exterior treatment shall be completed prior to final building approval.

105.11 Notice of termite protection. A permanent sign which identifies the termite treatment provider and need for reinspection and treatment contract renewal shall be provided. The sign shall be posted near the water heater or electric panel.

105.12 Work starting before permit issuance. Upon approval of the building official, the scope of work delineated in the building permit application and plan may be started prior to the final approval and issuance of the

Subject: RE: Long Beach Munt ce08080209 1238 Long Beach Drive

Hi Jen,
(Please confirm receipt of this email.)

The structure on this property received a permit in 1998 and construction has stalled many times. This case (is my case) began with a referral from the building official in 2008 after he made several attempts to work with the property owner, all attempts failed and the permit expired again 7-15-2008.

A hearing was held on October 30, 2009 and the Special Magistrate found the property owner in violation of 3 counts. One for condition of the site, high grass and weeds, which has now become replaced with invasive Australian Pines. The other two counts are unsafe charges. Daily fines of \$1,100.00 per day have accrued for 1720 days for a total of \$1,892,000.00 and will continue to accrue until compliance is achieved.

I haven't added up the costs yet, best guess 1000.00.

The property was inspected by the building official last week to see if the structure was a candidate for demolition by the County, and he feels the structure could be mitigated. This means that either the existing structure is inspected and an engineer deems it up to current FBC, or the compromised portions would have to be removed/retrofitted, etc.

This permit received a ROGO allocation, therefore a new permit would have to enter the ROGO allocation process again.

The permit also had a 1203 SF enclosure because it was permitted prior to the County adopting a 299 SF restriction on enclosures. I don't know if this would have to be removed or not.

These are just my obvious observations, there may be other issues that need to be addressed. Any potential buyer should speak with the building department and planning department about permitting questions.

As far as the fines, the County staff's authority to reduce fines is limited to a 75% reduction by resolution, which is still a hefty amount to negotiate with a sale.

If you had a serious buyer, any reduction in the fine amount lower than 75% would have to be approved by the Board of County Commissioners.

I hope this helps.

Hello Kat, regarding the properties on Long Beach, just curious what was going on with the Munt property. Also, were you at 1445 Long Beach?

These are both unfinished structures and have clients that may be interested. Just wondered if they were selling, foreclosure, fines, etc...

Thank you,

**BOARD OF COUNTY COMMISSIONERS
AGENDA ITEM SUMMARY**

Meeting Date: 02/10/16

Division: Growth Management/Code

Bulk Item: Yes X No

Staff Contact /Phone #: Steve Williams; 292-3470

AGENDA ITEM WORDING: Approval of a settlement agreement for Code Compliance Liens regarding real property located at 537 Plante Street, Key Largo, FL.

ITEM BACKGROUND: This property has been the subject of three code compliance cases and has become an eyesore to its neighborhood. A nearby property owner wishes to purchase the property and clean it up, but does not wish to acquire without assurances regarding the code liens that exceed the value of the property. The current owner has abandoned the property and left the keys.

CE12050038: The property has been subject of a code compliance case for illegal parking and storage of trucks and failure to maintain the property clean and free of trash and debris. On February 28, 2013 the Code Compliance Special Magistrate approved an executed Stipulation Agreement wherein the property owner admitted to the violations. In the Stipulation, the property owner agreed to pay fines in the amount of \$200.00 per day, if compliance was not achieved by the agreed upon compliance date (May 17, 2013). The property owner was given 1 extension of the compliance date with the final compliance date of July 19, 2013; however, compliance was not achieved by the final compliance date of July 19, 2013. The Final Order was recorded as a lien in the Monroe County Clerk's Office on January 17, 2014. The current amount of the fines as of December 1, 2015 is \$172,800.00 with a \$200.00 per diem and an estimate of costs are \$1,367.69.

CE10020191: Mr. Hardy has had similar violations in the past that have been remedied. For example, 2011, he was found in violation of parking and storing vehicles in the setbacks, storing abandoned vehicles, failure to maintain the property cleaned of junk and debris, prohibited habitation of travel trailers, illegal parking and storage on the right of way and failure to have all vehicles registered and tagged to a tenant or property owner. Those violations were cured on or before the compliance date (May 11, 2011). However, the one-time fine in the amount of \$250.00 ordered by the Special Magistrate for the repeat use of the right of way and the repeat failure to maintain the property remains unpaid to date. Additionally, costs in the amount of \$159.49 remain unpaid to date. In 2006 Mr. Hardy was found in violation of failing to maintain the property clean of junk and debris. He gained compliance and paid the administrative fees of \$100.00.

CE13090093: The Special Magistrate found the property owner in violation of failure to connect to the central sewer system on February 27, 2014 and set an original compliance date of June 1, 2014. The property owner was given an extension to the compliance date until February 1, 2015. The property is not yet compliant. As of December 1, 2015 the fines total \$54,700.00 with a \$100.00 per diem and an estimate of costs are \$265.02.

The total owed is \$229,542.20 with a \$300.00 per diem. A settlement agreement has been set forth to potential new buyers as follows:

- \$20,000 for all fines and costs
 - Complete cleanup and compliance within 30 days of close
 - If not compliant on day 31, revert to existing amount of \$300.00 per day and \$20,000.00 is treated as partial payment of full lien amount.
-

PREVIOUS RELEVANT BOCC ACTION: August 20, 2014 – authorization to initiate litigation and work with the property owner and the County Veteran’s Affairs to see if compliance can be achieved prior to filing suit.

CONTRACT/AGREEMENT CHANGES: N/A

STAFF RECOMMENDATIONS: Approval of a settlement agreement for successful purchase of the parcel. Currently, there are two interested purchasers and this settlement will be extended to successful buyer. The County has no preferences or position with regards to whomever purchases the property.

- 219 (h) **PROPERTY TAX DISCLOSURE SUMMARY:** BUYER SHOULD NOT RELY ON THE SELLER'S CURRENT
 220 PROPERTY TAXES AS THE AMOUNT OF PROPERTY TAXES THAT THE BUYER MAY BE OBLIGATED
 221 TO PAY IN THE YEAR SUBSEQUENT TO PURCHASE. A CHANGE OF OWNERSHIP OR PROPERTY
 222 IMPROVEMENTS TRIGGERS REASSESSMENTS OF THE PROPERTY THAT COULD RESULT IN
 223 HIGHER PROPERTY TAXES. IF YOU HAVE ANY QUESTIONS CONCERNING VALUATION, CONTACT
 224 THE COUNTY PROPERTY APPRAISER'S OFFICE FOR INFORMATION.
- 225 (i) **FIRPTA TAX WITHHOLDING:** Seller shall inform Buyer in writing if Seller is a "foreign person" as defined by
 226 the Foreign Investment in Real Property Tax Act ("FIRPTA"). Buyer and Seller shall comply with FIRPTA,
 227 which may require Seller to provide additional cash at Closing. If Seller is not a "foreign person", Seller can
 228 provide Buyer, at or prior to Closing, a certification of non-foreign status, under penalties of perjury, to inform
 229 Buyer and Closing Agent that no withholding is required. See STANDARD V for further information pertaining
 230 to FIRPTA. Buyer and Seller are advised to seek legal counsel and tax advice regarding their respective
 231 rights, obligations, reporting and withholding requirements pursuant to FIRPTA.
- 232 (j) **SELLER DISCLOSURE:** Seller knows of no facts materially affecting the value of the Real Property which
 233 are not readily observable and which have not been disclosed to Buyer. Except as provided for in the
 234 preceding sentence, Seller extends and intends no warranty and makes no representation of any type, either
 235 express or implied, as to the physical condition or history of the Property. Except as otherwise disclosed in
 236 writing Seller has received no written or verbal notice from any governmental entity or agency as to a
 237 currently uncorrected building, environmental or safety code violation.

238 **PROPERTY MAINTENANCE, CONDITION, INSPECTIONS AND EXAMINATIONS**

239 **11. PROPERTY MAINTENANCE:** Except for ordinary wear and tear and Casualty Loss, Seller shall maintain the

- 243* (a) **PROPERTY INSPECTIONS AND RIGHT TO CANCEL:** Buyer shall have 1 (if left blank, then 15)
 244 days after Effective Date ("Inspection Period") within which to have such inspections of the Property
 245 performed as Buyer shall desire during the Inspection Period. If Buyer determines, in Buyer's sole
 246 discretion, that the Property is not acceptable to Buyer, Buyer may terminate this Contract by
 247 delivering written notice of such election to Seller prior to expiration of Inspection Period. If Buyer
 248 timely terminates this Contract, the Deposit paid shall be returned to Buyer, thereupon, Buyer and
 249 Seller shall be released of all further obligations under this Contract; however, Buyer shall be
 250 responsible for prompt payment for such inspections, for repair of damage to, and restoration of, the
 251 Property resulting from such inspections, and shall provide Seller with paid receipts for all work done
 252 on the Property (the preceding provision shall survive termination of this Contract). Unless Buyer
 253 exercises the right to terminate granted herein, Buyer accepts the physical condition of the Property
 254 and any violation of governmental, building, environmental, and safety codes, restrictions, or
 255 requirements, but subject to Seller's continuing AS IS Maintenance Requirement, and Buyer shall be
 256 responsible for any and all repairs and improvements required by Buyer's lender.
- 257 (b) **WALK-THROUGH INSPECTION/RE-INSPECTION:** On the day prior to Closing Date, or on Closing Date
 258 prior to time of Closing, as specified by Buyer, Buyer or Buyer's representative may perform a walk-through
 259 (and follow-up walk-through, if necessary) inspection of the Property solely to confirm that all items of
 260 Personal Property are on the Property and to verify that Seller has maintained the Property as required by the
 261 AS IS Maintenance Requirement and has met all other contractual obligations.
- 262 (c) **SELLER ASSISTANCE AND COOPERATION IN CLOSE-OUT OF BUILDING PERMITS:** If Buyer's
 263 inspection of the Property identifies open or needed building permits, then Seller shall promptly deliver to
 264 Buyer all plans, written documentation or other information in Seller's possession, knowledge, or control
 265 relating to improvements to the Property which are the subject of such open or needed Permits, and shall
 266 promptly cooperate in good faith with Buyer's efforts to obtain estimates of repairs or other work necessary to
 267 resolve such Permit issues. Seller's obligation to cooperate shall include Seller's execution of necessary
 268 authorizations, consents, or other documents necessary for Buyer to conduct inspections and have estimates
 269 of such repairs or work prepared, but in fulfilling such obligation, Seller shall not be required to expend, or

275 **13. ESCROW AGENT:** Any Closing Agent or Escrow Agent (collectively "Agent") receiving the Deposit, other funds
276 and other items is authorized, and agrees by acceptance of them, to deposit them promptly, hold same in escrow
277 within the State of Florida and, subject to **COLLECTION**, disburse them in accordance with terms and conditions
278 of this Contract. Failure of funds to become **COLLECTED** shall not excuse Buyer's performance. When conflicting
279 demands for the Deposit are received, or Agent has a good faith doubt as to entitlement to the Deposit, Agent
280 may take such actions permitted by this Paragraph 13, as Agent deems advisable. If in doubt as to Agent's duties
281 or liabilities under this Contract, Agent may, at Agent's option, continue to hold the subject matter of the escrow
282 until the parties agree to its disbursement or until a final judgment of a court of competent jurisdiction shall
283 determine the rights of the parties, or Agent may deposit same with the clerk of the circuit court having jurisdiction
284 of the dispute. An attorney who represents a party and also acts as Agent may represent such party in such
285 action. Upon notifying all parties concerned of such action, all liability on the part of Agent shall fully terminate,
286 except to the extent of accounting for any items previously delivered out of escrow. If a licensed real estate
287 broker, Agent will comply with provisions of Chapter 475, F.S., as amended and FREC rules to timely resolve
288 escrow disputes through mediation, arbitration, interpleader or an escrow disbursement order.
289 Any proceeding between Buyer and Seller wherein Agent is made a party because of acting as Agent hereunder,
290 or in any proceeding where Agent interpleads the subject matter of the escrow, Agent shall recover reasonable
291 attorney's fees and costs incurred, to be paid pursuant to court order out of the escrowed funds or equivalent.
292 Agent shall not be liable to any party or person for mis-delivery of any escrowed items, unless such mis-delivery is
293 due to Agent's willful breach of this Contract or Agent's gross negligence. This Paragraph 13 shall survive Closing
294 or termination of this Contract.

295 **14. PROFESSIONAL ADVICE; BROKER LIABILITY:** Broker advises Buyer and Seller to verify Property condition,
296 square footage, and all other facts and representations made pursuant to this Contract and to consult appropriate
297 professionals for legal, tax, environmental, and other specialized advice concerning matters affecting the Property
298 and the transaction contemplated by this Contract. Broker represents to Buyer that Broker does not reside on the
299 Property and that all representations (oral, written or otherwise) by Broker are based on Seller representations or
300 public records. **BUYER AGREES TO RELY SOLELY ON SELLER, PROFESSIONAL INSPECTORS AND**
301 **GOVERNMENTAL AGENCIES FOR VERIFICATION OF PROPERTY CONDITION, SQUARE FOOTAGE AND**
302 **FACTS THAT MATERIALLY AFFECT PROPERTY VALUE AND NOT ON THE REPRESENTATIONS (ORAL,**
303 **WRITTEN OR OTHERWISE) OF BROKER.** Buyer and Seller (individually, the "Indemnifying Party") each
304 individually indemnifies, holds harmless, and releases Broker and Broker's officers, directors, agents and
305 employees from all liability for loss or damage, including all costs and expenses, and reasonable attorney's fees
306 at all levels, suffered or incurred by Broker and Broker's officers, directors, agents and employees in connection
307 with or arising from claims, demands or causes of action instituted by Buyer or Seller based on: (i) inaccuracy of
308 information provided by the Indemnifying Party or from public records; (ii) Indemnifying Party's misstatement(s) or
309 failure to perform contractual obligations; (iii) Broker's performance, at Indemnifying Party's request, of any task
310 beyond the scope of services regulated by Chapter 475, F.S., as amended, including Broker's referral,
311 recommendation or retention of any vendor for, or on behalf of Indemnifying Party; (iv) products or services
312 provided by any such vendor for, or on behalf of, Indemnifying Party; and (v) expenses incurred by any such
313 vendor. Buyer and Seller each assumes full responsibility for selecting and compensating their respective vendors
314 and paying their other costs under this Contract whether or not this transaction closes. This Paragraph 14 will not
315 relieve Broker of statutory obligations under Chapter 475, F.S., as amended. For purposes of this Paragraph 14,
316 Broker will be treated as a party to this Contract. This Paragraph 14 shall survive Closing or termination of this
317 Contract.

318 **DEFAULT AND DISPUTE RESOLUTION**

319 **15. DEFAULT:**

320 (a) **BUYER DEFAULT:** If Buyer fails, neglects or refuses to perform Buyer's obligations under this Contract,
321 including payment of the Deposit, within the time(s) specified, Seller may elect to recover and retain the
322 Deposit for the account of Seller as agreed upon liquidated damages, consideration for execution of this
323 Contract, and in full settlement of any claims, whereupon Buyer and Seller shall be relieved from all further
324 obligations under this Contract, or Seller, at Seller's option, may, pursuant to Paragraph 16, proceed in equity
325 to enforce Seller's rights under this Contract. The portion of the Deposit, if any, paid to Listing Broker upon

326 default by Buyer, shall be split equally between Listing Broker and Cooperating Broker; provided however,
327 Cooperating Broker's share shall not be greater than the commission amount Listing Broker had agreed to
328 pay to Cooperating Broker.
329 (b) **SELLER DEFAULT:** If for any reason other than failure of Seller to make Seller's title marketable after
330 reasonable diligent effort, Seller fails, neglects or refuses to perform Seller's obligations under this Contract,
331 Buyer may elect to receive return of Buyer's Deposit without thereby waiving any action for damages resulting
332 from Seller's breach, and, pursuant to Paragraph 16, may seek to recover such damages or seek specific
333 performance.

334 This Paragraph 15 shall survive Closing or termination of this Contract

335 **16. DISPUTE RESOLUTION:** Unresolved controversies, claims and other matters in question between Buyer and
336 Seller arising out of, or relating to, this Contract or its breach, enforcement or interpretation ("Dispute") will be
337 settled as follows:

338 (a) Buyer and Seller will have 10 days after the date conflicting demands for the Deposit are made to attempt to
339 resolve such Dispute, failing which, Buyer and Seller shall submit such Dispute to mediation under Paragraph
340 16(b).

341 (b) Buyer and Seller shall attempt to settle Disputes in an amicable manner through mediation pursuant to Florida
342 Rules for Certified and Court-Appointed Mediators and Chapter 44, F.S., as amended (the "Mediation Rules").
343 The mediator must be certified or must have experience in the real estate industry. Injunctive relief may be
344 sought without first complying with this Paragraph 16(b). Disputes not settled pursuant to this Paragraph 16

348 by this Contract, and each party will pay their own costs, expenses and fees, including attorney's fees, incurred in
349 conducting the mediation. In any litigation permitted by this Contract, the prevailing party shall be entitled to
350 recover from the non-prevailing party costs and fees, including reasonable attorney's fees, incurred in conducting
351 the litigation. This Paragraph 17 shall survive Closing or termination of this Contract.

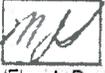

352 **STANDARDS FOR REAL ESTATE TRANSACTIONS ("STANDARDS")**

353 **18. STANDARDS:**

354 **A. TITLE:**

355 (i) **TITLE EVIDENCE; RESTRICTIONS; EASEMENTS; LIMITATIONS:** Within the time period provided in
356 Paragraph 9(c), the Title Commitment, with legible copies of instruments listed as exceptions attached thereto,
357 shall be issued and delivered to Buyer. The Title Commitment shall set forth those matters to be discharged by
358 Seller at or before Closing and shall provide that, upon recording of the deed to Buyer, an owner's policy of title
359 insurance in the amount of the Purchase Price, shall be issued to Buyer insuring Buyer's marketable title to the
360 Real Property, subject only to the following matters: (a) comprehensive land use plans, zoning, and other land
361 use restrictions, prohibitions and requirements imposed by governmental authority; (b) restrictions and matters
362 appearing on the Plat or otherwise common to the subdivision; (c) outstanding oil, gas and mineral rights of
363 record without right of entry; (d) unplatted public utility easements of record (located contiguous to real property
364 lines and not more than 10 feet in width as to rear or front lines and 7 1/2 feet in width as to side lines); (e) taxes
365 for year of Closing and subsequent years; and (f) assumed mortgages and purchase money mortgages, if any (if
366 additional items, attach addendum); provided, that, none prevent use of Property for **RESIDENTIAL PURPOSES**.
367 If there exists at Closing any violation of items identified in (b) – (f) above, then the same shall be deemed a title
368 defect. Marketable title shall be determined according to applicable Title Standards adopted by authority of The
369 Florida Bar and in accordance with law.

370 (ii) **TITLE EXAMINATION:** Buyer shall have 5 days after receipt of Title Commitment to examine it and notify
371 Seller in writing specifying defect(s), if any, that render title unmarketable. If Seller provides Title Commitment and
372 it is delivered to Buyer less than 5 days prior to Closing Date, Buyer may extend Closing for up to 5 days after
373 date of receipt to examine same in accordance with this STANDARD A. Seller shall have 30 days ("Cure Period")
374 after receipt of Buyer's notice to take reasonable diligent efforts to remove defects. If Buyer fails to so notify
375 Seller, Buyer shall be deemed to have accepted title as it then is. If Seller cures defects within Cure Period, Seller
376 will deliver written notice to Buyer (with proof of cure acceptable to Buyer and Buyer's attorney) and the parties
377 will close this Contract on Closing Date (or if Closing Date has passed, within 10 days after Buyer's receipt of
378 Seller's notice). If Seller is unable to cure defects within Cure Period, then Buyer may, within 5 days after
379 expiration of Cure Period, deliver written notice to Seller: (a) extending Cure Period for a specified period not to
380 exceed 120 days within which Seller shall continue to use reasonable diligent effort to remove or cure the defects
381 ("Extended Cure Period"); or (b) electing to accept title with existing defects and close this Contract on Closing

Date (or if Closing Date has passed, within the earlier of 10 days after end of Extended Cure Period or Buyer's receipt of Seller's notice), or (c) electing to terminate this Contract and receive a refund of the Deposit, thereby releasing Buyer and Seller from all further obligations under this Contract. If after reasonable diligent effort, Seller is unable to timely cure defects, and Buyer does not waive the defects, this Contract shall terminate, and Buyer shall receive a refund of the Deposit, thereby releasing Buyer and Seller from all further obligations under this Contract.

B. SURVEY: If Survey discloses encroachments on the Real Property or that improvements located thereon encroach on setback lines, easements, or lands of others, or violate any restrictions, covenants, or applicable governmental regulations described in STANDARD A (i)(a), (b) or (d) above, Buyer shall deliver written notice of such matters, together with a copy of Survey, to Seller within 5 days after Buyer's receipt of Survey, but no later than Closing. If Buyer timely delivers such notice and Survey to Seller, such matters identified in the notice and Survey shall constitute a title defect, subject to cure obligations of STANDARD A above. If Seller has delivered a prior survey, Seller shall, at Buyer's request, execute an affidavit of "no change" to the Real Property since the preparation of such prior survey, to the extent the affirmations therein are true and correct.

C. INGRESS AND EGRESS: Seller represents that there is ingress and egress to the Real Property and title to the Real Property is insurable in accordance with STANDARD A without exception for lack of legal right of access.

D. LEASE INFORMATION: Seller shall, at least 10 days prior to Closing, furnish to Buyer estoppel letters from tenant(s)/occupant(s) specifying nature and duration of occupancy, rental rates, advanced rent and security deposits paid by tenant(s) or occupant(s) ("Estoppel Letter(s)"). If Seller is unable to obtain such Estoppel Letter(s) the same information shall be furnished by Seller to Buyer within that time period in the form of a Seller's affidavit and Buyer may thereafter contact tenant(s) or occupant(s) to confirm such information. If Estoppel Letter(s) or Seller's affidavit, if any, differ materially from Seller's representations and lease(s) provided pursuant to Paragraph 6, or if tenant(s)/occupant(s) fail or refuse to confirm Seller's affidavit, Buyer may deliver written notice to Seller within 5 days after receipt of such information, but no later than 5 days prior to Closing Date, terminating this Contract and receive a refund of the Deposit, thereby releasing Buyer and Seller from all further obligations under this Contract. Seller shall, at Closing, deliver and assign all leases to Buyer who shall assume Seller's obligations thereunder.

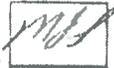

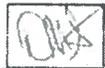

E. LIENS: Seller shall furnish to Buyer at Closing an affidavit attesting (i) to the absence of any financing statement, claims of lien or potential lienors known to Seller and (ii) that there have been no improvements or repairs to the Real Property for 90 days immediately preceding Closing Date. If the Real Property has been improved or repaired within that time, Seller shall deliver releases or waivers of construction liens executed by all general contractors, subcontractors, suppliers and materialmen in addition to Seller's lien affidavit setting forth names of all such general contractors, subcontractors, suppliers and materialmen, further affirming that all charges for improvements or repairs which could serve as a basis for a construction lien or a claim for damages have been paid or will be paid at Closing.

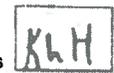

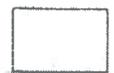

F. TIME: Calendar days shall be used in computing time periods. **Time is of the essence in this Contract.** Other than time for acceptance and Effective Date as set forth in Paragraph 3, any time periods provided for or dates specified in this Contract, whether preprinted, handwritten, typewritten or inserted herein, which shall end or occur on a Saturday, Sunday, or a national legal holiday (see 5 U.S.C. 6103) shall extend to 5:00 p.m. (where the Property is located) of the next business day.

G. FORCE MAJEURE: Buyer or Seller shall not be required to perform any obligation under this Contract or be liable to each other for damages so long as performance or non-performance of the obligation is delayed, caused or prevented by Force Majeure. "Force Majeure" means: hurricanes, earthquakes, floods, fire, acts of God, unusual transportation delays, wars, insurrections, and acts of terrorism, and which, by exercise of reasonable diligent effort, the non-performing party is unable in whole or in part to prevent or overcome. All time periods, including Closing Date, will be extended for the period that the Force Majeure prevents performance under this Contract, provided, however, if such Force Majeure continues to prevent performance under this Contract more than 14 days beyond Closing Date, then either party may terminate this Contract by delivering written notice to the other and the Deposit shall be refunded to Buyer, thereby releasing Buyer and Seller from all further obligations under this Contract.

H. CONVEYANCE: Seller shall convey marketable title to the Real Property by statutory warranty, trustee's, personal representative's, or guardian's deed, as appropriate to the status of Seller, subject only to matters described in STANDARD A and those accepted by Buyer. Personal Property shall, at request of Buyer, be transferred by absolute bill of sale with warranty of title, subject only to such matters as may be provided for in this Contract.

I. CLOSING LOCATION; DOCUMENTS; AND PROCEDURE:

Buyer's Initials  

Seller's Initials  

STANDARDS FOR REAL ESTATE TRANSACTIONS ("STANDARDS") CONTINUED

439 (i) **LOCATION:** Closing will take place in the county where the Real Property is located at the office of the
440 attorney or other closing agent ("Closing Agent") designated by the party paying for the owner's policy of title
441 insurance, or, if no title insurance, designated by Seller. Closing may be conducted by mail or electronic means.

442 (ii) **CLOSING DOCUMENTS:** Seller shall at or prior to Closing, execute and deliver, as applicable, deed, bill of
443 sale, certificate(s) of title or other documents necessary to transfer title to the Property, construction lien
444 affidavit(s), owner's possession and no lien affidavit(s), and assignment(s) of leases. Seller shall provide Buyer
445 with paid receipts for all work done on the Property pursuant to this Contract. Buyer shall furnish and pay for, as
446 applicable the survey, flood elevation certification, and documents required by Buyer's lender.

447 (iii) **PROCEDURE:** The deed shall be recorded upon **COLLECTION** of all closing funds. If the Title Commitment
448 provides insurance against adverse matters pursuant to Section 627.7841, F.S., as amended, the escrow closing
449 procedure required by STANDARD J shall be waived, and Closing Agent shall, **subject to COLLECTION of all**
450 **closing funds**, disburse at Closing the brokerage fees to Broker and the net sale proceeds to Seller.

451 **J. ESCROW CLOSING PROCEDURE:** If Title Commitment issued pursuant to Paragraph 9(c) does not provide
452 for insurance against adverse matters as permitted under Section 627.7841, F.S., as amended, the following
453 escrow and closing procedures shall apply: (1) all Closing proceeds shall be held in escrow by the Closing Agent
454 for a period of not more than 10 days after Closing; (2) if Seller's title is rendered unmarketable, through no fault
455 of Buyer, Buyer shall, within the 10 day period, notify Seller in writing of the defect and Seller shall have 30 days
456 from date of receipt of such notification to cure the defect; (3) if Seller fails to timely cure the defect, the Deposit
457 and all Closing funds paid by Buyer shall, within 5 days after written demand by Buyer, be refunded to Buyer and,
458 simultaneously with such repayment, Buyer shall return the Personal Property, vacate the Real Property and re-
459 convey the Property to Seller by special warranty deed and bill of sale; and (4) if Buyer fails to make timely
460 demand for refund of the Deposit, Buyer shall take title as is, waiving all rights against Seller as to any intervening
461 defect except as may be available to Buyer by virtue of warranties contained in the deed or bill of sale.

462 **K. PRORATIONS; CREDITS:** The following recurring items will be made current (if applicable) and prorated as
463 of the day prior to Closing Date, or date of occupancy if occupancy occurs before Closing Date: real estate taxes
464 (including special benefit tax assessments imposed by a CDD), interest, bonds, association fees, insurance, rents
465 and other expenses of Property. Buyer shall have option of taking over existing policies of insurance, if
466 assumable, in which event premiums shall be prorated. Cash at Closing shall be increased or decreased as may
467 be required by prorations to be made through day prior to Closing. Advance rent and security deposits, if any, will
468 be credited to Buyer. Escrow deposits held by Seller's mortgagee will be paid to Seller. Taxes shall be prorated
469 based on current year's tax with due allowance made for maximum allowable discount, homestead and other
470 exemptions. If Closing occurs on a date when current year's millage is not fixed but current year's assessment is
471 available, taxes will be prorated based upon such assessment and prior year's millage. If current year's
472 assessment is not available, then taxes will be prorated on prior year's tax. If there are completed improvements
473 on the Real Property by January 1st of year of Closing, which improvements were not in existence on January 1st
474 of prior year, then taxes shall be prorated based upon prior year's millage and at an equitable assessment to be
475 agreed upon between the parties, failing which, request shall be made to the County Property Appraiser for an
476 informal assessment taking into account available exemptions. A tax proration based on an estimate shall, at
477 either party's request, be readjusted upon receipt of current year's tax bill. This STANDARD K shall survive
478 Closing.

479 **L. ACCESS TO PROPERTY TO CONDUCT APPRAISALS, INSPECTIONS, AND WALK-THROUGH:** Seller
480 shall, upon reasonable notice, provide utilities service and access to Property for appraisals and inspections,
481 including a walk-through (or follow-up walk-through if necessary) prior to Closing.

482 **M. RISK OF LOSS:** If, after Effective Date, but before Closing, Property is damaged by fire or other casualty
483 ("Casualty Loss") and cost of restoration (which shall include cost of pruning or removing damaged trees) does
484 not exceed 1.5% of Purchase Price, cost of restoration shall be an obligation of Seller and Closing shall proceed
485 pursuant to terms of this Contract. If restoration is not completed as of Closing, a sum equal to 125% of estimated
486 cost to complete restoration (not to exceed 1.5% of Purchase Price), will be escrowed at Closing. If actual cost of
487 restoration exceeds escrowed amount, Seller shall pay such actual costs (but, not in excess of 1.5% of Purchase
488 Price). Any unused portion of escrowed amount shall be returned to Seller. If cost of restoration exceeds 1.5% of
489 Purchase Price, Buyer shall elect to either take Property "as is" together with the 1.5%, or receive a refund of the
490 Deposit, thereby releasing Buyer and Seller from all further obligations under this Contract. Seller's sole obligation
491 with respect to tree damage by casualty or other natural occurrence shall be cost of pruning or removal.

492 **N. 1031 EXCHANGE:** If either Seller or Buyer wish to enter into a like-kind exchange (either simultaneously with
493 Closing or deferred) under Section 1031 of the Internal Revenue Code ("Exchange"), the other party shall
494 cooperate in all reasonable respects to effectuate the Exchange, including execution of documents, provided,

however, cooperating party shall incur no liability or expense related to the Exchange, and Closing shall not be contingent upon, nor extended or delayed by, such Exchange.

O. CONTRACT NOT RECORDABLE; PERSONS BOUND; NOTICE; DELIVERY; COPIES; CONTRACT EXECUTION: Neither this Contract nor any notice of it shall be recorded in any public records. This Contract shall be binding on, and inure to the benefit of, the parties and their respective heirs or successors in interest. Whenever the context permits, singular shall include plural and one gender shall include all. Notice and delivery given by or to the attorney or broker (including such broker's real estate licensee) representing any party shall be as effective as if given by or to that party. All notices must be in writing and may be made by mail, personal delivery or electronic (including "pdf") media. A facsimile or electronic (including "pdf") copy of this Contract and any signatures hereon shall be considered for all purposes as an original. This Contract may be executed by use of electronic signatures, as determined by Florida's Electronic Signature Act and other applicable laws.

P. INTEGRATION; MODIFICATION: This Contract contains the full and complete understanding and agreement of Buyer and Seller with respect to the transaction contemplated by this Contract and no prior agreements or representations shall be binding upon Buyer or Seller unless included in this Contract. No modification to or change in this Contract shall be valid or binding upon Buyer or Seller unless in writing and executed by the parties intended to be bound by it.

Q. WAIVER: Failure of Buyer or Seller to insist on compliance with, or strict performance of, any provision of this Contract, or to take advantage of any right under this Contract, shall not constitute a waiver of other provisions or rights.

R. RIDERS; ADDENDA; TYPEWRITTEN OR HANDWRITTEN PROVISIONS: Riders, addenda, and typewritten or handwritten provisions shall control all printed provisions of this Contract in conflict with them.

S. COLLECTION or COLLECTED: "COLLECTION" or "COLLECTED" means any checks tendered or received, including Deposits, have become actually and finally collected and deposited in the account of Escrow Agent or Closing Agent. Closing and disbursement of funds and delivery of closing documents may be delayed by Closing Agent until such amounts have been COLLECTED in Closing Agent's accounts.

T. LOAN COMMITMENT: "Loan Commitment" means a statement by the lender setting forth the terms and conditions upon which the lender is willing to make a particular mortgage loan to a particular borrower. Neither a pre-approval letter nor a prequalification letter shall be deemed a Loan Commitment for purposes of this Contract.

U. APPLICABLE LAW AND VENUE: This Contract shall be construed in accordance with the laws of the State of Florida and venue for resolution of all disputes, whether by mediation, arbitration or litigation, shall lie in the county where the Real Property is located.

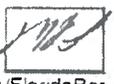

V. FOREIGN INVESTMENT IN REAL PROPERTY TAX ACT ("FIRPTA"): If a seller of U.S. real property is a "foreign person" as defined by FIRPTA, Section 1445 of the Internal Revenue Code requires the buyer of the real property to withhold 10% of the amount realized by the seller on the transfer and remit the withheld amount to the Internal Revenue Service (IRS) unless an exemption to the required withholding applies or the seller has obtained a Withholding Certificate from the IRS authorizing a reduced amount of withholding. Due to the complexity and potential risks of FIRPTA, Buyer and Seller should seek legal and tax advice regarding compliance, particularly if an "exemption" is claimed on the sale of residential property for \$300,000 or less.

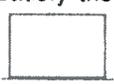

(i) No withholding is required under Section 1445 if the Seller is not a "foreign person," provided Buyer accepts proof of same from Seller, which may include Buyer's receipt of certification of non-foreign status from Seller, signed under penalties of perjury, stating that Seller is not a foreign person and containing Seller's name, U.S. taxpayer identification number and home address (or office address, in the case of an entity), as provided for in 26 CFR 1.1445-2(b). Otherwise, Buyer shall withhold 10% of the amount realized by Seller on the transfer and timely remit said funds to the IRS.

(ii) If Seller has received a Withholding Certificate from the IRS which provides for reduced or eliminated withholding in this transaction and provides same to Buyer by Closing, then Buyer shall withhold the reduced sum, if any required, and timely remit said funds to the IRS.

(iii) If prior to Closing Seller has submitted a completed application to the IRS for a Withholding Certificate and has provided to Buyer the notice required by 26 CFR 1.1445-1(c) (2)(i)(B) but no Withholding Certificate has been received as of Closing, Buyer shall, at Closing, withhold 10% of the amount realized by Seller on the transfer and, at Buyer's option, either (a) timely remit the withheld funds to the IRS or (b) place the funds in escrow, at Seller's expense, with an escrow agent selected by Buyer and pursuant to terms negotiated by the parties, to be subsequently disbursed in accordance with the Withholding Certificate issued by the IRS or remitted directly to the IRS if the Seller's application is rejected or upon terms set forth in the escrow agreement.

(iv) In the event the net proceeds due Seller are not sufficient to meet the withholding requirement(s) in this transaction, Seller shall deliver to Buyer, at Closing, the additional COLLECTED funds necessary to satisfy the

Seller's Initials  

STANDARDS FOR REAL ESTATE TRANSACTIONS ("STANDARDS") CONTINUED

562 applicable requirement and thereafter Buyer shall timely remit said funds to the IRS or escrow the funds for
563 disbursement in accordance with the final determination of the IRS, as applicable.
564 (v) Upon remitting funds to the IRS pursuant to this STANDARD, Buyer shall provide Seller copies of IRS Forms
565 8288 and 8288-A, as filed.
566

566 **W. RESERVED**

567 **X. BUYER WAIVER OF CLAIMS:** *To the extent permitted by law, Buyer waives any claims against Seller
568 and against any real estate licensee involved in the negotiation of this Contract for any damage or
569 defects pertaining to the physical condition of the Property that may exist at Closing of this Contract and
570 be subsequently discovered by the Buyer or anyone claiming by, through, under or against the Buyer.
571 This provision does not relieve Seller's obligation to comply with Paragraph 10(j). This Standard X shall
572 survive Closing.*

Please also note the following:

- If any of the previous terms are not met, the Net Proceeds will not be accepted and the satisfaction will be delayed at your expense.

Twenty one days after 21st Mortgage Corporation receives the approved funds, it will submit the lien release documents to the County to be recorded.

A short sale will result in some portion of the outstanding balance and/or unpaid interest on your loan to be written off. This may have tax consequences to you, and we encourage you to contact a tax professional to discuss any questions you may have. Upon completion of the short sale and when we next report the terms and status of your loan to the credit bureaus, we will report that your loan is paid and settled for less than the total amount due unless it's prohibited due to bankruptcy regulations and/or state law.

If you have any questions, feel free to contact your representative at 1-800-955-0021 ext. 1326. Please note, failure to make your loan payments during the loss mitigation process will result in the accrual of late fees as well as negative credit reporting where allowed by applicable law.

This is neither a demand for payment of a debt nor a notice of personal liability to any recipient whose debt might have been discharged in bankruptcy or who might be subject to automatic stay pursuant to the United States Bankruptcy Code. However, 21st Mortgage needs to learn your intentions concerning the subject property. Regular payments in accordance with the payment schedule in the loan agreement are recommended if you wish to retain possession of the property even though you are not personally liable for any debt or loan that previously related to the property. The lien on the property is still valid under applicable law without a debt or loan accompanying the lien.

Sincerely,

Tiffany Bryan
21st Mortgage Corporation

**BOARD OF COUNTY COMMISSIONERS
AGENDA ITEM SUMMARY**

Meeting Date: February 10, 2016 Department: Planning & Environmental Resources
Bulk Item: Yes No Staff Contact Person/Phone #: Mayté Santamaria 289-2562

AGENDA ITEM WORDING: A public hearing to consider an ordinance by the Monroe County Board of County Commissioners Amending the Monroe County Future Land Use Map from Industrial (I) to Commercial (COMM) for property located at approximate mile marker 9, described as four parcels of land in Section 21, Township 67 South, Range 26 East, Rockland Key, Monroe County Florida, having Real Estate Numbers 00122080.000000, 00122081.000200, 00122010.000000 and 00121990.000000; and from Mixed Use/Commercial Fishing (MCF) and Industrial (I) to Mixed Use/Commercial (MC); creating Policy 107.1.6 Big Coppitt Mixed Use Area 1, to provide limitations on development and specific restrictions; for property located at approximate mile marker 9, described as a parcel of land in Section 21, Township 67 South, Range 26 East, Big Coppitt Key, Monroe County, Florida, having Real Estate Number 00120940.000100; as proposed by Rockland Operations, LLC and Rockland Commercial Center, Inc. (Legislative Proceeding)

ITEM BACKGROUND: An application was originally submitted on May 18, 2012, on behalf of “Toppino Family Companies” to amend the Future Land Use Map for 25 parcels totaling approximately 84 acres on Rockland and Big Coppitt Keys from MCF and I to MC. Staff did not recommend approval of the original proposal and suggested the applicant consider the Commercial (COMM) FLUM category which does not include a residential component. In 2014, after the creation of the COMM FLUM, the applicant amended and reduced the request to amend the FLUM to five total parcels: on Rockland Key from I to COMM, and on Big Coppitt Key from MCF and I to MC, totaling approximately 44 acres (~15 acres MC and ~29 acres COMM.).

On December 10, 2014, the BOCC transmitted the draft ordinance for the proposed FLUM amendment to the Florida Department of Economic Opportunity (DEO), which reviewed the proposal and issued an Objections, Recommendations and Comments (ORC) Report, received by the County on March 23, 2015. The ORC report identified objections regarding increased potential residential development on the Big Coppitt portion of the property, and pointed out that although the applicant claims the proposed FLUM amendment will provide some relief to the affordable housing shortage currently faced by the County, there is no guarantee the site will be used for affordable housing.

In response to the ORC, the applicant prepared a revised proposal for the FLUM amendment based on the ORC report; additional data and analysis, including excerpts from the Monroe County Year 2030 Technical Document, the County’s 2015 Workforce Housing Stakeholder Assessment Report, Key West’s Affordable Housing White Paper dated September 14, 2015, and the requirements of Florida law. The revised proposal requested the same FLUM amendment from MCF and I to MC and COMM, but also included a Comprehensive Plan text amendment, to be adopted simultaneously to respond to the ORC objection, establishing a subarea policy for the Big Coppitt portion of the property restricting any residential use on the subject property to only affordable housing. Staff had also recommended including the following restrictions to the proposed subarea policy: restricting any residential use on the subject property to affordable housing only (with a minimum mix of at least 30% median, at least 30% low, and at least 30% very low income categories); eliminating all potential for market rate permanent residential and/or transient uses on the site; prohibiting new marinas; prohibiting dredging; prohibiting light industrial uses; prohibiting residential buildings in the 70-74 DNL (Day-Night Average Sound Level) noise contour; and requiring sound attenuation for any habitable buildings located within the 70-74 and 65-69 DNL (Day-Night Average Sound Level) noise contours.

The public hearing on November 17, 2015 for above described FLUM and subarea policy was continued to the February 10, 2016 BOCC meeting because the applicant did not agree with the staff recommendation on the mix of affordable housing income categories (mix of at least 30% median, at least 30% low, and at least 30% very low income categories).

On January 11, 2016, the applicant provided a revised subarea proposal (included in staff report and draft ordinance) indicating an alternative for the mix of affordable housing income categories (5% median, 20% low

and very low combined and 75% moderate income categories) and included other amendments in an effort to address concerns from the surrounding community members. The applicant also held a community meeting on January 14, 2016 to offer information on the proposal and hear the surrounding community's concerns/input. Staff attended the community meeting to listen to the public input. Summary provided below.

- *Concern with a congregation of low income neighbors – comments related to potential safety issues and property value concerns (low rental rates and max sales price caps could lower surrounding property values). Asked if applicant would request increased police patrols to the area.*
- Applicant described a proposed amendment to reduce the percentage of lower income groups proposed in the amendment: 5% median, 20% low and very low combined and 75% moderate income categories. The applicant also stated they hope to rent to police officers, teachers, nurses, etc.
- *Concern with potential traffic congestion in the Big Coppitt neighborhood.*
- Applicant described a proposed amendment to the subarea policy to restrict the use of Puerta Drive and showed the community two other possible ingress and egress options for the proposed future affordable housing development; including the creation of direct route through Rockland Key.
- *Concerned with nonresidential uses, such as restaurants, which could increase traffic through the neighborhood.*
- Applicant described a proposed amendment to the subarea policy to eliminate nonresidential uses.
- *Asked why the applicant was requesting mixed use if they were not proposing any nonresidential uses.*
- Applicant stated they requested this category because it provides sufficient density for an affordable housing project but was not the highest density available. For example, a FLUM designation of Residential High (RH) and Urban Residential (UR) zoning provides a density bonus for affordable housing of 25 dwelling units per buildable acre. A FLUM designation of Mixed Use (MC) and Mixed Use (MU) zoning provides a density bonus for affordable housing of 18 dwelling units per buildable acre.
- *Concerned with the development of up to 213 affordable housing units – significant number of units - comments related to potential safety issues and property value concerns. Community asked if the development would be ownership or rental.*
- Applicant stated that the development has not been designed, as the map amendment is the 1st step in the process. As such, a development plan is premature and the total number of units that could fit on the site has not been determined. Applicant noted that it may be lower than the max potential development.
- Applicant stated that the project would be 100% rental.
- *Asked about potential recreational facilities or access to the property – mentioned neighbors were previously allowed to access property to watch the sunset.*
- Applicant stated that if this project moves forward that their intention was to include some recreational facilities, possibly a club house, pool or something similar. Applicant stated that they appreciate of the comment and could work with the community on providing access to the recreational facilities.
- Applicant described a proposed amendment to the subarea policy to eliminate nonresidential uses and allow residential accessory uses such as club house or recreational activities.

Based upon the applicant's concern of obtaining financing to develop an affordable housing project with a majority of the units as the lower income categories and the surrounding community members expressed concern with having a large composition of the lower income categories adjacent to their neighborhood, staff recommends a few edits to the applicant's proposal. Staff recommends, in an effort to provide for the existing workforce, an increase of the proposed median income category (highest income group of the lower income groups) to provide for a little more mix in affordable housing income categories. The suggestion would result in a mix of 10% median, 20% low and very low combined and 70% moderate income categories.

Based upon the revised subarea policy, the proposed FLUM amendment, as shown in the table below, would eliminate market rate residential and transient development potential, provide for an increase in affordable housing development potential, and eliminate nonresidential use development potential:

Net Change in Development Potential for Total Site	Proposed FLUM Amendment Alone	Proposed FLUM Amendment with Proposed Revised Subarea Policy
	Residential (allocated): +27.1 du Residential (max net): +122.6 du Transient: +222.5 rooms/spaces Nonresidential: (-204,013) SF	Market Rate Residential: 0 du Affordable Residential (max net): +122.6 du [213 total] Transient: 0 rooms Nonresidential: (-474,710) SF

Normally, the County has 180 days from the date of receipt of the ORC to adopt the FLUM amendment, adopt the FLUM amendment with changes or not adopt the FLUM amendment. The 180 day deadline for action by the County would be September 19, 2015; however, the County requested an extension to this deadline from DEO (as requested by the applicant). The new deadline for County action is March 15, 2016.

The applicant has also proposed a corresponding Land Use District (Zoning) map amendment.

PREVIOUS RELEVANT BOCC ACTION:

On December 10, 2014, at a regularly scheduled meeting, the Board of County Commissioners adopted Resolution #375-2014, transmitting to the state land planning agency an ordinance amending the FLUM for the subject property from MCF and I to COMM and MC.

On July 15, 2015, at a regularly scheduled meeting, the Board of County Commissioners approved sending a request to the State Land Planning Agency requesting an extension of time to adopt the Future Land Use Map amendments transmitted to the State Land Planning Agency on December 10, 2014 via Resolution 374-2014 (two parcels on Key Largo) and Resolution 375-2014 (for four parcels on Rockland Key and one parcel on Big Coppitt).

On November 17, 2015, at a regularly scheduled meeting, the Board of County Commissioners continued the public hearing for the proposed FLUM amendment from MCF and I to COMM and MC and the corresponding subarea policy to February 10, 2016.

33
34 **WHEREAS**, the ORC report identified objections regarding increased potential
35 residential development on the Big Coppitt portion of the property, and pointed out that although
36 the applicant claims the proposed FLUM amendment will provide some relief to the affordable
37 housing shortage currently faced by the County, there is no guarantee the site will be used for
38 affordable housing; and

39
40 **WHEREAS**, the ORC report specifically states: *The applicant makes the argument that*
41 *housing in Monroe county is in short supply, the cost of that housing is too high and therefore,*
42 *this amendment adds to the available affordable housing by re-designating 14.83 acres to mixed*
43 *use which can accommodate a multi-family affordable housing development project of*
44 *significant size. However, there is nothing in the amendment which provides assurance that any*
45 *future residential development on this property will be for affordable housing; and*

1 **WHEREAS**, the ORC report recommended that the BOCC either not adopt the
2 amendment, or revise the amendment to allow uses other than residential uses; and
3

4 **WHEREAS**, normally, the County has 180 days from the date of receipt of the ORC to
5 adopt the FLUM amendment, adopt the FLUM amendment with changes or not adopt the FLUM
6 amendment, which would have given the BOCC a deadline of September 19, 2015; and
7

8 **WHEREAS**, the County requested and was granted an extension to the deadline from
9 DEO, which gives the BOCC a new deadline of March 15, 2016 to adopt the FLUM amendment,
10 adopt the FLUM amendment with changes or not adopt the FLUM amendment; and
11

12 **WHEREAS**, in response to the ORC, the applicant prepared a revised proposal for the
13 FLUM amendment based on the ORC report, additional data and analysis, and the requirements
14 of Florida law. The revised proposal requested the same FLUM amendment from MCF and I to
15 MC and COMM, but also included a Comprehensive Plan text amendment, to be adopted
16 simultaneously to respond to the ORC objections, establishing a subarea policy for the Big
17 Coppitt portion of the property restricting any residential use on the subject property to only
18 affordable housing; and
19

20 **WHEREAS**, staff had also recommended including the following restrictions to the
21 proposed subarea policy: restricting any residential use on the subject property to affordable
22 housing only (with a minimum mix of at least 30% median, at least 30% low, and at least 30%
23 very low income categories); eliminating all potential for market rate permanent residential
24 and/or transient uses on the site; prohibiting new marinas; prohibiting dredging; prohibiting light
25 industrial uses; prohibiting residential buildings in the 70-74 DNL (Day-Night Average Sound
26 Level) noise contour; and requiring sound attenuation for any habitable buildings located within
27 the 70-74 and 65-69 DNL (Day-Night Average Sound Level) noise contours; and
28

29 **WHEREAS**, at a regularly scheduled meeting on 17th day of November, 2015, the
30 BOCC continued the public hearing to consider adoption of the proposed FLUM amendment and
31 subarea policy because the applicant did not agree with staff recommendation on the mix of
32 affordable housing income categories (mix of at least 30% median, at least 30% low, and at least
33 30% very low income categories); and
34

35 **WHEREAS**, On January 11, 2016, the applicant provided a revised subarea proposal
36 indicating an alternative for the mix of affordable housing income categories and included other
37 amendments in an effort to address concerns from the surrounding community members; and
38

39 **WHEREAS**, based upon the applicant's concern of obtaining financing to develop an
40 affordable housing project with a majority of the units as the lower income categories and the
41 surrounding community members expressed concern with having a large composition of the
42 lower income categories adjacent to their neighborhood, staff recommends in effort to provide
43 for the existing workforce, an increase of the proposed median income category (highest income
44 group of the lower income groups) to provide for a little more mix in affordable housing income
45 categories. The suggestion would result in a mix of 10% median, 20% low and very low
46 combined and 70% moderate income categories.

III. PREVIOUS RELEVANT ACTIONS

The application was originally submitted on May 18, 2012 on behalf of Rockland Operations, LLC, Frank P. Toppino Limited Partnership, Frank P. Toppino Land Trust No. 1, Rockland Recycling Center, Inc., Edward Toppino Family Limited Partnership, Edward Toppino Sr. Land Trust, Frank P. Toppino Family Limited Partnership, and Toppino Land Trust, LLC (collectively, "Toppino Family Companies"). The original request was to amend the Future Land Use Map for 25 parcels on Rockland and Big Coppitt Keys from Industrial (I) and Mixed Use/Commercial Fishing (MCF) to Mixed Use/Commercial (MC).

The request was reviewed by the Development Review Committee (DRC) at their regularly scheduled meeting on November 27, 2012 with a recommendation of denial, due to the significant increase in potential residential (+364 dwelling units) and transient (+1,202 rooms/spaces) density, and related issues including limited ROGO allocations, potential increases to hurricane evacuation time, and the location of said density being within the 65+DNL (day-night average sound level) noise contour, which, based upon Navy documentation, includes recommendations to prohibit residential development. Staff at that time recommended the applicant consider the Commercial (COMM) FLUM category, as that category allows similar uses and intensity but does not include a residential component.

The applicant amended the application to the current request by Rockland Operations, LLC and Rockland Commercial Center, Inc. to amend the FLUM for only five parcels on Rockland and Big Coppitt Keys from Mixed Use/Commercial Fishing (MCF) and Industrial (I) to Commercial (COMM) and Mixed Use/Commercial (MC). Compared to the original application, the current request reduces the overall amount of land proposed for FLUM amendment from 84 acres to 44 acres; and reduces the amount of land proposed to be given an MC FLUM designation from 84 acres to approximately 15 acres of MC FLUM and 29 acres of COMM FLUM.

During Applicant's revisions to the request, the Toppino Family Companies transferred several of the subject parcels from various entities to Rockland Operations, LLC for estate planning purposes.

At its regularly scheduled meeting on April 29, 2014, the Monroe County Development Review Committee reviewed and discussed the revised FLUM amendment proposal.

At its regularly scheduled meeting on August 27, 2014, the Monroe County Planning Commission held a public hearing for review and consideration of the revised FLUM amendment proposal and recommended approval, as memorialized in Resolution P39-14 (Exhibit 1).

On December 10, 2014, at a regularly scheduled meeting, the BOCC adopted Resolution #375-2014 (Exhibit 2), transmitting to the state land planning agency an ordinance amending the FLUM for the subject property from Mixed Use/Commercial Fishing (MCF) and Industrial (I) to Mixed Use/Commercial (MC) and Commercial (COMM).

The draft ordinance was transmitted to the Florida Department of Economic Opportunity (DEO), which reviewed the proposal and issued an Objections, Recommendations and

Comments (ORC) report, received by the County on March 23, 2015. The ORC report with all state agency comments as well as the County's response to the ORC report is attached as Exhibit 3.

The ORC report identified an objection regarding increased potential residential development on the Big Coppitt portion of the property, and pointed out that although the applicant claims the proposed FLUM amendment will provide some relief to the affordable housing shortage currently faced by the County, there is no guarantee the site will be used for affordable housing. Specifically, the ORC report stated (bold formatting added):

The applicant makes the argument that housing in Monroe county is in short supply, the cost of that housing is too high and therefore, this amendment adds to the available affordable housing by re-designating 14.83 acres to mixed use which can accommodate a multi-family affordable housing development project of significant size. However, there is nothing in the amendment which provides assurance that any future residential development on this property will be for affordable housing.

The ORC report recommended that the BOCC either not adopt the amendment, or revise the amendment to allow uses other than residential uses. Normally, the County has 180 days from the date of receipt of the ORC to adopt the FLUM amendment, adopt the FLUM amendment with changes or not adopt the FLUM amendment. The 180 day deadline for action by the County would be September 19, 2015; however, the County requested an extension to this deadline from DEO (as requested by the applicant). The new deadline for County action is March 15, 2016.

In response to the ORC, the applicant prepared a revised proposal for the FLUM amendment based on the ORC report; additional data and analysis, including excerpts from the Monroe County Year 2030 Technical Document (Exhibit 4), the County's 2015 Workforce Housing Stakeholder Assessment Report (Exhibit 5), Key West's Affordable Housing White Paper dated September 14, 2015 (Exhibit 6), and the requirements of Florida law. The revised proposal requested the same FLUM amendment from MCF and I to MC and COMM, but also included a Comprehensive Plan text amendment, to be adopted simultaneously to respond to the ORC objections, establishing a subarea policy for the Big Coppitt portion of the property restricting any residential use on the subject property to only affordable housing. Staff had also recommended including the following restrictions to the proposed subarea policy: restricting any residential use on the subject property to affordable housing only (with a minimum mix of at least 30% median, at least 30% low, and at least 30% very low income categories); eliminating all potential for market rate permanent residential and/or transient uses on the site; prohibiting new marinas; prohibiting dredging; prohibiting light industrial uses; prohibiting residential buildings in the 70-74 DNL (Day-Night Average Sound Level) noise contour; and requiring sound attenuation for any habitable buildings located within the 70-74 and 65-69 DNL (Day-Night Average Sound Level) noise contours.

The proposed text amendment to the Monroe County Year 2010 Comprehensive Plan, as presented at the November 17, 2015 public hearing reads:

Policy 107.1.6 Big Coppitt Mixed Use Area 1 -To Provide Limitations on Development and Specific Restrictions

Development in the Big Coppitt Mixed Use Area 1 shall be subject to regulations applicable to the Mixed Use/Commercial (MC) Future Land Use Designation as well as an additional restriction set out below:

1. Residential units developed on the Big Coppitt Mixed Use Area 1 shall be restricted to affordable housing only (with a minimum mix of at least 30% median, at least 30% low, and at least 30% very low income categories) and subject to affordable housing regulations pursuant to Section 130-161 of the Monroe County Code of Ordinances.
2. There shall be no market rate or transient residential units.
3. There shall be no new marinas.
4. There shall be no dredging.

Update since November 17, 2015 BOCC meeting:

The public hearing on November 17, 2015 for this item was continued to the February 10, 2016 BOCC meeting because the applicant did not agree with staff recommendation on the mix of affordable housing income categories (mix of at least 30% median, at least 30% low, and at least 30% very low income categories).

On January 11, 2016, the applicant provided a revised subarea proposal indicating an alternative for the mix of affordable housing income categories and included other amendments in an effort to address concerns from the surrounding community members (revised draft provided below and attached as Exhibit 11).

Applicant recommendation:

Policy 107.1.6 Big Coppitt Mixed Use Area 1 -To Provide Limitations on Development and Specific Restrictions

Development in the Big Coppitt Mixed Use Area 1 shall be subject to regulations applicable to the Mixed Use/Commercial (MC) Future Land Use Designation as well as an additional restriction set out below:

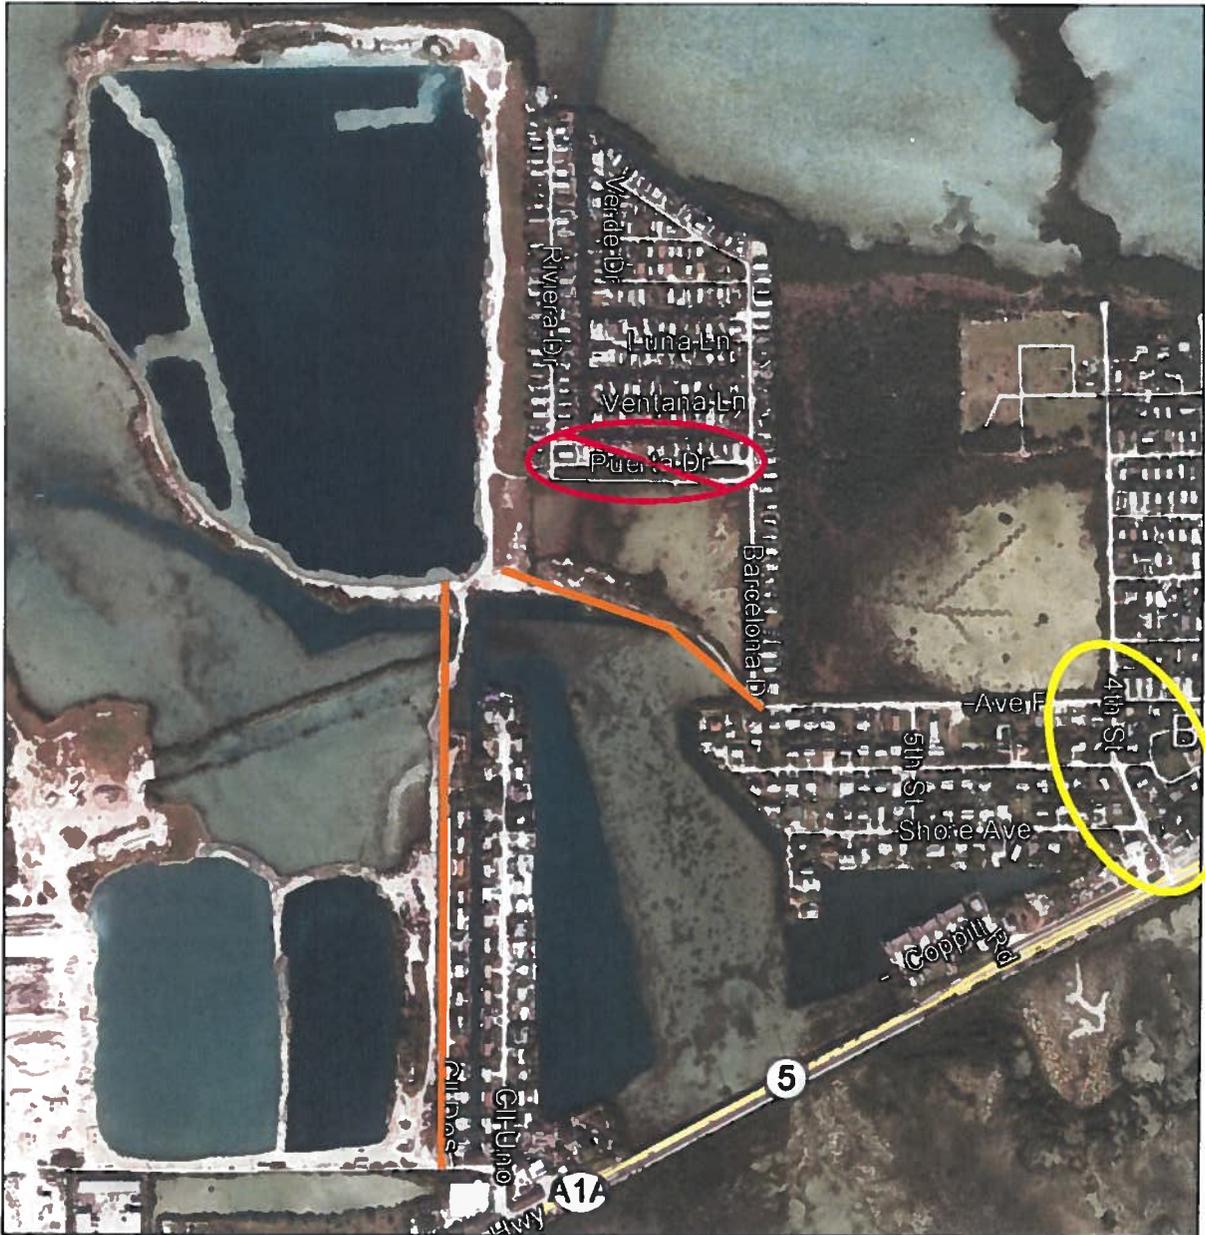

1. Residential units developed on the Big Coppitt Mixed Use Area 1 shall be restricted to affordable housing only (with a minimum mix of at least 30% median, **and** at least a 30% combination of low, and at least 30% very low income categories) and subject to affordable housing regulations pursuant to Section 130-161 of the Monroe County Code of Ordinances.
2. **There shall be no nonresidential uses. Accessory uses to the residential development, such as a club house or recreational activities are permitted.**
3. There shall be no market rate or transient residential units.
4. **There shall be no new marinas.**
- 4.5. There shall be no dredging.
5. **There shall be no light industrial uses.**
- 5.6. All habitable buildings located within the 65-69 DNL (Day-Night Average Sound Level) noise contour pursuant to the 2013 Navy Environmental Impact Statement shall be sound attenuated to achieve an indoor Noise Level Reduction of at least 25 decibels.
- 6.7. No residential buildings shall be located within the 70-74 DNL.
7. **Any development located within the Big Coppitt Mixed Use Area 1 shall not utilize Puerta Drive for ingress and egress.**
8. **All habitable buildings located within the 70-74 DNL noise contour pursuant to the 2013 Navy Environmental Impact Statement shall be sound attenuated to achieve an indoor Noise Level Reduction of at least 30 decibels.**

The Big Coppitt Mixed Use Area 1, with Real Estate No. 00120940-000100 is approximately 14.8 acres of vacant land and is legally described as:....

Additionally, the applicant held a community meeting on January 14, 2016 to offer information on the proposal and hear the surrounding community's concerns/input. Staff attended the community meeting to listen to the public input. Based on the meeting, the following includes the perceived main comments on the proposed FLUM amendment (public comment summarized in green italics below).

- *Concern with a congregation of low income neighbors – comments related to potential safety issues and property value concerns (low rental rates and max sales price caps could lower surrounding property values). Asked if applicant would request increased police patrols to the area.*
- County staff previously recommended a mix of 30% median, 30% low, 30% very low and 10% moderate income categories to provide a variety of affordable housing opportunities for the workforce.
- Applicant described a proposed amendment to reduce the percentage of lower income groups proposed in the amendment: 5% median, 20% low and very low combined and 75% moderate income categories. The applicant also stated they hope to rent to police officers, teachers, nurses, etc.
- It appeared the community was concerned with the very low and low income categories and with the lower rental rates that could be charged to those occupants.
- *Concern with potential traffic congestion in the Big Coppitt neighborhood.*

- Applicant described a proposed amendment to the subarea policy to restrict the use of Puerta Drive (red circle below) and showed the community two other possible ingress and egress options for the proposed future affordable housing development (approx. locations indicated in orange below); including the creation of direct route through Rockland Key.
 - The community still expressed concerns with potential congestion on 4th Street and the ability to safely access U.S. 1 without excessive delays.
 - As a note, if the FLUM amendment is approved and the applicant moves forward with a proposed residential development, a traffic study will be required for the specific proposal to identify if any transportation improvements would be necessary (for example, potential need for right and/or left turn lane on U.S. 1).

- *Concerned with nonresidential uses, such as restaurants, which could increase traffic through the neighborhood.*

- Applicant described a proposed amendment to the subarea policy to eliminate nonresidential uses.
- *Asked why the applicant was requesting mixed use if they were not proposing any nonresidential uses.*
- Applicant stated they requested this category because it provides sufficient density for an affordable housing project but was not the highest density available. For example, a FLUM designation of Residential High (RH) and Urban Residential (UR) zoning provides a density bonus for affordable housing of 25 dwelling units per buildable acre. A FLUM designation of Mixed Use (MC) and Mixed Use (MU) zoning provides a density bonus for affordable housing of 18 dwelling units per buildable acre.
- *Concerned with the development of up to 213 affordable housing units – significant number of units - comments related to potential safety issues and property value concerns.*
- Applicant stated that the development has not been designed, as the map amendment is the 1st step in the process. As such, a development plan is premature and the total number of units that could fit on the site has not been determined. Applicant noted that it may be lower than the max potential development.
- *Community asked if the development would be ownership or rental.*
- Applicant stated that the project would be 100% rental.
- *Asked about on-site management for the affordable housing rental development - comments related to potential safety issues, property value concerns as well as the storage of vehicles and boats.*
- Applicant stated that if this project moves forward that there would definitely be on-site management, conditions for background checks for potential tenants and rules for complex/development which could include “no boats or no storage of boats.”
- *Asked about potential recreational facilities or access to the property – mentioned neighbors were previously allowed to access property to watch the sunset.*
- Applicant stated that if this project moves forward that their intention was to include some recreational facilities, possibly a club house, pool or something similar. Applicant stated that they appreciative of the comment and could work with the community on providing access to the recreational facilities.
- Applicant described a proposed amendment to the subarea policy to eliminate nonresidential uses and allow residential accessory uses such as club house or recreational activities.

Based upon the applicant’s concern of obtaining financing to develop an affordable housing project with a majority of the units as the lower income categories and the surrounding community members expressed concern with having a large composition of the lower income categories adjacent to their neighborhood, staff recommends a few edits to the applicant’s proposal. Staff recommends, in an effort to provide for the existing workforce, an increase of the proposed median income category (highest income group of the lower income groups) to provide for a little more mix in affordable housing income categories. The suggestion would result in a mix of 10% median, 20% low and very low combined and 70% moderate income categories. Staff also

recommends maintaining provision #8 of the subarea policy to ensure the proposal is consistent with the Navy Air Installation Compatibility Use Zones (“AICUZ”) Land-Use Compatibility Recommendations and that potential habitat accessory structures are also sound attenuated.

Staff recommendation:

Policy 107.1.6 Big Coppitt Mixed Use Area 1 -To Provide Limitations on Development and Specific Restrictions

2. **There shall be no nonresidential uses. Accessory uses to the residential development, such as a club house or recreational facilities are permitted.**
3. There shall be no market rate or transient residential units.
4. ~~There shall be no new marinas.~~
- 4.5. There shall be no dredging.
5. ~~There shall be no light industrial uses.~~
- 5.6. ~~All habitable buildings located within the 65-69 DNL (Day-Night Average Sound Level) noise contour pursuant to the 2013 Navy Environmental Impact Statement shall be sound attenuated to achieve an indoor Noise Level Reduction of at least 25 decibels.~~

7. **Any development located within the Big Coppitt Mixed Use Area 1 shall not utilize Puerta Drive for ingress and egress.**
8. All habitable buildings located within the 70-74 DNL noise contour pursuant to the 2013 Navy Environmental Impact Statement shall be sound attenuated to achieve an indoor Noise Level Reduction of at least 30 decibels.

The Big Coppitt Mixed Use Area 1, with Real Estate No. 00120940-000100 is approximately 14.8 acres of vacant land and is legally described as:....

All three options for the proposed subarea policy are included in the ordinance for the BOCC’s consideration, direction and decision on the proposed amendment.

<p>*Based on the initial proposed Comprehensive Plan text amendment which will accompany the corresponding FLUM amendment, a subarea policy for the Big Coppitt portion of the property will restrict any residential use on the subject property to only affordable housing; eliminate all potential for market rate permanent residential and/or transient uses on the site; prohibit new marinas; prohibit dredging; prohibit light industrial uses on the site; prohibit residential buildings in the 70-74 DNL (Day-Night Average Sound Level) noise contour; and require sound attenuation for any habitable buildings located within the 70-74 and 65-69 DNL (Day-Night Average Sound Level) noise contours.</p> <p>**Applicant’s proposed revision to the subarea policy eliminates all potential for nonresidential uses, market rate and transient residential uses.</p> <p>Note: The above table provides an approximation of the development potential for residential, transient and commercial development. Please note, Section 130-156 of the Land Development Code states: <i>The density and intensity provisions set out in this section are intended to be applied cumulatively so that no development shall exceed the total density limits of this article. For example, if a development includes both residential and commercial development, the total gross amount of development shall not exceed the cumulated permitted intensity of the parcel proposed for development.</i></p>		

As shown in the table above, based on the proposed Comprehensive Plan subarea policy, the proposed FLUM amendment would result in zero density for market rate residential development; an increase in overall potential residential development (under max net density for affordable housing) of 122.6 dwelling units; zero density for transient unit development o; and a *decrease* in overall potential nonresidential development of 474,710 square feet of floor area.

B. Maintaining Hurricane Evacuation & Discouraging Increases in Density/Intensity

1. Monroe County Rule 28-20.140, F.A.C. (ratified by the Legislature in 2011), includes Work Program tasks requiring hurricane evacuation clearance time analyses and a Memorandum of Understanding (MOU), with the Division of Emergency Management, Monroe County, City of Marathon, Village of Islamorada, City of Key West, City of Key Colony Beach, and City of Layton regarding hurricane evacuation.

The County and the other jurisdictions in the Keys regulate new residential growth through a permit allocation system. The basis for the permit allocation rate and distribution is the ability to maintain a 24-hour evacuation clearance time. Monroe County has created a staged evacuation process wherein mobile home residents, transient units and military personnel are required to evacuate prior to all other residential properties. Based upon recent analysis, the hurricane evacuation clearance time model runs, the County's hurricane Memorandum of Understanding with the Department of Emergency Management, Department of Economic Opportunity and the incorporated jurisdictions within the County, and maximum build-out from the Work Program, the County received 1,970 allocations over the next 10 years, which places the residential evacuation time at approximately the 24-hour evacuation time limitation.

Although the proposed FLUM amendment and subarea policy would result in an increase in potential affordable housing development of 122 dwelling units, the County has a bank of approx. 200 unused affordable housing allocations from past ROGO years available for new affordable dwelling units, as well as 710 additional affordable housing allocations as provided by the State (710 of the 1,970 allocations over the next 10 years are to be used for affordable housing). Therefore, the potential increase of 122 new residential units is within our ROGO allocation limit (1,970 total) and is not expected to cause the staged evacuation times to exceed the 24-hour limit.

2. On September 21, 2012, the Monroe County BOCC adopted Ordinance 028-2012, creating Policy 101.4.20 discouraging private applications for future land use changes which increase allowable density/intensity and creates a mechanism to allow increases in density and intensity with the donation of IS lots (1:1 basis) or acreage (2:1 basis) to the County that contains non-scarified native upland habitat or wetland habitat. This amendment was found in-compliance by the State Land Planning Agency and became effective upon the issuance of DEO's Notice of Intent on November 20, 2012. The adopted policy states that its provisions are applicable only to private applications "received after the effective date of this ordinance..." The initial application for the proposed FLUM amendment was received on May 18, 2012, prior to the effective date of the ordinance; therefore this policy does not apply to this FLUM amendment request.

C. Military Compatibility

The DEO ORC report included:

The entire amendment lies within the Military Installation Area of Impact (MIAI). The fifth parcel is within the 65-69 Day-Night Average Noise Level (DNL). Comprehensive Plan policy 108.2.6 adopts MIAI Land Use Table. The table contains “permitted uses allowed”, “allowed with restrictions”, “uses generally incompatible (allowed with exceptions)”, and “uses not compatible and should be prohibited” for each DNL category. Within the 65-69 DNL, residential uses are listed as “uses generally incompatible (allowed with exceptions)” Some uses are allowed with restrictions.

The DEO ORC also includes an attached letter from NASKW stating:

...[NASKW] is not in favor of any increased residential density in high noise areas 65 DNL and above. Per Naval instruction, residential use is discouraged in DNL 65 - 69 and strongly discouraged in DNL 70-74. The absence of viable alternative development options should be determined and an evaluation should be conducted locally prior to local approvals indicating that a demonstrated community need for the residential use would not be met if development were prohibited in these zones. Where the community determines that these uses must be allowed, measures to achieve an outdoor to indoor Noise Level Reduction (NLR) of at least 25 dB in DNL 65-69 and NLR of 30 dB in DNL 70-74 should be incorporated into building codes and be in individual approvals; for transient housing a NLR of at least 35 dB should be incorporated in DNL 75 - 79.

On May 22, 2012, the County adopted amendments to the Comprehensive Plan to address military compatibility criteria (Ord 012-2012). These Comprehensive Plan amendments require applicants for FLUM amendments within the MIAI (Military Installation Area of Impact) received after the effective date of the policies (July 19, 2012) to provide a supplemental noise study, based on professionally accepted methodology, if NASKW indicates the property is within a noise zone greater than 65 DNL. The initial application for the proposed FLUM amendment was received on May 18, 2012, prior to the effective date of the recently adopted Military Compatibility Policies; therefore these policies do not apply to this FLUM amendment request and it does not trigger any of the additional noise study requirements.

The Navy issued the Record of Decision on October 31, 2013, for the Final Environmental Impact Statement (EIS) for Naval Air Station Key West Airfield Operations. In the Final EIS, the Navy approved “Alternative 2” as the preferred alternative, and the associated noise contours. The noise contours are shown in Figure 1 on the following page.

The results of the EIS analysis produced a map of contours of the noise environment from NAS Key West airfield operations which identifies the subject properties within the 65-69 DNL (blue solid contour), 70-74 DNL (green solid contour) and 75-79 DNL (yellow solid contour). A magnified excerpt of the noise contours are shown in Figure 2 on the following page.

The proposed FLUM amendment along with the restrictions in the proposed subarea policy would eliminate all potential residential uses on property located in the 75-79 DNL and 70-74 DNL, directing potential future residential uses onto property located within the 65-69 DNL

and requiring sound attenuation for all habitable buildings within the 65-69 DNL and 70-74 DNL.

Note, the BOCC discussed and reviewed Policy 108.2.5 (policy which requires applicants requesting FLUM amendments within the MIAI to provide a supplemental noise study) and directed staff to eliminate the text which requires the supplemental noise study. As part of the Comprehensive Plan Update, the BOCC transmitted the proposed amendments to Policy 108.2.5 to the Florida Department of Economic Opportunity (DEO) in February, 2015. On May 1, 2015, the County received DEO's Objections, Recommendations and Comments (ORC) report regarding the proposed amendments. The ORC report did not include any objections or comments regarding the proposed amendment to Policy 108.2.5 eliminating the requirement for a supplemental noise study. The proposed amendments are anticipated to be considered by the BOCC for adoption in the spring of 2016.

Residential Uses

As can be readily ascertained from the Navy Air Installation Compatibility Use Zones ("AICUZ") Land-Use Compatibility Recommendations (see "Table G-1" from the EIS – shown on pages 15-18 of this staff report) residential uses are strongly discouraged in the 70-74 DNL. Currently, approximately 3.7 acres subject to the proposed FLUM amendment already permit residential uses within this zone.

Although the proposed FLUM amendment on its own would leave 1.1 acres open to potential residential uses within the 70-74 DNL, the additional restrictions in the proposed subarea policy would also prohibit residential buildings within the 70-74 DNL. The proposed amendment would remove any potential of residential uses from the 75-79 DNL and simultaneously permit the parcels located within a 65-69 DNL to increase their residential density. Therefore the potential residential density would be relocated from higher to lower DNL zones.

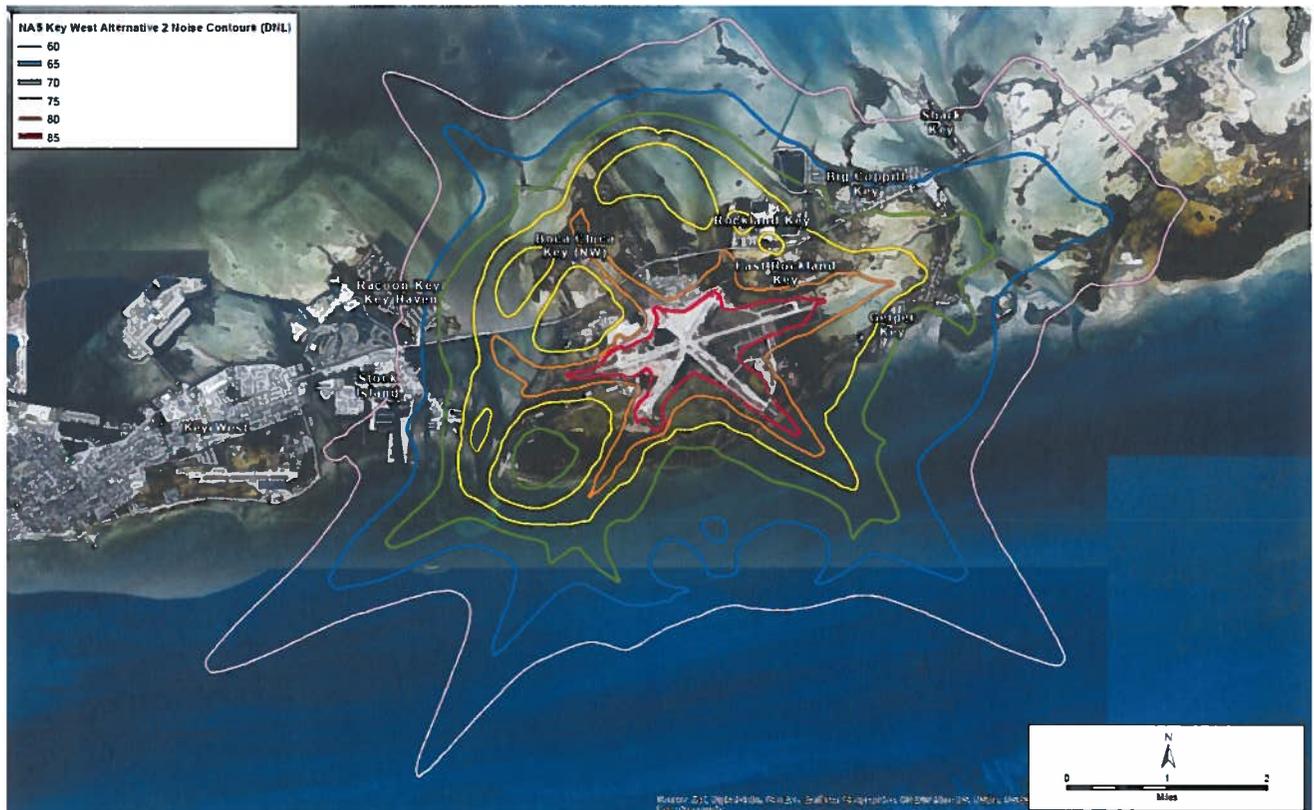

Figure 1. Noise Contours Map (EIS “Alternative 2”)

Figure 2. Magnified Excerpt from Noise Contours Map (EIS “Alternative 2”)

Additionally, according to the Navy's AICUZ Land-Use Compatibility Recommendations, residential uses are only discouraged in the 65-69 DNL (and strongly discouraged in the 70-74 DNL) and are recommended to be located in other areas unless a study is undertaken identifying the need for housing.

Monroe County has already undertaken numerous studies, including its most recent Evaluation and Appraisal Report, and the 2015 Workforce Housing Stakeholder Assessment Report (see Exhibit 5), which identifies the need for affordable housing in the lower Florida Keys. The proposed FLUM amendment could assist in addressing this need. As can be seen in the attached maps (Exhibit 8), there are limited locations in the Lower Keys for potential larger scale affordable housing developments. Moreover, the parcel proposed for an increase in potential density is nearly entirely within the 65-69 DNL and adjacent to an existing, developed residential subdivision within the Residential High future land use designation. The amendment to a Mixed Use/Commercial designation would allow a variety of affordable residential and commercial uses compatible with the adjacent residential neighborhood.

The proposed FLUM amendment along with the restrictions in the proposed subarea policy would result in a potential increase of up to 122 affordable residential dwelling units. Household units are *strongly discouraged* in the 70-74 DNL and *discouraged* in the 65-69 DNL; and household units are listed by the Navy as not compatible and should be prohibited in the 75-79 DNL. The proposed subarea policy would also prohibit residential buildings within the 70-74 DNL. The proposed amendment would therefore serve to move any potential residential units completely out of both the 70-74 DNL and 75-79 DNL, in accordance with NASKW compatibility recommendations. All potential residential development would be relocated to the 65-69 DNL, which is the lowest noise level on the subject properties, and sound attenuated to achieve an outdoor to indoor Noise Level Reduction of at least 25 decibels.

Non-Residential Uses

The application proposes to reduce the total potential nonresidential square footage by up to 474,710 square feet. Additionally, the properties subject to the requested FLUM amendment to Commercial (COMM) are located within the 70-74 DNL and 75-79 DNL. Commercial uses such as commercial retail, industrial and offices are all permissible within this noise level according to the Navy's AICUZ Land-Use Compatibility Recommendations, albeit with recommendations of measures to achieve an outdoor to indoor noise level reduction of 25-30 decibels for certain portions of these buildings. The proposed subarea policy to accompany the proposed FLUM amendment would require that all habitable buildings located within the 65-69 DNL be sound attenuated to achieve an outdoor to indoor noise level reduction of at least 25 decibels, and that all habitable buildings located within the 70-74 DNL be sound attenuated to achieve an outdoor to indoor noise level reduction of at least 30 decibels.

25, 30, or 35	Land use and related structures generally compatible; measures to achieve NLR of 25, 30, or 35 must be incorporated into design and construction of structure.							
DNL	Day-night average sound level.							
CNEL	Community Noise Equivalent Level (normally within a very small decibel difference of DNL)							
Ldn	Mathematical symbol for DNL.							

Notes for Table G-1:

1. General
 - a. Although local conditions regarding the need for housing may require residential use in these zones, residential use is discouraged in DNL 65 to 69 and strongly discouraged in DNL 70 to 74. The absence of viable alternative development options should be determined and an evaluation should be conducted locally prior to local approvals indicating that a demonstrated community need for the residential use would not be met if development were prohibited in these zones.
 - b. Where the community determines that these uses must be allowed measures to achieve and outdoor to indoor NLR of at least 25 Decibels (dB) in DNL 65 to 69 and NLR of 30 dB in DNL 70 to 74 should be incorporated into building codes and be in individual approvals; for transient housing a NLR of at least 35 dB should be incorporated in DNL 75 to 79.
 - c. Normal permanent construction can be expected to provide a NLR of 20 dB, thus the reduction requirements are often stated as 5, 10 or 15 dB over standard construction and normally assume mechanical ventilation, upgraded sound transmission class ratings in windows and doors and closed windows year round. Additional consideration should be given to modifying NLR levels based on peak noise levels or vibrations.
 - d. NLR criteria will not eliminate outdoor noise problems. However, building location and site planning, design and use of berms and barriers can help mitigate outdoor noise exposure NLR particularly from ground level sources. Measures that reduce noise at a site should be used wherever practical in preference to measures that only protect interior spaces.
2. Measures to achieve NLR of 25 must be incorporated into the design and construction of portions of these buildings where the public is received, office areas, noise sensitive areas or where the normal noise level is low.
3. Measures to achieve NLR of 30 must be incorporated into the design and construction of portions of these buildings where the public is received, office areas, noise sensitive areas or where the normal noise level is low.
4. Measures to achieve NLR of 35 must be incorporated into the design and construction of portions of these buildings where the public is received, office areas, noise sensitive areas or where the normal noise level is low.
5. If project or proposed development is noise sensitive, use indicated NLR. If not, land use is compatible without NLR.
6. No buildings.
7. Land use compatible provided special sound reinforcement systems are installed.
8. Residential buildings require a NLR of 25
9. Residential buildings require a NLR of 30.
10. Residential buildings not permitted.
11. Land use not recommended, but if community decides use is necessary, hearing protection devices should be worn.

D. Floodplain Regulations

As discussed throughout this staff report, the proposed FLUM amendment would change the types of uses permitted on the property (for example, from heavy industrial uses to residential uses) and would change the maximum potential density ranges on the property for affordable housing. The proposed FLUM amendment (and its associated zoning amendment) is one step in the pursuit of developing the property, as the map amendments do not approve any site plans, building permits or floodplain development permits, and do not provide and County Rate of Growth Ordinance (ROGO) allocations.

The proposed FLUM amendment does not affect the floodplain regulations for the subject property. It does not waive nor reduce any floodplain requirements for any potential future development on the subject parcel(s).

The Big Coppitt portion of the site is primarily within an AE Zone (EL 10') with the northern portion within a VE Zone (EL 16'; 14; and 12'). The applicant has indicated they plan to place the affordable housing on the portion of the site within the AE Zone; however, the County has not received any applications for development approval at this time.

At the time the owner applies for development permits, they will be required to meet all floodplain regulations in the Monroe County Land Development Code (Chapter 122) and the Florida Building Code (FBC) as well as FEMA guidance, etc.

E. Applicant's Amendment Basis and Data & Analysis for the Requested FLUM Amendment:

The Amendment contemplates the previously discussed changing trends in the economy and regulatory environment. Furthermore, based on input from staff, and also review of the current adjoining uses surrounding the parcels, it has been determined that the proposed amendments allows the parcels to be utilized to their highest and best use with de minimis impacts on neighboring properties and the surrounding environment.

Specifically, Rockland Key adjoins the Navy's Boca Chica military air installation base which is subject to high noise events. Part of Rockland Key is located within the Navy jet potential crash zone. Therefore, currently, Rockland Key is not suitable for residential development. The Industrial FLU permits residential development. The newly enacted Commercial FLU does not permit residential development, but permits non-residential, commercial uses compatible with military air installations.

In contrast, Rockland Operations' property located on Big Coppitt Key is adjacent to a residential area that has a Future Land Use Map Designation Residential High (RH). Rockland Operations' Big Coppitt property is also located next to an old burrow pit that is compatible with residential uses. Currently, all studies identify a complete and total deficiency of scarified, undeveloped land suitable for future residential development in the lower keys close to the largest employment center of the lower keys, Key West. Specifically, land suitable for an affordable housing project. Rockland Operations desires to develop such a project.

According to Florida Housing data compiled by the University of Florida the 2012 average home value price in unincorporated Monroe County was \$551,485 [\$478,985 per Florida Housing Data Clearinghouse] compared to a statewide average of \$160,174. Monroe County's median gross rent for 2012 was \$1,269 [\$1,390 per 2012 American Community Survey 1-Year Estimates] compared to a statewide average of \$981 [\$954 per 2012 American Community Survey 1-Year Estimates]. In Monroe County, the HUD Fair Market Rent in 2012, representing rent for a typical modest apartment, was \$946 for a studio apartment, \$1152 for a one-bedroom, \$1,419 for a two-bedroom, \$2,065 for a three-bedroom, and \$2,211 for a four-bedroom unit.

More alarming is the percentage of households whose mortgages exceed the HUD threshold for being considered cost burdened due to their mortgage payments. According to HUD, "Cost-burdened" households pay more than 30% of income for rent or mortgage costs. This is also the standard used by the Florida Department of Economic Opportunity. In 2009, 12,927 [5,848 unincorporated per Florida Housing Data Clearinghouse] Monroe County households (37%) pay more than 30% of income for housing. By comparison, 29% of households statewide are cost-burdened. 6,177 [2,795 per Florida Housing Data Clearinghouse] households in [unincorporated] Monroe County (18%) pay more than 50% of income for housing!

Of the 12,226 [4,278 per Florida Housing Data Clearinghouse] renters, Cost burdened households exceeding 30% of income is 5,124 [1,794 per Florida Housing Data Clearinghouse], of which, 2,423 [846 per Florida Housing Data Clearinghouse] households spend over 50% [50% or more] of their income on rent. This equates to 42% of households being cost burdened by rent and of this 42%, 20% of all households pay in excess of 50% of their income towards rent.

From 2000-2010, the housing inventory has only increased 3% whereas in the prior decade, 1990-2000, the housing inventory increased almost 15%. The drastic decline in new housing has led to higher home sales and rent prices leading to an ever increasing demand for affordable housing. During the 1990s, Monroe County averaged 509 building permits per year for residential homes, including averaging 96 building permits for multi-family housing. From 2000-2010, multi-family building permits issued per year decreased to an average of 7.8 per year.

In unincorporated Monroe County for the year 2010, 60.9% of the total households are estimated to have incomes in the moderate range or below. As reported by the Monroe County Affordable Housing Report, dated November 2007, the County is the most cost burdened small-county in the State. Monroe County has the highest affordability gap of all counties in the State. An average of 5,545 households would need and qualify for affordable housing assistance. By the year 2030, the percentage will increase to 62.4%. Monroe County's adopted Comprehensive Plan Evaluation and Appraisal Report ("EAR") recommends encouraging options for affordable housing. The EAR further recommends that the County should consider the vast majority of the available dwelling units for development as multi-family so as to provide affordable housing. The proposed FLUM amendment accomplishes this goal by rezoning 14 acres mixed use which can accommodate a multi-family affordable housing development project of significant size.

F. Impact on Community Character

As shown in Figure 3 below, parcels surrounding the subject property currently have FLUM designations of Industrial, Mixed Use/Commercial Fishing, Residential High, Residential Medium, Residential Conservation, Mixed Use/Commercial, and Military (across US1). Land uses surrounding the subject property include residential to the east, and a mixture of light/heavy industrial and vacant land to the west and southwest. Land across US1 to the south is vacant wetlands.

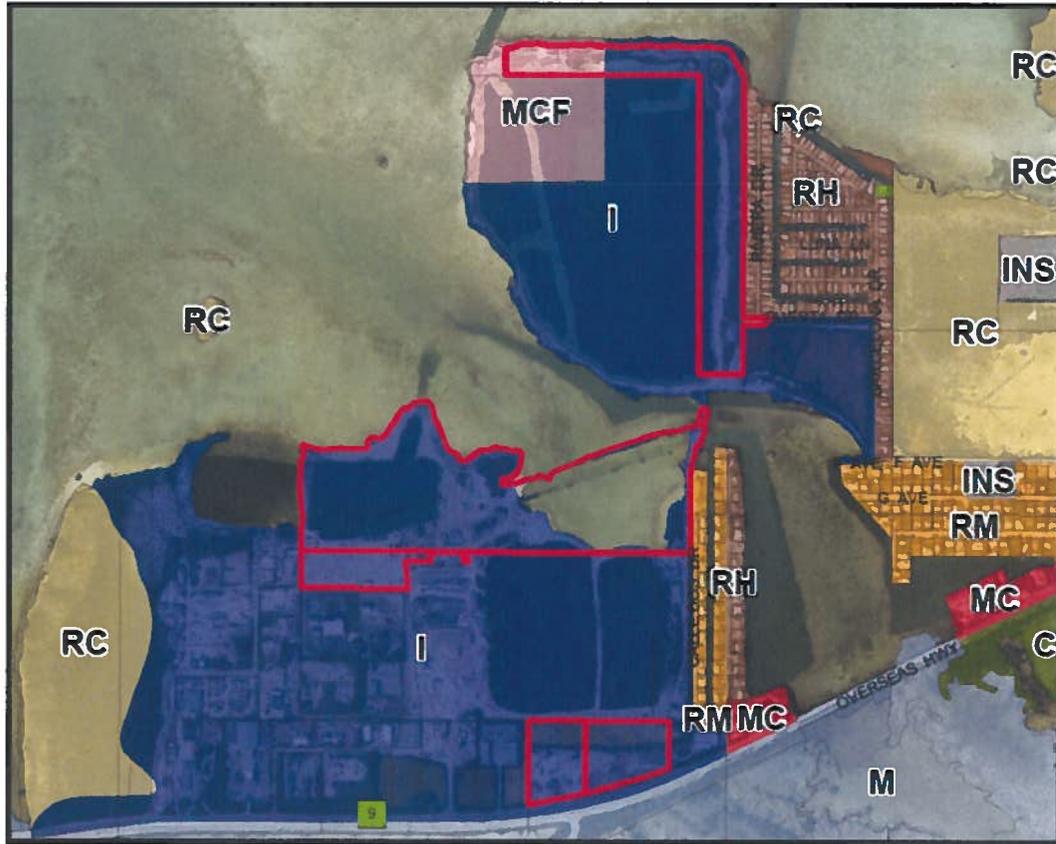

Figure 3. Subject parcels with existing FLUM designations

The portion of the site proposed for MU zoning, which would potentially allow affordable housing residential development, is adjacent to an existing residential area within an RH FLUM and URM Zoning district.

The subject parcels are classified as “undeveloped land” and “water” (borrow pits) on the County’s habitat type maps. The subject parcels are designated as habitat for one protected species, the brown pelican (listed as a State Species of Special Concern); however, the County does not have any adopted development controls relative to the brown pelican.

As shown in Figure 4, most of the site has a tier designation of Tier III. A small portion (half an acre) on Rockland Key has a tier designation of Tier I. The majority of the site is scarified, consisting of pea-rock, gravel, borrow pits, and some grassy areas.

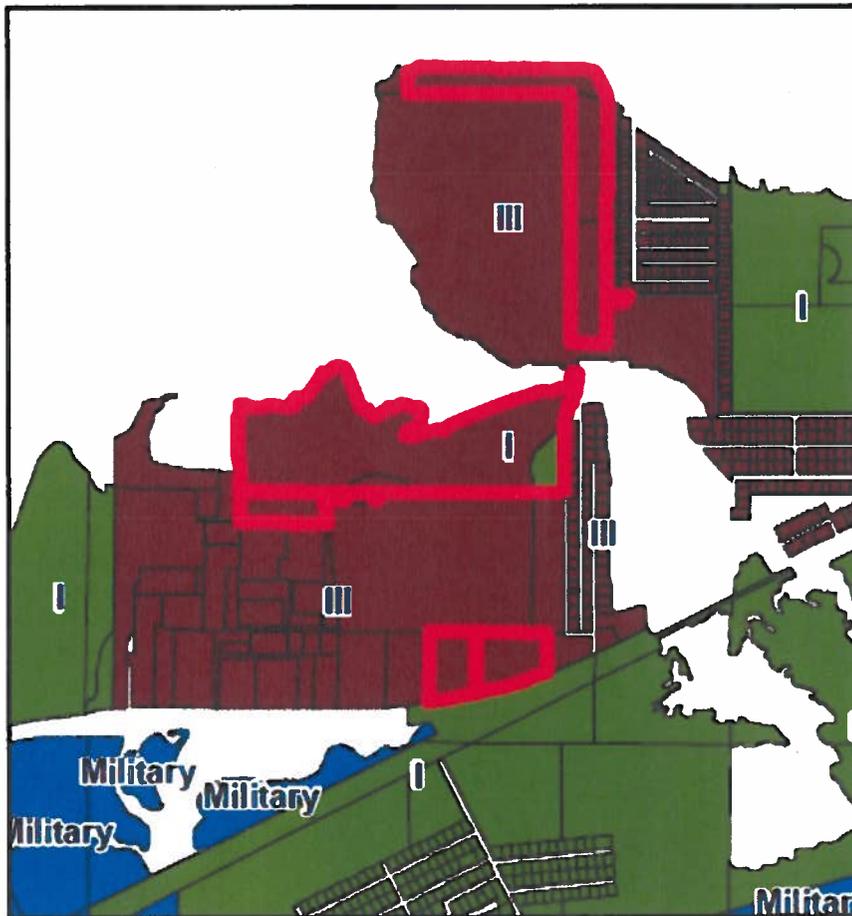

Figure 4. Tier Designations

The proposed FLUM amendment is not anticipated to have an adverse effect on the community character of the area.

G. Effects on Public Facilities

Traffic Circulation (Policy 301.1.1)

According to the 2015 US.1 Arterial Travel Time and Delay Study, at the present time, US 1 is operating overall at a Level of Service (LOS) C. In the Lower Keys Area, the segments from the area of the request to Key West are operating at a LOS B or better and the segments from the area of the request to Big Pine Key are operating at a LOS C or better. The request is located in the area of Segments 2 and 3, which are operating at levels of service A and B respectively.

- Segment 2 Boca Chica (4-L/D) Key Haven Blvd. to Rockland Dr. (5,167 Reserve Trips) – LOS A
- Segment 3 Big Coppitt (2-L/U) Rockland Dr. to Boca Chica Rd. (1,292 Reserve Trips) – LOS B

The applicant submitted a trip generation analysis prior to transmittal of the proposed FLUM amendment. URS (County consultant) reviewed the analysis and confirmed that the proposed FLUM amendment would result in a trip generation reduction of 7,933 trips per day.

Consistent with the density and intensity analysis provided in this staff report, the trip generation analysis includes an increase of 1,613 daily trips from a 2.50 acre FLUM change from Mixed Use/Commercial Fishing (MCF) with a maximum FAR of 0.40 to Mixed Use/Commercial (MC) with a maximum FAR of 0.60; no change in daily trips resulting from a 12.33 acre FLUM change from Industrial (I) to Mixed Use/Commercial (MC) as both categories have the identical 0.60 maximum FAR; and a decrease of 9,546 daily trips from a 29.59 acre FLUM change from Industrial (I) with a maximum FAR of 0.60 to Commercial (COMM) with a maximum FAR of 0.50. Cumulatively these would result in a potential decrease of 7,933 vehicle trips per day. The full analysis is attached as Exhibit 9. (*Note: the trip generation analysis used the maximum FAR of 0.60 for the MC FLUM, which is only applicable to Maritime Industries zoning; intensity analysis in this staff report used a maximum FAR of 0.45 for the MC FLUM, which corresponds to all other zoning categories under the MC FLUM. Trip generation using 0.45 FAR would result in an even greater decrease in potential traffic.*)

Therefore, the proposed FLUM amendment is not anticipated to negatively impact the traffic LOS. Traffic analysis for specific development proposals will be reviewed as part of the development approval process.

Potable Water (Policy 701.1.1)

FKAA's Water Treatment Facility in Florida City has a maximum water treatment design capacity of 29.8 million gallons per day (MGD). This consists of 23.8 MGD from the Biscayne Aquifer through the primary conventional water treatment process and 6 MGD from the brackish Floridan Aquifer through the secondary Reverse Osmosis (RO) treatment plant. There are also two saltwater Reserve Osmosis (RO) plants, located on Stock Island and Marathon, which are able to produce potable water under emergency conditions. The RO desalination plants have design capacities of 2.0 and 1.0 MGD of water, respectively. The 2012 projection for annual average daily demand is 17.62 MGD which is well below FKAA's Water Use Permit amount of 23.98 MGD.

Pursuant to Policy 701.1.1 of the Comprehensive Plan, the Level of Service standard for nonresidential potable water is 0.35 gallons per square foot per day. The proposed FLUM amendment decreases the site's maximum nonresidential development potential by 204,013 SF, which would decrease potential potable water demand.

Pursuant to Policy 701.1.1 of the Comprehensive Plan, the Level of Service standard for residential potable water is 66.5 gallons per capita per day. The proposed FLUM amendment would increase the potential affordable residential development by 122 dwelling units, which would increase potential potable water demand by 18,173 gallons per day if developed to its maximum affordable residential potential.

Currently there is sufficient capacity for such an increase.

Solid Waste (Policy 801.1.1)

Monroe County has a contract with Waste Management through September 30, 2024. The contract authorizes the use of in-state facilities; thereby, providing the County with approximately ten years of guaranteed capacity for the haul out and disposal of 95,000

tons/year of solid waste not including yard waste. Under the proposed FLUM categories, the net increase in potential affordable residential units on the site is 122 dwelling units. Currently there is sufficient capacity for such an increase. Nonresidential solid waste is handled by private contract.

Sanitary Sewer (Policy 901.1.1)

The property will be served by the Big Coppitt Wastewater Treatment Plant. The Big Coppitt Wastewater Treatment Plant has a design capacity of 0.323 MGD. The current average daily flow is 0.130 MGD and therefore the plant has sufficient capacity for the increase in residential development potential associated with the proposed map amendment.

H. Consistency with the provisions and intent of the Monroe County Year 2010 Comprehensive Plan

The proposed amendment is consistent with the Goals, Objectives and Policies of the Monroe County Year 2010 Comprehensive Plan. Specifically, the amendment furthers:

Goal 101

Monroe County shall manage future growth to enhance the quality of life, ensure the safety of County residents and visitors, and protect valuable natural resources.

Objective 101.4

Monroe County shall regulate future development and redevelopment to maintain the character of the community and protect the natural resources by providing for the compatible distribution of land uses consistent with the designations shown on the Future Land Use Map.

Policy 101.4.5

The principal purpose of the Mixed Use/ Commercial land use category is to provide for the establishment of commercial land use (zoning) districts where various types of commercial retail and office may be permitted at intensities which are consistent with the community character and the natural environment. Employee housing and commercial apartments are also permitted. In addition, Mixed Use/Commercial land use districts are to establish and conserve areas of mixed uses, which may include maritime industry, light industrial uses, commercial fishing, transient and permanent residential, institutional, public, and commercial retail uses.

This land use category is also intended to allow for the establishment of mixed use development patterns, where appropriate. Various types of residential and non-residential uses may be permitted; however, heavy industrial uses and similarly incompatible uses shall be prohibited. The County shall continue to take a proactive role in encouraging the maintenance and enhancement of community character and recreational and commercial working waterfronts.

In order to protect environmentally sensitive lands, the following development controls shall apply to all hammocks, pinelands, and disturbed wetlands within this land use category:

1. only low intensity commercial uses shall be allowed;
2. a maximum floor area ratio of 0.10 shall apply; and
3. maximum net residential density shall be zero.

Policy 101.4.21

The principal purpose of the Commercial (COMM) future land use category is to provide for the establishment of commercial zoning districts where various types of commercial retail; highway-oriented sales and services; commercial recreation; light industrial; public, institutional and office uses may be permitted at intensities which are consistent with the community character and the natural environment. The commercial zoning districts established within this category are intended to serve the immediate vicinity or serve the Upper or Lower subarea. This category is not intended to accommodate transient or permanent residential development.

In order to protect environmentally sensitive lands, the following development controls shall apply to all Tier I lands within this land use category:

1. only low intensity commercial uses shall be allowed; and
2. a maximum floor area ratio of 0.15 shall apply.

Policy 101.4.22

Monroe County hereby adopts the following density and intensity standards for the future land use categories, which are shown on the Future Land Use Map and described in Policies 101.4.1 - 101.4.17:

Future Land Use Densities and Intensities			
Future Land Use Category And Corresponding Zoning	Allocated Density ^(b) (per acre)	Maximum Net Density ^(a) ^{(b) (i)} (per buildable acre)	Maximum Intensity (floor area ratio)
Commercial (COMM) (C1 and C2 zoning)	0 du 0 rooms/spaces	N/A N/A	0.15-0.50
Mixed Use/Commercial (MC) ^{(b) (i)} (SC, UC, DR, RV, MU and MI zoning)	1-6 du 5-15 rooms/spaces 1 du (MI zoning)	2 -18 du 10-25 rooms/spaces 2 du (MI zoning)	0.10-0.45 (SC, UC, DR, RV, and MU zoning) 0.30-0.60 (MI zoning)

Pursuant to Section 380.0552(7) Florida Statutes, the proposed amendment is consistent with the Principles for Guiding Development as a whole.

J. The proposed amendment is consistent with the Part II of Chapter 163, Florida Statutes (F.S.). Specifically, the amendment furthers:

163.3161(4), F.S. - It is the intent of this act that local governments have the ability to preserve and enhance present advantages; encourage the most appropriate use of land, water, and resources, consistent with the public interest; overcome present handicaps; and deal effectively

with future problems that may result from the use and development of land within their jurisdictions. Through the process of comprehensive planning, it is intended that units of local government can preserve, promote, protect, and improve the public health, safety, comfort, good order, appearance, convenience, law enforcement and fire prevention, and general welfare; facilitate the adequate and efficient provision of transportation, water, sewerage, schools, parks, recreational facilities, housing, and other requirements and services; and conserve, develop, utilize, and protect natural resources within their jurisdictions.

163.3161(6), F.S. - It is the intent of this act that adopted comprehensive plans shall have the legal status set out in this act and that no public or private development shall be permitted except in conformity with comprehensive plans, or elements or portions thereof, prepared and adopted in conformity with this act.

163.3177(1), F.S. - The comprehensive plan shall provide the principles, guidelines, standards, and strategies for the orderly and balanced future economic, social, physical, environmental, and fiscal development of the area that reflects community commitments to implement the plan and its elements. These principles and strategies shall guide future decisions in a consistent manner and shall contain programs and activities to ensure comprehensive plans are implemented. The sections of the comprehensive plan containing the principles and strategies, generally provided as goals, objectives, and policies, shall describe how the local government's programs, activities, and land development regulations will be initiated, modified, or continued to implement the comprehensive plan in a consistent manner. It is not the intent of this part to require the inclusion of implementing regulations in the comprehensive plan but rather to require identification of those programs, activities, and land development regulations that will be part of the strategy for implementing the comprehensive plan and the principles that describe how the programs, activities, and land development regulations will be carried out. The plan shall establish meaningful and predictable standards for the use and development of land and provide meaningful guidelines for the content of more detailed land development and use regulations.

163.3177(6)(a)2., F.S. - The future land use plan and plan amendments shall be based upon surveys, studies, and data regarding the area, as applicable, including:

- a. The amount of land required to accommodate anticipated growth.
- b. The projected permanent and seasonal population of the area.
- c. The character of undeveloped land.
- d. The availability of water supplies, public facilities, and services.
- e. The need for redevelopment, including the renewal of blighted areas and the elimination of nonconforming uses which are inconsistent with the character of the community.
- f. The compatibility of uses on lands adjacent to or closely proximate to military installations.
- g. The compatibility of uses on lands adjacent to an airport as defined in s. 330.35 and consistent with s. 333.02.
- h. The discouragement of urban sprawl.
- i. The need for job creation, capital investment, and economic development that will strengthen and diversify the community's economy.
- j. The need to modify land uses and development patterns within antiquated subdivisions.

163.3177(6)(a)8., F.S. - Future land use map amendments shall be based upon the following analyses:

- a. An analysis of the availability of facilities and services.
- b. An analysis of the suitability of the plan amendment for its proposed use considering the character of the undeveloped land, soils, topography, natural resources, and historic resources on site.
- c. An analysis of the minimum amount of land needed to achieve the goals and requirements of this section.

163.3178(8)(a), F.S. - A proposed comprehensive plan amendment shall be found in compliance with state coastal high-hazard provisions if:

1. The adopted level of service for out-of-county hurricane evacuation is maintained for a category 5 storm event as measured on the Saffir-Simpson scale; or
2. A 12-hour evacuation time to shelter is maintained for a category 5 storm event as measured on the Saffir-Simpson scale and shelter space reasonably expected to accommodate the residents of the development contemplated by a proposed comprehensive plan amendment is available; or
3. Appropriate mitigation is provided that will satisfy subparagraph 1. or subparagraph 2. Appropriate mitigation shall include, without limitation, payment of money, contribution of land, and construction of hurricane shelters and transportation facilities. Required mitigation may not exceed the amount required for a developer to accommodate impacts reasonably attributable to development. A local government and a developer shall enter into a binding agreement to memorialize the mitigation plan.

163.3194(1)(b), F.S. - All land development regulations enacted or amended shall be consistent with the adopted comprehensive plan, or element or portion thereof, and any land development regulations existing at the time of adoption which are not consistent with the adopted comprehensive plan, or element or portion thereof, shall be amended so as to be consistent. If a local government allows an existing land development regulation which is inconsistent with the most recently adopted comprehensive plan, or element or portion thereof, to remain in effect, the local government shall adopt a schedule for bringing the land development regulation into conformity with the provisions of the most recently adopted comprehensive plan, or element or portion thereof. During the interim period when the provisions of the most recently adopted comprehensive plan, or element or portion thereof, and the land development regulations are inconsistent, the provisions of the most recently adopted comprehensive plan, or element or portion thereof, shall govern any action taken in regard to an application for a development order.

V. PROCESS

Comprehensive Plan Amendments may be proposed by the Board of County Commissioners, the Planning Commission, the Director of Planning, or the owner or other person having a contractual interest in property to be affected by a proposed amendment. The Director of Planning shall review and process applications as they are received and pass them onto the Development Review Committee and the Planning Commission.

The Planning Commission shall hold at least one public hearing. The Planning Commission shall review the application, the reports and recommendations of the Department of Planning & Environmental Resources and the Development Review Committee and the testimony given at the public hearing. The Planning Commission shall submit its recommendations and findings to the Board of County Commissioners (BOCC). The BOCC then holds a public

hearing to consider the transmittal of the proposed comprehensive plan amendment, and considers the staff report, staff recommendation, and the testimony given at the public hearing. The BOCC may or may not recommend transmittal to the State Land Planning Agency. The amendment is transmitted to the State Land Planning Agency, which then reviews the proposal and issues an Objections, Recommendations and Comments (ORC) Report. Upon receipt of the ORC report, the County has 180 days to adopt the amendments, adopt the amendments with changes or not adopt the amendments.

VI. RECOMMENDATION

Staff recommends APPROVAL of the proposed amendment to the Future Land Use Map (FLUM) of the Monroe County Year 2010 Comprehensive Plan from Industrial (I) and Mixed Use/Commercial Fishing (MCF) to Commercial (COMM) and Mixed Use/Commercial (MC) for five (5) parcels located on Rockland Key and Big Coppitt Key, having real estate numbers 00122080.000000, 00122081.000200, 00122010.000000, 00121990.000000, and 00120940.000100; and to create Comprehensive Plan Policy 107.1.6 Big Coppitt Mixed Use Area 1, to provide limitations on development and specific restrictions for the Big Coppitt portion of the site, as described in detail in this staff report (three options described below):

Option 1 – initial proposed subarea policy:

- restricting any residential use on the subject property to affordable housing only (with a minimum mix of at least 30% median, at least 30% low, and at least 30% very low income categories);
- eliminating all potential for market rate permanent residential and/or transient uses on the site;
- prohibiting new marinas; prohibiting dredging; prohibiting light industrial uses on the site;
- prohibiting residential buildings in the 70-74 DNL (Day-Night Average Sound Level) noise contour; and requiring sound attenuation for any habitable buildings located within the 70-74 and 65-69 DNL (Day-Night Average Sound Level) noise contours.

Option 2 – Applicant revision:

- restricting any residential use on the subject property to affordable housing only (with a minimum mix of at least 5% median, at least 20% of low and very low combined);
- eliminating all potential for market rate permanent residential and/or transient uses on the site;
- prohibiting all potential for nonresidential uses on the site; allowing residential accessory uses;
- prohibiting dredging;
- prohibiting residential buildings in the 70-74 DNL (Day-Night Average Sound Level) noise contour; and requiring sound attenuation for any habitable buildings located within the ~~70-74~~ and 65-69 DNL (Day-Night Average Sound Level) noise contours; and
- restricting the use of Puerta Drive for ingress and egress for any development located within the Big Coppitt Mixed Use Area 1

Option 3- Staff recommended edits to Applicant revision:

- restricting any residential use on the subject property to affordable housing only (with a minimum mix of at least 10% median, at least 20% of low and very low combined);
- eliminating all potential for market rate permanent residential and/or transient uses on the site;
- prohibiting all potential for nonresidential uses on the site; allowing residential accessory uses;
- prohibiting dredging;
- prohibiting residential buildings in the 70-74 DNL (Day-Night Average Sound Level) noise contour; and requiring sound attenuation for any habitable buildings located within the 70-74 and 65-69 DNL (Day-Night Average Sound Level) noise contours; and

- restricting the use of Puerta Drive for ingress and egress for any development located within the Big Coppitt Mixed Use Area 1

The FLUM amendment with the subarea restrictions would increase the site's potential for residential development (limited to affordable housing units) by 122 dwelling units [max potential of 213 du]. The amendment would serve to relocate these potential units to the lowest noise level areas on the subject properties and include measures to achieve noise level reductions of 25-30 decibels as recommended by the Navy's AICUZ Land-Use Compatibility Recommendations. Although these potential dwelling units would require ROGO allocations, the County has an excess of ROGO allocations specifically designated for affordable dwelling units and currently factored into hurricane evacuation time modeling. The proposed amendment also reduces the nonresidential development potential by approximately 474,710 square feet; The proposed amendment would also decrease the maximum potential trip generation by 7,933 vehicle trips per day.

Exhibit 1 to Ordinance# -2014

The Monroe County Future Land Use Map is amended as indicated above.

Proposal: Future Land Use change of five parcels of land on Big Coppitt Key having Real Estate Numbers: 00120940-000100, 00122080-000000, 00122081-000200, 00122010-000000 and 00121990-000000 from Industrial (I) to Commercial (COMM) and Mixed Use/Commercial (MC).

The Department of Economic Opportunity had the following objections and comments to the proposed FLUM (map) amendment (shown in blue throughout this report):

Objection: Resolution 375-2014 proposes to amend the future land use map for five parcels on Rockland Key totaling 44.42 acres. The County proposes to change the land use designation on four of the parcels from Industrial to Commercial. The Commercial designation does not allow for residential and the Department has no objections for this portion of the amendment. However, the fifth parcel (RE# 00120940-000100) is 14.83 acres and proposes to amend the land use designation from Industrial (12.33 acres) and Mixed Use/Commercial Fishing (2.5 acres) to Mixed Use Commercial for a total of 14.83 acres. The potential increase in residential development potential is 27 dwelling units or 221 rooms and a reduction of 204,013 square feet of nonresidential. The potential increase on the 14.83 acre parcel is 56 dwelling units or 221 rooms and a reduction of 75,119 square feet of nonresidential.

To address this DEO objection, the applicant and County developed a sub-area policy that further limits development on the Big Coppitt portion of the amendment. The proposed Comprehensive Plan text amendment creating a subarea policy for the Big Coppitt portion of the property, which accompanies the FLUM amendment, restricts the residential uses on the subject property to only affordable housing; eliminates all market rate permanent residential and/or transient uses on the subject property; prohibits new nonresidential uses on the subject property; prohibits residential buildings in the 70-74 DNL (Day-Night Average Sound Level) noise contour; and requires sound attenuation for any habitable buildings located within the 70-74 and 65-69 DNL (Day-Night Average Sound Level) noise contours.

The development potential with the proposed subarea policy is provided below (note no market rate or transient units or nonresidential uses would be permitted on Big Coppitt parcel):

*Based on the initial proposed Comprehensive Plan text amendment which will accompany the corresponding FLUM amendment, a subarea policy for the Big Coppitt portion of the property will restrict any residential use on the subject property to only affordable housing; eliminate all potential for market rate permanent residential and/or transient uses on the site; prohibit new marinas; prohibit dredging; prohibit light industrial uses on the site; prohibit residential buildings in the 70-74 DNL (Day-Night Average Sound Level) noise contour; and require sound attenuation for any habitable buildings located within the 70-74 and 65-69 DNL (Day-Night Average Sound Level) noise contours.

**Applicant’s proposed revision to the subarea policy eliminates all potential for nonresidential uses, market rate and transient residential uses.

Note: The above table provides an approximation of the development potential for residential, transient and commercial development. Please note, Section 130-156 of the Land Development Code states: *The density and intensity provisions set out in this section are intended to be applied cumulatively so that no development shall exceed the total density limits of this article. For example, if a development includes both residential and commercial development, the total gross amount of development shall not exceed the cumulated permitted intensity of the parcel proposed for development.*

The entire amendment lies within the Military Installation Area of Impact (MIAI). The fifth parcel is within the 65-69 Day-Night Average Noise Level (DNL). Comprehensive Plan policy 108.2.6 adopts MIAI Land Use Table. The table contains “permitted uses allowed”, “allowed with restrictions”, “uses generally incompatible (allowed with exceptions)”, and “uses not compatible and should be prohibited” for each DNL category. Within the 65-69 DNL, residential uses are listed as “uses generally incompatible (allowed with exceptions)” Some uses are allowed with restrictions. A note for this category states:

***Uses Generally Incompatible (allowed with exceptions). The land use and related structures are generally incompatible.*

Note 1

a) Although local conditions regarding the need for housing may require residential use in these Zones, residential use is discouraged in DNL 65-69 and strongly discouraged in DNL 70-74. The absence of viable alternative development options should be determined and an evaluation should be conducted locally prior to local approvals indicating that a demonstrated community need for the residential use would not be met if development were prohibited in these Zones.

N/A - this FLUM application was submitted (May 18, 2012) prior to effective date (July 19, 2012) of Military Installation Area of Impact (MIAI) policies. Policy 108.2.6 specifically states: "For any application received after the effective date of this policy, within the MIAI overlay, Monroe County will not approve NEW land uses, as demonstrated on the MIAI Land Use Table (permitted uses shown in Column #2), through a Future Land Use Map, Text, overlay or LUD map amendment."

On May 22, 2012, the County adopted amendments to the Comprehensive Plan to address military compatibility criteria (Ord 012-2012). These Comp Plan amendments require applicants for FLUM amendments within the MIAI received after the effective date of the policies (July 19, 2012) to be subject to additional coordination and restrictions, including a supplemental noise study, if the property is within a noise zone greater than 65 DNL. The initial application for the proposed FLUM amendment was received on May 18, 2012, prior to the effective date of the adopted Military Compatibility Policies; therefore, these policies do not apply to this FLUM amendment request and it does not trigger any of the additional noise study requirements.

The Navy issued the Record of Decision on October 31, 2013, for the Final Environmental Impact Statement (EIS) for Naval Air Station Key West Airfield Operations. In the Final EIS, the Navy approved "Alternative 2" as the preferred alternative, and the associated noise contours. The results of the EIS analysis produced a map of contours of the noise environment from NAS Key West airfield operations which identifies the subject properties within the 65-69 DNL, 70-74 DNL and 75-79 DNL. According to the *Navy's AICUZ Land-Use Compatibility Recommendations*, residential uses are discouraged in the 65-69 DNL (and strongly discouraged in the 70-74 DNL) and are recommended to be located in other areas unless a study is undertaken identifying the need for housing. Where a need is identified by the community, then measures to achieve an outdoor to indoor noise level reduction of at least 25 decibels should be incorporated. Normal construction is expected to provide a noise level reduction of 20 decibels.

The proposed FLUM amendment along with the restrictions in the proposed subarea policy would eliminate all potential residential uses on property located in the 75-79 DNL and 70-74 DNL, directing potential future affordable housing residential uses onto property located within the 65-69 DNL and requiring sound attenuation for all habitable buildings within the 65-69 DNL and 70-74 DNL.

Further, Monroe County has undertaken numerous studies, including its most recent Evaluation and Appraisal Report and the 2015 Workforce Housing Stakeholder Assessment Report (see Exhibit 5 to staff report), which identifies the need for affordable housing in the Florida Keys, including that 51% of the households are cost burdened and that by 2030 the need for affordable housing will increase to 62.4% of the permanent resident households. Key West also produced a White Paper on Affordable Housing Needs Solution, dated September 14, 2015 (see Exhibit 6 to staff report), which identifies a need of at least 6,500 units and that 77% of all households in Key West are cost burdened. There is a general unmet affordable housing need throughout unincorporated Monroe County, with a more prominent need and demand for affordable workforce housing in the lower Keys. Prohibiting development on the subject parcel would eliminate a large tract of scarified land as a possible location for critically needed affordable housing.

Note: There was a recent article in the Citizen, interviewing NASKW officials about the need for affordable housing for their workforce. Article attached at the end of this document.

Again, the subarea policy for the Big Coppitt portion of the property, accompanying the FLUM amendment, will restrict any residential use on the subject property to only affordable housing; eliminate all potential for market rate permanent residential and/or transient uses on the site; prohibit all nonresidential uses on the site; prohibit dredging; prohibit residential buildings in the 70-74 DNL (Day-

Night Average Sound Level) noise contour; and require sound attenuation for any habitable buildings located within the 70-74 and 65-69 DNL (Day-Night Average Sound Level) noise contours.

The applicant makes the argument that housing in Monroe County is in short supply, the cost of that housing is too high and therefore, this amendment adds to the available affordable housing by re-designating 14.83 acres to mixed use which can accommodate a multi-family affordable housing development project of significant size. However, there is nothing in the amendment which provides assurance that any future residential development on this property will be for affordable housing. In fact, the proposed designation of Mixed Use Commercial would allow a total of 69 dwelling units or 221 hotel rooms.

As stated previously, the applicant has prepared a Comp Plan text amendment in response to the ORC, establishing a subarea policy for the Big Coppitt portion of the property restricting any residential use on the subject property to only affordable housing.

Monroe County has undertaken numerous studies, including its most recent Evaluation and Appraisal Report, and the 2015 Workforce Housing Stakeholder Assessment Report (see Exhibit 5 to staff report), which identifies the need for affordable housing in the Florida Keys, including that 51% of the households

are cost burdened and that by 2030 the need for affordable housing will increase to 62.4% of the permanent resident households. Key West also produced a White Paper on Affordable Housing Needs Solution (see Exhibit 6 to staff report), which identifies a need of at least 6,500 units and that 77% of all households in Key West are cost burdened.

The proposed FLUM amendment could assist in addressing the need for affordable housing as the subarea policy restricts the subject property to only affordable housing. As can be seen in the maps attached to the staff report (Exhibit 8*), there are limited locations in the Lower Keys for potential larger scale affordable housing developments. Moreover, the parcel proposed for an increase in potential density is nearly entirely within the 65-69 DNL and adjacent to an existing, developed residential subdivision within the Residential High future land use designation. The amendment to a Mixed Use/Commercial designation would allow a variety of affordable residential uses adjacent to a residential neighborhood.

**note, maps in Exhibit 8 identify NASKW noise contours, Tier III, CHHA, existing affordable housing, properties with land use designations that provide density bonuses for affordable housing development, and private-vacant properties greater than 1 acre that are designated as Tier III which may be potential sites for affordable housing. It should be noted that the majority of the land in the Florida Keys is within the CHHA and that the majority of existing affordable housing is located within the CHHA. Further, there are limited locations outside of the CHAA, particularly in the Lower Keys; and there are limited locations in the Lower Keys for potential larger scale affordable housing developments.*

The initial applicant proposed text amendment to the Monroe County Year 2010 Comprehensive Plan reads:

Policy 107.1.6 Big Coppitt Mixed Use Area 1 -To Provide Limitations on Development and Specific Restrictions

Development in the Big Coppitt Mixed Use Area 1 shall be subject to regulations applicable to the Mixed Use/Commercial (MC) Future Land Use Designation as well as an additional restriction set out below:

1. Residential units developed on the Big Coppitt Mixed Use Area 1 shall be restricted to affordable housing only (with a minimum mix of at least 30% median, at least 30% low, and at least 30% very low income categories) and subject to affordable housing regulations pursuant to Section 130-161 of the Monroe County Code of Ordinances.
2. There shall be no market rate or transient residential units.
3. There shall be no new marinas.
4. There shall be no dredging.
5. There shall be no light industrial uses.
6. All habitable buildings located within the 65-69 DNL (Day-Night Average Sound Level) noise contour pursuant to the 2013 Navy Environmental Impact Statement shall be sound attenuated to achieve an indoor Noise Level Reduction of at least 25 decibels.
7. No residential buildings shall be located within the 70-74 DNL.
8. All habitable buildings located within the 70-74 DNL noise contour pursuant to the 2013 Navy Environmental Impact Statement shall be sound attenuated to achieve an indoor Noise Level Reduction of at least 30 decibels.

The Big Coppitt Mixed Use Area 1, with Real Estate No. 00120940-000100 is approximately 14.8 acres of vacant land and is legally described as:....

On January 11, 2016, the applicant provided a revised subarea proposal indicating an alternative for the mix of affordable housing income categories and included other amendments in an effort to address concerns from the surrounding community members. The *revised* applicant proposed text amendment to the Monroe County Year 2010 Comprehensive Plan reads:

Policy 107.1.6 Big Coppitt Mixed Use Area 1 -To Provide Limitations on Development and Specific Restrictions

Development in the Big Coppitt Mixed Use Area 1 shall be subject to regulations applicable to the Mixed Use/Commercial (MC) Future Land Use Designation as well as an additional restriction set out below:

1. Residential units developed on the Big Coppitt Mixed Use Area 1 shall be restricted to affordable housing only (with a minimum mix of at least ~~30~~5% median, and at least a ~~30~~20% combination of low, and at least 30% very low income categories) and subject to affordable housing regulations pursuant to Section 130-161 of the Monroe County Code of Ordinances.
2. **There shall be no nonresidential uses. Accessory uses to the residential development, such as a club house or recreational activities are permitted.**
3. There shall be no market rate or transient residential units.
4. ~~There shall be no new marinas.~~
- 4.5. There shall be no dredging.
5. ~~There shall be no light industrial uses.~~
- 5.6. All habitable buildings located within the 65-69 DNL (Day-Night Average Sound Level) noise contour pursuant to the 2013 Navy Environmental Impact Statement shall be sound attenuated to achieve an indoor Noise Level Reduction of at least 25 decibels.
- 6.7. No residential buildings shall be located within the 70-74 DNL.
7. **Any development located within the Big Coppitt Mixed Use Area 1 shall not utilize Puerta Drive for ingress and egress.**
8. ~~All habitable buildings located within the 70-74 DNL noise contour pursuant to the 2013 Navy Environmental Impact Statement shall be sound attenuated to achieve an indoor Noise Level Reduction of at least 30 decibels.~~

Based upon the applicant's concern of obtaining financing to develop an affordable housing project with a majority of the units as the lower income categories and the surrounding community members expressed concern with having a large composition of the lower income categories adjacent to their neighborhood, staff recommends a few edits to the applicant's proposal. Staff recommends, in an effort to provide for the existing workforce, an increase of the proposed median income category (highest income group of the lower income groups) to provide for a little more mix in affordable housing income categories. The suggestion would result in a mix of 10% median, 20% low and very low combined and 70% moderate income categories. Staff also recommends maintaining provision #8 of the subarea policy to ensure the proposal is consistent with the Navy Air Installation Compatibility Use Zones ("AICUZ") Land-Use Compatibility Recommendations and that potential habitat accessory structures are also sound attenuated.

Staff recommendation:**Policy 107.1.6 Big Coppitt Mixed Use Area 1 -To Provide Limitations on Development and Specific Restrictions**

Development in the Big Coppitt Mixed Use Area 1 shall be subject to regulations applicable to the Mixed Use/Commercial (MC) Future Land Use Designation as well as an additional restriction set out below:

1. Residential units developed on the Big Coppitt Mixed Use Area 1 shall be restricted to affordable housing only (with a minimum mix of at least ~~30~~10% median, and at least a ~~30~~20% combination of low, and at least 30% very low income categories) and subject to affordable housing regulations pursuant to Section 130-161 of the Monroe County Code of Ordinances.
2. There shall be no nonresidential uses. Accessory uses to the residential development, such as a club house or recreational facilities are permitted.
3. There shall be no market rate or transient residential units.
4. ~~There shall be no new marinas.~~
- 4.5. There shall be no dredging.
5. ~~There shall be no light industrial uses.~~
- 5.6. All habitable buildings located within the 65-69 DNL (Day-Night Average Sound Level) noise contour pursuant to the 2013 Navy Environmental Impact Statement shall be sound attenuated to achieve an indoor Noise Level Reduction of at least 25 decibels.
- 6.7. No residential buildings shall be located within the 70-74 DNL.
7. Any development located within the Big Coppitt Mixed Use Area 1 shall not utilize Puerta Drive for ingress and egress.
8. All habitable buildings located within the 70-74 DNL noise contour pursuant to the 2013 Navy Environmental Impact Statement shall be sound attenuated to achieve an indoor Noise Level Reduction of at least 30 decibels.

The Big Coppitt Mixed Use Area 1, with Real Estate No. 00120940-000100 is approximately 14.8 acres of vacant land and is legally described as:....

All three options for the proposed subarea policy are included in the ordinance for the BOCC's consideration, direction and decision on the proposed amendment.

Monroe County future land use map contains a potential buildout of 10,258 dwelling units on the available vacant lands, of these units 51% (5,289 units of density) are located in the lower keys. There may be a shortage of available housing, but there is no shortage of vacant lots with density for housing. Based on data submitted by the County, the County has 8,168 vacant parcels and 1,970 building permit allocations which leaves a deficit of allocations of 6,198 parcels. The County failed to establish that in the absence of viable alternative development, that a demonstrated community need for the residential use would not be met if development were prohibited in these Zones.

While the County projects a balance of 6,198 privately held vacant parcels at risk of not obtaining permits in the future after the ten-year allocation (1,970), affordable housing allocations are limited to only Tier III designated parcels. Tier III parcels are estimated at 3,301 privately held vacant parcels – see table below. These Tier III parcels would need to be further evaluated for development constraints such as submerged lands, upland habitat, clear zones, noise zones greater than 65-69 DNL, etc.

TIER	NUMBER OF VACANT PARCELS
No Tier (ORCA, etc.)	235
Tier I	3,979
Tier II	393
Tier III-A	260
Tier III	3,301
TOTAL	8,168*
TOTAL ALLOCATIONS	1,970
POTENTIAL LIABILITY	6,198*

As can be seen in the maps attached to the staff report as Exhibit 8, there are limited locations in the Lower Keys for potential larger scale affordable housing developments. Note, the maps in Exhibit 8 identify NASKW noise contours, Tier III, CHHA, existing affordable housing, properties with land use designations that provide density bonuses for affordable housing development, and private-vacant properties greater than 1 acre that are designated as Tier III which may be potential sites for affordable housing. It should be noted that the majority of the land in the Florida Keys is within the CHHA and that the majority of existing affordable housing is located within the CHHA. Further, there are limited locations outside of the CHAA, particularly in the Lower Keys; and there are limited locations in the Lower Keys for potential larger scale affordable housing developments.

Prohibiting development on the subject parcel would eliminate a large tract of scarified land as a possible location for critically needed affordable housing. The amendment to a Mixed Use/Commercial designation and the subarea policy would allow for affordable residential uses adjacent to a residential neighborhood (with a Residential High future land use designation).

As noted previously, the proposed FLUM amendment along with the restrictions in the proposed subarea policy would result in a potential increase of up to 122 affordable residential dwelling units. The proposed subarea policy would also prohibit residential buildings within the 70-74 DNL. The proposed amendment would therefore serve to move any potential residential units completely out of both the 70-74 DNL and 75-79 DNL, in accordance with NASKW compatibility recommendations. All potential residential development would be relocated to the 65-69 DNL, which is the lowest noise level on the subject properties, and sound attenuated to achieve an outdoor to indoor Noise Level Reduction of at least 25 decibels which meets the recommends from the Navy's AICUZ Land-Use Compatibility Recommendations. The additional information provided in this ORC response and staff report for the amendment establishes that there is an absence of viable alternative development options. Further the attached reports demonstrate a community need for affordable housing.

Note: There was a recent article in the Citizen, interviewing NASKW officials about the need for affordable housing for their workforce. Article attached at the end of this document.

Although the proposed FLUM amendment and subarea policy would result in an increase in potential affordable housing development of 122 dwelling units [maximum potential of 213du], the County has a bank of approx. 200 unused affordable housing allocations from past ROGO years available for new

affordable dwelling units, as well as 710 additional affordable housing allocations as provided by the State (710 of the 1,970 allocations over the next 10 years are to be used for affordable housing). Therefore, the potential increase of 122 new residential units [maximum potential of 213du], is not expected to cause the staged evacuation times to exceed the 24-hour limit.

Previous Agreement - The land has been mined extensively and contain haul roads and bridges between dredged pools. There is an executed settlement agreement which requires a restored littoral zone and a setback 150 feet from the water line of the dredged pool on the portion of the fifth parcel that runs north/south. These reclamation requirements may be impediments to the proposed uses. Additional dialogue needs to occur between the legal sections of Monroe County and the Department of Economic Opportunity regarding the effect of the agreement.

N/A – County is not a party to the agreement and does not have involvement nor enforcement of the agreement.

1991 agreement between Tarmac Florida, Inc., C.T.B., Inc., and DCA (Case No. 90-923).

Site Suitability - The portion of the fifth parcel which extends east/west has an elevation that ranges from -2 to 2 feet while the portion of the property which extends north/south has an elevation as high as 4 feet. The east/west portion of the fifth parcel is located in the Velocity Zone (VE) with required elevations for future development ranging from 12-16 feet. That portion of the property is also in Coastal Barrier Resource System (CBRS) "Otherwise Protected Area" (OPA). The CBRS Buffer Zone extends even further south. Federal flood insurance is not available in the OPA for structures that are newly built or substantially improved on or after November 16, 1991. The fifth parcel is also entirely within the Coastal High Hazard Area (CHHA) and therefore inconsistent with Monroe County comprehensive plan policy 101.14.1, which states, "Monroe County shall discourage developments proposed within the Coastal High Hazard Area (CHHA)."

As discussed throughout the staff report, the proposed FLUM amendment would change the types of uses permitted on the property (for example, changing from heavy industrial uses to residential uses) and would change the maximum potential density ranges on the property. The proposed FLUM amendment (and its associated zoning amendment) is one step in the pursuit of developing the property, as the map amendments do not approve any site plans, building permits or floodplain development permits, and do not provide any County Rate of Growth Ordinance (ROGO) allocations.

Additionally, the proposed FLUM amendment, with the subarea, does not affect the floodplain regulations for the subject property. It does not waive nor reduce any floodplain requirements for any potential future development on the subject parcel(s). At the time the property owner applies for development permits, the owner/developer will be required to meet all floodplain regulations in the Monroe County Land Development Code (Chapter 122) and the Florida Building Code (FBC) as well as FEMA guidance, etc.

Monroe County Comp Plan includes Policy 101.14.1 which “discourage[s] developments proposed within the Coastal High Hazard Area” but does not prohibit development in the Coastal High Hazard Area. As can be seen in the maps (Exhibit 8) attached to the staff report: almost the entirety of the Florida Keys is within the CHAA; the majority of the existing development is within the CHHA; the majority of the existing affordable housing is within the CHHA (except some portions in the Upper Keys); there are limited properties/locations outside of the CHAA, particularly in the Lower Keys; and there are limited locations in the Lower Keys for potential larger scale affordable housing developments.

Further, Florida Statutes also do not prohibit development in the CHHA.

Section 163.3178(8) a) A proposed comprehensive plan amendment shall be found in compliance with state coastal high-hazard provisions if:

1. The adopted level of service for out-of-county hurricane evacuation is maintained for a category 5 storm event as measured on the Saffir-Simpson scale; or

2. A 12-hour evacuation time to shelter is maintained for a category 5 storm event as measured on the Saffir-Simpson scale and shelter space reasonably expected to accommodate the residents of the development contemplated by a proposed comprehensive plan amendment is available; or

3. Appropriate mitigation is provided that will satisfy subparagraph 1. or subparagraph 2. Appropriate mitigation shall include, without limitation, payment of money, contribution of land, and construction of hurricane shelters and transportation facilities. Required mitigation may not exceed the amount required for a developer to accommodate impacts reasonably attributable to development. A local government and a developer shall enter into a binding agreement to memorialize the mitigation plan.

(b) For those local governments that have not established a level of service for out-of-county hurricane evacuation by July 1, 2008, by following the process in paragraph (a), the level of service shall be no greater than 16 hours for a category 5 storm event as measured on the Saffir-Simpson scale.

(c) This subsection shall become effective immediately and shall apply to all local governments. No later than July 1, 2008, local governments shall amend their future land use map and coastal management element to include the new definition of coastal high-hazard area and to depict the coastal high-hazard area on the future land use map.

Monroe County Rule 28-20.140, F.A.C., includes Work Program tasks requiring hurricane evacuation clearance time analyses and a Memorandum of Understanding (MOU), with the Division of Emergency Management, Monroe County, City of Marathon, Village of Islamorada, City of Key West, City of Key Colony Beach, and City of Layton regarding hurricane evacuation.

The County and the other jurisdictions in the Keys regulate new residential growth through a permit allocation system. The basis for the permit allocation rate and distribution is the ability to maintain a 24-hour evacuation clearance time. Monroe County has created a staged evacuation process wherein mobile home residents, transient units and military personnel are required to evacuate prior to all other residential properties. Based upon recent hurricane evacuation clearance time model runs and the resulting the Memorandum of Understanding with the Department of Emergency Management, Department of Economic Opportunity the incorporated jurisdictions and the County (establishing maximum build-out from the Work Program), the County received 1,970 allocations over the next 10 years. With this 10 year allocation (1,970 units), the residential evacuation time is projected to be at the 24-hour evacuation time limitation.

Although the proposed FLUM amendment and subarea policy would result in an increase in potential affordable housing development of 122 dwelling units[maximum potential of 213du], the County has a bank of approx. 200 unused affordable housing allocations from past ROGO years available for new affordable dwelling units, as well as 710 additional affordable housing allocations as provided by the State (710 of the 1,970 allocations over the next 10 years are to be used for affordable housing). Therefore, the potential increase of 122 new residential units is within our ROGO allocation limit (1,970 total) and is not expected to cause the staged evacuation times to exceed the 24-hour limit.

Further, the Coastal Barrier Improvement Act (CBRS) does not directly prevent or regulate development, it simply removes the federal incentive (prohibits federal expenditures and financial assistance, including federal flood insurance) for development on designated coastal barriers. The CBRS contains two types of units, System Units and Otherwise Protected Areas (OPAs). The County's definition in the Code applies only to the 15 System Units; the County does not have policies or regulations for OPAs. OPAs are denoted with a "P" at the end of the unit number (e.g., FL- 48P).

The fifth parcel is very narrow and development of the area adjacent to the mine pools could have negative water quality impacts on the tidally influenced mining pool and is inconsistent with the Principles for Guiding Development in the Florida Keys Area.

N/A – site planning comment. The proposed the map amendment and subarea policy do not approve any site plans and/or permits.

The proposed FLUM amendment does not affect the stormwater regulations for the subject property. It does not waive nor reduce any stormwater requirements for any potential future development on the subject parcel(s). At the time the owner applies for development permits, they will be required to meet all stormwater regulations in the Monroe County Land Development Code (Chapter 114).

See Comp Plan Drainage Policies – level of service at the time a development permit is issued:

Objective 101.9 Monroe County shall provide for drainage and stormwater management so as to protect real and personal property and to protect and improve water quality.

Policy 101.9.1 Upon adoption of the Comprehensive Plan, Monroe County shall adopt and implement the level of service standards for stormwater management established in Drainage Policy 1001.1.1. *These level of service standards ensure that at the time a development permit is issued, adequate stormwater management facilities are available to support the development concurrent with the impacts of such development.* (See Drainage Objective 1001.1 and related policies.)

GOAL 1001 Monroe County shall provide a stormwater management system which protects real and personal properties, and which promotes and protects ground and nearshore water quality.

Objective 1001.1 Monroe County shall ensure *that at the time a development permit is issued, adequate stormwater management facilities are available to support the development at the adopted level of service standards concurrent with the impacts of such development.*

Policy 1001.1.1 Water Quality Level of Service Standards -Minimum Water Quality:

1. All projects shall be designed so that the discharges will meet Florida State Water Quality Standards as set forth in Chapters 17-25 and 17-302, F.A.C, incorporated herein by reference. In addition, all projects shall include an additional 50% of the water quality treatment specified below, which shall be calculated by multiplying the volumes obtained in Section (a) by a factor of 1.5 , Retention/Detention Criteria (SFWMD Water Quality Criteria 3.2.2.2):

- a) Retention and/or detention in the overall system, including swales, lakes, canals, greenways, etc., shall be provided for one of the three following criteria or equivalent combinations thereof:
 - (1) Wet detention volume shall be provided for the first inch of runoff from the developed project, or the total runoff of 2.5 inches times the percentage of imperviousness, whichever is greater.
 - (2) Dry detention volume shall be provided equal to 75 percent of the above amount computed for wet detention.
 - (3) Retention volume shall be provided equal to 50 percent of the above amounts computed for wet detention.
- b) Infill residential development within improved residential areas or subdivisions existing prior to the adoption of this comprehensive plan must ensure that its post-development stormwater run-off will not contribute pollutants which will cause the runoff from the entire improved area or subdivision to degrade receiving water bodies and their water quality as stated above.
- c) New Development and Redevelopment projects which are exempt from the South Florida Water Management District permitting process shall also meet the requirements of Chapter 40-4 and 40E-40, F.A.C.

Authority: Sections 163.3177(2); 163.3177 (4)(a); 163.3177(6)(a)1.f.; 163.3178 (2)(b); 380.0552(7)(a), (b), (e), (h) Florida Statutes (F.S.)

Recommendations: Do not adopt the proposed amendment. Revise the amendment to allow uses other than residential. Coordinate with Department staff to evaluate the effect of the restoration plans included in the Stipulated Settlement Agreement for the fifth parcel.

Authority: Sections 163.3177(2); 163.3177 (4)(a); 163.3177(6)(a)1.f.; 163.3178 (2)(b); 380.0552(7)(a), (b), (e), (h) Florida Statutes (F.S.)

163.3177(2) - Coordination of the several elements of the local comprehensive plan shall be a major objective of the planning process. The several elements of the comprehensive plan shall be consistent. Where data is relevant to several elements, consistent data shall be used, including population estimates and projections unless alternative data can be justified for a plan amendment through new supporting data and analysis. Each map depicting future conditions must reflect the principles, guidelines, and standards within all elements, and each such map must be contained within the comprehensive plan.

163.3177 (4)(a) - Coordination of the local comprehensive plan with the comprehensive plans of adjacent municipalities, the county, adjacent counties, or the region; with the appropriate water management district's regional water supply plans approved pursuant to s. 373.709; and with adopted rules pertaining to designated areas of critical state concern shall be a major objective of the local comprehensive planning process. To that end, in the preparation of a comprehensive plan or element thereof, and in the comprehensive plan or element as adopted, the

governing body shall include a specific policy statement indicating the relationship of the proposed development of the area to the comprehensive plans of adjacent municipalities, the county, adjacent counties, or the region, as the case may require and as such adopted plans or plans in preparation may exist.

163.3177(6)(a)1.f. <unknown citation >

(6) In addition to the requirements of subsections (1)-(5), the comprehensive plan shall include the following elements:

(a) A future land use plan element designating proposed future general distribution, location, and extent of the uses of land for residential uses, commercial uses, industry, agriculture, recreation, conservation, education, public facilities, and other categories of the public and private uses of land. The approximate acreage and the general range of density or intensity of use shall be provided for the gross land area included in each existing land use category. The element shall establish the long-term end toward which land use programs and activities are ultimately directed.

1. Each future land use category must be defined in terms of uses included, and must include standards to be followed in the control and distribution of population densities and building and structure intensities. The proposed distribution, location, and extent of the various categories of land use shall be shown on a land use map or map series which shall be supplemented by goals, policies, and measurable objectives.

2. The future land use plan and plan amendments shall be based upon surveys, studies, and data regarding the area, as applicable, including:

a. The amount of land required to accommodate anticipated growth.

b. The projected permanent and seasonal population of the area.

c. The character of undeveloped land.

d. The availability of water supplies, public facilities, and services.

e. The need for redevelopment, including the renewal of blighted areas and the elimination of nonconforming uses which are inconsistent with the character of the community.

f. *The compatibility of uses on lands adjacent to or closely proximate to military installations.*

163.3178 (2)(b)

(2) Each coastal management element required by s. 163.3177(6)(g) shall be based on studies, surveys, and data; be consistent with coastal resource plans prepared and adopted pursuant to general or special law; and contain:

(b) *An analysis of the environmental, socioeconomic, and fiscal impact of development and redevelopment proposed in the future land use plan, with required infrastructure to support this development or redevelopment, on the natural and historical resources of the coast and the plans and principles to be used to control development and redevelopment to eliminate or mitigate the adverse impacts on coastal wetlands; living marine resources; barrier islands, including beach and dune systems; unique wildlife habitat; historical and archaeological sites; and other fragile coastal resources.*

380.0552(7)(a), (b), (e), (h)

(7) PRINCIPLES FOR GUIDING DEVELOPMENT.—State, regional, and local agencies and units of government in the Florida Keys Area shall coordinate their plans and conduct their programs and regulatory activities consistent with the principles for guiding development as specified in chapter 27F-8, Florida Administrative Code, as amended effective August 23, 1984, which is adopted and incorporated herein by reference. For the purposes of reviewing the consistency of the adopted plan, or any amendments to that plan, with the principles for guiding development, and any amendments to the principles, the principles shall be construed as a whole and specific provisions may not be construed or applied in isolation from the other provisions. However, the principles for guiding development are repealed 18 months from July 1, 1986. After repeal, any plan amendments must be consistent with the following principles:

(a) *Strengthening local government capabilities for managing land use and development so that local government is able to achieve these objectives without continuing the area of critical state concern designation.*

- (b) Protecting shoreline and marine resources, including mangroves, coral reef formations, seagrass beds, wetlands, fish and wildlife, and their habitat.*
- (c) Protecting upland resources, tropical biological communities, freshwater wetlands, native tropical vegetation (for example, hardwood hammocks and pinelands), dune ridges and beaches, wildlife, and their habitat.*
- (d) Ensuring the maximum well-being of the Florida Keys and its citizens through sound economic development.*
- (e) Limiting the adverse impacts of development on the quality of water throughout the Florida Keys.*
- (f) Enhancing natural scenic resources, promoting the aesthetic benefits of the natural environment, and ensuring that development is compatible with the unique historic character of the Florida Keys.*
- (g) Protecting the historical heritage of the Florida Keys.*
- (h) Protecting the value, efficiency, cost-effectiveness, and amortized life of existing and proposed major public investments, including:*
 - 1. The Florida Keys Aqueduct and water supply facilities;*
 - 2. Sewage collection, treatment, and disposal facilities;*
 - 3. Solid waste treatment, collection, and disposal facilities;*
 - 4. Key West Naval Air Station and other military facilities;*
 - 5. Transportation facilities;*
 - 6. Federal parks, wildlife refuges, and marine sanctuaries;*
 - 7. State parks, recreation facilities, aquatic preserves, and other publicly owned properties;*
 - 8. City electric service and the Florida Keys Electric Co-op; and*
 - 9. Other utilities, as appropriate.*

Again, the subarea policy for the Big Coppitt portion of the property, accompanying the FLUM amendment, will restrict any residential use on the subject property to only affordable housing; eliminate all potential for market rate permanent residential and/or transient uses on the site; prohibit all nonresidential uses on the site; prohibit dredging; prohibit residential buildings in the 70-74 DNL (Day-Night Average Sound Level) noise contour; and require sound attenuation for any habitable buildings located within the 70-74 and 65-69 DNL (Day-Night Average Sound Level) noise contours. The proposed subarea policy restricts development and addresses the DEO ORC.

Military housing woes
Navy impacted by Key West housing crisis
BY ADAM LINHARDT Citizen Staff
alinhardt@keysnews.com

Naval Air Station Key West Fire Chief C.J. Krieger does as best as he can to inform incoming civilian firefighters of the financial realities of living in Key West.

The embattled chief says about 45 to 50 percent of his crew consists of a revolving door of firefighters who arrive here and get trained, only to leave months later because they can't afford the rents in town or cost of buying a home.

"They have to learn our base operations, our equipment and all that money gets wasted on the front end when they leave," Krieger said. "And they don't leave because they don't like it here. They just can't afford it."

Krieger has lost 12 firefighters in the last two years alone, he said.

A rebounding real estate market and growth in illegal transient rentals have made finding an affordable rental difficult, if not impossible in some cases in Key West. Local elected leaders and housing advocates have said the affordable housing problem has reached a crisis level.

And the Navy is facing the same struggle over the the lack of workforce and affordable housing for its civilian employees who are not guaranteed barracks or housing like active-duty sailors or military personnel, said Naval Air Station Key West commanding officer Capt. Steve McAlearney.

"As one of the major employers in the Keys, we do certainly face the same housing and cost-of-living issues as the city and county," McAlearney said. "It is incredibly hard to hire and retain key employees, simply because they can't afford to stay."

That includes firefighters, air traffic controllers, public works, security personnel and child care employees, among a host of others. They are the cement that holds the base together as active-duty military members are only assigned to Key West for a few years. It's the civilian employees who give the base continuity, McAlearney said.

In other words, keeping and retaining those civilians is key to base operations and mission success. There are about 1,000 civilian employees who work for the military in Key West. That includes NAS Key West, Joint Interagency Task Force South, the Coast Guard as well as the Navy research lab and similar groups, but the two major employers are NAS Key West and JIATF South.

"The whole structure of the base exists because of DOD employees," said NAS Key West spokeswoman Trice Denny.

In 2005, the Navy began to set aside some of its military housing on base for Department of Defense civilian employees in order to retain those employees, said NAS Key West housing director Charity Sandstrom. In all, 222 units were set aside, but there are more employees than units and, to date, the waiting list spans as long as a year.

“I’ve fielded several phone calls recently from new employees asking me to take their name off the on-base housing wait list, because after taking the job, they looked into living in town and found that it’s just not affordable,” Sandstrom said, adding that they essentially quit over the phone due to the lack of affordable housing in Key West.

NAS Key West is the only naval air station nationwide that sets aside on-base housing for civilian employees, Sandstrom said. She currently has about 60 civilian employees waiting for on-base housing.

McAlearney was reticent to call the problem a crisis, like other officials have, but he added the issue is one of his priorities.

When it comes to base housing everywhere on Naval Air Station Key West — which includes Sigsbee Park, Truman Annex, Trumbo Point, and the naval health clinic on South Roosevelt Boulevard — the priority always remains with active duty personnel, Denny said. That means if an active duty sailor needs a home, they get priority over civilian employees.

“Housing for active duty service members is a priority because, quite frankly, we need to take care of the folks who serve our country first and their families,” Denny said.

The barracks on Boca Chica Key are for myriad transient fighter and other squadrons that are in town for training.

One of the other problems the Navy faces, Denny said, were misconceptions some residents have about Navy housing as it relates to active-duty personnel and civilian employees.

Active duty members

There about 1,500 active duty service members (uniformed officers and sailors) stationed in Key West annually. About 45 percent of those service members live in town and not on base, based on Navy records.

But not all of those active duty service members want to live in town. Currently, there is a six-month waiting list for officers and a two-month waiting list for enlisted personnel who want housing on base, Denny said.

McAlearney and Denny were quick to squash any perception that the Navy is a driving force behind the affordable housing crisis in Key West.

“My perception is that the second home market and short-term rentals are what’s making the housing market tight,” McAlearney said.

Those active duty members who have to or choose to live in town are given what is called a Basic Allowance for Housing (BAH). The BAH is determined by the cost of housing and utilities in town. BAH rates are computed annually using current median market rents and the average local cost for electricity, water and sewer, Denny said.

That data is actually collected twice annually in the spring and summer, Denny explained. It includes apartments, town homes, duplexes as well as single-family rental units, she added.

“The housing market drives the costs of rents,” Denny wrote in an email. “When rents are low, some military members choose to live in town to possibly pocket any extra BAH. That is not the case at this time. Many of our folks are using their entire BAH in town and if they live in on-base housing, they give up their entire BAH.”

She stressed that the cost of utilities are factored into the BAH.

The BAH for 2016 was set for \$2,232 a month for the lowest-ranking enlisted service member with dependents to \$3,426 for the highest-ranking officers, whereas those single sailors with no dependents will receive \$1,773 on the low scale and high-ranking officers receiving at most \$3,414, according to Navy records.

“If a landlord thinks they are being savvy and charging a service member their full BAH for rent, then they are doing a disservice, as well, as BAH is intended to cover rent and utility costs,” Denny said. “So again, it’s market driven.”

McAlearney said the base is not going to slow down its training cycles any time soon as more service members other than pilots are upping their visits as well.

“The airfield is getting busier than ever and many of the SEALs are Marines who have been in Iraq and Afghanistan and are leaving the mountains and coming back to the water,” McAlearney said.

Sigsbee Park

Recently elected Key West Commissioner Sam Kaufman wrote a letter to U.S. Rep. Carlos Curbelo, R-Miami, this month asking for his help in urging the Navy to move forward in opening the 166 vacant units in Sigsbee Park.

“When I inquired about making these units available to military members or military civilian employees, I was surprised that no clear plan to do so is in place,” Kaufman wrote. “Unfortunately, Key West is suffering a severe crisis of a lack of affordable housing. The federal government can make a positive impact on our island by making these units available to military members and other civilian employees. Hundreds of people would have affordable housing in the city of Key West if these units were made available. I am reaching out to you to ask you for your assistance on this most important subject.”

McAlearney shares Kaufman’s concern over the empty units, he said.

“We’re exploring ways in which we can make these available to military personnel and DOD employees,” McAlearney said. “Those are the personnel I need to run this base. I hope by spring to get an offer on the table to those people who may want to manage those units.”

The Navy hires private companies to administer some of its housing, and Balfour Beatty provides that service at NAS Key West. That service would be put out to bid regarding the units in question at Sigsbee Park.

The 166 units are currently in caretaker status, meaning the Navy Facilities and Engineering Command is studying them to see what needs to be done to them construction- or renovation-wise to make them livable, McAlearney said.

The problem is that McAlearney’s hands are tied until that command finalizes its evaluation of the units. The pace of government moves slow, McAlearney said.

“I would like to see them used as they’re intended, for housing,” McAlearney said. “I would prefer them to be affordable housing for my workforce and in turn that would help ease the burden on the county and city housing markets.”

The likelihood that any empty units on Sigsbee Park would eventually be opened to regular civilian residents appear slim as the Navy is already dealing with wait lists for its people for housing.

“It could potentially free up other housing where folks are living now if they move onto the base,” Kaufman said. “I think it’s a piece of the puzzle, not the cure-all to affordable housing, but 166 units is a lot of units. I have a lot of respect for Capt. McAlearney and I’m sure his ideas will be right on.”

Peary Court

Meanwhile, the Navy is plowing forward in finding a resolution to its housing issues despite the sale of Peary Court in 2013, which used to be housing for active duty service members only.

Back in 2009, Balfour Beatty began the process of studying how to recover from the 2008 housing market crash. The former military housing at Peary Court was sold in 2013 to a non-military related development company.

But during the time preceding the sale, Beatty began renting Peary Court to any qualified renter, including private civilians. DOD employees could have applied as civilian renters and live there during that time.

It remains to be seen whether the City of Key West will purchase Peary Court and keep it as workforce housing.

The Navy owned the land at Peary Court and Balfour Beatty owned the buildings when the decision was made to sell the Peary Court annex two years ago. Balfour Beatty had to get naval approval to sell Peary Court, Denny said.

“At the time, the occupancy levels were low enough that selling Peary Court was determined to be the best way to infuse money into improving housing throughout the Southeast Housing LLC,” Denny said, which is the partnership between the Navy and Balfour Beatty.

If the city eventually purchases Peary Court, Mayor Craig Cates’ affordable housing committee proposed increasing the density there from eight units per acre to 16, which would be the same as the surrounding neighborhood, Cates said earlier this month. The committee supports the city buying Peary Court for up to \$55 million, Cates said.

Either way, McAlearney is in the unfortunate position of trying to find civilian employee housing. Hopefully, progress can be made at Sigsbee Park, he said.

Dear Mayor Kohlage:

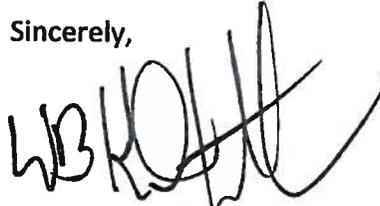

The Department of Economic Opportunity has completed its review of the proposed comprehensive plan amendment for Monroe County (Amendment No. 15-1ACSC), which was received and determined complete on January 27, 2015. We have reviewed the proposed amendment in accordance with the state coordinated review process set forth in Sections 163.3184(2) and (4), Florida Statutes (F.S.), for compliance with Chapter 163, Part II, F.S. Review comments received by the Department from the appropriate reviewing agencies are also enclosed.

The attached Objections, Recommendations, and Comments Report outlines our findings concerning the amendment. We have identified an objection and have included recommendations regarding measures that can be taken to address the objection.

The County should act by choosing to adopt, adopt with changes, or not adopt the proposed amendment. Also, please note that Section 163.3184(4)(e)1, F.S., provides that if the second public hearing is not held within 180 days of your receipt of the Department of Economic Opportunity report, the amendment shall be deemed withdrawn unless extended by agreement with notice to the Department of Economic Opportunity and any affected party that provided comment on the amendment. For your assistance, we have enclosed the procedures for final adoption and transmittal of the comprehensive plan amendment.

**OBJECTIONS RECOMMENDATIONS AND COMMENTS REPORT
MONROE COUNTY 15-1ACSC
PROPOSED COMPREHENSIVE PLAN AMENDMENT**

I. Consistency with Chapter 163, Part II and Chapter 380, Part I

The Department has the following objections and comments to the proposed comprehensive plan amendment:

Objection: Resolution 375-2014 proposes to amend the future land use map for five parcels on Rockland Key totaling 44.42 acres. The County proposes to change the land use designation on four of the parcels from Industrial to Commercial. The Commercial designation does not allow for residential and the Department has no objections for this portion of the amendment. However, the fifth parcel (RE# 00120940-000100) is 14.83 acres and proposes to amend the land use designation from Industrial (12.33 acres) and Mixed Use/Commercial Fishing (2.5 acres) to Mixed Use Commercial for a total of 14.83 acres. The potential increase in residential development potential is 27 dwelling units or 221 rooms and a reduction of 204,013 square feet of nonresidential. The potential increase on the 14.83 acre parcel is 56 dwelling units or 221 rooms and a reduction of 75,119 square feet of nonresidential.

The entire amendment lies within the Military Installation Area of Impact (MIAI). The fifth parcel is within the 65-69 Day-Night Average Noise Level (DNL). Comprehensive Plan policy 108.2.6 adopts MIAI Land Use Table. The table contains “permitted uses allowed”, “allowed with restrictions”, “uses generally incompatible (allowed with exceptions)”, and “uses not compatible and should be prohibited” for each DNL category. Within the 65-69 DNL, residential uses are listed as “uses generally incompatible (allowed with exceptions)” Some uses are allowed with restrictions. A note for this category states:

***Uses Generally Incompatible (allowed with exceptions). The land use and related structures are generally incompatible.*

Note 1

a) Although local conditions regarding the need for housing may require residential use in these Zones, residential use is discouraged in DNL 65-69 and strongly discouraged in DNL 70-74. The absence of viable alternative development options should be determined and an evaluation should be conducted locally prior to local approvals indicating that a demonstrated community need for the residential use would not be met if development were prohibited in these Zones.

The applicant makes the argument that housing in Monroe County is in short supply, the cost of that housing is too high and therefore, this amendment adds to the available affordable

housing by re-designating 14.83 acres to mixed use which can accommodate a multi-family affordable housing development project of significant size. However, there is nothing in the amendment which provides assurance that any future residential development on this property will be for affordable housing. In fact, the proposed designation of Mixed Use Commercial would allow a total of 69 dwelling units or 221 hotel rooms.

Monroe County future land use map contains a potential buildout of 10,258 dwelling units on the available vacant lands, of these units 51% (5,289 units of density) are located in the lower keys. There may be a shortage of available housing, but there is no shortage of vacant lots with density for housing. Based on data submitted by the County, the County has 8,168 vacant parcels and 1,970 building permit allocations which leaves a deficit of allocations of 6,198 parcels. The County failed to establish that in the absence of viable alternative development, that a demonstrated community need for the residential use would not be met if development were prohibited in these Zones.

Previous Agreement - The land has been mined extensively and contain haul roads and bridges between dredged pools. There is an executed settlement agreement which requires a restored littoral zone and a setback 150 feet from the water line of the dredged pool on the portion of the fifth parcel that runs north/south. These reclamation requirements may be impediments to the proposed uses. Additional dialogue needs to occur between the legal sections of Monroe County and the Department of Economic Opportunity regarding the effect of the agreement.

Site Suitability - The portion of the fifth parcel which extends east/west has an elevation that ranges from -2 to 2 feet while the portion of the property which extends north/south has an elevation as high as 4 feet. The east/west portion of the fifth parcel is located in the Velocity Zone (VE) with required elevations for future development ranging from 12-16 feet. That portion of the property is also in Coastal Barrier Resource System (CBRS) "Otherwise Protected Area" (OPA). The CBRS Buffer Zone extends even further south. Federal flood insurance is not available in the OPA for structures that are newly built or substantially improved on or after November 16, 1991. The fifth parcel is also entirely within the Coastal High Hazard Area (CHHA) and therefore inconsistent with Monroe County comprehensive plan policy 101.14.1 , which states, "Monroe County shall discourage developments proposed within the Coastal High Hazard Area (CHHA)."

The fifth parcel is very narrow and development of the area adjacent to the mine pools could have negative water quality impacts on the tidally influenced mining pool and is inconsistent with the Principles for Guiding Development in the Florida Keys Area.

Authority: Sections 163.3177(2); 163.3177 (4)(a); 163.3177(6)(a)1.f.; 163.3178 (2)(b); 380.0552(7)(a), (b), (e), (h) Florida Statutes (F.S.)

Recommendations: Do not adopt the proposed amendment. Revise the amendment to allow uses other than residential. Coordinate with Department staff to evaluate the effect of the restoration plans included in the Stipulated Settlement Agreement for the fifth parcel.

The Office of Intergovernmental Programs of the Florida Department of Environmental Protection (Department) has reviewed the above-referenced amendment package under the provisions of Chapter 163, Florida Statutes. The Department conducted a detailed review that focused on potential adverse impacts to important state resources and facilities, specifically: air and water pollution; wetlands and other surface waters of the state; federal and state-owned lands and interest in lands, including state parks, greenways and trails, conservation easements; solid waste; and water and wastewater treatment.

Based on our review of the submitted amendment package, the Department has found no provision that, if adopted, would result in adverse impacts to important state resources subject to the Department's jurisdiction.

Dear Mr. Eubanks:

This letter is in response to Monroe County Amendment Number 15-1ACSC Notification (enclosure 1), approved via Resolution 375-2014. We have reviewed the proposed amendment, and appreciate Monroe County's critical need for affordable and workforce housing.

Per discussion with Ms. Rebecca Jetton on February 5, 2015, Naval Air Station Key West is not in favor of any increased residential density in high noise areas 65 DNL and above. Per Naval instruction, residential use is discouraged in DNL 65-69 and strongly discouraged in DNL 70-74. The absence of viable alternative development options should be determined and an evaluation should be conducted locally prior to local approvals indicating that a demonstrated community need for the residential use would not be met if development were prohibited in these zones. Where the community determines that these uses must be allowed, measures to achieve an outdoor to indoor Noise Level Reduction (NLR) of at least 25 dB in DNL 65-69 and NLR of 30 dB in DNL 70-74 should be incorporated into building codes and be in individual approvals; for transient housing a NLR of at least 35 dB should be incorporated in DNL 75-79.

We look forward to continued coordination on this project. My point of contact is my Community Planning Liaison Officer, Ms. Ashley Monnier. She may be reached at (305) 293-2633 or via e-mail: ashley.monnier@navy.mil.

Comment *: I am a long time resident of the Florida Keys which is designated as an area of Critical State Concern. I am asking for your assistance with the Rockland Key Commercial Retail Center Overlay Project which if allowed to proceed, will be the largest project in the counties history, quoting a county source. Located on Rockland Key, on approximately 33 acres, it sits before the Monroe County Commission for approval and was submitted in December 2014. I am forming a group opposed to a project of this enormity that will not only effect the surrounding area it will have far reaching consequences damaging the economic survival of the Keys and Key West as well as the Environmental and aesthetic impact. Can you please help the group I am starting of like minded citizens? There has to be a way to halt this especially with our designation of Critical State Concern. Are you aware of this?

Monroe County Comprehensive Plan Update

7.0 HOUSING ELEMENT *[Rule 9J-5.010 F.A.C.]*

The Housing Element of the Monroe County Comprehensive Plan addresses the data inventory requirements of 9J-5.0005 (2) of the Florida Administrative Code (F.A.C.). The data inventory requirement will support the development of goals, objectives, policies, and implementation programs for the Housing Element.

7.1 Introduction

The information provided for housing characteristics was retrieved from the Florida Housing Data Clearinghouse (FHDC) in April 2010¹. The FHDC data is based on Census 2000 and it is the best available data for unincorporated Monroe County analysis. Detailed housing information from the 2010 U.S. Census is scheduled for release in early 2011 and will provide the basis for a refined housing analysis for the planning period. There are limitations to the data presented in the housing inventory and these limitations have been noted where relevant throughout this document. However, until that time permitting data has been used to demonstrate the housing inventory as of 2009. This element also focuses on the housing characteristics, construction activity, and affordable housing issues.

7.1.1 Policy Framework

Below is a summary of federal, state and local government regulations that impact the development of housing:

7.1.1.1 Federal Regulations

- Fair Housing Act:

The Fair Housing Act prohibits housing discrimination on the basis of race, color, religion, sex, disability, familial status, and national origin. Its coverage includes private housing, housing that receives Federal financial assistance, and State and local government housing. It is unlawful to discriminate in any aspect of selling or renting housing or to deny a dwelling to a buyer or renter because of the disability of that individual, an individual associated with the buyer or renter, or an individual who intends to live in the residence. Other covered activities include, for example, financing, zoning practices, new construction design, and advertising.

¹ Accessed through: <http://fihousingdata.shimberg.ufl.edu/a/profiles?action=results&nid=4499> on April, 8 2010.

- **Section 504:**

The Fair Housing Act Section 504 requires owners of housing facilities to make reasonable exceptions in their policies and operations to afford people with disabilities equal housing opportunities. For example, a landlord with a "no pets" policy may be required to grant an exception to this rule and allow an individual who is blind to keep a guide dog in the residence. The Fair Housing Act also requires landlords to allow tenants with disabilities to make reasonable access-related modifications to their private living space, as well as to common use spaces. (The landlord is not required to pay for the changes.) The Act further requires that new multifamily housing with four or more units be designed and built to allow access for persons with disabilities. This includes accessible common use areas, doors that are wide enough for wheelchairs, kitchens and bathrooms that allow a person using a wheelchair to maneuver, and other adaptable features within the units.

7.1.1.2 State Regulations

- **HB 697, which amended portions of Chapter 163.3177(6)(f)1, F.S., requires that the Housing Element be amended to include standards, plans, and principles for:**
 - h) "Energy efficiency in the design and construction of new housing" and
 - i) "Use of renewable energy resources."

In order to acknowledge the benefit of renewable resources, such as solar energy, and encourage energy efficiency in building construction, the County will assure there are no obstacles within the County's Comprehensive Plan and/or Monroe County Land Development Code (MCLDC) which may conflict with these requirements.

- **The Florida Fair Housing Act:**

The Florida Fair Housing Act declares it illegal to discriminate in the sale, rental, advertising, financing, or providing of brokerage services for housing. The Florida Fair Housing Act parallels the Federal Fair Housing Act.

- **Community Workforce Housing Innovation Pilot Program:**

The 2006 Florida Legislature passed House Bill 1363 (Ch. 2006-69, s. 27, Laws of Fla.), a housing bill focused on addressing some of the affordable housing challenges the State currently faces. HB 1363 includes \$50 million for an affordable housing pilot program called the Community Workforce Housing Innovation Pilot Program (CWHIP). Florida Housing will administer CWHIP, and these funds will be awarded on a competitive basis through a Request for Proposals (RFP) process to public-private entities seeking to build affordable housing for Florida's workforce. Monroe County, as a high cost county, is eligible to qualify households making 160 percent of the area median income for affordable housing.

- **Florida Landlord/Tenant Law:**

Florida's Landlord/Tenant Law Chapter 83, Part II - Florida Statutes explains tenant and landlord rights and responsibilities on rental agreements and disputes.

7.1.1.3 Monroe County Regulations

Rate of Growth Ordinance (ROGO)

Due to the State of Florida limitation on the amount of growth the County could absorb, based on the Carrying Capacity and Hurricane Evacuation Studies, on June 23, 1992, the Monroe County Board of County Commissioners adopted Ordinance 016-1992, thereby implementing the Residential Dwelling Unit Allocation System, today known as the Rate of Growth Ordinance or ROGO. The Ordinance became effective on July 13, 1992, and has been amended through the years based on changing conditions related to infrastructure. ROGO allows development subject to the ability to safely evacuate the Florida Keys (the Keys) within 24 hours.

The ROGO system is a method of prioritizing where growth should be directed based on the fact that the State of Florida currently allocates 197 housing units annually for building permit issuance (Table 7.1), MCLDC Art. II Sec. 138-24. The number of allocations has varied throughout the years, depending on the progress the County has made toward achieving State set goals. The annual allocation period, or ROGO year, is the 12-month period beginning on July 13, 1992, (the effective date of the original dwelling unit allocation ordinance), and subsequent one-year periods. Initially, the total number of available allocations was split among the three subareas² which included Upper Keys, Middle Keys, and Lower Keys (not to be confused with the Planning Area geographic locations as described in Section 2.2.1 "Geographic Location/Planning Areas"). Environmental issue and community vision plans have further refined the distribution of available allocations.

Efforts to address the development impacts on the habitat of the Key Deer, Lower Keys Marsh Rabbit and the Eastern Indigo Snake on Big Pine Key/No Name Key started in the mid-1980s. The Florida Department of Community Affairs (DCA), the U.S. Fish and Wildlife Service and the Florida Fish and Wildlife Conservation Commission signed a Memorandum of Agreement to develop a Habitat Conservation Plan (HCP) for the Key Deer and other protected species in the project area.

In 1998, Monroe County, the Florida Department of Transportation (FDOT) and the DCA signed a Memorandum of Agreement in which they committed to develop a (HCP) for these two Keys. On June 9, 2006, a Federal Incidental Take Permit (#TE083411-0, ITP) from the U.S. Federal Fish and Wildlife Commission was issued to three (3) permittees: Monroe

² Subareas are geographic locations used to distribute ROGO allocations. Subareas are not to be confused with Planning Areas (Lower, Middle and Upper) as defined by Section 2.2.1 *Geographic Location/ Planning Areas* of the Future Land Use Element.

County, Florida Department of Transportation, and the Florida Department of Community Affairs. The ITP ensures that development bears its fair share of required mitigation and that the take of the covered species is minimized and mitigated.

The Livable Communikeys Program (LCP), Master Plan for Future Development of Big Pine Key and No Name Key was adopted on August 18, 2004 under Ordinance 029-2004. The LCP envisioned the issuance of 200 residential dwelling units over 20 year horizon at a rate of roughly 10 per year. A minimum of twenty percent of the 10 units per year are to be set aside for affordable housing development. Today the 197 housing permits are allocated in the Lower, Upper and Big Pine/No Name Keys Subareas, due to municipal incorporation and environmental impact / constraints.

On September 22, 2005, the Monroe County Board of Commissioners adopted Ordinance 025-2005 which revised the ROGO to utilize the Tier Overlay System as the basis for the competitive point system to implement Goal 105 of the 2010 Comprehensive Plan. The ordinance became effective on February 5, 2006, under final Ordinance 009-2006. The Tier System, still a ROGO, made changes such as subarea boundary districts for allocation distribution, basis of scoring applications, and administrative relief. The Ordinance changed the total available allocation number to 197. It also provided vesting provisions to subareas geographically defined as follows and are depicted in the Tier Overlay District Map:

- **Upper Keys (Lower and Middle Keys combined):** the unincorporated area of the county north of Tavernier Creek and corporate limits of the Village of Islamorada (approximately mile marker 90).
- **Lower Keys:** the unincorporated area of the County from the corporate limits of the Village of Islamorada (approximately mile marker 72) south to the corporate limits of the City of Key West at Cow Key Bridge on U.S. Highway 1 (approximately mile marker 4), excluding Big Pine Key and No Name Key.
- **Big Pine Key/No Name Key:** the islands of Big Pine Key and No Name Key within unincorporated the County. Based on the revised 2010 Comprehensive Plan and the adopted Maps as part of the Master Plan for Big Pine Key and No Name Key, they are now evaluated as their own subarea.

Once an application is submitted, it is scored based on which Tier the property is located. The basic process is: 1) applicant applies for residential building permit, 2) if applicant receives all required approvals for residential development then the applicant may submit an application for a residential unit, 3) applicant completes for an allocation award, 4) applicant receives allocation award, then has 60 days to pick up permit. If the applicant does not use the permit then the allocation expires.

The total number of available allocations is split among the three subareas of the County. Each applicant competes against the other applicants located within the same subarea.

There is one exception to this process, applicants for affordable housing. Affordable housing applicants compete against all applicants for affordable housing keys wide; with the caveat that one affordable allocation goes to Big Pine and another one goes to No Name Key. Allocations are awarded each quarter in each subarea with the exception of the Big Pine Key/No Name Key subarea, where allocations are awarded annually. Table 7.1 depicts the current distribution of available allocations per MCLDC Art. II Sec. 138-24.

There are a limited number of available annual residential ROGO allocations. The number of market rate residential ROGO allocations available in each subarea of the unincorporated County and total number of affordable residential ROGO allocations available countywide on a yearly basis are illustrated in Table 7.1. According to MCLDC Art. II Sec. 138-24, the market rate available allocations total 126 and the available affordable housing allocations total 71 units (2 affordable allocations are reserved for the Big Pine/No Name Key Subarea).

In addition, there is a ratio of affordable housing ROGO allocations to market rate ROGO allocations. Prior to October of each year, the Board of County Commission (BOCC) may adopt a resolution changing the ratio of affordable housing to market rate ROGO allocations based upon the recommendations of the planning director and planning commission arising from the annual review of ROGO. This ratio may be amended pursuant to the following:

- The percentage of affordable housing shall never be less than 20 percent of the total ROGO allocations available or the minimum established by rule of the Florida Administration Commission, whichever is greater.
- The increase or decrease in the percentage of affordable housing of the total ROGO allocations available shall not exceed 50 percent of the previous year's ROGO allocations to market rate and affordable housing.

MCLDC Art. II Sec. 138-24

The primary basis of the competition is the Tier designation which will award an applicant between 0 and 30 points. Points are intended to discourage development in environmentally sensitive areas (Tier I) and to direct and encourage development to appropriate infill areas (Tier III). Points also recognize that any development can affect the functioning of natural and man-made infrastructure. Points vary depending on whether a proposed development project is located on Big Pine Key or No Name Key or if it is located elsewhere in the unincorporated County.

A penalty is assigned if the project is within a V flood zone. Lot aggregation is the process of combining a contiguous, platted, vacant, and buildable parcel with another and building only one unit. This is a reduction of density. Lot aggregation is only possible in Tier III and Tier III (A) areas, where upland native habitat is not cleared. Additional points may be awarded through lot aggregation, land dedication and land dedication. Payment to land acquisition fund is the process of purchasing points (maximum of 2) by donating to the County fund which allows for the retirement of development rights through the acquisition of property. Land dedication is made prior to issuance of the permit. The primary point assignments system is provided in **Section 3.19.1.1 "Point System within ROGO"**.

A historic account of market rate and affordable ROGO allocations and awards are depicted on **Table 7.2**. A detailed account of number of ROGO allocated and awarded is provided in **Appendix 7-1**. Below is a brief history of the ROGO system.

- During ROGO Year 1-6 a total of 255 allocations (203 market rate and 52 affordable) were allowed each year. During this period, unused affordable housing allocations could be rolled- over to market rate allocations (Ord. 016-1992) in the Lower Keys, Middle Keys and Upper Keys subareas.
- ROGO Years 6-14 allocations were affected by reductions due to Cesspit and Nutrient Credit requirements.
- On December 31, 1997, the Village of Islamorada incorporated, thus reducing the unincorporated allocations by 28 to 227 (182 market rate 45 affordable) for Rogo Year 6 and reducing the Upper Keys subarea boundary.
- During ROGO Year 8 (2000), the City of Marathon incorporated (November 30, 1999), therefore reducing the unincorporated allocations by 24 and modifying the Middle Keys subarea boundary. Also, during ROGO Year 8, the Department of Community Affairs entered into a Memorandum of Understanding with the County to allow 90 affordable housing allocations in exchange of good faith effort to begin the FEMA inspection program.
- For ROGO Year 9 (2001), the Department of Community Affairs reinstated 201 affordable housing allocations (2001). This number includes both market and affordable housing allocations that were lost due the inability to match an allocation with nutrient reduction credits.

- For ROGO Year 10 (2002), the Lower Keys subarea lost 25 allocations due to nutrient credit requirements.
- Beginning in ROGO Year 11 (2003), affordable allocations can be grouped into a single pool for countywide allocations.
- During ROGO Year 14 (2004), Ord. 009-2006 was enacted changing the allocation number to 197 (126 market rate 71 affordable) pursuant to Rule 28-20.110, F.A.C. The same rule also returned 165 allocations to the County to be used for affordable housing.
- By ROGO Year 15 (2005), the new Big Pine/No Name Key subarea was created. Of the 197 allocations, 8 market rate and 2 affordable allocations are assigned to this subarea. Cesspit requirements end during the first quarter of this ROGO year.

As seen in **Table 7.2**, from ROGO Year 1 to 17, of the grand total of available market rate allocations of 2,755, 2,804 were awarded. The excess of awards may be due in part to the rollover of affordable allocations that went unused from ROGO Year 1-6 into market rate and the reuse of expired allocations from one ROGO quarter to another and from one ROGO year to another ROGO year. These expired allocations were awarded to the next applicant or "reused." Of the 1,242 available affordable housing allocations, 977 were awarded. Between ROGO Years 1-17, an average of 222 ROGO allocations were awarded each year. Of the allocations awarded, affordable housing awards represent 25 percent of the total award. A detailed historical account of the number allocations available and awarded is provided in **Appendix 7-1**.

As seen in **Table 7.3**, there were 49 market rate allocations that expired which were tracked, recaptured and reused by the County. Therefore, at this point in time, there are zero market rate allocations remaining. As seen in **Table 7.3**, there were 167 affordable allocations that were rolled over to market rate (ROGO Years 2-6); 10 affordable allocations expired; and 100 affordable allocations went unused. Therefore, a grand total of 110 affordable allocations are available.

7.1.2 Residential Land Use Characteristics

As evidenced in *Chapter 2.0 Future Land Use Element* the County has 4,988.2 acres of residential land. This makes up 6.8 percent of the land use. The residential land use distribution is 52.1 percent in the Upper Keys Planning Area (UKPA), 4.0 percent in the Middle Keys Planning Area (MKPA), and 43.8 percent in the Lower Keys Planning Area (LKPA).

Density and intensity is determined by Policy 101.4.21 of the 2010 Monroe County Comprehensive Plan (1995). However, Property Appraiser's data provides the current status of actual density and intensity by land acreage and number of dwelling units. As of January 2010, the current density for single-family homes was 2.2 units per acre, 0.71 for mobile homes, and 7.5 in average for all multi-family type (i.e. multifamily, condominium, etc.), according to the Property Appraiser data. These are illustrated in **Appendix 2-2** of the Future Land Use Element

7.2 Existing Housing Stock Characteristics

An inventory of existing housing is necessary to analyze the present housing situation in unincorporated Monroe County and to determine future housing needs. To obtain a count of existing housing in unincorporated Monroe County, two resources are combined: FHDC, and building permits and demolitions of housing from April 1, 2000 to April 1, 2010. The latter is discussed in Section 7.2.12 "Residential Construction Activity".

Mainland Florida accounts for 90 percent of the land mass of the County; the majority of this land is located within the Everglades National Park and is under federal jurisdiction. Only 41 year-round households are located on the Mainland portion of the County, with virtually no demand for additional units projected, and no private lands available for development. Therefore, this element will focus primarily on lands within the unincorporated Lower, Middle, and Upper Planning Areas, as identified below, and illustrated on Map Series 2.1:

- Lower Keys Planning Area (LKPA): West boundary of Stock Island to the eastern limit of the Seven Mile Bridge. The Marquesas Keys, located 30 miles west of Key West and the Dry Tortuga Keys, located 70 miles west of Key West are also included within this planning area;
- Middle Keys Planning Area (MKPA): Eastern limit of the City of Marathon to the western limit of the Village of Islamorada, including Lignumvitae Key and Shell Key. It excludes the incorporated City of Layton, City of Marathon, City of Key Colony Beach and Village of Islamorada; and
- Upper Keys Planning Area (UKPA): Western limit of the Village of Islamorada to the northern County line.

7.2.1 *Type of Housing* [Rule 9]-5.010 (1)(a) F.A.C.]

Table 7.7 provides housing units by type countywide for 1990 and 2010, which includes the municipalities within the County. Overall, the total housing stock countywide increased by 13.4 percent or 6,135 dwelling units from 1990 to 2000. Major changes are noted in single family attached units with a 79 percent increase. Duplex units and mobile home/trailer/other decreased by 24.9 percent and 5.2 percent respectively.

Table 7.8 provides housing units by type for unincorporated County for 2000. Based on 2000 Census (dated April 1, 2000), more than half of the unincorporated County's 24,595 year-round⁵ housing units were single-family units; 10.4 percent were multi-family units, 2.7 percent were duplex units, and another 30.9 percent were mobile homes/trailers/other.

7.2.1.1 Hotel/Motel Transient Units

Section 101-1 of the County LCD defines housing as, "lawfully established hotel rooms, campground spaces, mobile homes, transient residential units, institutional residential units (except hospital rooms) and live-aboards".

Historically the number of hotel/motel transient units has declined in the last years. In 2003 the Florida Department of Business and Professional Regulation reported 9,373

⁵ The U.S. Census number of dwelling units excludes seasonal population, liveaboards, etc.

hotel/motel rooms countywide. In 2010 there were 7,967. By March 14, 2011 there were 3,632 countywide.

The County has adopted a series of ordinances regarding hotel/motel transient units:

- 1) The Board of County Commissioners (BOCC) adopted Ordinance No. 47-1999 on November 10, 1999, creating Sec. 9.5-120.5, which established that new transient residential units, such as hotel/motel rooms, or campground, recreational vehicle or travel trailers spaces, would not be eligible for residential ROGO allocations until January 1, 2002.
- 2) The BOCC extended the moratorium on new transient units from January 1, 2002 to December 31, 2006, through Ordinance No. 001-2002. The BOCC adopted Ordinance No. 001-2007 to extend the moratorium on new transient units to December 31, 2008. The moratorium was then set to expire on July 31, 2010.
- 3) According to the *Economic Trends and Opportunities in Unincorporated Monroe County* report, the number of licensed hotel/motel⁶ rooms in unincorporated County was 2,199 and 8,680 countywide. According to the Monroe County Tourist Development Report dated March 2010, the County excluding Key West, had 56.3 percent occupancy as of January 2010. Key Largos occupancy rate was at 57.9 percent and Key West at 78.4 percent during the same period.
- 4) At their July 21, 2010 meeting, the BOCC extended the prohibition of new transient residential units including hotel or motel rooms, campground spaces or spaces for parking or recreational vehicle or travel until December 31, 2011 (Ord. 023-2010 and MCLDC Section 138.23).

7.2.2 *Occupancy and Tenure*
[Rule 9]-5.010 (1)(a) F.A.C.]

As indicated in Table 7.9, occupied units dominated the County's housing market in 2000, accounting for 64.0 percent of all units; vacancy was reported at 36.0 percent. Owner occupancy predominates at 70.4 percent; whereas, renter occupancy was reported at 29.6 percent. The MKPA had the highest vacancy rate at 71.9 percent when compared to the other planning areas; this percentage exceeds that of the County (36.0 percent). Of the dwelling units that were occupied in the MKPA, at the time of the 2000 Census, 81.6 percent were occupied by owners.

As seen in Table 7.9, the geographic distribution was assessed through Geographic Information System (GIS) from the U.S. Census. Analysis was performed at the block level in order to carve out the unincorporated County planning areas. The Lower and Upper Keys

⁶Number of rooms from licensed hotel/motel acquired from Economic Trends and Opportunities in Unincorporated Monroe County by Fishkind and Associates, Inc. February 23, 2011 report.

Planning Areas have the highest dwelling unit distribution with 47.3 and 46.9 percent, respectively, of the housing stock. In comparison, the MKPA has the lowest percentage of housing stock at 5.8 percent.

According to the *2008 Hurricane Evacuation Model Report* by Reid Ewing, for the County as a whole, occupancy rates for permanent dwelling units appear to have declined by about 20 percent between the 2000 Census and the 2007 American Community Survey (ACS). Therefore, it is estimated that the occupancy rate for the unincorporated County of 64.0 percent, as reported by the 2000 Census, has decreased to 51.2 percent.

7.2.3 Vacancy Status
[Rule 9J-5.010(1)(a) F.A.C.]

At the time of the 2000 Census, the vacant homes were classified as 79.1 percent seasonal, recreational or occasional use; 7.4 percent was categorized as "Other Vacant"; and 6.2 percent of the vacant homes were for rent. The remaining units were classified as for sale, rented or sold, not occupied, and for migrant workers. This is illustrated on Table 7.10.

Note: "For Migrant Workers" and "Other Vacant" not available; and the City of Marathon and the Village of Islamorada was not incorporated in 1990.

In recent years Census 2000 and ACS from 2005-2008 have shown a substantial amount of home units are held for seasonal use. The data indicates the number of seasonal units has risen from 12,628 in 2000 to 15,262 in 2005 to 19,195 in 2008. This is an increase of 6,567 seasonal units. During the same period, permanently occupied units have fallen from

35,086 to 29,084, or about 6,002 units. Based on the ACS and Census data, the loss in permanent population is approximately equivalent to the gain in seasonal population since year 2000.

Contributing to the declining permanently occupied units is the rate of foreclosed homes and the increasing rate of non-homesteaded units. During the 2000-2009 period total homesteaded units increased from 16,005 to 16,698 units, a net increase of 693 units. During the same period, non-homesteaded units moved from 20,784 to 22,197, a net increase of 1,413 units. In general, non-homesteaded properties represent seasonal vacant, second homes, or for rent units. Population in these should be distinguished from short-term tourist visitors. However, in times of high foreclosure rates, a shift to non-homestead may represent a temporary loss in permanent population.

This compares with the 3,431 foreclosures from 2005-2009, recognizing it is likely as much as half of the foreclosed units may have been resold since the initial foreclosures which began in 2005, and some tendency for those units to return to a homesteaded status. By 2009, after speculative investing ceased, the share of non-homesteaded properties went back down, falling to 2003 levels.

The non-homestead rate for all units is now 57.1 percent (2010). This is essentially the same rate both pre and post bubble. Single family non-homestead rates began to move up more closely in concert with rising foreclosures; therefore, a considerable portion of permanent population losses may be attributable to foreclosures arising from the speculative housing bubble, and thus temporary. The expectation is some permanent population may return to these units over the course of the planning horizon – thus permanent population may increase over this period in substantially greater numbers than the growth in new housing units.

There has been an increase in vacant units from 2005-2009. During this period both the Census and BEBR indicated permanent population loss. From 2005 to 2008 the ACS indicated an increase in seasonal vacancy of 3,457 units. During the 2005-2009 period, foreclosure data indicated there were 3,431 foreclosures, as noted earlier. Thus, the ACS data indicates, on net, the permanent population losses and associated housing vacancy is being shifted into seasonal units. Further, it is believed that vacant units are associated with seasonal (non-permanent population) population. With a reported permanent population growth in 2009 and increasing homestead exemptions in 2009 on one hand and coinciding numbers of foreclosures and seasonal increase through ACS, it is equally possible that permanent population loss is temporary and due as much to the end of the housing bubble, foreclosures and rising unemployment, as it is due to a shift from permanent to seasonal residency. It is likely both conditions exist and are occurring.

7.2.4 Age of Housing
[Rule 9J-5.010 (1)(a) F.A.C.]

At the time of the 2000 Census, 19.2 percent of the housing stock is estimated to be 30 or more years old, or built before 1970. The number of structural problems generally reflects housing conditions and usually increases with the age of the housing stock. This is illustrated on Table 7.12.

7.2.5 Price/Rent Characteristics and Affordability
[Rule 9]-5.010 (1)(a) F.A.C.]

7.2.5.1 Introduction

The availability of affordable housing is one of the most challenging issues facing Florida - and around the nation. A few of the barriers to creating affordable housing in the County are the high cost of land; a limited number of affordable ROGO allocations; and competition for a finite amount of subsidies. Affordable housing may be defined as the "ability" of a household to purchase a home. As defined by the U.S. Department of Housing and Urban Development (HUD), affordable housing is one which cost does not exceed 30 percent of a household's gross income. If it exceeds 30 percent of the households gross income the household is considered to be cost burdened. There are two major factors that define whether a dwelling unit is affordable: household income and cost. Two primary affordable housing indicators are the affordability index and the number of cost burdened households.

The affordability index measures the ability of the median income household in an area to afford a median priced house. In addition to the median income and median house price in an area, the index construction requires the current mortgage interest rate, assumptions about the down payment required to purchase the median price dwelling unit, and the maximum percentage of household income that can be spent on housing. An index of 100 indicates the typical (median) family in the area has sufficient income to purchase a single-family dwelling unit selling at the median price.

The Shimberg Center for Housing Studies developed an affordability index for all Florida counties in a 2004 study. Median house prices were calculated from the Florida Department of Revenue county property appraiser datasets. Median household incomes come from the 2000 decennial US Census. Although important, median sale prices in a county or Metropolitan Statistical Area (MSAs) do not alone determine housing affordability. A second important factor is the income of area residents. The highest household incomes in Florida are generally in the coastal counties that also contain many high priced housing units. However, median household incomes and single-family house prices in an area are only moderately correlated, which can lead to significant differences in housing affordability across counties and MSAs. According to the Shimberg Center study, the County has the lowest affordability index with the least affordable homes. However, the affordability index focuses only on the average incomes and housing prices and does not consider the lowest income householders that would typically rent.

Cost burden is another method of evaluating housing affordability and probably more reliable because it accounts for all income including those that would buy and those that would rent. As mentioned, a household that is cost burdened is one that is paying more than 30 percent of their gross income in housing cost (30 percent is established by HUD as a parameter for an affordable home). Housing cost includes taxes and insurance for owners and utility costs for owners and renters. The Shimberg Study concluded that while 20 percent of owners in the State of Florida are cost burdened, 41.6 percent of renters are

cost burdened or paying more than 30 percent of their income towards housing cost. The cost burdened topic in the County is further elaborated in **Section 7.2.7 "Cost to Income Ratio"**.

7.2.5.2 Monroe County Affordable Housing Defined

As defined in Sec 101-1, of the MCLDC, affordable housing is considered to be one which:

- 1) Meets all applicable requirements of HUD minimum property standards as to room sizes, fixtures, landscaping and building materials, when not in conflict with applicable laws of the county; and
- 2) Monthly rent, not including utilities, does not exceed 30 percent of that amount which represents either 50 percent (very low income) or 80 percent (low income) or 100 percent (median income) or 120 percent (moderate income) of the monthly median adjusted household income for the County.
- 3) Affordable Rental Housing
 - Very low income - a rental dwelling unit which monthly rent, not including utilities, does not exceed 30 percent of the amount that represents 50 percent of the monthly median adjusted household income for the county.
 - Low income- a rental dwelling unit which monthly rent, not including utilities, does not exceed 30 percent of the amount that represents 80 percent of the monthly median adjusted household income for the county.
 - Median income - a rental dwelling unit which monthly rent, not including utilities, does not exceed 30 percent of the amount that represents 100 percent of the monthly adjusted median household income for the county.
 - Moderate income - a rental dwelling unit which monthly rent, not including utilities, does not exceed 30 percent of the amount that represents 120 percent of the monthly median adjusted household income for the county.
- 4) Owner Occupied Affordable Housing
 - Very Low Income - a dwelling unit occupied only by a household whose total household income does not exceed 50 percent of the median monthly household income for the county.
 - Low Income - a dwelling unit occupied only by a household whose total household income does not exceed 80 percent of the median monthly household income for the county.

- **Median Income** - a dwelling unit occupied only by a household whose total household income does not exceed 100 percent of the median monthly household income for the county.
- **Moderate Income** - a dwelling unit occupied only by a household whose total household income does not exceed 160 percent of the median monthly household income for the county.

The County's low paying jobs in the service and tourism industry have failed to keep up with the increasing housing cost even before the recession. Typically, the moderate income range for qualifying for affordable housing assistance is 120 percent of the area median income; however, since the housing prices in the County are disproportionately high, the County and the State allows households making 160 percent of the area median income to qualify for affordable housing assistance (House Bill 1363 Ch. 2006-69, s. 27, Laws of Fla.) for home purchase.

7.2.5.3 Housing Value and Affordability

As seen in Table 7.13, the median value of specified owner-occupied units, for the County as a whole, according to the 2000 Census, was \$241,200. This is an increase of nearly 60 percent from 1990. As seen in the ACS for 2006-2008, the 2000 median house value increased by 154 percent in 2008 (\$613,900). According to the Shimberg Institute, the average home sales price in 2009 declined to \$572,607. The 2009 decline in selling price reflects the economic recession.

According to HUD data, the County's area median income in 2010 was \$68,400. Table 7.14 depicts the household income levels qualifying for affordable housing based on assumed family size for households with a single income provider working 40 hours for both renter and owner housing. This is the best available data and is provided by the County Growth Management Division.

For a household comprised of adults related by marriage or domestic partnership registered with the County, only the highest 60 hours of the combined employment hours are counted, and considered to be 75 percent of the adjusted gross income. The income of dependents regardless of age is not counted in calculating a household's income (MCLDC Sec. 130.161). Income levels for domestic partnerships are illustrated on Table 7.15 and are the best available data as provided by the County Growth Management Division.

Maximum selling price for an affordable housing unit based on the 2010 median income of \$68,400 is illustrated in Table 7.18. As defined by the MCLDC 101-01, the maximum sales price, for an owner occupied affordable housing unit, means a price not exceeding 3.75 times the annual median household income for the County for a one bedroom or efficiency unit, 4.25 times the annual median household income for the County for a two bedroom unit, and 4.75 times the annual median household income for the County for a three or more bedroom unit.

For a median income households made up of two person income providers related by marriage or domestic partnership, the income would be approximately \$73,548, as seen in Table 7.15. For this household, it would be difficult to purchase a market rate home. Typically, the ability to purchase a dwelling unit is calculated by the household income multiplied by three. Therefore, the same household of two income providers would be able to afford a \$220,644 market rate home. However, the average market rate price in 2009 was recorded at \$572,607 (Table 7.13). This is an affordability gap of 351 thousand dollars. Affordability gap is calculated by subtracting the housing price (\$572,607) by the purchase ability (\$220,644).

If the same family were to be qualified to purchase an affordable dwelling unit, and were to purchase efficiency or 1 bedroom apartment, the selling price would have to be no greater than \$275,806, applying the 3.75 multiplier as seen in Table 7.18.

7.2.5.3.1 Owner Occupied Housing Value

As required by Rule Chapter 9J-5 F.A.C., the distribution of specified owner-occupied units within the County and the median value trends are shown in Table 7.19 and are based on unincorporated County data acquired an April 2010 from the Florida Housing Data Clearinghouse (FHDC) The FHDC provides public access to data about housing in Florida. Data for unincorporated County was acquired from the FHDC and is based on 2000 Census data.

When comparing owner occupied housing cost to the 2000 median value, there were approximately 42.9 percent of the owner occupied housing that fall below the median value (\$241,200).

As a comparison, the distribution of specified owner-occupied units within the County and the median value trends for 1990, are as reported in the "Housing Element" of the Technical Document of the *2010 Monroe County Comprehensive Plan* as adopted in 1995, are shown in **Table 7.20**. It is important to note that at the time the 1990 data was collected, the City of Marathon and the Village of Islamorada were not incorporated; therefore unincorporated 1990 totals will be higher when compared to unincorporated 2000 totals.

7.2.5.3.2 Monthly Cost of Owner-Occupied Units

Table 7.21 and Table 7.23, presents the distribution of specified owner-occupied housing cost in the County by mortgage status and non-mortgage status for year 2000. According to the FDCH, in 2000, about 57.1 percent of renters paid between \$1,000 and \$1,999 per month.

Only 8.7 percent of the owners with non-mortgage status paid more than \$1,000 per month. About 45.7 percent of non-mortgage status owners paid between \$400 and \$699 per month.

It is important to mention that mortgage status and non-mortgage status are collected from a 1-in-6 sample and weighted to represent the total population and thus totals will not equal the 11,334 unit shown in Table 7.9.

7.2.6 Cost to Income Ratios
[Rule 9J-5.010 (1)(a) F.A.C.]

7.2.6.1 Rent-to-Income Ratios

According to the HUD, the threshold for affordable housing is a rent-to-income ratio of 30 percent. In other words, when gross monthly housing cost exceeds 30 percent of monthly household income, the household is considered to be paying too much for housing versus other essential living expenses. This is known as a household that is cost burdened.

Based on the 30 percent cost burdened threshold, the general trend is that the lower the household income range (less than \$10,000 on Table 7.26), the higher the degree of being cost burdened. 92 percent of households making an income below \$10,000 are cost burdened. In the other spectrum, at the income range of \$75,000 or more, the rate of households that were cost burdened was only 6.3 percent. This trend is consistent with the exception of income range \$50,000 - \$74,999, where all renter households were cost burdened. Renter households, with annual incomes below \$34,999, accounted for 59 percent of total renter households, but represented 75 percent of households being cost burdened. Of the 3,310 renter household sample, 54.0 percent was cost burdened. These trends are depicted in Table 7.26.

As a comparison, the 1989 Rent-to Income for Renter-Occupied Units, are as reported in the "Housing Element" of the Technical Document component of the 2010 Monroe County Comprehensive Plan as adopted in 1995, are shown in Table 7.27. The trend of the lower income being the most cost burdened when compared the 1999. However, renters at the various income ranges were less cost burdened back in 1989. Of the 11,183 renter households in 1989, 47.0 percent was cost burdened. This represents a five percent increase of cost-burdened renters in 1999. This restates the affordable housing need.

7.2.6.2 Owner-to-Income Ratios

Based on the HUD threshold of households paying more than 30 percent of their income as being cost burdened, the same trend is observed for owners. Lower income owner occupied households (with incomes below \$10,000) were the most cost burdened at 92 percent. In contrast, at the \$75,000 or more income range, 11.4 percent of households were cost burdened. Owner households with annual incomes below \$34,999 accounted for 29 percent of total owner occupied households, but represent 66 percent of households which were cost burdened. 2,356 of the 7,412 owner households or 32 percent of the owner households were cost burdened. Owner-to-income ratios are shown on Table 7.28.

When comparing renter cost to income (Table 7.26) and owner cost to income (Table 7.28), it is evident that the lowest income households are the most cost burdened, more so for renters. Also, all renters at the \$50,000 - \$74,999 income range are cost burdened in comparison to only a quarter of those who own in that same income range. It is evident that renters are in more need of affordable housing assistance.

7.2.7 Structural Condition of Housing Stock
[Rule 9J-5.010 (1)(c) F.A.C.]

Substandard housing is defined as units without complete kitchen facilities; units lacking some or all plumbing facilities (hot and cold piped water, flush toilets, no bathtub or shower); or units designated as deteriorating or dilapidated because of other structural deficiencies. Another characteristic of substandard housing are those that are overcrowded. Housing conditions are available for those lacking complete plumbing facilities, complete kitchens, central heat and over crowdedness and are illustrated in Table 7.29.

According to FHDC, which provides the latest available detail concerning structural conditions of housing, there were 139 units or about 0.6 percent of the unincorporated County's housing stock that lacked complete plumbing and could, therefore, be considered "substandard". Other factors, such as the lack of complete kitchen facilities, indicate a substandard unit; these units account for 0.8 percent of the total housing inventory. Approximately 6.1 percent of the County's occupied housing units had more than 1.01 persons per room.

Although these conditions are the norm for accessing substandard housing, the County may consider conducting an onsite survey to truly depict the severity of deteriorating and substandard structures. In particular, given that the housing stock is aging as indicated on Table 7.12.

7.2.8 Subsidized Housing Developments
[Rule 9J-5.010(1)(d) F.A.C.]

7.2.8.1 Housing Delivery Programs

Below is a list of programs that deal with the provision of subsidized and affordable housing.

7.2.8.1.1 Federal Programs

- **The Community Development Block Grant (CDBG):** This program has been in existence since 1974. The program is a significant source of funds for affordable housing; however, this is not the sole focus of such grants. CDBG funds can be used for a variety of community development initiatives, including affordable housing construction, home repair assistance for existing low-income homeowners, and economic development initiatives designed to spur business investment and economic growth in distressed neighborhoods. Funding is awarded according to a formula that attempts to quantify the amount of need in a community compared with other communities, using several economic and demographic measures. Communities receiving grants are required to solicit and encourage citizen participation, particularly from the proposed beneficiaries, in developing a final plan for using the funds.
- **Home Investment Partnerships (HOME):** This is a block grant program administered by HUD designed to provide flexible funding support for affordable low-income housing in the affordable housing solutions for low-income families. HOME funds can be used to acquire and renovate deteriorated properties or construct new housing for rent or sale. The funds can also be used for down payment assistance grants to individual homebuyers, as well as to other programs. The beneficiaries of HOME-funded programs must have incomes below 80 percent of the HUD-determined area median family income, and most uses of HOME funds have more specific income guidelines. The flexibility of the HOME program is designed to empower communities to find the best available uses for the money, and requires significant interagency cooperation. HOME funds must be matched with a 25 local contribution, which can take the form of cash from municipal bond issues or donated labor and construction materials from the private sector. Another form of local contribution can be vacant or abandoned properties-donated by private donors or the city-which after HOME-funded renovation and/or construction, would be sold to low-income homebuyers. Additionally, jurisdictions receiving HOME funding are required to commit at least 15 percent of funding to projects which will be owned or developed by experienced, local, community-based nonprofit organizations called Community Housing Development Organizations (CHDOs) by HUD, but often known as Community Development Corporations (CDCs). HOME-funded housing is required to remain affordable for low-income residents for at least 5 to 20 years, depending on the type of project and proportion of funding provided by HOME.

- **The American Dream Down Payment Initiative:** This is a corollary program to HOME designed specifically to aid low-income first-time homebuyers with funds for closing costs and a down payment. Families meeting the criteria are eligible for up to \$10,000 or 6 percent of the purchase price (whichever is greater) of a home. Some of the funds may also be used for remedying health hazards such as lead-based paint in the home prior to occupancy. The ADDI program is administered in conjunction with the HOME program, but allocations are figured separately, and different rules apply.
- **The Housing Opportunities for Persons with AIDS (HOPWA):** This program provides special housing assistance for low-income persons diagnosed with HIV or AIDS. Assistance ranges from short-term rental assistance aimed at preventing homelessness, to ongoing longer-term rental assistance, to the acquisition, construction, and provision of supporting housing, which provides integrated services for health care, mental health, chemical dependency, and general case management. According to HUD, HOPWA funds are an important catalyst for partnerships; on average, approximately \$2 is leveraged for every \$1 provided by HOPWA. Baseline HOPWA funds are awarded based on a statutory formula program, but additional funds are available based on a competitive grant process awarding additional funds to highly successful or innovative programs.
- **The Emergency Shelter Grants (ESG):** This program provides federal funding for homeless shelters through HUD grants to local governments, which then disburse the grant monies to local nonprofits. ESG funds are required to be locally matched dollar for dollar. The matched funds are most likely to be found in the form of private fundraising by the recipient nonprofit organizations, but can also include other federal, state, and local grants as well as in-kind donations of real estate and volunteer time. ESG funds are also granted to state governments, but different rules apply.
- **Federal Emergency Management Agency (FEMA):** FEMA provides grants and assistance programs to local governments, such as the Disaster-Specific Assistance Program; Hazard-Related Grants and Assistance Programs, and Non-Disaster Programs.
- **Section 8 Voucher Program:** A voucher may be either "project-based" (where its use is limited to a specific apartment complex; public housing agencies (PHAs) may reserve up to 20 percent of its vouchers) or "tenant-based" (where the tenant is free to choose a unit in the private sector, is not limited to specific complexes). Under the voucher program, individuals or families with a voucher find and lease a unit (either in a specified complex or in the private sector) and pay a portion of the rent (based on income, but generally no more than 30 percent (40 percent being the maximum at time of lease-up) of the family's income).

7.2.8.1.2 Florida Programs¹¹

- **State Housing Initiatives Partnership (SHIP):** State housing initiatives partnership SHIP is the first-and only-permanently funded, state housing program in the nation to provide funds directly to local governments to increase affordable housing opportunities in their communities. The program channels 69 percent of the documentary stamp tax revenues created by the Sadowski Act directly to counties and entitlement cities in Florida on a noncompetitive basis. Designed as an incentive for the formation of public-private partnerships for building, rehabilitating and preserving affordable housing, the SHIP program provides a financial means to develop and implement housing programs that are locally designed.

SHIP funds may be used to provide emergency repairs to very low, low and moderate income households following a natural disaster as declared by the President of the United States, Governor of the State of Florida or by the Monroe County Board of County Commissioners. Funds can be used to purchase emergency supplies to weatherproof damaged home; interim repairs to avoid further damage; tree and debris removal required to make the individual housing unit habitable; construction of wells or repair of existing wells where public water is not available; post disaster assistance with non-insured repairs; and soft costs required to process assistance applications. The program is only implemented after a natural disaster.

SHIP funds may be also used as part of the local contribution for programs that construct multi-family special needs rental housing. The SHIP funds that are used in these types of projects will be in the form of a deferred payment loan for 15 years at a one percent to five percent interest rate, depending upon cash flow of the project.

- **State Apartment Incentive Loan (SAIL) Program:** SAIL stimulates production of affordable, multi- and single-family rental housing for very low-income individuals and families in Florida. SAIL is a development incentive program, which leverages state loan funds, local government contributions, developer equity, and private bond financing. The State Apartment Incentive Loan program (SAIL) provides low-interest loans on a competitive basis to affordable housing developers each year. This money often serves to bridge the gap between the development's primary financing and the total cost of the development. SAIL dollars are available to individuals, public entities, not-for-profit or for-profit organizations that propose the construction or substantial rehabilitation of multifamily units affordable to very low income individuals and families.
- **Florida Homeownership Assistance Program (HAP):** Down payment Assistance Loan Program: This helps individuals and families with low incomes purchase their own homes by providing \$2,500 in 0 percent interest, non-amortizing, second mortgage loans for down payments and closing costs. The following are:

¹¹"Of Ships and Sails: Affordable Housing Financing Programs In Florida" (Foresight, Fall 1997)

Permanent Loan Program - This provides 0 percent interest, non-amortizing, second mortgage loans covering 25 percent of the purchase price of a home. These loans assist qualified borrowers with down payment/closing costs and reduce the principal on their first mortgage.

Construction Loan Program-A nonprofit developer or sponsor is eligible to borrow the lesser of either the total funds available in an application cycle, or 33 percent of the cost of the project to construct or substantially rehabilitate a minimum of four homes. At least 30 percent of the units must be set aside for low-income borrowers and 30 percent for very low-income borrowers.

- **Predevelopment Loan Program (PLP):** This program provides financial assistance for predevelopment costs, site acquisition, and development of land for housing affordable to individuals or families with very low and low incomes.
- **Florida Affordable Housing Guarantee Program:** This program provides guarantees on taxable loans and tax-exempt loans to stimulate innovative, private sector lending for multi- and single-family affordable housing.
 1. **Low-Income Rental Housing Tax Credit (LIHTC) Program:** This program gives developers federal tax credits in exchange for acquisition and substantial rehabilitation for substantially rehabilitating or for new construction of rental housing projects for low or very low income rental housing units must be set aside for individuals or families.
 2. **Multi-Family Mortgage Revenue Bond Program:** This program uses taxable and tax-exempt bonds to provide below-market interest rate loans to non-profits and for profits for developers of apartment units that set aside at least 20 percent of the units for households earning 50 percent or less of the AMI or forty percent for households earning 60 percent of the AMI.
 3. **Single-Family Mortgage Revenue Bonds (MRB) Program:** This uses the proceeds from mortgage revenue bonds from statewide qualified lending institutions to offer below-market mortgage loans to first-time home buyers with low, moderate and or middle incomes. (FAC Rule 67-25)

7.2.8.1.3 Monroe County Programs

There are various County agencies with a role in affordable housing development¹²; these are:

¹² Monroe County Division of Housing and Community Development, 2007, *Monroe County Affordable and Workforce Housing*.

- **Monroe County Planning and Environmental Resources Department:** This Department works with property owners to develop and preserve Affordable Housing in unincorporated Monroe County. This department recommends and provides Comprehensive Plan amendments and MCLDCs relating to affordable housing.
- **Monroe County Land Authority (MCLA):** The MCLA is a land acquisition agency created pursuant to Section 2-397 of the MCLDC, Section 380.0661 of the Florida Statutes, and the Florida Keys and Key West Area of Critical State Concern designations. The agency is empowered to acquire and dispose of property for a range of public purposes, including recreation, affordable housing, environmental protection, and the protection of private property rights. As of September 30, 2009, the Monroe County Land Authority has expended \$21 million on site acquisition, \$28.5 million for affordable housing (Source: MCLA).
- **Monroe County Housing Authority:** The Housing Authority is responsible for low income and affordable rental apartments throughout the County, and oversees the SHIP program which provides 2nd mortgages to income-qualified home buyers.

As per the Monroe County Housing Authority, a variety of housing programs provide for subsidized housing in unincorporated Monroe County. These programs include State Apartment Incentive Loan Program (SAIL), Monroe County Land Authority Program (MCLA), Low Income Tax Housing Tax Credit (LIHTC), Federal Emergency Management Agency Program (FEMA) and other U.S. Housing and Community Development programs (HUD).

A total of 470 dwelling units are subsidized by several programs in unincorporated Monroe County, which are listed in Table 7.30 and 7.31. A total of 85 units are scheduled to be built. All of the units and developments listed in this section are rental.

7.2.8.2 Subsidized Housing and the Rate of Growth (ROGO) Process

The process of receiving a building permit in Monroe County is a competitive process. ROGO is a tool utilized by the County to control growth throughout the Keys. However, additional consideration is given to affordable housing permit applications. ROGO is a

point based system that allows applicants applying for a new residential building permit to compete against other applicants for the limited number of allocations issued each year. The number of allocations available is determined through the adoption of an administrative rule on the State level. The number of allocations is based on the progress Monroe County has made toward achieving state set goals such as a central wastewater system being available keys wide. The total number of available allocations is split among the three subareas of Monroe County. The Upper Keys, Lower Keys and the Big Pine/No Name Key subareas. Each applicant competes against the other applicants located within the same subarea. There is one exception to this process, applicants for affordable housing. Affordable housing applicants compete against all applicants for affordable housing permits keys wide. Allocations are awarded each quarter in each subarea with the exception of Big Pine Key and No Name Key where allocations are awarded annually.

7.2.9 *Group Homes*
[Rule 9J-5.010 (1)(e) F.A.C.]

The Florida Department of Children & Families licenses one group home within the County. It is a Residential Child Caring Agency in Key West, Florida, with a capacity of six children, ages 11 to 17.

7.2.10 *Mobile Home Parks*
[Rule 9J-5.010 (1)(f) F.A.C.]

The vast majority of mobile home parks are located on the Municipalities. An account for both unincorporated and incorporated mobile home parks as accessed through the Florida Department of Business and Professional Regulation file name mhmailings.csv is provided in Table 7.32. A total of 1,378 units are located in the mobile home parks in the count as a whole.

7.3 Housing Demand Analysis [Rule 9J-5.010 (2) F.A.C.]

The housing demand component of the Comprehensive Plan update is of primary importance in order to plan for the needed housing stock given population growth. This element derives from population estimates and projections as required per [Rule 9J-5.005(2)(e) F.A.C]. Population projections methodology and details are explained in *Chapter 2.0 Future Land Use Element*.

Housing Demand is defined as the needed number of dwelling units that will accommodate population growth. Given the County's location and the economic climate, housing affordability has become an increasing problem. This section also provides the data inventory necessary to support the policy recommendations given the population estimates trend housing need and also addresses some of the issues related to affordable housing demand and supply. Only unincorporated County data is presented in this analysis.

7.3.1 Population Projections and Approach [Rule 9J-5.005(2)(e) F.A.C and Rule 9J-5.010(2)(a) F.A.C]

The Unincorporated Monroe County Population Projections form the basis for household need calculations. Population is identified according to LKPA, UKPA and MKPA. The methodology derives from a permanent population¹³ forecast and a seasonal population¹⁴ forecast at the County level. The sum of permanent and seasonal forecast is referred to as the functional population for the unincorporated County as a whole. With the exception the housing demand analyses are based upon projects functional population.¹⁵ Affordable housing demand is based upon only the permanent population and permanent households because the County's regulations require those obtaining affordable allocations to be permanent residents.

The permanent population projection series is based on the latest published data by the University of Florida, Bureau of Economic and Business Research (BEBR), published in March 2010, for permanent population estimates. In as much as ROGO has been in place since 1993, BEBR population projections reflect a growth trend constrained by ROGO's implementation. This means permanent population growth projections implicitly assume the continuation of the ROGO constraint and the effects of its implementation.

The seasonal population series is based on the Florida Keys Aqueduct Authority (FKAA) data series from August 24, 2004. This series includes estimates of seasonal residences, recreational vehicles, hotel/motel, camps, boat live aboards, mobile home, and other. The DCA required the projections herein to use the FKAA series for the purposes of estimating the seasonal population component, with appropriate updates to the methodology.

¹³ Permanent population is referred to as the residents whose primary place of residency is in the County.

¹⁴ Seasonal population is referred to as the residents whose primary place of residence outside of the County and their residences are non-homesteaded.

¹⁵ Functional population is the sum of permanent and seasonal population

The best available data suggest a loss in permanent population with likely replacement through an increase of seasonal residents.

7.3.2 Projected Number of Households¹⁶
[Rule 9J-5.010 (2)(a) F.A.C.]

7.3.2.1 Number of Households for Permanent Population

Permanent population is one component of functional population. Loss of permanent population is thought to have occurred as a result of the recent recession, a rise in foreclosures, depletion of affordable housing and increased unemployment. Nearly 3,500 units have been foreclosed throughout the Keys since 2005. The rise in home prices and threat of hurricanes has also contributed to some permanent population loss. Losses associated with some of these conditions may be temporary, resulting in renewed growth after the recession.

The ROGO based permanent population series is used as one component of the functional population. At the county level, for control totals, the DCA has recommended using the latest BEBR annual estimates and the BEBR Medium series population, published March 2010 for permanent population estimates.

The BEBR annual population estimates for municipalities and unincorporated areas indicates permanent population fell in the Keys from 2006-2008, with some a return to growth evidenced in 2009. The effect of the short term decline is to drive the long term population projections down. Thus, both recent history and future projections from BEBR suggest a downward trend in permanent population.

The estimated average household size according to BEBR in 2009 was 2.2 persons per household. This estimate is used to project the number of permanent households out to 2030. The estimated number of households generated by permanent population from 2010 to 2030 is shown on **Table 7.41**. These projections reflect the ROGO restriction on growth.

It is projected that permanent population households will decline by 1.8 percent from 2010 (16,076) to 2030 (15,786).

¹⁶ As defined by the US Census, a household includes all the people who occupy a dwelling unit as their usual place of residence. Dwelling units or housing is referred to as the structure which may be occupied or vacant.

7.3.2.2 Number of Households for Seasonal Population

Seasonal population is another component of functional population. There is evidence of population shifting from permanent to seasonal. For instance, of all the new single family housing growth in Monroe County since 1999, nearly 70 percent has been in non-homesteaded units. Most likely, this is a combination of both growth in seasonal population as well as permanent population loss. Loss of permanent population may cause once occupied units to become non-homesteaded. In addition, a comparison of the ACS 2008 and the Census 2000 data, illustrated that the number of seasonal units had risen.

The estimated number of households generated by seasonal population from 2010 to 2030 is shown on Table 7.42. Seasonal population numbers are derived from the FKAA, seasonal series. Seasonal numbers include estimates of seasonal residences, recreational vehicles, hotel/motel, camps, boat live aboards, mobile home, and other. It is estimated that seasonal households have a higher person per household or household size due to the increasing size of newly built units. Therefore, the figure of 2.7 persons per household is used to calculate the number of seasonal households and is supported by the FKAA methodology.

It is projected that households for seasonal population will increase by 10.7 percent from 2010 (13,126) to 2030 (14,529). Seasonal households are expected to increase at an average rate of 2.57 percent every five years during the planning period.

¹⁷ Estimates for permanent households are based on the BEBR estimated average household size of 2.2 as of April 1, 2009.

7.3.2.3 Number of Households for Functional Population

Functional population is the sum of seasonal and permanent population estimates and form the basis for this analysis; however, only when referring to affordable housing permanent population and household numbers.

As seen in Table 7.43, the 2010 estimated population for unincorporated Monroe County is 70,808 (2010) and by 2030 it is projected to increase by 3,149 additional persons. This is an increase of 157.5 persons per year through the twenty year planning horizon. As illustrated in Table 7.43, the number of households for the estimated 2010 functional population (29,202) is projected to increase by 1,113 households (3.8 percent) in 2030 to 30,315.

Table 7.43 - Functional Household Estimates and Projections, 2010-2030

Source: Fishkind & Associates, Inc., 2010, *Unincorporated Monroe County Population Projections*
 BEBR, February 2010, *Number of Households and Average Household Size in Florida: April 1, 2009*

¹⁸ The number of seasonal households is based on seasonal population projection from the FKA. The FKA estimates were originally based on the *Monroe County Population Estimates and Forecast 1990-2015*. The average household size of 2.7 is used to estimate and project the number of household.

¹⁹ Functional households is the sum of seasonal and permanent households

It is important to mention that while permanent population decreases at an average rate of less than one percent every five years, seasonal population increases at an average rate of 2.57 percent every five years; resulting in an obvious shift in population from permanent to seasonal. Overall, functional population or total population for the unincorporated County will increase at an average rate of less than one percent, every five years, in the twenty year planning period.

7.3.3 Projected Number of Households by Size
[Rule 9J-5.010 (2)(a) F.A.C]

In order to obtain the estimated and projected household by size the Shimberg Center of Affordable Housing (SCAH) database was assessed. The SCAH creates a set of population projections based on BEBR estimates, which are then divided into households. Then the SCAH allocates households across size and projects them by assuming the year 2000 proportions across the entire planning horizon. For the purpose of this analysis, SCAH percentage allotment is used in combination with the unincorporated County functional population projections to calculate the number household by size. Therefore, the best available data are SCAH ratios in combination with the estimated functional household numbers.

As seen in Table 7.44 by the year 2030, 72.5 percent of households will consist of one or two persons. The number of persons per household having five persons or more is estimated at 5.6 percent for the same year. However, as explained in Section 7.3.2.2 "Number of Households for Seasonal Population", it is estimated that seasonal households have a higher person per household or household size, due to the increasing size of newly built units.

Table 7.44 - Functional Population Households by Size, 2010-2030

7.3.4 Projected Number of Households by Income
[Rule 9J-5.010 (2)(a) F.A.C]

Household income is a critical factor when determining if a household would qualify for affordable housing assistance. In order to obtain the estimated and projected household by

income, the Affordable Housing Needs Assessment (AHNA) of the Shimberg Center of Affordable Housing (SCAH) was evaluated. The SCAH creates a set of population projections based on BEBR estimates, which are then divided into households. Then the SCAH allocated households across income groups and projects them by assuming the year 2000 proportions across the entire planning horizon. For the purpose of this analysis, SCAH percentage allotment is used in combination with the functional unincorporated County population projections to calculate the number of households by income.

Household by income is a two-part analysis. The first analysis is prepared for functional (total) households as an illustration of unincorporated Countywide household, thereby including seasonal and permanent households. In order to illustrate the number of households that would qualify for affordable housing assistance, the second analysis is exclusive to permanent households. It is important to mention that the SCAH definition of "moderate income" groups does not parallel that of the County. Moderate income is emphasized since households at this income range or below are the households qualifying for affordable housing assistance. The SCAH classifies income groups in the following manner:

- Extremely Low Income - households making 0-30 percent of AMI
- Very Low Income - households making 30.1-50 percent of AMI
- Low Income - households making 50.1-80 percent of the AMI
- Moderate Income - households making 80.01-120 percent of the AMI
- Above Moderate Income - households making over 120 percent of the AMI

In contrast, as indicated in Section 7.2.5.2 "Monroe County Affordable Housing Defined", moderate incomes are the households whose total income does not exceed 120 percent of the area median income (for renters) and households whose total income does not exceed 160 percent of the median income of the County (for owners). With the County definition of moderate income, in particular for owners, it is not possible to determine which households will be making up to 160 percent of the area median income, given that SCAH lumps into the "above moderate income" those in the 121 to 160 percentage of the area median income. Therefore, some households in the above moderate income range would qualify for assistance but it is not possible to determine how many.

7.3.4.1 Households by Income - Functional Population

Table 7.45 shows the estimated and projected functional households by income from 2010 to 2030. For the year 2010, 60.9 percent of the total households in the unincorporated County are estimated to have incomes in the moderate income range or below (120 percent or less as defined by the SCAH). Conversely, households in the above moderate income range (120 percent or more of the area median income) is 39.1 percent. For the year 2030, the percentage of households making below the moderate range increases by 1.5 percent. This may indicate that more households could become cost burdened. This income analysis illustrates where households for the unincorporated County, as a whole,

fall in relationship to the various income groups. This analysis is not meant for the purpose of drawing conclusions on affordable housing need.

7.3.4.2 Households by Income - Permanent Population

Affordable housing programs are targeted to permanent residents whose income is between the extremely low income and moderate income ranges. In the County, in order to receive an ROGO allocation for an affordable unit, the occupants of that dwelling unit must be permanent residents. For these reasons, it is important to illustrate the number of permanent households by income levels to gauge the affordable housing need.

Families with incomes below the moderate range are likely to be more limited in their ability to afford a house and other goods. As a result, extremely low income, very low income, low income and moderate income (as defined by HUD and as used by the SCAH) are the income groups that would typically qualify for affordable housing assistance programs. The areas shaded in gray on Table 7.46 denote the number of permanent resident households that would qualify for affordable housing assistance based on permanent residents and as defined by HUD income classifications. It is then estimated that in the year 2010 about 60.9 percent of permanent residents will need affordable housing. As the planning period extends to 2030, the need for affordable housing will increase to 62.4 percent of the permanent resident households. This is indicative that for the greater population of permanent residents, housing affordability will continue to be an issue in the County.

It is important, however, to restate that the County's moderate income range is set at 160 percent of the area median income, for owner occupied housing; therefore, the numbers in

Table 7.46 underestimate the affordable housing need. In other words, some of the households in the above moderate income range (making above 120 percent of the area median income) would also qualify for affordable housing assistance, if they were home owners.

Affordable housing need is further elaborated in Section 7.3.5.3 "Affordable Housing Need". The table below is meant to illustrate the number of households in the various income groups of the permanent population that would qualify for affordable housing assistance. It is not meant for estimating future median income.

7.3.5 Projected Housing Need [Rule 9J-5.010 (2)(b), F.A.C.]

7.3.5.1 Unincorporated County Housing Need

To determine the number of dwelling units needed, the estimates must account for occupancy rates. The average hotel occupancy from 2003-2010 is 70 percent according to Smith Travel Research, Fishkind & Associates, Inc. This figure is used to generate the number of dwelling units for seasonal households.

The occupancy rate for permanent households in 2008, according to the ACS, was 89.7 percent. This figure is used to derive the number of dwelling units needed for permanent

population. Functional dwelling units, which is the sum of the seasonal and permanent dwelling units constitutes the basis for the housing need.

An additional 1,680 dwelling units are needed during the next twenty years. The number of dwelling units needed by year 2030 is an additional 1,680 dwelling units.

It is important to differentiate between the numbers of dwelling units estimated in 2010 per population projections (36,674) and the number of dwelling units estimated to have been constructed by 2010 as accounted in Section 7.2.12 "Residential Construction Activity" (total of 26,283).

The number of dwelling units documented in Section 7.2.12 "Residential Construction Activity", were based upon the Census 2000 unit count, adding the dwelling units that received a certificate of occupancy since April 1, 2000, subtracting the demolition of units and then adding the replacement units. This exercise should have brought the number of existing dwelling units up to date. However, the Census 2000 number may not be a true reflection of the number of dwelling units given the particular County housing characteristics. That is to say, the Census counts do not take into account the whole housing environment in the Florida Keys. There are non-docked boats that serve as shelters; recreational vehicles that serve as dwelling units located in camp grounds; and accessory dwelling units or secondary suites that are associated with the primary residence. All of these types of housing particular to the Florida Keys may not counted by the Census.

On the other hand, the number of estimated dwelling units generated by the population projection in 2010 is different because it is driven by population projections and number of people per household.

²⁰ Seasonal Dwelling units are households times the occupancy rate of 70 percent

²¹ Permanent dwelling units are households times the occupancy rate of 89.7 percent.

²² Functional dwelling units are the sum of seasonal and permanent dwelling units.

7.3.5.2 Housing Need by Planning Area

As stated previously, an additional 1,680 dwelling units will be needed for the anticipated functional population of the County by year 2030. The analysis below illustrates the location of the needed units in relationship to the three planning areas, where growth is anticipated. It is important to note that more (56.3 percent) of the dwelling units will be concentrated in the LKPA primarily because this planning area will experience the most growth in population. To meet this projection, in the twenty year horizon, an average of 84 new units per year will be needed for the unincorporated County as a whole. This is less than the number of yearly ROGO allocations of 197, as currently established in Article II, Section 138-24 of the MCLDC.

Table 7.48 illustrates the number of dwelling units needed from 2015 to 2030 by planning area given functional population growth. Between the years 2020 to 2030 the dwelling unit need remains constant.

7.3.5.3 Affordable Housing Need

As previously discussed the availability of affordable housing is one of the most challenging issues in Florida and around the nation. There is resounding documentation of the housing affordability problems the County is facing. As reported by the *Monroe County Affordable and Workforce Housing Report*, dated November 2007, the County is the most cost burdened small-county in the nation and has the most expensive single family homes and condominiums in the State. According to a recent *Harvard University Joint Center for Housing Studies*, the proportion of Americans spending more than half their incomes (severely cost burdened) on housing increased from 12 percent in 2000 to 16 percent in 2008.

According to the *Monroe County Affordable and Workforce Housing* report, the County has the highest affordability gap of all counties in Florida. The "affordability gap" is the difference between the buying power of a median income household and the median sales price of a single family home. The County's median income is \$68,400 (HUDuser.org 2010); assuming a 40 hour per week, 50 week year, this translates into an hourly salary of \$34.20. Based on the 2010 median income, a one income earner family would be able to afford a monthly

payment of a mortgage or rent of \$1,710 (no more than 30 percent of income). A customary measure of how much home a family can afford is the family income multiplied by three. Therefore, a household which income is \$68,400 would be able to afford a \$205,200 priced dwelling unit. In contrast, the median value in 2009 according to the Shimberg Center was \$572,608. This is an affordable gap of 370 thousand dollars.

The *Monroe County Affordable and Workforce Housing* report further states that 34.8 percent of home-owning Monroe County families are cost burdened, meaning they pay 30 percent of their income for housing, exclusive of insurance and taxes. Of the households that are cost burdened (34.8 percent), 17.4 percent of families are severely cost burdened, meaning they pay more than 50 percent of their income for housing. These trends exemplify the need to increase opportunities for affordable housing options. With the market crash more houses have been foreclosed and more permanent residents are moving out of the County with a population shift of permanent residents to seasonal who are able to afford pricier homes.

As seen in **Table 7.46**, the affordable housing need is assigned to the households making 0 to 120 percent of the area median income for permanent population only. As a requirement for receiving an affordable housing ROGO allocation, the residents occupying that affordable unit must be permanent County residents. The following analysis looks at affordable housing need by planning area only for the permanent residents.

7.3.5.3.1 Permanent Population Affordable Housing Need by Income Level

Based on the SCAH, the number of households in the various income levels has been projected. The tables below are meant for illustration of households in the various income groups to determine the number of households that would need affordable housing assistance or those that would be making 120 percent of the area median income or less. Tables are not meant for estimating of future area median income. It is important to restate that the estimated affordable housing need is correlated to the ROGO allocations and permanent population. Therefore, permanent population is utilized in this analysis.

Lower Keys

As shown in **Table 7.49**, an average of 5,545 households would need and qualify for affordable housing assistance in the Lower Keys. Based on SCAH in 2010, 60.9 percent of households would qualify for affordable housing assistance. By the year 2030 the percentage will increase to 62.4 percent. These percentages may be understated since for owner occupied housing, the qualifying income in the County is 160 percent of the area median income. It is not possible to determine how many households in the above moderate income range (incomes above 120 of the area median income) would qualify. Some of the households that fall in the above moderate income range may qualify for affordable housing, if they were owners.

7.3.5.3.2 Permanent Population Estimated Cost Burdened Households

As explained in Section 7.2.7 "Price Rent Characteristics and Affordability", an indicator of affordable housing need is the number of households that are cost burdened (paying more than 30 percent of their income in housing cost) as established by HUD. In other words, when gross monthly housing cost exceeds 30 percent of monthly household income, the household is considered to be paying too much for housing versus other essential living expenses. The households presented in this analysis pertain to permanent population given that in order to qualify for affordable housing the occupants need to be permanent residents. The percent allotment is derived from the SCAH. As seen in Table 7.52, the cost burdened household is approximately 36 percent and are distributed as shown below.

Lower Keys

Of the households generated by permanent population in the LKPA, 36.6 percent are cost burdened according to SCAH. By the year 2030 the cost burdened household decreases to 35.7 percent. The decrease may be due in part to a shift in population from permanent to seasonal. A distribution of households paying more than 30 percent of their income in housing is shown in Table 7.53.

Note: Calculations are based on Shimberg Center for Affordable Housing percent allotment and distribution of functional population households.

In summary, the County should seek to encourage affordable housing options for households which are cost burdened. In year 2010, 36.6 percent of the households are cost burdened. The trend slightly lowers in the year 2030.

7.3.5.4 Need for Rural and Farm Worker Households

The County and its municipalities are either urbanized or under Conservation protection. According to the 2007 *Census of Agriculture*, the number of farming acres is 187 or 0.25 percent of land. There are no existing rural areas or farm worker households and there is no future need for those households. Therefore, this requirement does not apply.

7.3.5.5 Special Housing Need

The provision of adequate sites in residential areas or areas of residential character for group homes and foster care facilities is referenced in Section 7.2.9 "Group Homes". Only one facility currently exists in unincorporated Monroe County. These facilities are allowed in the Mixed Use District (MU) and Military Facility District (MF).

7.3.5.6 Replacement of Housing Units

Replacement of housing units due to deterioration is not a problem in the County. As seen Section 7.2.12.2 "Housing Demolitions and Replacement", an average of 70 dwelling units were demolished from 2001 - 2010. An average of 106 replacement units received a certificate of occupancy from 2001-2010.

Most of the dwelling units replaced were mobile homes. Of the mobile homes replaced, 68.5 percent were replaced by a single family unit. This represents an increasing demand or preference for single family homes. This may also reflect the shifting of population from permanent to seasonal, which may be better able to afford a single family home.

Pursuant to Section 163.3191, F.S., due to Coastal High Hazard Area designation, no additional mobile home parks are permitted in the County. Further, a moratorium for new recreational vehicles and camp grounds is in place as illustrated in Section 7.2.1.1. "Hotel/Motel Transient Units". A projection by housing type for the planning horizon considering shift of mobile homes to single family is provided in Section 7.3.7.1 "Housing Supply by Type".

Where housing units are removed as part of a federal housing program, such as the Community Development Block Grant, households will be relocated and the units will be replaced as per the program requirements; however, where individual housing units are removed by private owners, replacement is at the discretion of the owner.

7.3.5.7 Maintenance of an Adequate Vacancy Rate

As previously shown in **Table 7.9**, the inventory of vacant units is based on the U.S. Census 2000 vacancy rate of 36.0 percent for unincorporated Monroe County. As previously discussed in **Section 7.3.1 "Population Projections and Approach"**, the number of seasonal dwelling units is increasing and the number of permanently occupied dwelling units is declining. This correlates with the increase on non-homesteaded units (seasonal residents). Functional dwelling units (sum of permanent and seasonal) are used to account for vacancy rates.

The number of vacant units is calculated by the occupancy factor. Occupancy factors were applied to seasonal (70 percent) and permanent households (89.7 percent) to then obtain the number of dwelling units. Dwelling units minus the number of occupied households equate the number of vacant dwelling units.

There should be no problem for the County in maintaining an adequate vacancy rate. The number of dwelling units projected be vacant is shown on **Table 7.56**.

7.3.6 Land Requirements for Housing Needs
[Rule 9]-5.010(2)(c), F.A.C.]

The data and analysis in **Section 2.7.4.4 "Vacant Land Analysis within a Tier, Density and Intensity" (Chapter 2.0 Future Land Use Element)**, is used to determine the land available to accommodate the housing need as calculated in **Table 7.48** (total of 1,680) by planning area.

Housing can be accommodated in Tiers II, III and IIIA. Affordable housing can be accommodated in Tier III and IIIA. The tables below reflect the vacant land that is located within Tier III only since this is where the County encourages development. The following analysis shows the maximum allowed density or "theoretical density" given the underlying future land uses in vacant Tier III. As seen in the tables below, there is sufficient vacant land to accommodate the total new (1,680) housing units for the County within each of the planning areas.

NOTE: The following theoretical density and intensity analyses in this section are for illustrative purposes only; conditions specific to the individual parcel, including physical size, environmental sensitivity, zoning and tier designation and other regulatory constraints, such as ROGO and NROGO are the final determinant of development potential.

Lower Keys

As previously shown in **Table 7.48**, an additional 954 dwelling units are needed to accommodate functional residents by 2030 in the LKPA . Evaluating the vacant land located under Tier III (**Section 2.7.4.4 of Chapter 2.0 Future Land Use Element**), the theoretical density allows the 954 new dwelling units to be built. According to **Table 7.57** a total of 1,428 single family units and 506 multifamily units would be allowed, in theory, in the LKPA. The shaded areas in gray represent the affordable housing or multifamily opportunities for this planning area.

NOTE: The following theoretical density and intensity analyses in this section are for illustrative purposes only; conditions specific to the individual parcel, including physical size, environmental sensitivity, zoning and tier designation and other regulatory constraints, such as ROGO and NROGO are the final determinant of development potential.

Middle Keys

As previously shown in **Table 7.48**, an additional 51 dwelling units are needed to accommodate functional residents by 2030 in the MKPA. Evaluating the vacant land located under Tier III (**Section 2.7.4.4 of Chapter 2.0 Future Land Use Element**), **Table 7.58** shows that there would be enough land availability to accommodate the 51 dwelling units, in theory, in the MKPA. The shaded areas in gray represent the affordable housing or multifamily opportunities for this planning area.

NOTE: The following theoretical density and intensity analyses in this section are for illustrative purposes only; conditions specific to the individual parcel, including physical size, environmental sensitivity, zoning and tier designation and other regulatory constraints, such as ROGO and NROGO are the final determinant of development potential.

Upper Keys

As previously shown in Table 7.48, an additional 684 dwelling units are needed to accommodate functional residents by 2030 in the UKPA. Evaluating the vacant land located under Tier III (Section 2.7.4.4 of Chapter 2.0 Future Land Use Element) Table 7.59 shows that there would be enough land availability to accommodate the 684 dwelling units, in theory, in the UKPA. The shaded areas in gray represent the affordable housing multifamily opportunities for this planning area.

NOTE: The following theoretical density and intensity analyses in this section are for illustrative purposes only; conditions specific to the individual parcel, including physical size, environmental sensitivity, zoning and tier designation and other regulatory constraints, such as ROGO and NROGO are the final determinant of development potential.

It is evident that there is enough vacant land in Tier III to accommodate the 1,680 dwelling units needed for the planning horizon. The tables in this analysis demonstrate that there is more vacant land in Tier III to accommodate single family homes than vacant land available to accommodate multi-family units. However, as in previous sections, the affordable housing need based on the SCAH is about 60 percent. Of the 1,680 dwelling units needed for the planning horizon, the County should consider the vast majority of this housing to be developed as multi-family to provide affordable housing options to the 60 percent of households needing assistance.

Table 7.60 is a summary the amount of vacant land in Tier III for unincorporated County as a whole. It appears that the County has an excess of land to accommodate the needed dwelling units. This analysis is based on Tier III vacant land only. However, theoretical density and intensity analyses are for illustrative purposes only; conditions specific to the individual parcel, including physical size, environmental sensitivity, zoning and tier designation and other regulatory constraints, such as ROGO and NROGO are the final determinant of development potential.

7.3.7 Private Sector Provision of Housing
[Rule 9J-5.010(2)(d), F.A.C.]

It is expected that all of the future housing needs identified in this analysis can and will be met by the private sector. The demand for homes on coastal lands makes construction of such homes economically attractive to builders and developers.

A developer must first apply for a ROGO allocation in order to develop a dwelling unit. Then the applicant must apply for a building permit. Of the total ROGO allocations awarded, no less than 20 percent are assigned for affordable units. The County can award up to 197 ROGO allocations a year including 71 for affordable allocations. Between ROGO Years 1-17, an average of 222 ROGO allocations was awarded each year. Of the allocations awarded, affordable housing awards represent 25 percent of the total award. A detailed historical account of the number allocations available and awarded is provided in **Appendix 7-1**.

An important component of provision of housing is the number that will be needed for families that are cost burdened and in the qualifying incomes need affordable housing. Since the affordable housing analysis indicates that there is a need for affordability for 60 percent, at a minimum, developers should continue to receive incentives for providing affordable housing.

7.3.7.1 Housing Supply by Type

The estimated and projected housing units by type are depicted in **Table 7.61**. In order to obtain the estimated and projected household by type, the percent allotment from the South Florida Regional Council 2008 estimates are used in combination with the number of functional dwelling units projected. Additionally, the mobile home replacement for single family dwelling units trend from 2001-2010 and as shown in **Table 7.39**, is integrated into the projection. It is then estimated, that 311 mobile homes will be replaced by a single family unit every five years.

For the purpose of this analysis, the projected household numbers only reflects the single family, multi-family and mobile homes (not to be confused with mobile home parks) since:

- Section 163.3191, F.S. prohibits new mobile home parks in the Coastal High Hazard Area; and
- Development of new hotel/motel units, campgrounds and recreational vehicle spaces requires a residential ROGO allocation. The County has declared a moratorium on the allocation of ROGO for these types of use. There is currently a moratorium on ROGO designation for these units until December 31, 2011. The County is contemplating extending the moratorium date.

Table 7.61 - Dwelling Units by Type, 2010-2030

As seen in **Table 7.61**, above, there is a decreasing trend for mobile homes given the mobile home replacements by single family homes. It is estimated that 311 mobile homes are replaced for a single family structure every 5 years. There is a dichotomy when it comes to addressing affordable housing issues. Although mobile homes are being replaced by single family units, mobile homes offer a solution to providing affordable housing. Then again, no new mobile home parks are allowed given the County's CHHA designation. The County may consider evaluating mechanisms for retaining mobile home parks and encouraging mobile homes as affordable housing options.

7.3.7.2 Projected Number of by Tenure

In order to obtain the estimated and projected household by tenure, SCAH demographics were assessed. The SCAH creates a set of population projections based on BEBR estimates, which are then divided into households. Then households are allocated across tenure classes. The methodology assumes that household formation rates and the distribution of household characteristics remain constant in their year 2000 proportions across the entire planning horizon. For the purpose of this analysis, the SCAH percentage allotment is used in combination with the unincorporated Monroe County functional population households.

As seen in Table 7.62, the general trend is that by the year 2030, 74.5 percent of households will be occupied by owners and 25.5 percent of households will be occupied by renters. This is a 1.2 increase for owners when compared to year 2010.

7.3.7.3 Projected Need by Cost

To determine the projected cost, the historic average median incomes from 1999 to 2010 were assessed through HUD via www.huduser.org. It is estimated that the average median income for the County will increase by 3.4 percent every year. This is based strictly on historic area median income and does not take into consideration market forces, market crash or current recession. Using the affordable housing cost spreadsheets generated by the County Growth Management Division, which calculate affordable price by 30 percent of income, the affordable monthly rent are projected for the planning horizon on Table 7.63.

As seen in **Table 7.64** the affordable selling prices are projected for the County. As defined by MCLDC 101-01 the maximum sales price, owner occupied affordable housing unit, means a price not exceeding 3.75 times the annual median household income for the county for a one bedroom or efficiency unit, 4.25 times the annual median household income for the county for a two bedroom unit, and 4.75 times the annual median household income for the county for a three or more bedroom unit.

7.3.7.4 Projected Need by Income Range

Income ranges are discussed in **Section 7.3.4 "Projected Number of Households by Income"** and the analysis is based on SCAH data. Analysis was done two ways, for functional population and permanent population. Permanent population was analyzed separate since it is permanent population who would receive affordable housing assistance. In summary, at least 60.9 percent of households in 2010 will be at or below the moderate income range (80.01 to 120 percent of the area median income). By the year 2030, the number of households at or below the moderate income range will be at 62.4 percent (as provided earlier in **Tables 7.45 and 7.46**).

7.3.8 Private Sector Housing Delivery Process
[Rule 9J-5.010(2)(e), F.A.C.]

While the private sector finances and builds the housing units, local governments issue building permits and perform inspections of the units based on health and safety issues

established in and through the Florida Building Code. Building permits are issued in compliance with local land development regulations.

Land

There are currently 2,338 acres of vacant land in unincorporated Monroe County of which 1,294 (55 percent) are designated for Residential Low, Residential Medium and Residential High. If developed under the current designations, the acreage could theoretically support an additional 7,701 dwelling units. Refining the analysis to vacant acreage in Tier III, where the County encourages infill development, the theoretical number of housing that could be developed is 4,044. To be more precise this would be a breakdown of 2,747 single family homes and 1,297 multifamily or affordable units. There is ample vacant land to meet the need and future demand. However, due to the limited population growth (157 persons a year), the increasing vacancy rate, and the high price of land in a coastal community, there is no significant demand for new residential development from developers.

There are private-public partnerships for the provision of land acquisition and government support for affordable housing projects.

Finance

Financing affects the purchaser and builder's cost as well. Although the high cost of land in the County tends to limit the development of public housing and public housing programs, the County does participate in the affordable housing programs such as Community Development Block Grant (CDBG) and the HOME Investment Partnerships (HOME) programs to facilitate financing for private purchasers in lower income ranges.

Services

All services are provided by the County, with the exception of potable water, which is supplied by the Florida Keys Aqueduct Authority (FKAA). These services are discussed in more detail in the *Potable Water, Solid Waste, Sanitary Sewer and Drainage Elements*.

As a part of development, the County charges several fees for services rendered, and for impacts on the existing facilities. The County also charges various fees for site plan review, and redevelopment or building permits. As of November 2010, impact fees for development are outlined as follows:

- Parks/Recreation - \$340.00
- Sewer connection - \$70 per connection
- Transportation - \$633
- Sheriff - \$150 per SFR
- Fire - \$105 per SFR
- Library - \$242 per SFR
- Solid Waste - \$64 per SFR

ROGO Application for SFR - \$748 + \$20 research fee = \$768.00

NROGO Application - \$774

Mobile home to SFR - \$305

7.3.9 Means of Accomplishing Affordable Housing, Group Homes and Eliminating Substandard Conditions [Rule 9J-5.010(2)(f), F.A.C.]

Topic 1: [Rule 9J-5.010(2)(f)1., F.A.C]

The provision of housing with supporting infrastructure for all current and anticipated future residents of the jurisdiction with particular emphasis on the creation or preservation of affordable housing to minimize the need for additional local services and avoid the concentration of affordable housing units only in specific areas of the jurisdiction.

The infrastructure currently in place is adequate to meet the projected population to meet the future needs of County functional population in an effective, economical manner. Were only 84 dwelling units are anticipated each year from 2010 to 2030, the supporting infrastructure will continue to be maintained to provide the adopted level-of-service standards throughout the community. The County does scheduled maintenance and repair of infrastructure facilities for which it is responsible. The County will maintain an appropriate millage rate to pay for services provided to residents. The County provides the same level, amount, and quality of infrastructure to all residents in all areas without regard to income levels.

Each Livable CommuniKeys Plans includes objectives to maintain housing opportunities for all segments of the population while maintaining the availability of affordable housing and workforce housing for local residents, while preserving the character of the community.

The County relies entirely on the private sector, supplemented by outside government programs, to ensure the provision of adequate housing. There is a need for affordable housing for those permanent households that are making up to 120 percent of the area median income for renters and up to 160 percent of the area median income for owners. According to the SCAH (Table 7.46), a minimum of 60 percent of the permanent population will need affordable housing assistance or will be making incomes at or below the 120 percent of the area median income.

Currently the County can award up to 71 ROGO allocations for affordable housing; however, not all of them are being used due to the high cost of land and time and cost of the ROGO application process. Low-cost housing is difficult to provide. However, there is a number of housing assistance programs available to the residents of the County, including Section 8 and low interest loans; and the County participates in the Community Development Block Grant program and the HOME Investment Partnerships program. The County will, additionally, take the actions available (e.g., various residential densities,

waiver of fees) to encourage the development of very-low, low, and moderate income housing, where the need for it is identified.

Topic 2: [Rule 9J-5.010(2)(f)2., F.A.C]

The elimination of substandard housing conditions and for the structural and aesthetic improvement of housing;

Table 7.29 denotes the housing that is considered substandard according to the Census 2000. This is however, not a true inventory of substandard units at the County. The County should consider taking an inventory of mobile homes on individual sites and mobile homes in camp grounds and parks that need structural improvements.

Where existing housing units are identified and substandard, the County relies on code enforcement to ensure that housing is repaired or rehabilitated to meet codes. New housing units must meet the Florida Building Code; local building inspections are performed to ensure that code provisions are met.

Topic 3: [Rule 9J-5.010(2)(f)3., F.A.C]

The provision of adequate sites for housing for very-low, low, and moderate income households, and for mobile homes.

The provision of adequate land for affordable housing is stated in **Section 7.3.6 "Land Requirements for Housing Need"**. In summary, there is a surplus of acreage in Tier III (infill areas) that would allow for the needed affordable housing.

Given that mobile homes provide an affordable option, the County may want to consider continuing providing the land sites where mobile home development is located and determine if this is a financially feasible option.

Topic 4: [Rule 9J-5.010(2)(f)4., F.A.C]

MONROE COUNTY WORKFORCE HOUSING STAKEHOLDER ASSESSMENT REPORT- EXECUTIVE SUMMARY

Monroe County faces the quadruple impact of high land values, land limited by geographic and environmental features, housing supply limited by controlled growth (the Rate of Growth Ordinance) and a tourism economy with a prevalence of lower paying service-sector employment. In August 2014 the Monroe County Commission approved a stakeholder assessment effort, to be conducted by the FCRC Consensus Center at Florida State University (Consensus Center), to solicit perspectives and ideas on workforce housing challenges and on whether a county-wide consensus building effort should be convened to address the complex issues surrounding workforce housing in the Florida Keys.

This assessment report sets out the context for addressing workforce housing issues and used interviews, meetings and review of data and documents to assess stakeholder perspectives on the County's workforce housing challenges. These perspectives include county, city, regional, state and federal government levels, housing and tourist development leaders in Monroe County, the business and tourist community and non-profit community and civic organizations. Based on this stakeholder input, the assessment report summarizes the themes, concerns, issues, and interests that stakeholders believe ought to be considered in addressing workforce housing needs in Monroe County. (*See below*)

The workforce housing affordability crisis in the Florida Keys identified by the Monroe County Commission in 2014 is real. "Cost-burdened" households pay more than 30% of income for rent or mortgage costs. In 2013, 51% (or 16,849) of Monroe County households pay more than 30% of income for housing while statewide that figure is 43%. More than half of Monroe County renters are cost burdened (8,350 of 14,002) while about 45% of Monroe County homeowners are cost burdened (8,499 of the 18,936).

In November 2014 the United Way of Florida released its report, ALICE (Asset Limited, Income Constrained, Employed: Study of Financial Hardship, which indicates that nearly half of all Monroe County households (14,221 of 29,241) live above the federal poverty line but still struggle to afford basic expenses including housing, child care, food, transportation and health care.¹ The Report also evaluates community conditions for each of Florida's counties using a weighted "Economic Viability Dashboard" in three core areas using a scale of 1 (worst) to 100 (best).² Monroe County's results area as follows:

<i>Core Areas</i>	<i>Rating</i>	<i>Grade</i>
Housing Affordability (40%)	14 of 100	Poor
Job Opportunities (40%)	67 of 100	Good
Community Support (20%)	48 of 100	Poor

¹ The Report was initially developed in New Jersey and now five other states including Florida, California, Michigan, Indiana and Connecticut, have used the model and developed reports in 2014.
<https://www.frbatlantia.org/commdev/publications/partnersupdate/2015/01/study-sheds-light-on-working-families-in-florida>

² The Index provides the means to compare counties in Florida and to see changes over time. The Housing Affordability area includes three key indicators including: the Household Survival Budget (quantifying the cost of the housing, child care, food, health care, transportation); health insurance; and housing burden. The Job Opportunities area includes three key indicators including: Income Distribution; Employment Rate; and New Hire Wages. The Community Support area includes three key indicators: Violent crime rate; the annual payroll of human services nonprofits per capita; and Access to good basic health care.

The findings of all of several recent reports on Monroe County's current housing situation confirm that there is a significant and growing shortage of affordable workforce housing, both rental and ownership. In addition there exists a policy gap in that affordable housing for the working and middle classes is largely left to individual municipalities and counties to deal with.

Over 75 persons participated in the interviews and meetings and identified a range of workforce housing issues. While some offered perspectives from the same sector, they live and work in different parts of the Keys and the ideas they offer are not necessarily the same as others sharing that perspective. However, across the various perspectives the following emerged as six common themes regarding key workforce housing issues:

1. A Shared vision of success for Workforce Housing in Monroe County
2. Take Action on Workforce Housing
3. Build upon the past affordable housing studies and reports
4. Defining the problem first based on data
5. Seek a balanced package of options as there is no single strategy that will solve the workforce housing crisis
6. View housing as community infrastructure, like transportation and water supply

Issues generally identified as important from most perspectives included:

1. Addressing the ROGO system and workforce housing, including transfers and fractional ROGOs
2. Density and livable workforce housing
3. Relaxing height restrictions in light of Federal flood insurance changes and to create more workforce housing
4. Monroe Housing Authority role in workforce housing
5. Transportation and its relationship to and role in workforce housing
6. Workforce Housing site identification and audit of publicly owned property.
7. Creation of new workforce housing units that are both affordable and livable with development incentives and public private partnerships
8. Preservation and maintenance of existing workforce housing and incentives to preserve workforce housing
9. Related workforce issues due to high cost of housing (insurance, childcare, food insecurity etc.)
10. County, City and state affordable housing policies and regulations including length of deed restrictions
11. Explore and expand funding sources to expand workforce housing in Monroe County

The Stakeholder Assessment sought to identify how different stakeholders viewed the challenges of workforce housing facing Monroe County and its residents. The over 60 issues and ideas identified and summarized from the many interviews and meetings, help to shed light on the complexity of the issues and on the healthy diversity of views on how to best address the challenges even among those sharing the same stakeholder perspective. The assessment interviews were conducted with the understanding that the themes and ideas identified would be shared with the Commission and inform any committee that would engage in subsequent consensus building on workforce housing solutions. It was also understood that individual views would not be attributed but the related themes perspectives would be summarized. The report provides input from following perspectives: County Government; City Government; State Government; Education; Development; Lodging/Hospitality/Tourism; Business; Non Profit; and Military. 60 workforce housing ideas

Workforce Housing & the Education Sector	
1. Engage the school system as largest employer	
2. Improve teacher housing needs data	

Monroe County staff has gathered detailed baseline data that included an inventory of affordable and workforce housing projects completed over the past two decades in Monroe County, along with the public incentives that were made to assist in the housing development. In the course of the assessment interviews and meetings, various studies and data sources were identified on best practices from other jurisdictions and ideas developed or considered but not implemented by previous affordable housing task forces. Among the range of stakeholders interviewed, all expressed the need for a focused and comprehensive county-wide workforce housing dialogue that involved those with a stake in the outcome. Many believed that such a committee should develop a package of consensus recommendations, informed by data and the range of stakeholder and public perspectives, that can provide for both short and longer term actions for the Board of County Commission's consideration.

While some of those interviewed remained skeptical that there will be sufficient "political will" to implement the Committee's recommendations as has been the case in the past, many believed that this was an urgent and timely issue for the County to address in light of hotel redevelopment and the economic upturn.

In the Fall of 2014, following the initiation of this Assessment, the Commission re-appointed members to the existing Affordable Housing Advisory Committee and with the thought of convening and charging them with addressing workforce housing issues and providing the County Commission with its recommendations. The reconvened committee would review this assessment report and other data as it addressed its charge. A workforce housing committee, ad hoc or otherwise, appointed and charged by the County Commission to address workforce housing issues in the Florida Keys was explored in the assessment interviews. A significant number of those interviewed applauded the County Commission's action in re-purposing the existing Affordable Housing Advisory Committee to focus, at least in the short term, on workforce housing. It was suggested that this approach could provide representation from each District in the County, offer workforce housing perspectives from the public, private and nonprofit sectors, and minimize confusion and any duplication of effort that an ad hoc workforce housing committee might create. It was also pointed out that this charge would be consistent with the Committee's current mission to address affordable housing opportunities in Monroe County for both "residents and workforce."

The Commission should review the current Committee appointments to ensure that a balance of workforce housing stakeholder perspectives are included in its membership. If the Commission charges the Affordable Housing Advisory Committee to develop consensus recommendations on workforce housing actions for consideration by the Monroe County BOCC, most stakeholders interviewed suggested there should be a sufficient range of stakeholder perspectives represented and participating in the consensus building. This would allow the Committee to develop informed workforce housing consensus findings and recommendations that stakeholders might support and the County Commission could act upon.

There is a great deal of public and stakeholder interest in the workforce housing issues the Committee will take up. The membership requirements, as set forth in both Florida statute and the Monroe County Resolution, do not reference representation of the municipalities in the County, the military, the School Board and perhaps other organizations impacted by workforce housing policies and programs and with a stake in contributing to solutions to improve the availability of workforce housing in the Florida Keys.

The format for the Committee meetings should encourage constructive public and stakeholder input. The Commission might consider charging the Committee with establishing an engagement strategy to involve a broader range of stakeholders in their development of findings and recommendations. This might be accomplished through opportunities for public input during their own meetings, as well as through Committee sponsored advisory workgroups, joint workshops with municipal taskforces and city commissions, workshops at key moments in the development of options and recommendations, online surveys and other techniques.

It was observed by many that an advisory committee developing recommendations on workforce housing will require dedicated staff, including legal and planning expertise, and facilitation support for the Committee to do its work expeditiously. This is because of the complexity of the charge, the intense public interest in the issue, the linkages with other issues and programs and activities in the public, private and non-profit sectors, and the desire for timely actions to address the current workforce housing challenges.

The Monroe County Board of County Commissioners should review this Assessment Report and charge the Affordable Housing Committee to focus its efforts in the coming year on workforce housing. With a charge from the County Commission, the Committee should establish its procedures and approach and a schedule for meetings that would permit it to deliver back to the BOCC its workforce housing recommendations by mid-2016. The Committee should consider:

- Developing a shared vision of success;
- Jointly defining the workforce problems faced in the Florida Keys;
- Reviewing the range of issues and options identified in previous studies;
- Reviewing the experience and lessons learned with successful workforce housing projects developed in the Keys to date;
- Reviewing this Stakeholder Assessment Report; and
- Developing a package of consensus findings and recommended solutions for consideration by the Monroe County Board of County Commission.

This stakeholder assessment report confirms that there is wide agreement that Monroe County is facing a significant and growing workforce housing crisis with shortages for both affordable rental and ownership units. There is also agreement that no single strategy will solve the workforce housing crisis in Monroe County. Instead the challenge ahead is to craft a balanced package of targeted options that have been refined through discussion and debate and that can serve as a consensus framework for addressing and implementing solutions.

MONROE COUNTY WORKFORCE HOUSING STAKEHOLDER ASSESSMENT REPORT

I. ASSESSMENT SCOPE AND ORGANIZATION

Monroe County faces the quadruple impact of high land values, land limited by geographic and environmental features, housing supply limited by controlled growth (the Rate of Growth Ordinance) and a tourism economy with a prevalence of lower paying service-sector employment. In August 2014 the Monroe County Commission approved a stakeholder assessment effort, to be conducted by the FCRC Consensus Center at Florida State University (Consensus Center), to solicit perspectives and ideas on workforce housing challenges and on whether a county-wide consensus building effort should be convened to address the complex issues surrounding workforce housing in the Florida Keys.

The 2005 Harvard report, “Strengthening the Workforce and Communities through Housing Solutions” suggests, solutions to the workforce housing challenge require a broad-based, proactive approach.³ This stakeholder assessment engaged a broad range of public, private and non profit stakeholders to clarify substantive issues involved, options to consider, information needed and process and coordination issues.

This assessment report sets out the context for addressing workforce housing issues and used interviews, meetings and review of data and documents to assess stakeholder perspectives on the County’s workforce housing challenges. These perspectives include county, city, regional, state and federal government levels, housing and tourist development leaders in Monroe County, the business and tourist community and non-profit community and civic organizations. Based on this stakeholder input, the assessment report summarized the themes, concerns, issues, and interests that stakeholders believe ought to be considered in addressing workforce housing needs in Monroe County. The assessment seeks to address the following questions:

1. What are the range of affordable workforce housing and related issues from the perspectives of County, City, State and Federal housing and tourist development leaders, the business and tourist community and the non-profit community and civic organizations and residents?
2. What are the linkages with development and land use issues, transportation mobility?
3. What interests, organizations and individuals should participate in a stakeholder county-wide committee process to develop consensus recommendations on affordable workforce housing issues in Monroe County? How Should the County convene a stakeholder committee to develop recommendations on workforce housing in Monroe County and its cities?
4. What is needed in terms of base line current data on workforce housing programs in

³ <http://bit.ly/1kcpnfm>, “By the time a workforce housing affordability problem begins to affect the bottom line, the forces that contribute to high housing costs have long been in place and are difficult to reverse. For the housing and business communities to forestall such an outcome, they must establish a working relationship characterized by respect, trust, and an awareness of each other’s interests. They must have access to information about the causes of the affordability problem and data that demonstrate its effects.”

Monroe County? What information and data on best practices should be considered in any subsequent stakeholder consensus building process?

II. WORKFORCE HOUSING⁴ IN MONROE COUNTY- CONTEXT

The workforce housing affordability crisis in the Florida Keys identified by the Monroe County Commission in 2014 is real. "Cost-burdened" households pay more than 30% of income for rent or mortgage costs. In 2013, 51% (or 16,849) of Monroe County households pay more than 30% of income for housing while statewide that figure is 43%. More than half of Monroe County renters are cost burdened (8,350 of 14,002) while about 45% of Monroe County homeowners are cost burdened (8,499 of the 18,936).

In November 2014 the United Way of Florida released its report, ALICE (Asset Limited, Income Constrained, Employed: Study of Financial Hardship, which indicates that nearly half of all Monroe County households (14,221 of 29,241) live above the federal poverty line but still struggle to afford basic expenses including housing, child care, food, transportation and health care.⁵ The Report also evaluates community conditions for each Florida county using a weighted "Economic Viability Dashboard" in three core areas employing a scale of 1 (worst) to 100 (best).⁶ Monroe County's results area as follows:

<i>Core Areas</i>	<i>Rating</i>	<i>Grade</i>
Housing Affordability (40%)	14 of 100	Poor
Job Opportunities (40%)	67 of 100	Good
Community Support (20%)	48 of 100	Poor

⁴ Workforce housing can refer to any form of housing, including ownership of single or multi-family homes, as well as occupation of rental units. Workforce housing is generally understood to mean affordable housing for households with earned income that is insufficient to secure quality housing in reasonable proximity to the workplace. The term "workforce" is meant to connote those who are gainfully employed, a group of people who are not typically understood to be the target of affordable housing programs. Workforce housing, then, implies an altered or expanded understanding of affordable housing. Workforce housing is commonly targeted at "essential workers" in a community i.e. police officers, firemen, teachers, nurses, medical personnel. However resort communities generally define "essential" more broadly to include service workers, as they often are characterized by high real estate costs and a high number of low-paying service jobs essential to the local tourism economy.

⁵ The Report was initially developed in New Jersey and now five other states including Florida, California, Michigan, Indiana and Connecticut, have used the model and developed reports in 2014. <https://www.frbatlanta.org/commdcv/publications/partnersupdate/2015/01/study-sheds-light-on-working-families-in-florida>

⁶ The Index provides the means to compare counties in Florida and to see changes over time. The Housing Affordability area includes three key indicators including: the Household Survival Budget (quantifying the cost of the housing, child care, food, health care, transportation); health insurance; and housing burden. The findings of all of several recent reports on Monroe County's current housing situation confirm that there is a significant and growing shortage of affordable workforce housing, both rental and ownership. In addition there exists a policy gap in that affordable housing for the working and middle classes is largely left to individual municipalities and counties to deal with.

In Monroe County an hourly wage needed to afford a two-bedroom Fair Market Rent is \$26.27/hour.⁷ In order not to pay more than 30% of family income on housing, a household must earn \$4,553 monthly or \$54,640 annually.

The findings of all of the reports on Monroe County's current housing situation confirm that there is a significant and growing shortage of affordable workforce housing, both rental and ownership. A significant portion of the current workforce housing in Monroe County is rental and there is a large rental housing deficit. As is the case throughout Florida, there has been increase in the demand for rental housing in Florida following the great recession and subsequent housing crisis, particularly among younger households and families with children. Statewide, the percent of households renting increased from 29.4 percent in 2007 to 34.4 percent in 2012 (American Community Survey, 2012; Shimberg Center for Housing Studies, University of Florida, 2013).⁸ The Shimberg Center has found that affordable rental shortages are most pronounced in southeast Florida. (SCHS, 2013).

In an Affordable Housing Solutions White Paper (October 2014)⁸ Donald Craig, Planning Director for the City of Key West, projected a deficit of more than 6,500 units of affordable housing units in the City and characterized the affordability challenge as follows:

“The City's Comprehensive Plan identified the City of Key West median household income as \$52,004 while the average annual wages earned by a worker in the City are approximately \$37,844 indicating that by standard guidelines for mortgage lending at the median level, a home should cost no more than \$166,012, or three times the median income. This is clearly inconsistent with actual cost of housing in the City, when the Key West Board of Realtors reports that at the end of July 2014 the median sales prices of 162 single family homes sold in the preceding 7 months was \$630,000 and the median sales prices for Condo/Townhouses was \$368,000. Clearly persons and families making the median income or average wage cannot afford for-sale housing, even if such were being built. As to rental housing, the situation is not better. Even though dated and most assuredly higher, the 2010 reported median gross monthly rent in the City was \$1,359. In order to be affordable to the average wage earner in the City, the monthly rent should be no more than \$946. Rent such as this is not available in the City at this point and time and results in workers sharing housing in increasing numbers, or paying 40-50% of their income for housing.”

⁸ Affordable Housing White Paper- Donald Craig, AICP Director of Planning & Nicole Malo AICP, Planner, City of Key West: http://legistar1.granicus.com/KeyWest/meetings/2014/10/2491_A_City_Commission_14-10-07_Meeting_Agenda_Full_Detail.pdf

The 2015 Home Matters Report from the Florida Housing Coalition⁹ confirms what other reports have found regarding rapid increases in rents for vacant units on the market while Florida's home ownership has declined steadily since its peak in 2007. Tighter mortgage lending standards, rising mortgage interest rates and fees, and a high percentage of cash sales have squeezed many low and moderate income homebuyers out of the market.

There currently exists a policy gap to fund workforce housing development. Federal programs through HUD or state governments are generally targeted towards low-income programs designed for people that make less than 60% of Area Median Income (AMI). The Low-Income Housing Tax Credit, which mainly spurs development of rental properties, is an example of this. Affordable housing for the working and middle classes has been largely left to individual municipalities and counties to deal with.

III. WORKFORCE HOUSING CHALLENGES- STAKEHOLDER IDEAS AND PERSPECTIVES

A. Critical Affordable Workforce Housing Common Themes

The over 75 persons participating in the interviews and meetings identified a range of workforce housing issues. While some offered a perspective from the same sector, they lived and worked in different parts of the Keys and the ideas they offered were not necessarily the same as others sharing that perspective. However, across the various perspectives the following six common themes regarding key workforce housing issues emerged:

1. **A Shared vision of success** for Workforce Housing in Monroe County will be important to guide and gauge the menu of strategies and actions needed to address workforce housing.
2. **Action orientation.** All acknowledge the workforce housing context is complex and challenging but needs immediate focus and attention and that addressing gaps in workforce housing throughout the Florida Keys will require immediate and longer term actions, even if those interviewed had differences in emphasis on those options and actions.
3. **Build upon the past affordable housing studies and reports.** Many agreed with the following statement, "The comprehensive studies, recommendations and published works on the topic do not need to be repeated. The metrics of this problem are well known and documented. The dynamics and facts have changed little over the years."
4. **Define the problem(s) first.** There needs to be a careful effort to define the shared workforce housing problem facing Monroe County in a multifaceted way (different levels and needs of workers, rental vs. ownership, different locations in the Keys) and then based on data and knowledge, move to identify, craft and implement "solutions.

⁹ http://issuu.com/flhousing/docs/home_matters_report_02.2015_final

5. **No single strategy.** There does not appear to be a single strategy to pursue but rather a menu of combined strategies to address the workforce housing challenges in the Florida Keys. Any committee should seek to develop a balanced package of both short term and longer-term strategies and actions that are targeted to addressing the needs of different sections of the workforce and to different parts of Monroe County.
6. **Housing as community infrastructure.** Given its importance to the local economy, the County should consider workforce housing as it considers other critical infrastructure such as transportation and water supply. Workforce housing should receive the policy, planning and financial attention that other areas of local infrastructure receive. The County should seek to better integrate the housing element with other plan elements such as the future land use, public facilities, transportation and capital improvements.

B. Critical Affordable Workforce Housing Common Issues

Issues generally identified as important to address from most perspectives included:

1. Addressing the ROGO system and workforce housing, including transfers and fractional ROGOs
2. Density and livable workforce housing
3. Relaxing height restrictions in light of Federal flood insurance changes and to create more workforce housing
4. Strengthen Monroe County Housing Authority's role in workforce housing
5. Address transportation and its relationship to and role in workforce housing
6. Update Monroe County's workforce housing site identification and audit of publicly owned property
7. Create new workforce housing units that are both affordable and livable with development incentives and public private partnerships
8. Preserve and maintain existing workforce housing and provide incentives to preserve workforce housing
9. Address related workforce issues due to high cost of housing (insurance, childcare, food insecurity etc.)
10. Review and consider changes in the County, City and state affordable housing policies and regulations including length of deed restrictions

11. Explore and expand funding sources to expand workforce housing in Monroe County

C. Stakeholder Ideas and Perspectives on Workforce Housing Matrix

The Stakeholder Assessment sought to identify how different stakeholder perspectives viewed the challenges of workforce housing facing Monroe County and its residents. The over 60 issues and ideas identified and summarized from the many interviews and meetings, help to shed light on the complexity of the issues and on the healthy diversity of views on how to best address the challenges. The assessment interviews were conducted with the understanding that the themes and ideas identified would be shared with the Commission and inform any committee that would engage in subsequent consensus building on workforce housing solutions. It was also understood that individual views would not be attributed but related perspectives would be summarized.

Workforce housing ideas and issues identified in the Assessment from different perspectives and included issues displayed in the matrix below in the following nine categories:

1. Overall *(12 Issues/Ideas)*
2. Workforce Housing Funding *(7 Issues/Ideas)*

D. Stakeholder Ideas and Perspectives on Workforce Housing

Over 75 persons participated in the interviews and meetings and identified a range of workforce housing issues. Below is a compilation summary of the input received from individuals representing different sectors (public, private and non-profit) and residing in different parts of Monroe County.

1. County Government- Ideas and Perspectives

Build on affordable housing work to date

- We need to understand and build on what's been learned from various task forces and studies and apply to the current workforce housing situation in the Keys. Review what incentives are in ordinances and how have they worked. How do we retool to work better. What about inclusionary zoning? What about density bonuses and density waivers? What they are how they work. How to retool to work better. What doesn't work.
- Come up to speed on what was done previously so we know where things were when walked away.

No silver bullet, no easy fix

- We need a balanced menu of options. Acknowledge the broad range of different of solution and levels of housing.
- There is no easy fix, no one way to handle this problem.

Workforce Housing Shortages

- We are short over 6000 units and under ROGO we will get 700 over the next 10 years. That does not come close to solving the problem.
- The Affordable Housing Committee should focus initially on workforce.
- We are short 6,800 units of work- force housing. This is a crisis and housing is the most expensive item on the County's list.
- Housing affordability in the Keys includes insurance, the cost of food and the cost of daycare as well as housing.

Rental workforce housing focus

- Our most critical need is in lower income and service ranges and we should focus especially on rentals for this segment of the workforce.
- 98% of the residents of county-run public housing is workforce housing for working individuals (with the exception of the elderly and disabled). Rent is capped to 30% of household income and the remaining amount is subsidized.

Windstorm and Flood Insurance Rates

- The current windstorm and flood insurance situation is huge affecting all residents not just lower income.
- If you can't pay cash, you need insurance to secure a bank loan.
- FIRM- Fair insurance rates for Monroe- is engaged in grass roots advocacy work.
- The Federally subsidized program flood insurance program was amended and will set a new basis for Florida insurance rates, setting the stage for immediate dramatic increases flood insurance rates for both residential and commercial properties.

County growth management and affordable housing.

- Should affordable housing be part of the County growth management function

which is built more to slow growth or placed elsewhere with good staff support to allow it to be more active in identifying parcels and developers in getting the job done?

Empower and support the Affordable Housing Committee

- The Committee needs to consider a menu of recommended consensus workforce housing solutions as a package for the County Commission to consider and implement.

Protect and support the Committee's affordable housing staff.

- In the past considering the complex incentives and transactions for developers to build affordable housing has opened staff to attack by those opposing development in general. It has been a very public and vitriolic situation where staff have been personally attacked.

Site Identification.

- We should identify every piece of county property that is vacant, demolished, big enough for affordable housing and zoned properly.

Preserve and maintain affordable units.

- We've lost some affordable housing that was bought at low rates and sold at market rate and restrictions were ignored. We have to pay attention so games are not played with this and we lose these units.

Mixed Use.

- We should encourage this but it has not caught on except in Key West.
- We should explore mixed use and mixed income levels vs. low income property projects makes for better self policing and safer and more livable communities.
- The only exception to this is tax credit properties where everyone is low income with no one is over 60% AMI.

Address Management on Tax Credit Properties after 15 years.

- For the first 15 years, the developer is liable and responsible to maintain the tax credits and the housing. After the 15th year property management tends to deteriorate as less cash is devoted to upkeep.

Consider allowing Land Authority bed tax funds for construction.

- Currently they can only use the funding for land acquisition.
- Consider changing the Tourist Development Council (TDC) law to allow those dollars to be used for affordable housing development.

Height Restrictions.

- Should be open to relaxing this where this could produce more workforce housing.
- Consider handling this on a site specific basis.
- There are areas in town where building higher would not block views. The City of Key West would have the capacity to implement this although it would first have to be approved by referendum.

Explore Micro Housing.

- This is being implemented in cities such as New York. It might be applied in cities in the Keys to cut down on the commute time.
- Note that 1-bedroom units are the shortest in supply for the public housing and tend to be occupied longer, usually by elderly and disabled.

Enforce Housing Codes.

- Enforce housing codes in terms of illegal multiple occupancy.

ROGO

- ROGO allocation system for permits early on effectively eliminated affordable housing construction. Three things need to come together for successful workforce housing: funding, available land and allocations. However these have not coincided. Years ago funding was available but land and allocation were not.

Hospitality Industry and Workforce Housing.

- The industry should step up and participate in efforts to provide more affordable workforce housing. Some are, others should.
- Some wonder why County taxes would be used to subsidize the hotels' workforce housing. Hotels should do more.
- We should collect data on what hoteliers are doing in providing workforce housing for their employees.

Local Dedicated Funding Source.

- We need a local dedicated funding source (sales tax, "sin" tax, etc.) that can support the construction of workforce housing not just land acquisition.

Address Sadowski Trust Fund Donor Inequity.

- Monroe County contributes 60% and gets back 8%. This should be addressed when funding resumes.

Address NIMBY

- Historically there has been community reactions to the old low income projects. This may continue to be an issue.

Related Affordability Issues

- Insurance and Day Care can figure in challenges for workers in terms of costs on tight family budgets.
- Many work 2-3 service jobs to be able to afford housing and other costs such as food.
- The "situationally" homeless are part of the workforce housing puzzle in Monroe County.

Hurricanes and Workforce Housing.

- In the last hurricanes in the Keys transportation from Miami stopped and restaurant and lodging businesses in the Upper Keys had to shut their doors for lack of employees.

2. Municipal Government- Ideas and Perspectives

Target the Levels of Workforce to Serve

- We need to define more clearly what kind(s) of workforce housing we want for the community. Hourly wage earners may always be renters in the Florida Keys. There is a shortage of decent, reasonably priced, available housing, especially one-bedroom rentals.

Engage Employers

- We need the businesses in Monroe County with the different types of employees (hourly, salaried) to be at the table and part of the solution. Hotels have the highest occupancy rate and the most profits of any place in the country. They have begun to help with workforce housing and they should continue to do

more.

Vacation rentals

- We need to address this challenging issue and its impact on workforce housing in the current marketplace.

Height restrictions

- Ease height restrictions where there aren't view issues to allow for more workforce housing.

Mixed use.

- Seek more mixed uses with the school board and other public properties.

Land Acquisition

- Focus land acquisition on workforce housing properties.

Focus on Redevelopment

- Key West is nearing build out and most construction is redevelopment and remodeling.

Loss of Deed Restrictions

- Address and audit the Loss of Deed Restrictions. ("Of the total 1,089 affordable units, 223 are expected to have their deed restrictions expire, or have expired by the end of 2015." *(See Appendix #6)*.)

"No net loss" of existing workforce housing

- Amend the Comprehensive Plan's housing element so that future development will result in "no net loss" of existing workforce/affordable rental housing for households earning 80% or less than the area mean income.

High land values limit tax credit funded affordable units

- Difficult to both finance and construct units at any level except at the 60% of median through heavily subsidized tax credit funding. Lack of reasonably priced land has meant few of these projects have been built.
- In the City of Key West, its annual allocation of 91 affordable housing BPAS units.

Re-purpose land owned by local government

- Land owned by the county should be re-purposed for affordable and workforce housing.

Consider additional funding sources

- A tax on every alcoholic beverage sold or a 1% real estate transfer tax could generate funding for workforce housing. Relying upon the Land Authority funds won't be enough.

Development Plan and Funding for Workforce Housing

- We need to figure out how to put the land authority/Housing Authority and bed tax money together and form development plan for affordable housing.

ROGO AH Allocations

- Each year in City of Key West there are 90 affordable housing ROGO allocations with the City able to borrow up to 10 years ahead to create more affordable housing.
- Focus all tier-3 properties on workforce housing if it doesn't raise a property rights issue.

Adopt lease form

- Cities should consider adopting a lease form with the public sector owning the

underlying land.

Support non-profits and their work on affordable and workforce housing

- Provide funding for nonprofit affordable housing entities.

3. State Government- Ideas and Perspectives

FFHC Set Aside for Monroe County

- Work to preserve the Monroe County set aside Florida Finance Housing Corporation competitive applications for affordable housing tax credit

Sadowski Fund

- Sadowski Fund affordable housing funding has not been available for affordable housing since 2006. Work to bring that funding back.

Tourist Development Tax and Workforce Housing

- Tourist Development Tax should support the building of workforce housing. Funds go to the Monroe County Land Authority (\$4 million) and Key West (\$8 million).
- Consider changing the tourism bed tax statute to allow for supporting the construction of workforce housing.

Combination of Issues

- In the Keys need to consider four factors: hurricane evacuation; environmental protection of land and species; affordable housing; and water supply.
- During the economic downturn there was less interest in building AH.

Rising Rents

- Rising rents represent a big challenge for workforce housing and strategies to address this should be considered.

NIMBY issues and Workforce Housing

- Monroe County needs to address the NIMBY issue that is a barrier to workforce housing.

Protect Navy Noise and Crash Zone but look for workforce housing opportunities

- Work with the Navy to protect noise and crash zones while looking for opportunities to build workforce housing.

Support Deed Restrictions

- Support the use of 99 year leases for \$1- Affordable forever.
- Assess current state of enforcement of deed restricted land and work to extend leases to 99 years.

Identify and Aggregate Workforce Housing Parcels

- More could be done to identify parcels of land and aggregate them and analyze opportunities for workforce housing on surplus lands.
- There may be opportunities for duplexes and quadplexes on scarified small lots for rental units.

Height Restrictions

- Consider relaxing height restrictions especially in the center of the islands with existing tall buildings. This would provide additional workforce housing

FEMA Flood Maps

- Address the impacts of the new FEMA flood maps on Monroe County and workforce housing.

Homeless

- Homeless are an important issue to address in a tourist economy. How many of the homeless are there because of lack of affordable housing in the Keys?

ROGO System

- ROGO system has evolved and the modeling is scientifically and statistically defensible in terms of hurricane evacuation time.
- There are affordable housing ROGOs that have not been used.
- The most recent annual travel study that shows how long takes to get over the 22 segments of the U.S. 1 highway, indicates a segment starting to fail in Islamorada.

Engage the Hotel and Hospitality Industry

- Hoteliers should be more engaged in the workforce housing discussion. Convened a recent meeting for hoteliers in Islamorada to discuss this issue and only 3 came.

Enforcement of Housing Ordinances

- Need to address and enforce the ordinances regarding unlawful modifications of homes and overcrowding of residences.

Mobile Homes and RV Parks and Workforce Housing

- Need to address the question of the role of mobile/RV parks in supplying workforce housing and the impact of conversions of these parks on availability of affordable housing.

4. Education Sector Ideas and Perspectives

Target the kind of housing needed

- Education has the same levels of workforce housing needs as other sectors.
- Have to focus on the target population in terms of addressing gaps in workforce housing, e.g. Teachers, support and administrative staff, service industry workers, etc.

Partnerships for workforce housing

- Interested and exploring partnerships for workforce housing development on school board owned property.

Recruitment and Retention

- Recruiting and retaining teachers and professors in the Keys is a very challenging problem due to the relatively high cost of housing.
- Retention continues to be a problem and accessible and affordable workforce housing is part of it. There is a huge organizational cost to retrain.

Student Enrollment Stable

- The current context in terms of student enrollment is stable but not increasing, having decreased during the economic downturn.

Single vs. Family Teachers

- “We have lot of young employees with over 70 new teachers.” Young single teachers may rent space with roommate(s), but teachers with family is another matter as there is very little family friendly workforce housing.
- Many teachers in Upper Keys commute to Miami Dade vs. secure housing in

Monroe County.

- In Key West and the lower keys, the property values are the highest and present a challenge for young teachers and teachers with families.

Involve the Public School System at the Workforce Housing Table

- Since the Public School system one of the larger employers in the County in terms of teachers, support and administrative staff, there should be place at a workforce housing table for this perspective.

Increasing reliability of teacher housing needs data

- The School system is working on improving the reliability of their data and its collection related to employee housing needs.

Public private partnerships

- Encourage and support public private partnerships as part of the workforce housing solution.

5. Development Stakeholder Ideas and Perspectives

Development Constraints

- The critical areas of state concern and environmental issues constrain the available land for workforce housing.
- The cost of labor and insurance is climbing so incentives for workforce housing will be an important stimulus.

Authorize Land Authority to Build Workforce Housing

- Fund the Monroe County Housing Authority or other similar successful organizations to build workforce housing.

Convert public land for workforce housing

- The school board and the city may have large tracts that can be converted for workforce housing.
- Need to use infrastructure \$\$ making land improvements for property we should own- RFPs for developers.

Tax credit housing and workforce

- Meridian West- 102 units for very low income. It has the lowest turnover of any very low-income housing project in Florida with 3 bedroom apartment renting for around \$1100. The very low and low income are the best served in terms of affordable housing of the workforce population. Workforce housing is where the gaps are.

Livability and Affordability

- Tax credit developers- Designed for good purpose but because of bureaucratic overhead, can only do large scale projects that may look out of place and unattractive to the people living in and nearby the units/development.
- Livability ideas are secondary with landscaping and signage not given a high priority. Need to consider "livability" not just tax credits and affordability when building workforce housing.
- Scale is an issue here with smaller projects there is a greater chance of empowering residents to maintain their homes. The larger projects have ongoing maintenance and management costs

Address Spectrum of Workers and Housing Needs

- Have to clarify what workers want and need in terms of housing. What is the real need? Employees from Eastern Europe- Hawks Cay- Vast majority of employees- 6 months at a time. Is sharing an apartment for these workers a bad idea?
- What portion of staff/employers made up of transient migrant workers? What are their needs? How many are working in City of Key West and where can their housing needs be best addressed? What role might dormitories play?

Incentives for smaller unit projects

- Consider providing incentives for more smaller unit projects that will be more livable. The tax credit resource funding for this doesn't practically work below 20-25 units because of costs.
- Provide incentives for small apartment complexes, not big units, e.g. develop 10-20 units with multiple occupancy.
- They can be nicely done dorm style with shared kitchen consistent with character, built to code and also preserve green space.

Hotels re-openings and workforce housing impacts

- May not be new hotels coming on but those that were shut down are reopening. We need to be careful about what that means in terms of housing demand. There may not be growth in the population going forward.

Workforce Housing and Live Aboard Boats

- What are the City of Key West statistics on Mooring Fields. There may be more than 120 boats in mooring fields providing affordable housing. How many boats are there for a short or longer time? How many are providing workforce housing? What is the quality?

Addressing Trailer and RV Parks as Workforce Housing

- What role do existing trailer and RV parks play in affordable workforce housing in Monroe County?
- What has been the enforcement experience with the 30% rule in converting trailer parks in the County?

Waive building permit fees

- Have local governments waive building permit fees for affordable and workforce housing projects.

Political will

- Is there the political will to implement workforce housing solutions?
- There has been at times, for example the last Workforce Housing Task Force in 2007 had some of its recommendation implemented.

Encourage mixed use

- We should be encouraging mixed use in central areas throughout the Keys.

Consider greater use of an inclusionary affordable housing fee

- The County should set a fee for inclusionary housing such as the \$40,000 per inclusionary housing credit that Marathon is proposing. This fee would be paid to the Monroe County Housing Authority in an affordable housing trust fund to be distributed to those who actually build affordable housing. This would create a subsidy paid from new market rate or transient (hotel) projects to be distributed to those who actually build the affordable housing.

- To assure the housing is built and completed, the subsidy would not be funded until the certificates of occupancy for the affordable housing are issued.
- This type of commitment would incentivize those who are willing to build affordable housing, and the funds would come from those building the projects that require inclusionary housing without the market rate developer from having to use some of his/her market rate allocations on affordable housing.
- All transient unit development and re-development should require inclusionary affordable housing ordinance, or impact fee assessment.

Increase density and height

- With limited lands on which to build affordable housing, increase the density and height (e.g. 40 feet vs. 35 feet) for affordable housing to make this feasible.
- Increased density in appropriate zoning districts within commercial areas to facilitate workforce housing.
- Increase height in appropriate areas.
- Build up! Build new! Much of the KWHHA properties are old, ugly, small and inefficiently sparse. Density needs to increase.

Increase the capacity of highways

- To increase ROGO allocation work together to secure funding to increase the capacity of highways.

Review city and county owned lands for use as workforce housing

- Identify all city and county owned lands for workforce housing that do not present environmental issues and utilize for workforce housing.

Develop a workforce housing 10-year strategic plan.

- Look for early successes in the first 3-5 years in adjusting regulations. Set a goal of cutting the gap in workforce housing by 50%.
- The approach to “renter vs. ownership” should be “both/and.”

Address the 2018 FEMA changes

- We need to prepare in required elevations (AE 7 becomes 9) and 60% of houses will be in jeopardy making them harder to resale or rebuild.

Surplus land

- The County and Cities should inventory surplus land and identify land that can be used for workforce housing.
- Lift the cap on the number of credits, keep construction costs per unit low (\$25,000)
- Consider additional sales subsidy to help deals that are short.

Identify and Aggregate Parcels of Public Land

- County and the Cities haven’t done enough to identify parcels of land and aggregate them. We need to do more surplus land analysis.

Additional density for workforce housing

- We have to be creative. We should consider giving additional density to developers who are constructing a workforce community/development with a couple market rate units.

Add commercial development and redevelopment

- Based on employees and square feet (use industry standards and sales tax codes) for an impact fee assessment.

ROGO Transfers

- Implement a ROGO transfer ordinance whereby a market rate unit may be dislodged if an affordable unit replaces the dislodged market rate.
- Issue no market rate ROGO units for multi-unit development projects, instead, issue “affordables” and require developers to take the affordable units and deed restrict existing market rate properties and then dislodge the market rate for use elsewhere as their market rates.

Buy Down Interest Rates for Workforce Housing Projects

- Use land authority money or impact fees to buy down interest rates for development costs for work force housing projects.

Cut Taxing Rates on Workforce Housing

- Legislation to cut taxing rates on affordable and workforce housing.

Commercial Properties for Workforce Housing

- Give commercial properties that are used for workforce housing rental the same tax and insurance (flood) breaks as primary homestead properties.

6. Lodging, Hospitality and Tourist Development-- Ideas and Perspectives

The Hospitality Economy

- Hospitality represents 80% of the economic activity in the Keys. Its workforce is very transient and generally looking to rent not purchase.

Lodging Industry and Workforce Housing

- Lodging industry may be only industry in the Keys that is trying to address workforce housing for new properties. For example the Westin in Key West has 75 units set aside housing 105 people from managers to cooks.

Marketing and the Keys

- Focusing on creating a year round destination with success in Key West. Spreading the marketing effort out over the year to increase visits and occupancy in the off season and slow season. Colorado recently decided it had marketed sufficiently and moved to disband their statewide marketing effort. The next season resulted in a big drop in tourism. Tourism remains the key part of the Key's economy.

Importance of continuing to market the Keys

- Colorado experience in cutting budget for statewide marketing led to big drop in the tourism economy.

Environmental Land Acquisition vs. Affordable Housing

- With the years in which funding was put towards environmentally land acquisition, relatively little was invested affordable housing. What is a smart split between the 2 purposes?

Transportation and the Keys.

- The transit service from Miami-Dade to Marathon and north in the Upper Keys is currently funded by the Dade County local transit ½ penny, state and federal dollars but no Monroe County support for the transit service.
- As job opportunities grow in Miami Dade, what impact will this have on the supply of lodging industry and related tourist industry employees in the Upper Keys? “Getting on bus at Walmart in Florida City to go south for work, the

question for workers is How available is work, where and how much does it pay.”

- Homestead and Florida City provide high densities of immigrant populations which housing in Monroe County does not offer.
- Hotels in the Upper Keys are interested in working with Monroe and Dade Counties in finding a solution to sustaining and improving the transit service that provides lodging and hospitality works from Marathon and north. Some hotels are supplementing the bus routes with their own busses.
- We need better transit in the lower Keys to support the workforce transportation needs.
- Better public transportation in the lower keys. Reliability and cost of public transportation options to deal with fact that more affordable housing is further away from jobs.
- Need reliable transit from workforce housing to work especially with parking issues in Key West. Alternatives such as biking and scooters are not practical given weather. Consider using smaller and more transit vehicles in the Key West area.

Employee turnover

- Person dependent industries cannot outsource jobs. Need to find ways to reduce employee turnover which often relates to housing/rental costs.

Vacation rentals and Preserving Affordable Units

- This is a large problem throughout the Keys impacting the supply of workforce housing. However it may be that many are above the workforce housing price range.
- More important than building new workforce housing is how can we maintain what is affordable for the median income workers. During the downturn property values went down while rentals went up. Workforce housing is primarily the rental housing market. Consider whether there might be restrictions or new regulations creating some disincentives for converting units to vacation rentals.

Online Vacation Rentals Marketplace

- Address the online market place for vacation rentals that connects users with property to rent with users looking to rent the space(e.g. AirBnB) and its impact on bed tax revenue
- Also, related to this is the new addition of Air B&B and lack of regulation and enforcement. This raises safety issues as well as the “free ride” by not paying the bed tax. It may be much easier to rent through this approach than to a workforce tenant.

Help Workforce Renters

- Consider providing down payment/deposit assistance.

Hospitality Industry Data

- Hotels have been reluctant to share data on workforce housing as some is tied to employment contracts and privacy concerns.

Disseminating Workforce Housing Information

- We need more effective affordable housing information that is available to workers.

Height restrictions

- Can build more rental units on both 2nd and 3rd floors with first floor commercial in the lower Keys if the height restrictions are eased. For example consider strip malls with the upper level dedicated to housing.

Public Property

- County and Cities may be the biggest land owners and should identify public property with buildings that might be torn down to build housing.

Balance environmentally land acquisition with affordable housing

- investment. Historically, nothing or little has been allocated towards AH effort. What is a smart split between the 2 purposes.

NIMBYism (“Not in my back yard”)

- Lodging industry did general marketing efforts focusing on nurses and police and workforce housing which helped. However, there continues to be a lack of creating new workforce housing.
- Give Land Authority the ability to devote some of the bed tax funding to purchase workforce housing.

Retention and the High Cost of Housing

- Tourist Development Council data shows that 94% of those leaving the County are leaving because of high cost of living and housing.

Rents going up

- While land values dropped down during the recession, rentals went up as many owners faced with increases in wind storm and flood insurance and property taxes passed these on to tourism workers.

7. Business Sector including Real Estate

Island economy and community

- Housing has always presented a dilemma and changes in an island community and economy. 100 years ago the cigar manufacturers had to address this.
- We have a dynamically changing environment with a finite piece of real estate and nothing else to fall back on. Over the past 15 years, credit should be given for successfully putting together affordable housing units in the face of regulatory and NIMBY hurdles, but we are still far short of bridging the gap and meeting the demand.
- “Checks and land” can solve the workforce housing problem.

Clarify our workforce targets for housing

- It is not clear what kind of workforce and housing are we seeking to provide? Hotel, motel, restaurant or managers- each with a different set of problems.
- We don’t know anymore what the community needs. Do we need single residential occupancy for 500 guest workers in Key West? Probably not.
- We may not have an analytical feel for what we need in terms of workforce housing throughout the Keys.

Impact on community of transient workforce

- What are we doing to the cultural makeup of the community with a transient workforce? Children grow up and move to less expensive places instead of making Monroe County their home.

- Biggest concern is the character and flavor of Monroe county may be going away and losing our foundation. The next generation shrinking.

Wind and flood insurance

- Rising insurance costs are compounding the housing problem- driving rents up beyond affordability.

Political will

- We will need the political will to make changes to bridge the gap of workforce housing
- Previous Task Forces on affordable housing have been very difficult and challenging to serve on in terms of pleasing the elected leaders and citizens.
- Do we have the political will to continue grappling with this problem and implementing solutions? Is the problem only a shortage of affordable units suitable for workforce housing?
- We have opportunities but do we have the political will to get this done? There's too much, "I've got mine," in the community. How many of our elected leaders works or owns a business?

Land trusts as a tool

- The Bahama Land Trust debacle has made serious discussion of land trusts as part of the tool kit very difficult.

Prioritize units over "money in lieu of"

- Is it even possible to prevent gentrification on island that is 2X3 square miles? Don't look for \$\$ in lieu of as we need units.

Hold off major changes to workforce housing pending the Affordable Housing Committee's work

- The County appears to be getting ready to change income limitations to target working households at the middle level. Hold off implementing changes until we have reinstated and charged the Affordable Housing Committee.

Permit Bed Tax to support purchase/building of workforce housing

- Change the law to allow purchase and building of workforce housing. Put it where people can get to work.

8. Non-Profit Sector Ideas and Perspectives

Living wages

- Affordable housing programs for low income earners range from 80 to 140 % of AMI, yet real wages for career type workers are closer to 60% AMI.
- Employers in Monroe County are not expected to pay a living wage. The wealth created in our tourist economy depends upon low wage, high turnover, and low skill employees.

Limited housing supply and investment wealth

- The outside wealth that purchases a second home or invests in real estate in the Keys drives up the asking and selling prices for all properties where the dynamic of a limited supply of land and great wealth seeking investment churns on constantly. This dynamic is shared with other resort locations. The compromises workers make then is to work several jobs and/or to live in substandard housing or to leave.

- We need to get more citizens of Monroe County invested in the future of this place.

ROGO and affordable housing

- The measured gap between the number of units needed and the available ROGOs demonstrates the futility of trying to build our way out of the crisis. The negotiations with DEO provide affordable housing units for the next 20 years within the frame work of evacuation limits. These new affordable units are critical but will not solve the need.
- The operative assumption for allowing more density for certain types of affordable housing is that all of the types of ROGOs are not necessarily equal. Consider assigning a ROGO value of less than one unit for affordable homes less than 600 square feet or so. The Comprehensive Plan, the DEO, and evacuation models can be examined for alternative methods to allow more density for affordable units that are smaller.
- The second home owners who are not necessarily in residence during the hurricane evacuation season is an example of units counted against evacuation times where the actual impact may not exist. The number of homes that are vacant in Monroe County due to second home ownership has been noted in several studies
- The Area of State Critical Concern uses the dwelling unit as its basic unit of control. The management of and regulation of all home types will become critical to assessing evacuation time. Monroe County should audit all housing types and create an inventory detailing the status of each ROGO. Benefits from an audit would include identifying flood prone structures, uninhabitable units, illegal units, etc.
- Change ROGO to square footage.

Affordable housing has not been protected

- When government has granted greater densities or used inclusionary zoning it has not always registered, audited or tracked compliance to ensure the permanency of these precious units. Deed restrictions were not monitored.
- The temptation to convert affordable units into market rate units, rental or ownership, is too great and with little penalty or notice.

Affordable housing “lost units”

- The community has a strong common interest in protecting those affordable units it has lost after subsidizing or underwriting their creation. If the will were to exist, these “lost “units could be investigated and the current owner asked to revert them to affordable status. Liens and other mechanisms exist to “take” on the public’s behalf what was not proper to convert in the first place.

Redevelopment and inclusionary zoning

- Inclusionary zoning as a government policy has been in place for new development. It is time to explore requiring affordable housing units from redevelopment projects.

Lower and Middle Keys different workforce housing issues

- The lower and middle keys have different issues and solutions from the upper keys where day labor based in from the mainland can assist in the workforce. But the market dynamics are found in common through all of the keys.

Funding inequity

- A strong argument can be made to correct the inequity of the donor/recipient that exists, based on the \$6 million a year that Monroe County gives to The Sadowski Housing Trust Fund every year compared to the pittance of \$300,000 in SHIP funds returned this year and in the past.

Transportation

- Lack of transportation infrastructure makes workforce housing more problematic.

New workforce housing partnerships needed

- Many differing approaches in scope and scale will be required with various partnerships between government, private, for profit and nonprofit developers.

Affordable yet substandard housing

- Rental housing that costs less than \$900 a month, regardless of size or condition, is termed affordable despite being unsafe or substandard or very small.

Political will

- The political will to make real changes in policies, incentives, regulations and to commit resources remains to be sustained.

Don't repeat studies, focus on action

- The comprehensive studies, recommendations and published works on the topic do not need to be repeated. The metrics of this problem are well known and documented. The dynamics and facts have changed little over the years: outside wealth creates seasonal homes that are not available; the profit generated from transient units puts pressure on dense mobile home and RV parks; tourist industry wages are low, turnover is high, landlords can rent substandard units due to high demand for any type of housing, etc.

Other related issues

- While workforce housing is the focus of the moment, there are important related issues of food insecurity, education, child care for employees are critical to the workforce housing discussion.
- While addressing workforce housing, we should address homelessness (and the growing youth % of this population) and help with the path back to working for families.
- Where will the employees of the new lodging establishments be housed?
- There has been a huge uptick in the demand at food pantries across the County and not just among homeless people but with working families still in homes. 47% of families countywide with kids under 18 are eligible for reduced lunch. Of this population, 46% are minorities. Lack of affordable workforce housing has led to food insecurity. If we didn't have a housing problem we wouldn't have a food security issue.
- Many elected leaders are not aware of the childcare challenges faced by those working and living in the Keys. Those who haven't raised family here are not aware of the lack of child care options and its impact on the work force.
- If we can't control housing costs for working families, all other costs such as childcare, food prices, etc. are related and compounded.

Expand the Keys Economy.

- We need to think outside the box and expand our efforts to build a future Keys

economy beyond tourism.

- We need all parts of the demographic in Monroe County.

9. Military Sector Ideas and Perspectives

Recruitment and retention

- Workforce housing affects the recruitment and retention. The housing set aside for the base workforce has a long wait list. Housing is the #1 issue for their civilian workforce. There is not a week where the Commander is not involved in a family housing issue.

Communication and coordination

- In terms of the Naval Air Station lines of communication and coordination have been improved with the Commander now the point of contact for coordination.

Presence in the community

- In terms of presence in Monroe County, there are roughly 1600 military (including Coast Guard), 1000 civilians and 400 contractors or about 3000 employees and about 5500 including families, spouses and dependents.

Evacuation procedures

- In terms of evacuation, the Commanding Officer implements the recommendations of the County Emergency Manager and will close the base and issue evacuation orders for military personnel. Civilian workers are urged to evacuate and are provided travel orders and funds to evacuate. The 550 RV units in the Naval Air Station campgrounds evacuated first.

Need for buffer areas and workforce housing

- In terms of searching for solutions to locating workforce housing in Key West, the Naval Air Station strives to protect public health and welfare and its mission by keeping buffer areas separate without housing in the high noise of unsafe areas surrounding the base.
- The Naval Air Station does not get directly involved in growth issues such as density and intensity unless it directly impacts the buffer areas. Only exception to this was their support for the widening of the 18-mile stretch of US 1.
- General concern with the impact of vacation rentals on the supply of workforce rental housing for the over 5,500 Base employees and their families, spouses and dependents.

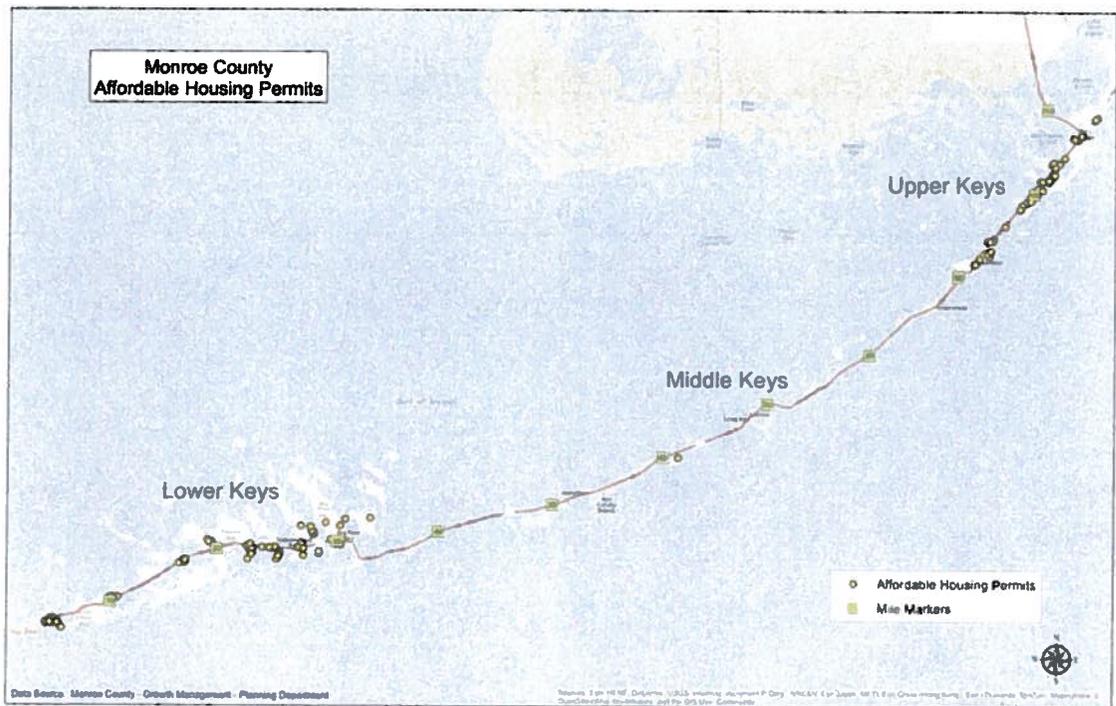

IV. WORKFORCE HOUSING PROCESS- STAKEHOLDER PERSPECTIVES

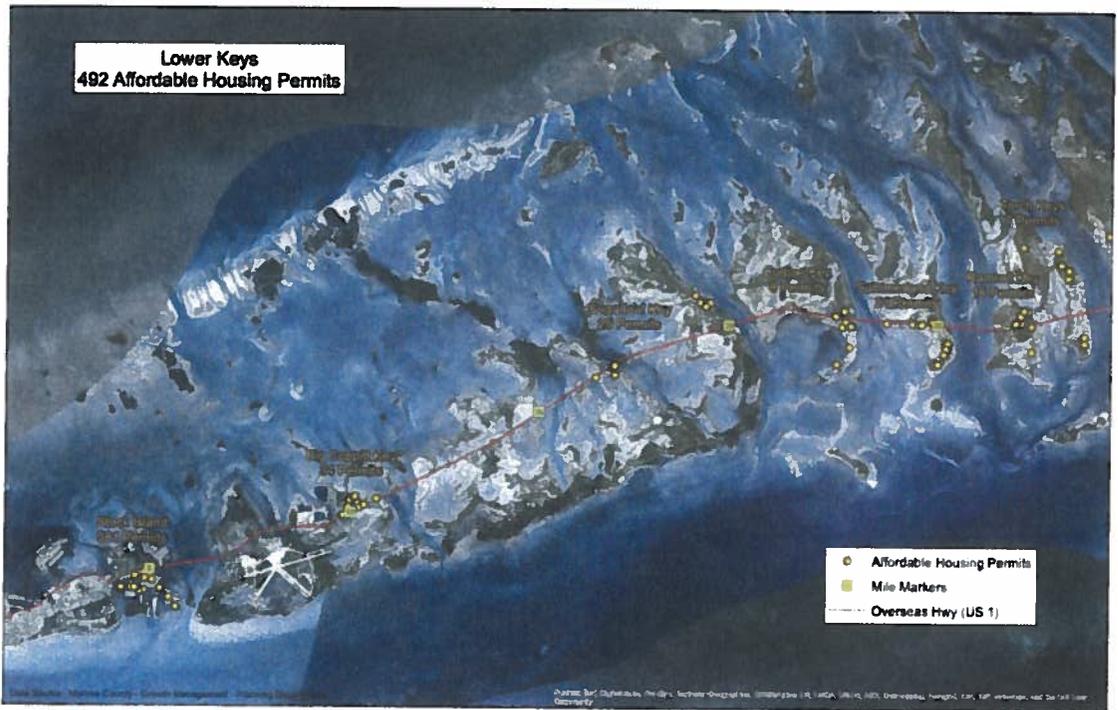

A. Information Needed to Inform Consensus Building on Workforce Housing

Monroe County staff has gathered a draft detailed baseline data that included an inventory of affordable and workforce housing projects completed over the past 2 decades in Monroe County, along with the public incentives that were made to assist in the housing development.

(See: [http://consensus.fsu.edu/Workforce-Housing-Assessment/pdfs2/DRAFT County AFF Housing Developments and Incentives 9-2.pdf](http://consensus.fsu.edu/Workforce-Housing-Assessment/pdfs2/DRAFT%20County%20AFF%20Housing%20Developments%20and%20Incentives%209-2.pdf)

The maps that provide the locations of the developments included in the Table throughout Monroe County:

Staff also provided information on the ROGO system and annual allocations. Based on the affordable housing units that are in the Affordable and Workforce Housing Projects Table, the distribution of deed restricted affordable housing units is currently:

ROGO Subarea¹⁰	# Units
Upper Keys	343
Lower Keys	452
Big Pine Key and No Name Key	19
Total	814
Now incorporated as Islamorada	5
Now incorporated as Marathon	4
Total including those now incorporated	823

The balances of Affordable Housing Allocation¹¹ available as of Quarter 3 Year 23 (Jan. 13, 2015-April 13, 2015) are:

- a. Big Pine/No Name Key Subarea affordable housing allocation breakdown into the two income categories are as follows: 1) very low, low, & median income 8 allocations and 2) moderate income 8 allocations; and
- b. Unincorporated Monroe County excluding the Big Pine/No Name Key Subarea affordable housing allocation breakdown into the two income categories are as follows: 1) very low income, low income and median income 114 allocations and 2) moderate 112 allocations.

The additional affordable allocations by Subarea up through 2023 include 710 total including 20 to Big Pine Key/No Name Key Subarea and 690 available for countywide allocation except for Big Pine Key/No Name Key subarea

In the course of the assessment interviews and meetings, various studies and data sources

¹⁰ The ROGO subareas are defined in Section 138-20 of the land development code as follows:

Sec. 138-20. - General provisions. (c) The ROGO allocation system shall apply within the unincorporated area of the county outside of the county mainland, and such area, for purposes hereof, has been divided into subareas as follows:

- (1) Upper Keys: the unincorporated area of the county north of Tavernier Creek and corporate limits of the Village of Islamorada (approximately mile marker 90).
- (2) Lower Keys: the unincorporated area of the county from the corporate limits of the Village of Islamorada (approximately mile marker 72) south to the corporate limits of the City of Key West at Cow Key Bridge on U.S. Highway 1 (approximately mile marker 4), excluding Big Pine Key and No Name Key.
- (3) Big Pine Key and No Name Key: the islands of Big Pine Key and No Name Key within unincorporated the county.

¹¹ Monroe County Code Sec. 138-24. **Residential ROGO allocations.....**

(1) Yearly residential ROGO allocation ratio. Each subarea shall have its number of market rate residential ROGO allocations available per ROGO year. Affordable ROGO allocations shall be available for countywide allocation except for Big Pine Key and No Name Key. The annual allocations for Big Pine Key and No Name Key shall be eight market rate and two affordable dwelling units.

were identified on best practices from other jurisdictions and ideas developed or considered but not implemented by previous affordable housing task forces. These background papers can be found at: <http://consensus.fsu.edu/Workforce-Housing-Assessment/>

B. Workforce Housing Stakeholder Perspectives on the Process Going Forward

Among the range of stakeholders interviewed, all expressed the need for a focused and comprehensive county-wide workforce housing dialogue that involved those with a stake in the outcome. Many believed that such a committee should develop a package of consensus recommendations, informed by data and the range of stakeholder and public perspectives, that can provide for both short and longer term actions for the Board of County Commission's consideration. While some of those interviewed remained skeptical that there will be sufficient "political will" to implement the Committee's recommendations as has been the case in the past, many believed that this was an urgent and timely issue for the County to address in light of hotel redevelopment and the economic upturn.

As one stakeholder put it, "the re-establishing of the Affordable Housing Committee is a good step. Funding staff to work with it will be a measure of the commitment to effect real solutions. The mix of expertise, perspective and operating experience that the committee can bring to bear has great potential value. However, the community support and political will must be nurtured for difficult decisions on the demonstrated effective approaches of density, height and permanent protection and the mix of rentals and ownership."

In the Fall of 2014, following the initiation of this Assessment, the Commission re-appointed members to the existing Affordable Housing Advisory Committee and with the thought of convening and charging them with addressing workforce housing issues and providing the County Commission with its recommendations. The reconvened committee would review this assessment report and other data as it addressed its charge.

A workforce housing committee, ad hoc or otherwise, appointed and charged by the County Commission to address workforce housing issues in the Florida Keys was explored in the assessment interviews. A significant number of those interviewed applauded the County Commission's action in re-purposing the existing Affordable Housing Advisory Committee to focus, at least in the short term, on workforce housing. It was suggested that this approach could provide representation from each District in the County, offer workforce housing perspectives from the public, private and nonprofit sectors, and minimize confusion and any duplication of effort that an ad hoc workforce housing committee might create. It was also pointed out that this charge would be consistent with the Committee's current mission to address affordable housing opportunities in Monroe County for both "residents **and workforce.**" (*emphasis added*)

A workforce housing committee, ad hoc or otherwise, appointed and charged by the County Commission to address workforce housing issues in the Florida Keys was explored in the assessment interviews. A significant number of those interviewed suggested the County Commission should consider utilizing and re-purposing the existing Affordable Housing

Advisory Committee to focus at least in the short term on workforce housing.¹² It was suggested that this would provide representation from each District in the County and minimize confusion and any duplication of effort that an ad hoc workforce housing committee might create in relation to the Affordable Housing Advisory Committee. It was also pointed out that this would be consistent with the Committee's current mission to address affordable housing opportunities in Monroe County. The Ordinance also provides that, "The advisory committee may perform additional responsibilities related to affordable housing at the request of the BOCC, including creating best management practices for the development of affordable housing in the community." [2-701(c)]

The Commission should review the current Committee appointments to ensure that a balance of workforce housing stakeholder perspectives are included in its membership. If the Commission charges the Affordable Housing Advisory Committee to develop consensus recommendations on workforce housing actions for consideration by the Monroe County BOCC, most stakeholders interviewed suggested there should be a sufficient range of stakeholder perspectives represented and participating in the consensus building. This would allow the Committee to develop informed workforce housing consensus findings and recommendations that stakeholders might support and the County Commission could act upon.¹³

There is a great deal of public and stakeholder interest in the workforce housing issues the Committee will take up. The membership requirements, as set forth in both Florida statute and the Monroe County Resolution, do not reference representation of the municipalities in the County, the military, the Monroe County School Board and perhaps other organizations impacted by workforce housing policies and programs and with a stake in contributing to solutions to improve the availability of workforce housing in the Florida Keys.¹⁴

The format for the Committee meetings should encourage constructive public and stakeholder input. The Commission might consider charging the Committee with establishing an engagement strategy to involve a broader range of stakeholders in their development of findings and recommendations. This might be accomplished through opportunities for public input during their own meetings, as well as through Committee sponsored advisory workgroups, joint workshops with municipal taskforces and city

¹² This would be consistent with their responsibility for developing every three years an affordable housing incentive recommendations report to the BOCC. The next triennial report will be due December 31 2017

¹³ The Current membership includes the following 11 members: Sylvia Murphy, Monroe County BOCC, Expires 11/2015, Tim Root, District 1, Expires 11/2016, Heather Roberts, District 1, Expires 11/2016, James D. Cameron, District 2, Expires 11/2018, Randy Wall, District 2, Expires 11/2018, Warren Leamard, District 3, Expires 11/2016, Ken Naylor, District 3, Expires 11/2016, Hana Eskra, District 4, Expires 11/2018, Edwin Swift III, District 4, Expires 11/2018, William Wiatt, District 4, Expires 11/ 2016, Jim Saunders, District 5, Expires 11/2016 and Stephanie Scuderi District 5, Expires 11/2016.

¹⁴ <http://www.monroecounty-fl.gov/DocumentCenter/Home/View/695> The membership follows the requirements of Florida Statute 420.9076 and Monroe County Resolution 062-2009, and calls for representation from those involved in affordable housing in: the residential home building industry from both a business and labor perspective, the mortgage and banking industry, the real estate industry, an advocate for low income persons, a for profit and a not for profit provider of affordable housing, a representative of employers in the County and a member of the local planning, and a representative of essential services personnel.

commissions, workshops at key moments in the development of options and recommendations, online surveys and other techniques. *(See Appendix #7 for Advisory Group process recommendations).*

It was observed by many that an advisory committee developing recommendations on workforce housing will require dedicated staff, including legal and planning expertise, and facilitation support for the Committee to do its work expeditiously. This is because of the complexity of the charge, the intense public interest in the issue, the linkages with other issues and programs and activities in the public, private and non-profit sectors, and the desire for timely actions to address the current workforce housing challenges.

V. WORKFORCE HOUSING IN MONROE COUNTY--NEXT STEPS

The Monroe County Board of County Commissioners should review this Assessment Report and charge the Affordable Housing Committee to focus its efforts in the coming year on workforce housing.

With a charge from the County Commission, the Committee should establish its procedures and approach and a schedule for meetings that would permit it to deliver back to the BOCC its workforce housing recommendations by mid-2016. The Committee should consider:

- Developing a shared vision of success;
- Jointly defining the workforce problems faced in the Florida Keys;
- Reviewing the range of issues and options identified in previous studies;
- Reviewing the experience and lessons learned with successful workforce housing projects developed in the Keys to date;
- Reviewing this Stakeholder Assessment Report; and
- Developing a package of consensus findings and recommended solutions for consideration by the Monroe County Board of County Commission.

This stakeholder assessment report confirms that there is wide agreement that Monroe County is facing a significant and growing workforce housing crisis with shortages for both affordable rental and ownership units. There is also agreement that no single strategy will solve this crisis. Instead the challenge ahead for Monroe County and municipalities and the range of stakeholders interested in workforce housing, is to craft a balanced package of targeted options that have been refined through discussion and debate and that can serve as a consensus framework for addressing and implementing solutions.

Purpose

This presentation is in response to requests from the City Commission to improve the way the City's workforce housing issues are addressed. Over the next ten years the City will be receiving over 500 residential Building Permit Allocation System (BPAS) units that are required to be deed restricted affordable. The availability of these new BPAS units provides the City an opportunity to create a significant number of net new affordable housing units for the first time in over a decade. The following discussion describes several key scenarios for potential action to provide workforce housing in order to maintain a sustainable local economy.

Method

This presentation is the result of staff review and discussion of relevant data, the Comprehensive Plan and site visits to certain City and Key West Housing Authority owned properties which could be candidates for the construction of affordable housing. It is also the product of several meetings with the Executive Director of the Key West Housing Authority to discuss specific methods for creating new

housing and updating the Workforce Housing Ordinance. Finally, staff reviewed key state statutes whose subject matter is, or relates to, affordable housing; and Identified Land Development Regulations (LDRs) in local Florida jurisdictions addressing affordable housing which may be models for amendments to the City's LDRs.

Problems and Key Findings Identified

There are currently 508 privately held affordable housing units, with varying degrees of deed restrictions and subsidy assistance, and 581 public housing units in the City representing 7% of the 14,892 residential dwelling units in the City, as identified by staff in the May 2010 Affordable Housing Deed Restriction Audit. The 2010 Census and the City Comprehensive Plan report a lower number of 14,107. Of the total 1,089 affordable units, 223 are expected to have their deed restrictions expire, or have expired by year's end. However, according to the findings of the 2012 Data and Analysis report (Attachment 1), prepared to support the Comprehensive Plan and confirmed by updated data provided by the Key West Housing Authority (08/2014) there continues to be and will continue to be a significant number of cost burdened households and a shortage of decent, reasonably priced, available housing, particularly one bedroom rentals. Specifically, data from the Comprehensive Plan and the 2010 Census indicate that at every income level from 30% to 140% of the Monroe County Median Income (\$63,500 in 2014), individuals and families are cost burdened as to amount paid for rent or mortgage. The City's Comprehensive Plan, the City's Land Development Regulations, and U.S. HUD guidelines indicate that not more than 30% of incomes should be expended for housing costs. In Key West over seventy-five percent (77% - 10,352) of all households, both renters and owners are cost burdened utilizing this guideline.

According to the Comprehensive Plan and the University of Florida Shimberg Center for affordable Housing, there is a need (deficit) of affordable housing units across the income spectrum. The deficit is at least 6,500 units. The City's Comprehensive Plan identifies the City of Key West median household income as \$52,004 while the average annual wages earned by a worker in the City are approximately \$37,844, indicating that by standard guidelines for mortgage lending at the median level a home should cost no more than \$156,012, or three times the median income. This is clearly inconsistent with actual cost of housing in the City, when the Key West Board of Realtors' reports that at the end of July 2014 the median sales price of 162 single family homes sold in the preceding 7 months was \$630,000, and the median sales price for Condo/Townhouses was \$368,000. Clearly persons and families making the median income or average wage cannot afford for sale housing, even if such were being built.

As to rental housing, the situation is no better. Even though dated and most assuredly higher the 2010 reported median gross monthly rent in the City was \$1,359. In order to be affordable to the average wage earner in the City, the then monthly rent should be no more than \$946. Rent such as this is not available in the City at this point in time, and result in workers sharing housing in increasing numbers, or paying 40-50% of their income for housing.

The Workforce Housing Ordinance (WFHO) of the City's Land Development Regulations has not been updated since 2005. At the time the WFHO was created real estate values, affordable housing stocks, and demands were different. The WFHO's stratification across the income spectrum from 80% to 140% of the median income at the Monroe County level (now \$63,500) is out of date with the actual incomes of today's workforce. Further, at the time and up until 2012, there were very, very few BPAS allocations available to create new housing, regardless of the WFHO's emphasis for housing for all income groups, resulting in very few new deed restrictions being built.

Since 2008 lending practices have been tightened and it is very difficult to both finance and construct units at any level except at the 60% of median through heavily subsidized tax credit funding, and none of these types of project have been built in the City due to the lack of reasonable priced land. Additionally, the cost of constructing units is extremely high at \$200-\$250 per square foot. Factored into the equation the focus in recent years has been to use

Land Authority Funds to acquire property together with Habitat for Humanity processes to reconstruct and manage the units. This has resulted in an emphasis being placed on the acquisition of existing units, often at high prices, which though deed restricted, require renovation and result in no net new units.

There are not enough very low (60% AMI) to low (80% AMI) income deed restricted units in the City to meet the needs of the local workforce. Yet the mechanisms to provide this housing are limited by outdated regulations and state statutes. For instance, in addition to the outdated Workforce Housing Ordinance, the Monroe County Land Authority (MCLA) statute, as presently written, does not work efficiently for Key West because it is limited to the purchases of land for three distinct purposes:

1. Conservation of environmentally sensitive lands;
2. Preservation of coastal access and recreation;
3. Affordable Housing.

The first two objectives have been met in the City as all conservation lands are now in the public realm and the access to coastal areas assured and adequate monies allocated through infrastructure taxes and Tourist Development Council grants. The third use of MCLA funds for affordable housing has experienced some successes, but at a very high price due to the very high cost of land. The City of Key West MCLA fund is presently approximately \$7 million which has been generated primarily from transient unit bed tax, as the City accounts for approximately 49% of the hotel rooms in the County. The \$7million is expected to increase to approximately \$8million after the start of the new fiscal year. While the funds have increased steadily the opportunities to use the funds have proven difficult to identify due to high land and costs and until recently the lack of new BPAS allocations.

Possible Solutions

Invest in Immediate Solutions while Planning for the Long Term

While there is an array of long term solutions which should be pursued, some of which are listed below, there may also be a nearer solution. This specific method can utilize existing publicly owned land together with MCLA funds, in order to create monies to build or subsidize net new affordable housing. The method has the following steps:

1. Identify land held by the City of Key West or the Key West Housing Authority which is capable of further development as affordable housing.
2. If necessary, rezone the property to achieve a higher density, which in Key West would be Medium Density Residential (MDR) at 16 units per acre, or High Density Residential (HDR) at 22 units per acre. If necessary, the Comprehensive Plan designations can be amended in an expedited manner for parcels whose use is to be affordable housing, enabled by state statute 163.3187. As a part of this effort the City may borrow forward one year from its annual allocation of 91 BPAS units.
3. The City of Key West sells its interest in the land to the Monroe County Land Authority, and restricts its use in the conveyance, consistent with the MCLA statute, to affordable housing.
4. The MCLA conveys the land to the Key West Housing Authority, and the city modifies its existing Inter-Local agreement with the KWHA to provide for the construction of affordable housing in partnership with city, and/or a developer partner.
5. The City uses the funds yielded from the sale of the property for the direct construction of the affordable housing on the site or uses the funds to otherwise subsidize the cost or operation of the affordable housing. The housing remains the property of the Housing Authority and or the City depending on the parcel and the arrangement reached with the transfer of the property to the Housing Authority.
6. Target projects which can accommodate mixed income users that provide relief to developers of affordable housing projects.

7. Repeat the process with other City or Housing Authority properties until all remaining affordable housing BPAS units are utilized.

Provide a Holistic Approach to Adjusting All Elements of Affordable Housing Tool

1. Work towards reducing **wind and flood insurance** premiums which increase the cost of homeownership and rental rates. If the proposed referendum on building height flexibility in response to FEMA insurance rates passes the ability to lower insurance rates may occur.
2. **Amend Comprehensive Plan** – Add policy(ies) to the City's Comprehensive Plan Housing Element to provide that all future development shall not result in a "net loss" of existing workforce/affordable rental housing for households earning 80% or less than the area mean income. (Findings of Municipal Scorecard for Affordable Housing Delivery: Best Management Case Study for South Florida. Prepared for the South Florida Regional Business Alliance by FIU Metropolitan Center).
3. **Ask State Representative Raschein and State Senator Bullard to Sponsor Legislation to Amend the Land Authority Statute as it Applies to the City of Key West**
Currently the statute has been interpreted by local attorneys such that it allows the funds accumulated to be used for land purchases only. As has been demonstrated the cost of land reasonably priced for affordable housing in the City is very sparse. Also demonstrated is that conservation lands in the City have been acquired and protected. Couple that with the fact that the City has already protected its undeveloped lots with sufficient BPAS allocations to prevent inverse condemnation ("takings") litigation against the City. Therefore, new state legislation to allow the City the ability to use MCLA funds for construction or other subsidy to provide affordable housing.
4. **Revise the Workforce Housing Ordinance:**
The Planning Department has requested proposals for a consultant who will assist staff with amendments to the Land Development Regulations, specifically the Workforce Housing Ordinance. Staff has researched the American Community Survey to extract data for the City's area median income (AMI) in order to compare it to that of the County's, which is used as the current baseline. However, the ACS survey shows that the County's and City's AMI are within a few thousand dollars of each other with the City's being higher in a few critical income household sizes. Further, petitioning HUD to allow the City to use the ACS numbers instead of the universally excepted US Census figures to establish the AMI may put our federal funding in jeopardy when using such federal subsidies. However, if the model put forth above as immediate action is pursued and no federal funds or subsidies are utilized or otherwise compromised, the use of the lower City median income may be possible.

The Workforce Housing Ordinance, based on income and workforce data from the early 2000, is confusing and out of date. As a result the inclusionary housing provisions (122-1467) and eligibility requirements (122-1469) are out of touch with the current housing needs. The ordinance also lacks incentive programs to encourage private developers to build new affordable housing.

Based on meetings with Manny Castillo, Executive Director of the KW Housing Authority and planning analysis supported by the 2013 Comprehensive Plan Data and Analysis, staff recommends the following approach to amending the WFHO:

- a. **Add provisions for inclusionary housing for redevelopment**, not just new development.

- b. **Revise Section 122-1496 for required income category mix** - Determine what the target incomes are and use current income level data to establish new ratios for 30% rule, such as more lower income category units. Reestablish inclusionary housing provisions requiring more low (80% AMI) and median (100% AMI) income level units. This can only be provided for by applying an approach like that used by the Village of Islamorada, wherein significant expansions of residential and commercial development, or net new development is evaluated, by type, as to the employees and jobs created to serve the new or expanded development, and thus the need for new affordable housing. A specific economic analysis for Key West, must be created to support the inclusionary housing provisions, recognizing the unique market of the City of Key West.
 - b. **Revise Eligibility Requirements (Section 122-1469)** - Maintain category income *range* within the low, median, moderate etc. categories for pro forma purposes, but allow the actual sales and rental levels to be determined based on a person's actual percentage of income (25-30%). Currently the City's one bedroom rental rates are higher than HUD's rates but the City's three and four bedroom rental rates are all lower than HUD's. The City needs to find a method to lower rents for the most sought after units (1 bedroom). This may require the mixing of market rate units in mixed income projects to provide indirect subsidy to the affordable units.
 - c. **Create innovative regulatory and financial incentive programs for building workforce housing and maintaining rental housing.** Such as:
 1. Tax abatement etc.
 2. Waiver all permitting fees (except impact fees which guarantee bond obligations).
 3. Expedited review.
- 5. Potential Funding Opportunities**
1. Community Workforce Housing Innovation Pilot Program loans and State Housing Initiatives Partnership Program (F.S. 420.5095).
 2. **Staff**
 1. Create a City Affordable Housing Officer, whose responsibility it would be to assist workers in finding and qualifying for housing.
 2. Create an Economic Development Officer whose responsibility it would be to identify possible Public private partnerships for redevelopment/development potential and who can offer incentives.
 3. SHIP – State Housing Incentive Program;
 4. HOME – Need more information
 5. CDBG – Community Development Block Grants
 6. TIF – Tax Increment Financing
 7. Surtax – Such as additional sales tax on alcoholic beverage sales
 8. CHDO - Need to establish CHDO (Community Housing Development Organization) per Section 122-1471 a non-profit organization, to serve as developer for AH on City owned property and administer the Affordable Housing Trust Fund
 10. Create a rental affordable housing trust fund for providing security deposits for rental housing

The possible solutions described above are all consistent to one degree or another with the City's Strategic Plan and previous recommendations off many study groups dealing with eh affordable housing issue.

**CITY OF KEY WEST
2012 UPDATES TO THE DATA AND ANALYSIS
FOR EAR-BASED COMPREHENSIVE PLAN AMENDMENTS APPENDIX A**

Introduction

The City completed its first Evaluation and Appraisal Report (EAR) in 2005, and due to the State mandated schedule was required to update the 2005 EAR the following year. There is very little difference between the two reports or the resulting recommendations. It is now the City's desire to implement the recommendations from the two EAR documents, however due to the years that have passed, the supporting data and analysis needs to be updated in order to be meaningful and to provide the most accurate amendments to the Comprehensive Plan.

The Planning Department identified several areas that needed updating, and these are as follows:

- **Affordable Housing Needs Analysis**
- **Population Estimates**
- **Hurricane Evacuation Analysis**
- **Land Use Analysis**
- **Level of Service Analysis**

The following provides some background from the 2005 and 2007 EARs and the updated analysis in the areas identified above.

Chapter 1. Affordable Housing Needs Analysis

The 2005 EAR listed "Affordable Housing" as one of the issues to be addressed during the updates to the Comprehensive Plan. Some of the contributing factors to the need for affordable housing included lower wage tourism based jobs; loss of military families that lived in housing subsidized by the government; increased demand for second homes; government limitations on growth; the loss of housing due to conversion to guesthouses; and the lack of available vacant land. In the 1990s the construction of transient units was permitted pursuant to the City's Building Permit Allocation System (BPAS), and as a result, approximately 874 transient units were built. However, due to Comprehensive Plan policy 1.3.12.3, which limits the percent of new units that may be allocated for transient use, no new transient allocations can be granted under the City's existing BPAS.

Policy 3-1.1.3 of the City's Comprehensive Plan requires that 30 percent of units constructed each year be affordable. At the time of the 2005 EAR, it was noted that this policy has been successful, however at that time there was still a recognized shortage of affordable units. In 2005, the City adopted a workforce housing ordinance which requires that 30 percent of new market rate housing units be affordable to members of the workforce who earn at or less than 80 percent of the median household income. The affordability of units permitted under these policies is maintained through deed restrictions. It is estimated that 504 units have been allocated affordably since the implementation of the BPAS; however, not all of these units were subject to the requirements in the 2005 workforce housing ordinance. The current policy is that the affordability periods for these units remain in place for perpetuity; however some of the earlier units have affordability periods that have or will expire. It is estimated that approximately 233 affordable deed restrictions have expired. However, it is important to

note that not all of these units have been allocated as part of the BPAS.

In addition to requiring private developers to provide a percentage of affordable units, the City has historically taken a proactive approach in providing affordable units. The City has worked within the limits of the BPAS policies and, while being mindful of evacuation planning, has signed agreements with the State and with private developers to allow more affordable units. On the legislative side, the City has implemented policies to allow accessory apartments to single family homes, to facilitate infill of affordable units, and to facilitate apartments above commercial developments.

The 2005 EAR identifies methods in which the City has sought community involvement to address the affordable housing issue. On March 30, 2001 the City held a special summit meeting of residents to gain insight on ways to address housing. From that meeting, there were approximately 40 suggested actions that would address the problem from many different angles. Many creative suggestions were made, including ideas on how to preserve the housing stock, ways to seek out additional funding sources and suggestions to build new units or subsidize rents. In 2009, Florida International University's Metropolitan Center conducted a Housing Needs Assessment for Monroe County that included information specific to the City of Key West. In order to update the City's housing needs assessment, the information contained in the 2005 EAR and 2009 Housing Needs Assessment was revised in 2012 using the most recently available information from the 2010 Census, the University of Florida's Shimberg Center for Affordable Housing, and other relevant data sources.

The provision of decent, safe, sanitary and affordable housing to all residents continues to be one of the most daunting challenges that the City of Key West faces. The City's scarcity of land for new development, growth in the second home market, high quality of life and desirability, and unique and historic housing stock all contribute to property and housing values that are among the highest in the State. The City's economy is largely based on tourism and service industries, which generally pay lower wages than many other industries. These dynamics result in a pronounced affordability gap that continues to challenge the City even in the current economic downturn.

A summary of the estimates of the City's existing housing stock is provided on Table A1-1 below. As can be seen, there is a small discrepancy between the figures from the Affordable Housing Needs Assessment (AHNA), the Census, and a May 2010 estimate prepared by City staff. For the purpose of this report, the 2010 Census figure will be used since it is the most recent, and because it is closer to the City estimate than the AHNA or the U.S. Census 2009 American Fact Finder data. Use of the City's estimate is constrained by the lack of information about occupancy or tenure.

Table A1-1. City of Key West's 2010 Housing Stock by Type and Tenure

	Total Units	Occupied Units	Owner Units	Renter Units
09 AHNA	13,307	11,017	5,024	5,993
2010 Census	14,107	10,929	4,520	6,409
2009 US Census Bureau American FactFinder	13,274	8,925	4,175	4,757
May 2010 Estimate	14,452 permanent plus 440 mobile homes			

The median single family home sales price in the City of Key West in 2010 was \$382,450. This value is higher than the 2001 median value of \$305,000, but significantly lower than the median value of

\$776,000 in 2005. The median condominium sales price in 2010 was \$318,000, higher than the 2001 sales price of \$222,000 but lower than the peak of \$575,000 in 2005. The decrease in sales prices between 2005 and 2010 is reflective of the economic downturn. The 2010 median gross rent for a rental unit in the City was \$1,359.¹

“Housing cost burden”, defined as the percent of a household’s income that is used to pay for housing costs, is frequently used as a measure for determining whether or not housing is affordable. According to federal housing program guidelines and the Shimberg Center, housing costs should not exceed 30 percent of a household’s income in order to be considered affordable. Federal guidelines define an extremely low income household as a household whose income is at or below 30 percent of the median household income for the area, a very low income household as a household whose income is at or below 50 percent of the median household income for the area, a low income household as a household whose income is between 50 and 80 percent of the median for the area, and a moderate income household as a household whose income is between 80 and 120 percent of the median for the area.

The median household income in the City in 2010 was \$52,004², while the average annual wages earned by a worker in the City are approximately \$37,844³. In order to be affordable, an owner-occupied home should not cost more than three times a household’s annual income. In order to be affordable to a household at the median level, a home should therefore cost no more than \$156,012. In order to be affordable to the average wage-earner in the City, a home should cost no more than \$113,532 (Note that this does not account for combined household incomes). In order to be affordable to a household earning at or less than 80% of the median for the area, a home should cost no more than \$124,891. The 2010 median sales price of \$382,450 for a single family home indicates an affordability gap of \$226,438 for households earning at or below the median household income, while the median sales price of \$318,000 for a condominium unit indicates a lower but still significant affordability gap of \$161,988.

The 2010 median gross monthly rent in the City was \$1,359. In order to be affordable to a household at the median income level, monthly rent should be no more than \$1,300.10. In order to be affordable to the average wage-earner in the City, monthly rent should be no more than \$946. In order to be affordable to a household earning at or below 80% of the median, monthly rent should be less than \$1,040. Approximately 50% of the City’s rental units are affordable to residents at the median income level, while approximately 37% are affordable to average wage-earners and households at 80% of the median⁴.

Table A1-2 below identifies and projects the number of households in the City by income level for the period between 2000 and 2030.⁵ The projections contained in this Table, provided by the Shimberg Center, are not consistent with the noted trend toward a slight population decrease in the City. Generally, however, they do provide a proximate count of households by income type for 2010. This Table indicates that 12% of the City’s housing stock should be affordable to households earning less than 30% of the median, 11% should be affordable to households earning between 30% and 50% of the median, 18% should be affordable to households earning between 50% and 80% of the median, 24% should be affordable to households earning between 80% and 120% of the median, and 34% should be affordable to households earning over 120% of the median.

Table A1-3 below documents the number of cost burdened households in the City by tenure for 2010.⁵ As can be seen, 35 percent of homeowner households and 42 percent of renter households in the City are paying more than 30 percent of their income for housing. Table A1-4 documents cost burdened households by income type. As expected, the level and severity of cost burden increases as income levels decrease.

⁵ University of Florida Shimberg Center for Affordable Housing, Housing Needs Summary, Florida Housing Data Clearinghouse, 2011

Table A1-5 below indicates the deficit or surplus of affordable housing units by income category in the City for 2010.⁶ This information provides perhaps the best indication of unmet affordable housing need. As can be seen, there is a deficit of housing units affordable for all income types, with the exception of rental units for households at 120 percent of the median.

The City of Key West has taken a proactive approach to addressing the affordable housing needs of its residents. There are currently a total of 508 federally, State and locally assisted units and 581 public housing units in the City. In order to encourage the provision of private sector affordable and workforce housing, single family units are allowed and encouraged to have accessory units that provide a more affordable housing option for the City's workforce and residents. In 2005 the City adopted a workforce housing ordinance which requires that 30 percent of new market rate housing units be affordable to members of the workforce who earn at or less than 80 percent of the median. In addition, Peary Court, a military housing complex, is transitioning from military ownership to civilian ownership, providing an additional 160 market rate housing units. Application of the workforce housing requirement would provide an additional 48 affordable or workforce housing units.

Gauging the need for special needs housing and homeless assistance is another important consideration for the City. There are currently approximately 136 beds for special needs housing, 122 beds for transitional housing, and 175 homeless shelter beds in the City. Based on a count conducted in 2011, 246 homeless persons were identified in the City. A partial listing of special needs and transitional housing facilities is provided below:

1. AIDS Help – 96 Units
2. Kathy's Hope – 16 rooms with communal facilities
3. Samuels House – 13 rooms with communal facilities
4. Casa de Meredith – 9 units
5. Florida Keys Outreach Coalition – One s.f house (2 bedroom)
6. Neece Center – 20 beds for men
7. Poinciana – 102 beds for men and women

Chapter 2. Population Estimates

Population projections are an important component of local comprehensive plans. They provide the statistical framework for future development and redevelopment, and for projecting the ability to provide key infrastructure and services at adopted levels of service. The population of Key West, a built-out community with natural and policy constraints that limit future development potential, is projected to decrease slightly during the short, mid and long range planning periods, as documented in the following analysis.

From: Karl Peterson, P.E.

Date: August 11, 2014

Subject: Rockland FLUM – Rockland Key, Florida
Trip Generation Analysis

Pursuant to our teleconference on Monday, July 28, 2014 we have conducted the additional trip generation analyses for the various permitted uses and land use categories. The results of these analyses are summarized below and on the following pages.

Parcel Information:	MCF to MC	2.50 acres
	I to MC	12.33 acres
	<u>I to COMM</u>	<u>29.59 acres</u>
	Total	44.42 acres or 1,934,935 square feet

Trip Generation: *ITE Trip Generation Manual (9th Edition)*
All daily trip calculations are based upon average rates as requested by the County's traffic engineering consultant.

Trip Differential: Based upon the foregoing trip generation analyses, the maximum trip generation potential associated with the existing land use categories is 84,367 vehicle trips per day. The maximum trip generation associated with the proposed land use categories is 76,434 vehicle trips per day. The result of the proposed land use plan amendment is a trip generation reduction of 7,933 vehicle trips per day.

John,

Please see attached. The differences from the previous August 5h version is that in this version the maximum FAR is used for all uses. The conclusion is that the same uses are the maximum trip generators. Only the last page which has 29.59 acres going from the Industrial FLUM category to the Commercial FLUM category has a change that affects the total trips. That being that the Commercial FLUM now correctly calculates the trip generation from a 0.50 FAR rather than 0.40 FAR previously, which results in the trip change from a -19,091 daily trips to -9,546 daily trips for this FLUM change and an overall change in trip generation from -17,478 daily trips to -7,933 daily trips inclusive of the entire application.

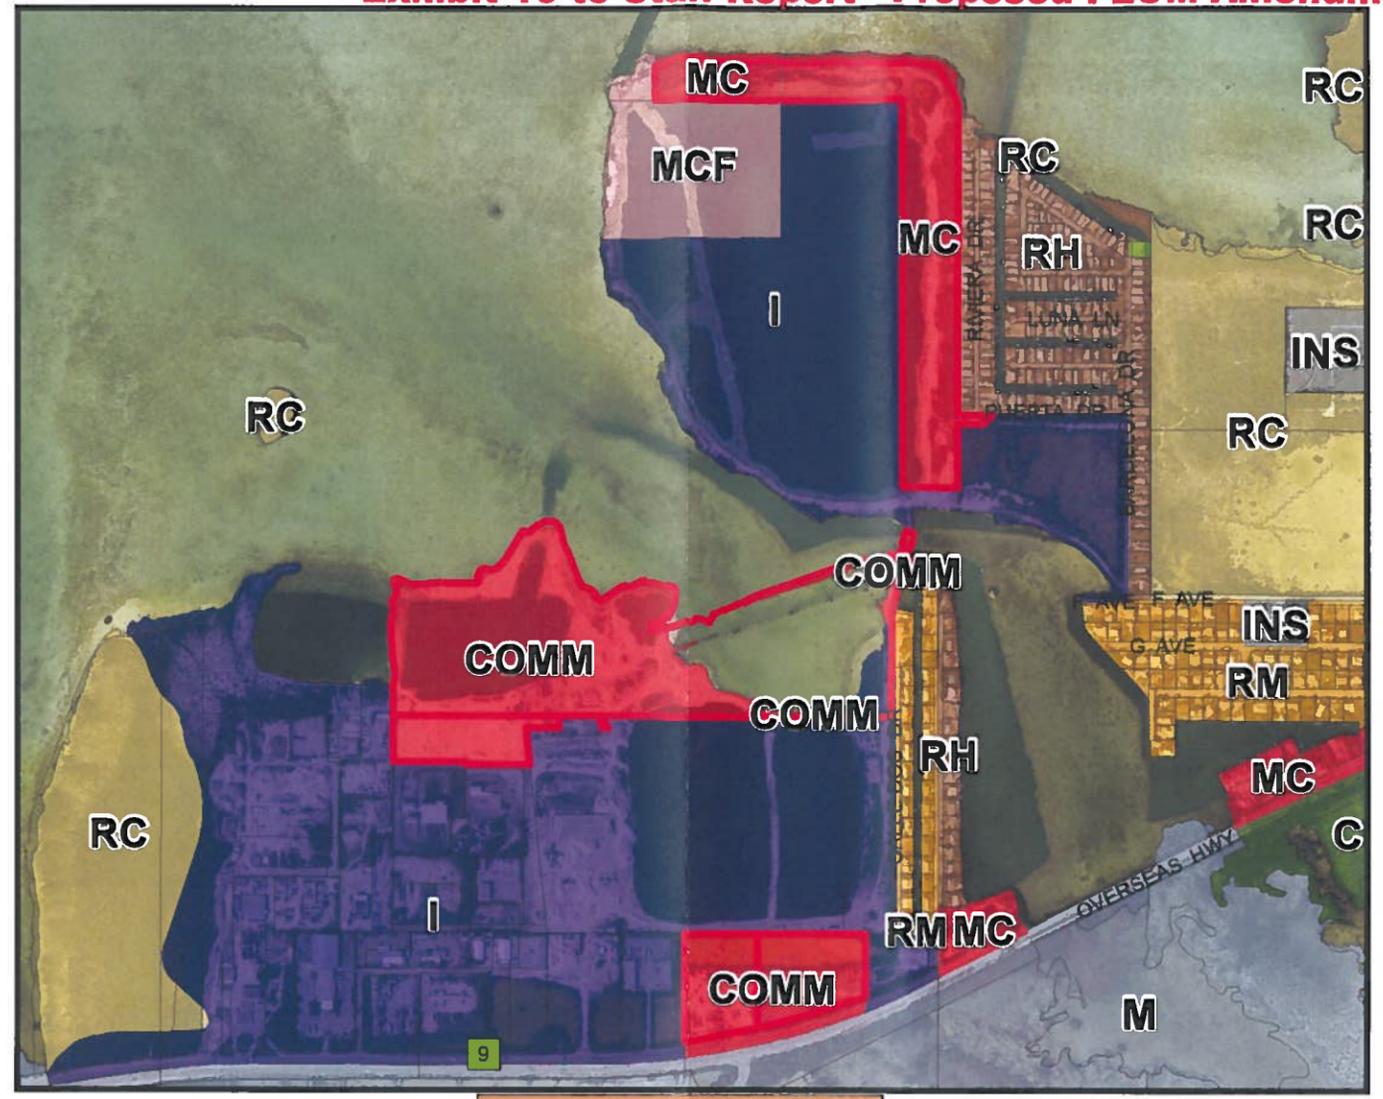

Please confirm your agreement with the analysis. Thank you.

**BOARD OF COUNTY COMMISSIONERS
AGENDA ITEM SUMMARY**

Meeting Date: February 10, 2016 Department: Planning & Environmental Resources
Bulk Item: Yes No Staff Contact Person/Phone #: Mayté Santamaria 289-2562

AGENDA ITEM WORDING: A public hearing to consider an ordinance by the Monroe County Board of County Commissioners Amending the Monroe County Land Use District (Zoning) Map from Industrial (I) and Commercial Fishing Area (CFA) to Mixed Use (MU) for property located at approximate mile marker 9, described as a parcel of land in Section 21, Township 67 South, Range 26 East, Big Coppitt Key, Monroe County, Florida, having Real Estate Number 00120940.000100, and from Industrial (I) to Commercial 2 (C2) for property located at approximate mile marker 9, described as four parcels of land in Section 21, Township 67 South, Range 26 East, Rockland Key, Monroe County Florida, having Real Estate Numbers 00122080.000000, 00122081.000200, 00122010.000000 and 00121990.000000; as proposed by Rockland Operations, LLC and Rockland Commercial Center, Inc. (Quasi-Judicial Proceeding)

ITEM BACKGROUND: The applicant has applied for a corresponding Future Land Use Map (FLUM) amendment for the subject parcels from MCF and I to COMM and MC. The BOCC transmitted the draft ordinance for the proposed FLUM amendment to the Florida Department of Economic Opportunity (DEO), which reviewed the proposal and issued an Objections, Recommendations and Comments (ORC) Report, received by the County on 3/23/2015. The ORC report identified objections regarding increased potential residential development on the Big Coppitt portion of the property, and pointed out that although the applicant claims the proposed FLUM amendment will provide some relief to the affordable housing shortage currently faced by the County, there is no guarantee the site will be used for affordable housing.

In response to the ORC, the applicant prepared a revised proposal for the FLUM amendment based on the ORC report; additional data and analysis, including excerpts from the Monroe County Year 2030 Technical Document, the County's 2015 Workforce Housing Stakeholder Assessment Report, Key West's Affordable Housing White Paper dated September 14, 2015, and the requirements of Florida law. The revised proposal requested the same FLUM amendment from MCF and I to MC and COMM, but also included a Comprehensive Plan text amendment, to be adopted simultaneously to respond to the ORC objection, establishing a subarea policy for the Big Coppitt portion of the property restricting any residential use on the subject property to only affordable housing. Staff had also recommended including the following restrictions to the proposed subarea policy: restricting any residential use on the subject property to affordable housing only (with a minimum mix of at least 30% median, at least 30% low, and at least 30% very low income categories); eliminating all potential for market rate permanent residential and/or transient uses on the site; prohibiting new marinas; prohibiting dredging; prohibiting light industrial uses; prohibiting residential buildings in the 70-74 DNL (Day-Night Average Sound Level) noise contour; and requiring sound attenuation for any habitable buildings located within the 70-74 and 65-69 DNL (Day-Night Average Sound Level) noise contours. The proposed FLUM amendment and subarea policy were scheduled to be considered by the BOCC for adoption at the November 17, 2015 meeting.

The public hearing on November 17, 2015 for above described FLUM and subarea policy was continued to the February 10, 2016 BOCC meeting because the applicant did not agree with the staff recommendation on the mix of affordable housing income categories (mix of at least 30% median, at least 30% low, and at least 30% very low income categories).

On January 11, 2016, the applicant provided a revised subarea proposal (included in staff report and draft ordinance) indicating an alternative for the mix of affordable housing income categories (5% median, 20% low and very low combined and 75% moderate income categories) and included other amendments in an effort to address concerns from the surrounding community members. The applicant also held a community meeting on January 14, 2016 to offer information on the proposal and hear the

surrounding community's concerns/input. Staff attended the community meeting to listen to the public input.

Based upon the applicant's concern of obtaining financing to develop an affordable housing project with a majority of the units as the lower income categories and the surrounding community members expressed concern with having a large composition of the lower income categories adjacent to their neighborhood, staff recommends a few edits to the applicant's proposal. Staff recommends, in an effort to provide for the existing workforce, an increase of the proposed median income category (highest income group of the lower income groups) to provide for a little more mix in affordable housing income categories. The suggestion would result in a mix of 10% median, 20% low and very low combined and 70% moderate income categories.

The proposed Zoning map amendment is necessary to be consistent with the proposed FLUM amendment. Note, Florida Statute Sections 163.3194 and 163.3201 require land development regulations to be consistent with and implement the Comprehensive Plan.

PREVIOUS RELEVANT BOCC ACTION:

On December 10, 2014, at a regularly scheduled meeting, the Board of County Commissioners (BOCC) adopted Resolution #375-2014, transmitting to the state land planning agency an ordinance amending the FLUM for the subject property from MCF and I to COMM and MC.

On November 17, 2015, at a regularly scheduled meeting, the Board of County Commissioners continued the public hearing for the proposed zoning amendment from CFA and I to COMM and MU (and the corresponding FLUM & subarea policy) to February 10, 2016.

44 **WHEREAS**, based upon the documentation submitted and information provided in the
45 accompanying staff report, the BOCC makes the following Findings of Fact:

- 1 1. Prior to the 1986 adoption of the County’s current land development regulations and
2 their associated land use district maps, the subject parcels were within GU (General
3 Use) and BU-2 (Medium Business Use) zoning districts; and
- 4 2. In 1986, a series of zoning maps, entitled the Land Use District Map, were adopted
5 for all areas of the unincorporated county. On sheets 563 and 564 of the Land Use
6 District Map, the subject parcels are within Commercial Fishing Area (CFA) and

12 to relieve particular hardships, nor to confer special privileges or rights on any
13 person, nor to permit an adverse change in community character, analyzed in the

20 the text or boundary was based;
 - 21 b. Changed assumptions (e.g., regarding demographic trends);
 - 22 c. Data errors, including errors in mapping, vegetative types and natural features
23 described in volume I of the plan [the Comprehensive Plan];
 - 24 d. New issues;
 - 25 e. Recognition of a need for additional detail or comprehensiveness; or
 - 26 f. Data updates; and
- 27
28 6. Map amendments to the Monroe County Land Use District Map shall not be

30 Critical State Concern; and

31
32 **WHEREAS**, based upon the documentation submitted and information provided in the
33 accompanying staff report, the Board makes the following Conclusions of Law:

- 34
35 1. The proposed map amendment is consistent with the provisions of the Monroe
36 County Code:
 - 37 a. As required by MCC §102-158, the map amendment does not relieve particular
38 hardships, nor confer special privileges or rights on any person, nor permit an
39 adverse change in community character, as analyzed in the Monroe County Year
40 2010 Comprehensive Plan;
 - 41 b. As required by MCC §102-158(d)(5)b., the map amendment is needed due to
42 changed assumptions and new issues; and
- 43
44 2. The proposed map amendment is consistent with the provisions and intent of the
45 Monroe County Year 2010 Comprehensive Plan:

- 1 a. The Mixed Use (MU) and Commercial 2 (C2) Land Use (Zoning) Districts
2 correspond with the Future Land Use Map designations of Mixed
3 Use/Commercial (MC) and Commercial (COMM), and are consistent with the
4 respective density and intensity standards as set forth in Policy 101.4.22;
5 b. The Mixed Use (MU) and Commercial 2 (C2) Land Use (Zoning) Districts are
6 consistent with the purposes of the Mixed Use/Commercial (MC) and
7 Commercial (COMM) Future Land Use Map designations, as set forth in Policies
8 101.4.5 and 101.4.21; and
9 3. The proposed map amendment is not inconsistent with the Principles for Guiding
10 Development in the Florida Keys Area of Critical State Concern;

III. PREVIOUS RELEVANT COUNTY ACTIONS

At its regularly scheduled meeting on August 25, 2015, the Monroe County Development Review Committee reviewed and discussed the proposed LUD map amendment and recommended approval, as memorialized in Resolution DRC 08-15.

At its regularly scheduled meeting on September 30, 2015, the Monroe County Planning Commission held a public hearing for review and consideration of the proposed LUD map amendment and recommended approval, as memorialized in Resolution P31-15 (Exhibit 3).

The applicant has also applied for a corresponding FLUM amendment for the subject property (File #2012-068 & 2015-114 – see Exhibit 4), which has been reviewed by the Monroe County Development Review Committee, Planning Commission, and Board of County Commissioners (BOCC) (transmittal hearing only). On December 10, 2014, at a regularly scheduled meeting, the BOCC adopted Resolution #375-2014, transmitting to the state land planning agency an ordinance amending the FLUM for the subject property from MCF and I to Mixed Use/Commercial (MC) and Commercial (COMM).

The draft ordinance was transmitted to the Florida Department of Economic Opportunity (DEO), which reviewed the proposal and issued an Objections, Recommendations and Comments (ORC) report, received by the County on March 23, 2015.

The ORC report identified objections regarding increased potential residential development on the Big Coppitt portion of the property, and pointed out that although the applicant claims the proposed FLUM amendment will provide some relief to the affordable housing shortage currently faced by the County, there is no guarantee the site will be used for affordable housing. Specifically, the ORC report stated (bold formatting added):

*The applicant makes the argument that housing in Monroe county is in short supply, the cost of that housing is too high and therefore, this amendment adds to the available affordable housing by re-designating 14.83 acres to mixed use which can accommodate a multi-family affordable housing development project of significant size. **However, there is***

nothing in the amendment which provides assurance that any future residential development on this property will be for affordable housing.

The ORC report recommended that the BOCC either not adopt the amendment, or revise the amendment to allow uses other than residential uses. Normally, the County has 180 days from the date of receipt of the ORC to adopt the FLUM amendment, adopt the FLUM amendment with changes or not adopt the FLUM amendment. The 180 day deadline for action by the County would be September 19, 2015; however, the County has requested an extension to this deadline from DEO (as requested by the applicant). The new deadline for County action is March 15, 2016.

In response to the ORC, the applicant prepared a revised proposal for the FLUM amendment based on the ORC report; additional data and analysis, including excerpts from the Monroe County Year 2030 Technical Document (Exhibit 4), the County's 2015 Workforce Housing Stakeholder Assessment Report (Exhibit 5), Key West's Affordable Housing White Paper dated September 14, 2015 (Exhibit 6), and the requirements of Florida law. The revised proposal requested the same FLUM amendment from MCF and I to MC and COMM, but also included a Comprehensive Plan text amendment, to be adopted simultaneously to respond to the ORC objections, establishing a subarea policy for the Big Coppitt portion of the property restricting any residential use on the subject property to only affordable housing. Staff had also recommended including the following restrictions to the proposed subarea policy: restricting any residential use on the subject property to affordable housing only (with a minimum mix of at least 30% median, at least 30% low, and at least 30% very low income categories); eliminating all potential for market rate permanent residential and/or transient uses on the site; prohibiting new marinas; prohibiting dredging; prohibiting light industrial uses; prohibiting residential buildings in the 70-74 DNL (Day-Night Average Sound Level) noise contour; and requiring sound attenuation for any habitable buildings located within the 70-74 and 65-69 DNL (Day-Night Average Sound Level) noise contours.

The proposed text amendment to the Monroe County Year 2010 Comprehensive Plan, as presented at the November 17, 2015 public hearing reads:

Policy 107.1.6 Big Coppitt Mixed Use Area 1 -To Provide Limitations on Development and Specific Restrictions

Development in the Big Coppitt Mixed Use Area 1 shall be subject to regulations applicable to the Mixed Use/Commercial (MC) Future Land Use Designation as well as an additional restriction set out below:

1. Residential units developed on the Big Coppitt Mixed Use Area 1 shall be restricted to affordable housing only (with a minimum mix of at least 30% median, at least 30% low, and at least 30% very low income categories) and subject to affordable housing regulations pursuant to Section 130-161 of the Monroe County Code of Ordinances.
2. There shall be no market rate or transient residential units.
3. There shall be no new marinas.
4. There shall be no dredging.
5. There shall be no light industrial uses.

6. All habitable buildings located within the 65-69 DNL (Day-Night Average Sound Level) noise contour pursuant to the 2013 Navy Environmental Impact Statement shall be sound attenuated to achieve an indoor Noise Level Reduction of at least 25 decibels.
7. No residential buildings shall be located within the 70-74 DNL.
8. All habitable buildings located within the 70-74 DNL noise contour pursuant to the 2013 Navy Environmental Impact Statement shall be sound attenuated to achieve an indoor Noise Level Reduction of at least 30 decibels.

The Big Coppitt Mixed Use Area 1, with Real Estate No. 00120940-000100 is approximately 14.8 acres of vacant land and is legally described as:.... [LEGAL DESCRIPTION TO FOLLOW].

The public hearing on November 17, 2015 for this item was continued to the February 10, 2016 BOCC meeting because the applicant did not agree with staff recommendation on the mix of affordable housing income categories (mix of at least 30% median, at least 30% low, and at least 30% very low income categories).

On January 11, 2016, the applicant provided a revised subarea proposal indicating an alternative for the mix of affordable housing income categories and included other amendments in an effort to address concerns from the surrounding community members (revised draft provided below and attached as Exhibit 11).

Applicant recommendation:

Policy 107.1.6 Big Coppitt Mixed Use Area 1 -To Provide Limitations on Development and Specific Restrictions

Development in the Big Coppitt Mixed Use Area 1 shall be subject to regulations applicable to the Mixed Use/Commercial (MC) Future Land Use Designation as well as an additional restriction set out below:

1. Residential units developed on the Big Coppitt Mixed Use Area 1 shall be restricted to affordable housing only (with a minimum mix of at least ~~30~~5% median; **and** at least a ~~30~~20% combination of low, and at least 30%-very low income categories) and subject to affordable housing regulations pursuant to Section 130-161 of the Monroe County Code of Ordinances.
2. **There shall be no nonresidential uses. Accessory uses to the residential development, such as a club house or recreational activities are permitted.**
3. There shall be no market rate or transient residential units.
4. **There shall be no new marinas.**
- 4.5. There shall be no dredging.
5. **There shall be no light industrial uses.**
- 5.6. All habitable buildings located within the 65-69 DNL (Day-Night Average Sound Level) noise contour pursuant to the 2013 Navy Environmental Impact Statement shall be sound attenuated to achieve an indoor Noise Level Reduction of at least 25 decibels.
- 6.7. No residential buildings shall be located within the 70-74 DNL.

7. Any development located within the Big Coppitt Mixed Use Area 1 shall not utilize Puerta Drive for ingress and egress.
8. All habitable buildings located within the 70-74 DNL noise contour pursuant to the 2013 Navy Environmental Impact Statement shall be sound attenuated to achieve an indoor Noise Level Reduction of at least 30 decibels.

The Big Coppitt Mixed Use Area 1, with Real Estate No. 00120940-000100 is approximately 14.8 acres of vacant land and is legally described as:....

Additionally, the applicant held a community meeting on January 14, 2016 to offer information on the proposal and hear the surrounding community's concerns/input. Staff attended the community meeting to listen to the public input.

Based upon the applicant's concern of obtaining financing to develop an affordable housing project with a majority of the units as the lower income categories and the surrounding community members expressed concern with having a large composition of the lower income categories adjacent to their neighborhood, staff recommends a few edits to the applicant's proposal. Staff recommends, in an effort to provide for the existing workforce, an increase of the proposed median income category (highest income group of the lower income groups) to provide for a little more mix in affordable housing income categories. The suggestion would result in a mix of 10% median, 20% low and very low combined and 70% moderate income categories. Staff also recommends maintaining provision #8 of the subarea policy to ensure the proposal is consistent with the Navy Air Installation Compatibility Use Zones ("AICUZ") Land-Use Compatibility Recommendations.

Staff recommendation:

Policy 107.1.6 Big Coppitt Mixed Use Area 1 -To Provide Limitations on Development and Specific Restrictions

Development in the Big Coppitt Mixed Use Area 1 shall be subject to regulations applicable to the Mixed Use/Commercial (MC) Future Land Use Designation as well as an additional restriction set out below:

1. Residential units developed on the Big Coppitt Mixed Use Area 1 shall be restricted to affordable housing only (with a minimum mix of at least ~~30~~**10%** median, **and** at least a ~~30~~**20%** combination of low, ~~and at least 30%~~ very low income categories) and subject to affordable housing regulations pursuant to Section 130-161 of the Monroe County Code of Ordinances.
2. **There shall be no nonresidential uses. Accessory uses to the residential development, such as a club house or recreational facilities are permitted.**
3. **There shall be no market rate or transient residential units.**
4. **There shall be no new marinas.**
- 4.5. **There shall be no dredging.**
5. **There shall be no light industrial uses.**

5.6. All habitable buildings located within the 65-69 DNL (Day-Night Average Sound Level) noise contour pursuant to the 2013 Navy Environmental Impact Statement shall be sound attenuated to achieve an indoor Noise Level Reduction of at least 25 decibels.

6.7. No residential buildings shall be located within the 70-74 DNL.

7. Any development located within the Big Coppitt Mixed Use Area 1 shall not utilize Puerta Drive for ingress and egress.

8. All habitable buildings located within the 70-74 DNL noise contour pursuant to the 2013 Navy Environmental Impact Statement shall be sound attenuated to achieve an indoor Noise Level Reduction of at least 30 decibels.

The Big Coppitt Mixed Use Area 1, with Real Estate No. 00120940-000100 is approximately 14.8 acres of vacant land and is legally described as:....

All three options for the proposed subarea policy are included in the ordinance for the BOCC's consideration, direction and decision on the proposed amendment.

The revised FLUM amendment, including the proposed Comprehensive Plan text amendment establishing the subarea policy (see Exhibit 4), is tentatively scheduled to be considered for adoption by the BOCC at their regularly scheduled meeting on February 10, 2016. The proposed LUD map amendment (see Exhibit 5), which is the subject of this staff report, is necessary to be consistent with the proposed FLUM amendment. Note, Florida Statute Sections 163.3194 and 163.3201 require land development regulations to be consistent with and implement the Comprehensive Plan.

<p>*Based on the proposed Comprehensive Plan text amendment which will accompany the corresponding FLUM amendment, a subarea policy for the Big Coppitt portion of the property will restrict any residential use on the subject property to only affordable housing in the very low, low, and median income categories; eliminate all potential for market rate permanent residential and/or transient uses on the site; prohibit new marinas; prohibit dredging; prohibit light industrial uses; prohibit residential buildings in the 70-74 DNL (Day-Night Average Sound Level) noise contour; and require sound attenuation for any habitable buildings located within the 70-74 and 65-69 DNL (Day-Night Average Sound Level) noise contours.</p> <p>**Applicant's proposed revision to the subarea policy eliminates all potential for nonresidential uses, market rate and transient residential uses.</p>			

The table above provides an approximation of the existing and proposed development potential for residential, transient, and nonresidential development. Section 130-156(b) of the Land Development Code states: *The density and intensity provisions set out in this section are intended to be applied cumulatively so that no development shall exceed the total density limits of this article. For example, if a development includes both residential and commercial development, the total gross amount of development shall not exceed the cumulated permitted intensity of the parcel proposed for development.*

As shown in the table above, the proposed LUD map amendment in zero density for market rate residential development; an increase in overall potential residential development (under max net density for affordable housing) of 122.6 dwelling units; zero density for transient unit development o; and a decrease in overall potential nonresidential development of 129,503 square feet of floor area.

B. Impact on Community Character

Parcels surrounding the subject property currently have LUD designations of Industrial, Commercial Fishing Area, Improved Subdivision, Urban Residential Mobile Home, and Native Area (across US1). Land uses surrounding the subject property include residential to the east, and a mixture of light/heavy industrial and vacant land to the west and southwest. Land across US1 to the south is vacant wetlands.

Almost the entire site has a tier designation of Tier III. A small portion (half an acre) on Rockland Key has a tier designation of Tier I. The majority of the site is scarified, consisting of pea-rock, gravel, borrow pits, and some grassy areas.

The portion of the site proposed for MU zoning, which would potentially allow affordable housing residential development, is adjacent to an existing residential area within a URM district.

The proposed LUD map amendment is not anticipated to have an adverse effect on the community character of the area.

C. Effects on Public Facilities

Traffic Circulation (Policy 301.1.1)

According to the 2015 US.1 Arterial Travel Time and Delay Study, at the present time, US 1 is operating overall at a Level of Service (LOS) C. In the Lower Keys Area, the segments from the area of the request to Key West are operating at a LOS B or better and the segments from the area of the request to Big Pine Key are operating at a LOS C or better. The request is located in the area of Segments 2 and 3, which are operating at levels of service A and B respectively.

- Segment 2 Boca Chica (4-L/D) Key Haven Blvd. to Rockland Dr. (5,167 Reserve Trips) – LOS A
- Segment 3 Big Coppitt (2-L/U) Rockland Dr. to Boca Chica Rd. (1,292 Reserve Trips) – LOS B

As part of the corresponding FLUM amendment application, the applicant submitted a trip generation analysis. URS (County consultant) reviewed the analysis and confirmed that the proposed FLUM amendment would result in a trip generation reduction of 7,933 trips per day (attached as Exhibit 6). Therefore, the proposed map amendment is not anticipated to negatively impact the traffic LOS. Traffic analysis for specific development proposals will be reviewed as part of the development approval process.

Potable Water (Policy 701.1.1)

FCAA's Water Treatment Facility in Florida City has a maximum water treatment design capacity of 29.8 million gallons per day (MGD). This consists of 23.8 MGD from the Biscayne Aquifer through the primary conventional water treatment process and 6 MGD from the brackish Floridan Aquifer through the secondary Reverse Osmosis (RO) treatment plant. There are also two saltwater Reserve Osmosis (RO) plants, located on Stock Island and Marathon, which are able to produce potable water under emergency conditions. The RO desalination plants have design capacities of 2.0 and 1.0 MGD of water, respectively. The 2012 projection for annual average daily demand is 17.62 MGD which is well below FCAA's Water Use Permit amount of 23.98 MGD.

Pursuant to Policy 701.1.1 of the Comprehensive Plan, the Level of Service standard for nonresidential potable water is 0.35 gallons per square foot per day. The proposed LUD map amendment increases the site's maximum nonresidential development potential by 128,894 SF, which would increase potential potable water demand by 45,112 gallons per day.

Pursuant to Policy 701.1.1 of the Comprehensive Plan, the Level of Service standard for residential potable water is 66.5 gallons per capita per day. The proposed LUD map amendment would increase the potential affordable residential development by 122 dwelling units, which would increase potential potable water demand by 18,173 gallons per day if developed to its maximum affordable residential potential. Currently there is sufficient capacity for such an increase.

Solid Waste (Policy 801.1.1)

Monroe County has a contract with Waste Management through September 30, 2024. The contract authorizes the use of in-state facilities; thereby, providing the County with approximately ten years of guaranteed capacity for the haul out and disposal of 95,000 tons/year of solid waste not including yard waste. Under the proposed LUD categories, the net increase in potential affordable residential units on the site is 122 dwelling units. Currently there is sufficient capacity for such an increase. Nonresidential solid waste is handled by private contract.

Sanitary Sewer (Policy 901.1.1)

The property will be served by the Big Coppitt Wastewater Treatment Plant. The Big Coppitt Wastewater Treatment Plant has a design capacity of 0.323 MGD. The current average daily flow is 0.130 MGD and therefore the plant has sufficient capacity for the increase in development potential associated with the proposed map amendment.

D. Consistency with the provisions and intent of the Monroe County Year 2010 Comprehensive Plan

The proposed amendment is consistent with the Goals, Objectives and Policies of the Monroe County Year 2010 Comprehensive Plan. Specifically, the amendment furthers:

Goal 101: Monroe County shall manage future growth to enhance the quality of life, ensure the safety of County residents and visitors, and protect valuable natural resources.

Objective 101.4: Monroe County shall regulate future development and redevelopment to maintain the character of the community and protect the natural resources by providing for the compatible distribution of land uses consistent with the designations shown on the Future Land Use Map.

Policy 101.4.5

The principal purpose of the Mixed Use/ Commercial land use category is to provide for the establishment of commercial land use (zoning) districts where various types of commercial retail and office may be permitted at intensities which are consistent with the community character and the natural environment. Employee housing and commercial apartments are also permitted. In addition, Mixed Use/Commercial land use districts are to establish and conserve areas of mixed uses, which may include maritime industry, light industrial uses, commercial fishing, transient and permanent residential, institutional, public, and commercial retail uses.

This land use category is also intended to allow for the establishment of mixed use development patterns, where appropriate. Various types of residential and non-residential uses may be permitted; however, heavy industrial uses and similarly incompatible uses shall be prohibited. The County shall continue to take a proactive role in encouraging the maintenance and enhancement of community character and recreational and commercial working waterfronts.

In order to protect environmentally sensitive lands, the following development controls shall apply to all hammocks, pinelands, and disturbed wetlands within this land use category:

1. only low intensity commercial uses shall be allowed;
2. a maximum floor area ratio of 0.10 shall apply; and
3. maximum net residential density shall be zero.

Policy 101.4.21

The principal purpose of the Commercial (COMM) future land use category is to provide for the establishment of commercial zoning districts where various types of commercial retail; highway-oriented sales and services; commercial recreation; light industrial; public, institutional and office uses may be permitted at intensities which are consistent with the community character and the natural environment. The commercial zoning districts established within this category are intended to serve the immediate vicinity or serve the Upper or Lower subarea. This category is not intended to accommodate transient or permanent residential development.

In order to protect environmentally sensitive lands, the following development controls shall apply to all Tier I lands within this land use category:

1. only low intensity commercial uses shall be allowed; and
2. a maximum floor area ratio of 0.15 shall apply.

Policy 101.4.22

Monroe County hereby adopts the following density and intensity standards for the future land use categories, which are shown on the Future Land Use Map and described in Policies 101.4.1 - 101.4.17:

E. Consistency with the provisions and intent of the Monroe County Code Land Development Code

In accordance with MCC §102-158(d)(5), the BOCC may consider the adoption of an ordinance enacting the proposed change based on one or more of the following factors:

1. Changed projections (e.g., regarding public service needs) from those on which the text or boundary was based;

N/A

2. Changed assumptions (e.g., regarding demographic trends);

The proposed LUD map amendment is necessary to be consistent with the proposed FLUM amendment from I and MCF to MC and COMM. The applicant is proposing a FLUM amendment and subarea policy to allow and restrict the development of residential uses to only affordable housing on the Big Coppitt portion of the property (the Commercial FLUM category proposed for the Rockland Key portion of the site has no residential development potential). The applicant has stated they are proposing the map amendments and subarea policy to address the shortage of affordable housing the County is experiencing.

3. Data errors, including errors in mapping, vegetative types and natural features described in volume 1 of the plan;

N/A

4. New issues;

The Monroe County Development Review Committee, Planning Commission, and Board of County Commissioners have recommended and transmitted to the State a FLUM amendment for the subject parcels. The proposed FLUM amendment changes

the FLUM designation on the site from Mixed Use/Commercial Fishing and Industrial to Mixed Use/Commercial and Commercial. The proposed LUD map amendment is necessary to be consistent with the proposed FLUM amendment. Note, Florida Statute Sections 163.3194 and 163.3201 require land development regulations to be consistent with and implement the Comprehensive Plan.

5. Recognition of a need for additional detail or comprehensiveness; or
N/A
6. Data updates;

V. RECOMMENDATION

Staff recommends approval of the proposed amendment to the Land Use District Map of the Monroe County Land Development Code from Industrial (I) and Commercial Fishing Area (CFA) to Commercial 2 (C2) and Mixed Use (MU) for five (5) parcels located on Rockland Key and Big Coppitt Key, having real estate numbers 00122080.000000, 00122081.000200, 00122010.000000, 00121990.000000, and 00120940.000100, contingent on adoption and effectiveness of the corresponding FLUM amendment, including the proposed Comprehensive Plan text amendment establishing a subarea policy which would restrict any residential use on the subject property to only affordable housing; eliminate all potential for market rate permanent residential and/or transient uses on the site; allow residential accessory uses; eliminate all potential nonresidential uses on the site; prohibit residential buildings in the 70-74 DNL (Day-Night Average Sound Level) noise contour; and require sound attenuation for any habitable buildings located within the 70-74 and 65-69 DNL (Day-Night Average Sound Level) noise contours.

39 inconsistent with the provisions and intent of the Monroe County Comprehensive
40 Plan; and
- 41 5. Monroe County Code (MCC) §102-158 states that map amendments are not intended
42 to relieve particular hardships, nor to confer special privileges or rights on any

1 person, nor to permit an adverse change in community character, analyzed in the
2 Monroe County Comprehensive Plan, but only to make necessary adjustments in light
3 of changed conditions or incorrect assumptions or determinations as determined by
4 the findings of the BOCC; and

- 5 6. MCC §102-158(d)(5)(b) provides that one or more of the following criteria must be
6 met for a map amendment:
- 7 a. Changed projections (e.g., regarding public service needs) from those on which
8 the text or boundary was based;
 - 9 b. Changed assumptions (e.g., regarding demographic trends);
 - 10 c. Data errors, including errors in mapping, vegetative types and natural features

 - 13 e. Recognition of a need for additional detail or comprehensiveness; or
 - 14 f. Data updates; and
- 15
- 16 7. Map amendments to the Monroe County Land Use District Map shall not be

18 Critical State Concern; and
- 19

20 **WHEREAS**, based upon the information and documentation submitted, the Planning
21 Commission makes the following Conclusions of Law:

22

- 23 1. The proposed map amendment is consistent with the provisions of the Monroe
24 County Code:
- 25
 - 26 a. As required by MCC §102-158, the map amendment does not relieve particular
27 hardships, nor confer special privileges or rights on any person, nor permit an
28 adverse change in community character, as analyzed in the Monroe County Year
29 2010 Comprehensive Plan;
 - 30 b. As required by MCC §102-158(d)(5)b., the map amendment is needed due to
31 changed assumptions and new issues; and
- 32
- 33 2. The proposed map amendment is consistent with the provisions and intent of the
34 Monroe County Year 2010 Comprehensive Plan:
- 35
 - 36 a. The Mixed Use (MU) and Commercial 2 (C2) Land Use (Zoning) Districts

WHEREAS, the Monroe County Development Review Committee considered the proposed amendment at a regularly scheduled meeting held on the 29th day of April, 2014; and

WHEREAS, the Monroe County Planning Commission held a public hearing on the 27th day of August, 2014, for review and recommendation on the proposed Future Land Use Map amendment; and

1 **WHEREAS**, the Monroe County Planning Commission made the following findings of
2 fact and conclusions of law:

- 3 1. The proposed FLUM is not anticipated to adversely impact the community character of

31 Objections, Recommendations and Comments (ORC) report, received by the County on March

37 housing shortage currently faced by the County, there is no guarantee the site will be used for
38 affordable housing; and
39

40 **WHEREAS**, the ORC report specifically states: *The applicant makes the argument that*
41 *housing in Monroe county is in short supply, the cost of that housing is too high and therefore,*

1 **WHEREAS**, the ORC report recommended that the BOCC either not adopt the
2 amendment, or revise the amendment to allow uses other than residential uses; and
3

4 **WHEREAS**, normally, the County has 180 days from the date of receipt of the ORC to
5 adopt the FLUM amendment, adopt the FLUM amendment with changes or not adopt the FLUM
6 amendment, which would have given the BOCC a deadline of September 19, 2015; and
7

8 **WHEREAS**, the County requested and was granted an extension to the deadline from
9 DEO, which gives the BOCC a new deadline of March 15, 2016 to adopt the FLUM amendment,
10 adopt the FLUM amendment with changes or not adopt the FLUM amendment; and
11

12 **WHEREAS**, in response to the ORC, the applicant prepared a revised proposal for the
13 FLUM amendment based on the ORC report, additional data and analysis, and the requirements
14 of Florida law. The revised proposal requested the same FLUM amendment from MCF and I to
15 MC and COMM, but also included a Comprehensive Plan text amendment, to be adopted
16 simultaneously to respond to the ORC objections, establishing a subarea policy for the Big
17 Coppitt portion of the property restricting any residential use on the subject property to only
18 affordable housing; and
19

20 **WHEREAS**, staff had also recommended including the following restrictions to the
21 proposed subarea policy: restricting any residential use on the subject property to affordable
22 housing only (with a minimum mix of at least 30% median, at least 30% low, and at least 30%
23 very low income categories); eliminating all potential for market rate permanent residential
24 and/or transient uses on the site; prohibiting new marinas; prohibiting dredging; prohibiting light
25 industrial uses; prohibiting residential buildings in the 70-74 DNL (Day-Night Average Sound
26 Level) noise contour; and requiring sound attenuation for any habitable buildings located within
27 the 70-74 and 65-69 DNL (Day-Night Average Sound Level) noise contours; and
28

29 **WHEREAS**, at a regularly scheduled meeting on 17th day of November, 2015, the
30 BOCC continued the public hearing to consider adoption of the proposed FLUM amendment and
31 subarea policy because the applicant did not agree with staff recommendation on the mix of
32 affordable housing income categories (mix of at least 30% median, at least 30% low, and at least
33 30% very low income categories); and
34

35 **WHEREAS**, On January 11, 2016, the applicant provided a revised subarea proposal
36 indicating an alternative for the mix of affordable housing income categories and included other
37 amendments in an effort to address concerns from the surrounding community members; and
38

39 **WHEREAS**, based upon the applicant's concern of obtaining financing to develop an
40 affordable housing project with a majority of the units as the lower income categories and the
41 surrounding community members expressed concern with having a large composition of the
42 lower income categories adjacent to their neighborhood, staff recommends in effort to provide
43 for the existing workforce, an increase of the proposed median income category (highest income
44 group of the lower income groups) to provide for a little more mix in affordable housing income
45 categories. The suggestion would result in a mix of 10% median, 20% low and very low
46 combined and 70% moderate income categories.

Hello Ed,

Yes, I concur with your statement below regarding the impact of the maximum FAR application in the trip generation. The trip generation analysis indicates a maximum potential trip generation reduction of 7,933 vehicle trips per day.

John,

Please see attached. The differences from the previous August 5h version is that in this version the maximum FAR is used for all uses. The conclusion is that the same uses are the maximum trip generators. Only the last page which has 29.59 acres going from the Industrial FLUM category to the Commercial FLUM category has a change that affects the total trips. That being that the Commercial FLUM now correctly calculates the trip generation from a 0.50 FAR rather than 0.40 FAR previously, which results in the trip change from a -19,091 daily trips to -9,546 daily trips for this FLUM change and an overall change in trip generation from -17,478 daily trips to -7,933 daily trips inclusive of the entire application.

Please confirm your agreement with the analysis. Thank you.

Meeting Date: February 10, 2016

Department: Project Management

Bulk Item: Yes No

Staff Contacts: Doug Sposito x4416/Chris Ambrosio x3477

AGENDA ITEM WORDING: Discussion and direction regarding adopting a resolution, ordinance, and rules and regulations to allow the use of bikes in Monroe County skate parks.

ITEM BACKGROUND: Commissioner Murphy received requests that bikes be allowed to be used in the Monroe County skate parks. Currently, the County Code prohibits bikes in the skate parks. F.S. 316.0085 provides the County with immunity from personal injury and property damage claims when it designates public property and allows the public to use that property for skateboarding, inline skating, paintball, freestyle, mountain, and off-road bicycling. The proposal is that freestyle bikes could be used in the park areas that would be re-designated for bikes and skateboarding. Project Management has determined the feasibility of use of bikes in the skate parks. The County Attorney's office has drafted preliminary documents that would implement and permit the use of bikes in the skate parks.

and off-road bicycling; paintball; definitions; liability

Effective: July 1, 2015

[Currentness](#)

(1) The purpose of this section is to encourage governmental owners or lessees of property to make land available to the public for skateboarding, inline skating, paintball, and freestyle or mountain and off-road bicycling. It is recognized that governmental owners or lessees of property have failed to make property available for such activities because of the exposure to liability from lawsuits and the prohibitive cost of insurance, if insurance can be obtained for such activities. It is also recognized that risks and dangers are inherent in these activities, which risks and dangers should be assumed by those participating in such activities.

(2) As used in this section, the term:

(a) "Governmental entity" means:

1. The United States, the State of Florida, any county or municipality, or any department, agency, or other instrumentality thereof.

2. Any school board, special district, authority, or other entity exercising governmental authority.

(b) "Inherent risk" means those dangers or conditions that are characteristic of, intrinsic to, or an integral part of skateboarding, inline skating, paintball, and freestyle or mountain and off-road bicycling.

(3)(a) This section does not grant authority or permission for a person to engage in skateboarding, inline skating, paintball, or freestyle or mountain and off-road bicycling on property owned or controlled by a governmental entity unless such governmental entity has specifically designated such area for skateboarding, inline skating, paintball, or freestyle or mountain and off-road bicycling. Each governmental entity shall post a rule in each specifically designated area that identifies all authorized activities.

(b) Each governmental entity shall post a rule in each specifically designated area for paintball or mountain and off-road bicycling which indicates that a child under 17 years of age may not engage in such activities until the governmental entity has obtained written consent, in a form acceptable to the governmental entity, from the child's parent or legal guardian.

(4) A governmental entity or public employee is not liable to any person who voluntarily participates in skateboarding, inline skating, paintball, or freestyle or mountain and off-road bicycling for any damage or injury to property or persons which arises out of a person's participation in such activity, and which takes place in an area designated for such activity.

(5) This section does not limit liability that would otherwise exist for any of the following:

(a) The failure of the governmental entity or public employee to guard against or warn of a dangerous condition of which a participant does not and cannot reasonably be expected to have notice.

(b) An act of gross negligence by the governmental entity or public employee that is the proximate cause of the injury.

(c) The failure of a governmental entity that provides a designated area for paintball or mountain and off-road bicycling to obtain the written consent, in a form acceptable to the governmental entity, from the parents or legal guardians of any child under 17 years of age before allowing such child to participate in paintball or mountain and off-road bicycling in such designated area, unless that child's participation is in violation of posted rules governing the authorized use of the designated area, except that a parent or legal guardian must demonstrate that written consent to engage in mountain or off-road bicycling in a designated area was provided to the governmental entity before entering the designated area.

Nothing in this subsection creates a duty of care or basis of liability for death, personal injury, or damage to personal property. Nothing in this section shall be deemed to be a waiver of sovereign immunity under any circumstances.

(6) Nothing in this section shall limit the liability of an independent concessionaire, or any person or organization other than a governmental entity or public employee, whether or not the person or organization has a contractual relationship with a governmental entity to use the public property, for injuries or damages suffered in any case as a result of the operation of skateboards, inline skates, paintball equipment, or freestyle or mountain and off-road bicycles on public property by the concessionaire, person, or organization.

(7)(a) Any person who participates in or assists in skateboarding, inline skating, paintball, or freestyle or mountain and off-road bicycling assumes the known and unknown inherent risks in these activities irrespective of age, and is legally responsible for all damages, injury, or death to himself or herself or other persons or property which result from these activities.

Chris Ambrosio

COUNTY | 12/22/2015 8:28:43 AM

An express assumption of risk irrespective of age making this a statutory affirmative defense. Not just a common law (weaker AD).

Any person who observes skateboarding, inline skating, paintball, or freestyle or mountain or off-road bicycling assumes the known and unknown inherent risks in these activities irrespective of age, and is legally responsible for all damages, injury, or death to himself or herself which result from these activities. A governmental entity that sponsors, allows, or permits skateboarding, inline skating, paintball, or freestyle or mountain or off-road bicycling on its property is not required to eliminate, alter, or control the inherent risks in these activities.

(b) While engaged in skateboarding, inline skating, paintball, or freestyle or mountain or off-road bicycling, irrespective of where such activities occur, a participant is responsible for doing all of the following:

1. Acting within the limits of his or her ability and the purpose and design of the equipment used.
2. Maintaining control of his or her person and the equipment used.
3. Refraining from acting in any manner which may cause or contribute to death or injury of himself or herself, or other persons.

Failure to comply with the requirements of this paragraph shall constitute negligence.

(8) The fact that a governmental entity carries insurance which covers any act described in this section shall not constitute a waiver of the protections set forth in this section, regardless of the existence or limits of such coverage.
