**MONROE COUNTY STAKEHOLDER WORKSHOP
for the
FWC PILOT PROGRAM ON ANCHORING & MOORING**

Murray E. Nelson Center
June 7, 2011

Any person who wishes to comment shall provide their name and residence (if living aboard indicate location and name of boat), and comment regarding the FWC Pilot Program (Program). The objectives of the Program, as described in 327.4105 F.S., are to encourage the establishment of additional public mooring fields and to develop and test policies and regulatory regimes that:

- Promote the establishment and use of mooring fields.
- Promote public access to waters of the state.
- Enhance navigational safety.
- Protect maritime infrastructure.
- Protect marine environment.
- Deter improperly stored, abandoned or derelict vessels

COMMENT (please be clear and succinct with your comment):

We need help - there is a criminal element
living on the water in front of our homes.
They dump human waste in the water
have drug parties and roam our
neighborhoods looking for trouble.
Unfortunately, what you are proposing
will not assist us now.

(no comment)

His boating group recommends all this

Sarasota is considering this, in the process

Sarasota Anchoring Permit - draft 1 of the word.

The City of Sarasota will issue 30 day and annual anchoring permits to all vessel owners who meet the following requirements.

1. a. Vessel shall obtain a USCG Aux. Vessel Safety Check (VSC) and receive either a "Yes" or "N/A" in order to receive the VSC decal.
 - b. Vessel shall also be required to receive a "Yes" for Items I - VI under "Recommended and Discussion Items" of the VSC.
 - c. Vessel shall be required to navigate under it's own power to a USCG facility, or other location which still demonstrates vessels ability to navigate, for VSC inspection.
 - d. Vessel shall display an up to date decal at all times.
2. All anchoring permit holders will be required to use pump-out services.
3. Only "annual" anchoring permit holders will be required to have a licensed diver inspect their anchoring system once their boat is anchored. The permit holder will be responsible for all these associated costs, and the diver must check off the following requirements.
 - a. Vessel in location not adversely effecting seagrass, navigation, or another anchored vessel.
 - b. Appropriate type and size line / chain used with no obvious defects.
 - c. Appropriate amount of scope deployed.
 - d. Anti chafe gear in place and in good condition.
 - e.1. Two anchor system set approx. 180 degrees apart.
 - e.2. Three anchor system set approx. 120 degrees apart.
 - e.3. Four anchor system set approx. 90 degrees apart.
 - e.4. One anchor system not permitted.

COMMENT (please be clear and succinct with your comment):

We have waterfront property on Buttonwood Sound near Bayview Drive. During Hurricane Wilma a sailboat broke free of its mooring, damaged our sea wall and came to rest in our yard (another sailboat came to rest on our neighbors (124 Pt. Pleasant) dock. During another storm a larger houseboat (unpowered) broke free from its mooring and threatened to damage our jetty and struck our neighbor's dock. ~~We also have~~ Our house was broken into by homeless people living on an abandoned boat in our basin (Buttonwood Key). We have also had two other attempted break ins. Our outdoor furniture was also damaged by vandals from water

⑥ There is no definition of a "Transient Vessel".
COMMENT (please be clear and succinct with your comment):

① At what point does a properly anchored transient vessel become a live aboard vessel? Is it based on time? A week, month...?

② ~~At what~~ How will proposed regulation affect local boaters who spend 2-4 weeks/year cruising down the keys?

③ Whatever regulation is proposed, it should not impact responsible boaters who are properly anchored.

COMMENT (please be clear and succinct with your comment):

• Why are current laws not being enforced regarding anchored / moored vessels in public waters?
• pump out
• ~~anchors~~ having no apparent method of moorings so they don't become a nuisance to homeowners because they don't pump & also leave dinghys & bikes on private property & trespass.

COMMENT (please be clear and succinct with your comment):

Existing mooring regulations (TARPON BASIN) are
conflicting, as far as how close to shoreline
vessels can anchor - would like to see
rules, regulations and future pilot program
clearer and upper Key included in pilot
program since we have a higher vessel population
than middle / lower Key.
would like to see easier process for removing
transient vessels -

COMMENT (please be clear and succinct with your comment):

This issue has needed to be addressed for a long time.
I have witnessed human waste in the water,
Derelict boats have washed ashore causing damage
Derelict boats are an eyesore and embarrassment to
the neighborhood,
Mooring placed by derelict boats are navigation hazard
Neighbors have had breakins and property damage,

COMMENT (please be clear and succinct with your comment):

If 327.4105 results in limiting vessels to
mooring field mooring fields should be created
to both be convenient and economical to the
existing community.
New mooring fields should be located adjacent to
populous areas, i.e., Key Largo, Tavernier, Islamorada, etc.
