

Recyclable Batteries

Lithium Ion batteries (LI-ion) (rechargeable)
Uses: laptops, other small electronics.

Button batteries
Uses: hearing aids, watches, calculators.

Small Sealed Lead Acid (SSLA) batteries
Uses: smaller equipment and backup power supplies. Rechargeable Battery Recycling Corporation (RBRC), which provides the required recycling for

most battery manufacturers, accepts SSLA batteries weighing up to 11 pounds.

Nickel-Cadmium batteries (NiCd)
Uses: portable electronics and toys.

Wet Cell Lead Acid batteries
Uses: autos, boats, trucks. Retailers are required to take back for recycling as trade-ins for new batteries.

Nickel Metal Hydride batteries (NiMH)
Uses: consumer electronics.

Portable power tool batteries
Uses: any brand of portable, cordless power tool.

Battery Pack
These batteries are packaged together with one single connector. Uses: phones, small equipment.

Old-style cell phone batteries
Cell phones should also be recycled. Take to HHW or check for other recycling opportunities at local retailers.

For more information, please contact the Florida Department of Environmental Protection at (850)245-8705 or visit www.dep.state.fl.us.

These photos represent some of the types of batteries that consumers use and are not a complete list of available battery types or manufacturers. Inclusion or absence from the examples does not imply prejudice or impropriety. The DEP does not endorse specific equipment or companies.
