52				NOTES:													
53				1. Committee members were asked to disclose any known conflicts of interest and to recuse themselves on those projects; these are indicated by "R".													
54				2. Per CAY opinion absent committee members may not have their scores counted; these are indicated by "A".													
55				3. In the case of a committee member absense or recusal (in the case of a conflict), we divided the total score by number of scorers to compute a													
56				total Average Score for each project.													
57				4. Projects are ranked by Total Average Score.													
58				5. * The Committee approved a motion to send the ranking to the Board of County Commissioners, asking for additional or special consideration for Projects that ranked 1, 2 and 4.													
59				6. This ranking is a committee recommendation to the BOCC. The BOCC will make the final award decision, and may choose to apply additional criteria in its award decision including but not limited to a financial risk analysis of top ranked applicants and an assessment of compliance with Treasury's "best available science" requirement.													
60				6. This ranking is a committee recommendation to the BOCC. The BOCC will make the final award decision, and may choose to apply additional criteria in its award decision including but not limited to a financial risk analysis of top ranked applicants and an assessment of compliance with Treasury's "best available science" requirement.													
61				7. The Committee's responsibility was to rank projects, not determine funding amounts; however, it did assess and consider a project's ability to "scale" its project downward should it receive less funding than requested. The top ranked projects indicated that their projects are scaleable.													
62				7. The Committee's responsibility was to rank projects, not determine funding amounts; however, it did assess and consider a project's ability to "scale" its project downward should it receive less funding than requested. The top ranked projects indicated that their projects are scaleable.
